(1) Represents consolidated income from continuing operations before losses from unconsolidated investees, taxes, dividends on preferred securities subject to mandatory redemption and cumulative effect of accounting change.

(2) Summation of the quarters' earnings per common share may not equal the annual amounts due to the averaging effect of the number of shares and share equivalents throughout the year.

(3) Represents the effects of the adoption of SFAS 123(R) in the first quarter of fiscal 2005.

Note: Certain reclassifications have been made to prior period amounts to conform to the current presentation. Refer to Legal Notice page 23.

(1) At February 29, 2004, preferred securities subject to mandatory redemption were reclassified to junior subordinated debt issued to capital trusts (a component of long-term debt) pursuant to the adoption of FASB Interpretation No. 46, "Consolidation of Variable Interest Entities". Dividends on junior subordinated debt issued to capital trusts are included in interest expense from February 29, 2004 forward.

(2) Represents the effects of the adoption of SFAS 123(R) in the first quarter of fiscal 2005.

Note: Certain reclassifications have been made to prior period amounts to conform to the current presentation. Refer to Legal Notice page 23.

- (1) Effective December 1, 2004, the Company offsets cash paid or received pursuant to credit support agreements ("cash collateral netting") against its OTC derivatives inventory. Total assets as of November 30, 2004 have been restated to reflect cash collateral netting. Prior periods presented do not reflect such cash collateral netting.
- (2) Adjusted assets exclude certain self-funded assets considered to have minimal market, credit and/or liquidity risk that are generally attributable to matched book and securities lending businesses as measured by aggregate resale agreements and securities borrowed less non-derivative short positions. See page 22 for further information.
- (3) Includes common equity and junior subordinated debt issued to capital trusts.
- (4) Includes common equity, junior subordinated debt issued to capital trusts, capital units and the non-current portion of long-term debt.
- (5) 99%/One-Day VaR represents the loss amount that one would not expect to exceed, on average, more than one time every one hundred trading days in the Company's trading positions if the portfolio were held constant for a one day period. The Company's VaR incorporates substantially all financial instruments generating market risk that are managed by the Company's trading businesses. For a further discussion of the calculation of VaR and the limitations of the Company's VaR methodology, see Part II, Item 7A "Quantitative and Qualitative Disclosures about Market Risk" in the Company's Form 10-K for fiscal 2004.

Note: Certain reclassifications have been made to prior period amounts to conform to the current presentation. Refer to Legal Notice page 23.

The following (page 16) presents more detailed financial information regarding the results of operations for the combined institutional securities, retail brokerage and asset management businesses. Morgan Stanley believes that a combined presentation is informative due to certain synergies among these businesses, as well as to facilitate comparisons of the Company's results with those of other companies in the financial services industry that have securities and asset management businesses. Morgan Stanley provides this type of presentation for its discover activities (page 17) in order to provide helpful comparison to other credit card issuers.

The following (pages 18 - 21) present a reconciliation for certain information disclosed on pages 13, 14 and 17.

The data is presented on both a "managed" loan basis and as reported under generally accepted accounting principles ("owned" loan basis). Managed loan data assume that the Company's securitized loan receivables have not been sold and presents the results of securitized loan receivables in the same manner as the Company's owned loans. The Company operates its Discover business and analyzes its financial performance on a managed basis. Accordingly, underwriting and servicing standards are comparable for both owned and securitized loans. The Company believes that managed loan information is useful to investors because it provides information regarding the quality of loan origination and credit performance of the entire managed portfolio and allows investors to understand the related credit risks inherent in owned loans and retained interests in securitizations. In addition, investors often request information on a managed basis, which provides a more meaningful comparison to industry competitors.

The following (page 22) presents a reconciliation for adjusted assets.

Balance sheet leverage ratios are one indicator of capital adequacy when viewed in the context of a company's overall liquidity and capital policies. The Company views the adjusted leverage ratio as a more relevant measure of financial risk when comparing financial services firms and evaluating leverage trends. Adjusted assets exclude certain self-funded assets considered to have minimal market, credit and/or liquidity risk that are generally attributable to matched book and securities lending businesses as measured by aggregate resale agreements and securities borrowed less non-derivative short positions. In addition, the adjusted leverage ratio reflects the deduction from shareholders' equity of the amount of equity used to support goodwill and intangible assets, as the Company does not view this amount of equity as available to support its risk capital needs.

The Company has also provided a pro forma annualized average return on common equity from continuing operations which excludes discontinued operations related to the planned sale of its aircraft financing business for the following periods: 3Q2005, 2Q2005, 3Q2004 and the nine months ended 2005 and 2004. The Company views this measure as a relevant indicator of its operations performance for period to period comparisons as well as when comparing its operating results to other financial services firms.

(1) Effective December 1, 2004, the Company offsets cash paid or received pursuant to credit support agreements ("cash collateral netting") against its OTC derivatives inventory. Total assets as of November 30, 2004 have been restated to reflect cash collateral netting.

Prior periods presented do not reflect such cash collateral netting.

(2) The Company views the junior subordinated debt issued to capital trusts as a component of its equity capital base given the inherent characteristics of the securities. These characteristics include the long dated nature (final maturity at issuance of thirty years extendable at the Company's option by a further nineteen years), the Company's ability to defer coupon interest for up to 20 consecutive quarters, and the subordinated nature of the obligations in the capital structure. The Company also receives rating agency equity credit for these securities.

(3) Leverage ratio equals total assets divided by tangible shareholders' equity.

(4) Adjusted leverage ratio equals adjusted total assets divided by tangible shareholders' equity.

Note: Certain reclassifications have been made to prior period amounts to conform to the current presentation.
