
Table of Contents — Report Roadmap

Any industry analysis is filled with moving parts, and that is particularly the case with the Internet in China. With this report, we endeavor to create a one-stop-shop for understanding the status, and potential evolution, of the Internet in China.

The report is divided into eight sections:

Overview	6
China and the Internet in a Global Context	9
Thoughts on the China Internet opportunity and the attendant risks.	
Perspective on the Global Landscape for Technology Companies	12
Relative comparisons of US and China labor costs, engineering graduates, technology innovation and global public technology company market capitalizations.	
China and the Internet — Industry, Competitive and Macro Themes	
We focus on fourteen key themes — related to industry, competitive and macro issues — that we believe are key indicators of the ongoing development of this dynamic market.	
China Internet Industry Landscape	17
1. Number of Internet users is significant and growing rapidly	
2. Relative Web site usage momentum is strong	
3. Younger users are active on the Internet	
4. Development of online media is still in the early growth stages	
5. Wireless messaging services linking mobile phones with the Internet are ramping quickly, though transitions are occurring	
6. Broadband acceptance is growing rapidly	
7. eCommerce is in the very early stages and governors exist	
China Internet Competitive Landscape	37
8. Challenges for multinational companies create opportunities for Chinese companies	
9. Third generation Internet entrepreneurs are impressive, though broad-based experience/leadership is still not abundant	
10. Sustainability of Internet-related revenue and profits is still unproven but market opportunity is large	
China Macro Landscape for the Internet	48
11. Government is focused on ramping Internet users	
12. The government’s strategy, in part, reflects the need to boost domestic (urban to rural) as well as global trade	
13. Economic momentum is strong, though slowing	
14. Capital markets have been robust	
China Reading/Viewing List	56
A series of sources that assist understanding of social, political, cultural and economic dynamics in China.	

Global Internet Company Overviews 63

We highlight eight public and twenty private Chinese Internet companies. We also highlight four Taiwanese/Singaporean, four Japanese companies, nine Korean, four American companies, and two European companies as we believe they provide perspective on regional market trends. We also present overviews and/or profiles of 49 public and private Internet companies along with historical income statements, balance sheets and stock charts for the public companies. The companies are ordered by market capitalization, then alphabetically.
