### **NOTE 1 - Introduction and Basis of Presentation**

#### **The Company**

Morgan Stanley & Co. Incorporated (“MS&Co.”), together with its wholly owned subsidiaries, (the “Company”) provides a wide range of financial and securities services. Its businesses include securities underwriting and distribution; financial advisory services, including advice on mergers and acquisitions, restructurings, real estate and project finance; sales, trading, financing and market-making activities in equity securities and related products and fixed income securities and related products including foreign exchange. The Company provides its products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals.

MS&Co. and certain of its subsidiaries are registered with the Securities and Exchange Commission (“SEC”) as broker-dealers. MS&Co. is also registered as a futures commission merchant with the Commodity Futures Trading Commission (“CFTC”). The Company is a wholly owned subsidiary of Morgan Stanley (the “Parent”).

#### **Basis of Financial Information**

The consolidated statement of financial condition is prepared in accordance with accounting principles generally accepted in the U.S., which require the Company to make estimates and assumptions regarding the valuations of certain financial instruments, the outcome of litigation and other matters that affect the consolidated statement of financial condition and related disclosures. The Company believes that the estimates utilized in the preparation of the consolidated statement of financial condition are prudent and reasonable. Actual results could differ materially from these estimates.

The consolidated statement of financial condition includes the accounts of MS&Co. and its wholly owned subsidiaries and other entities in which the Company has a controlling financial interest. The Company’s policy is to consolidate all subsidiaries in which it owns more than 50% of the outstanding voting stock unless it does not control the entity. In accordance with Financial Accounting Standards Board (“FASB”) Interpretation No. 46, “Consolidation of Variable Interest Entities” (“FIN

46”), as revised, the Company also consolidates any variable interest entities for which it is the primary beneficiary.

All material intercompany accounts and transactions have been eliminated in consolidation.

#### **Related Party Transactions**

The Company has transactions with the Parent and its affiliates, including leasing arrangements, the performance of administrative services and the execution of securities transactions with and on behalf of affiliates.

Receivables from affiliated companies as of May 31, 2005 are comprised of:

Securities purchased under agreements to resell (“reverse repurchase agreements”)	\$ 26,220,583
Securities borrowed	31,020,926
Customers	2,304,026
Brokers, dealers and clearing organizations	3,361,681
Interest and dividends	62,048
Fees and other	196,127
	<u>\$ 63,165,391</u>

Payables to affiliated companies as of May 31, 2005 are comprised of:

Securities sold under agreements to repurchase (“repurchase agreements”)	\$ 29,506,271
Securities loaned	65,898,258
Customers	1,762,948
Brokers, dealers and clearing organizations	11,617,982
Interest and dividends	899,325
Other liabilities and accrued expenses	201,977
	<u>\$109,886,761</u>

### **NOTE 2 - Summary of Significant Accounting Policies**

#### **Cash and Cash Equivalents**

Cash and cash equivalents consist of cash and highly liquid investments not held for resale with maturities, when purchased, of three months or less.

#### **Cash and Securities Deposited With Clearing Organizations or Segregated Under Federal and Other Regulations**

Cash and securities deposited with clearing organizations or segregated under federal and other regulations include cash and

## Morgan Stanley & Co. Incorporated

securities segregated in compliance with federal and other regulations and represent funds deposited by customers and funds accruing to customers as a result of trades or contracts.

### Financial Instruments Used for Trading

Financial instruments owned and financial instruments sold, not yet purchased, which include cash and derivative products, are recorded at fair value in the consolidated statement of financial condition. Fair value is the amount at which financial instruments could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The fair value of the Company's financial instruments owned and financial instruments sold, not yet purchased are generally based on observable market prices, observable market parameters or derived from such prices or parameters based on bid prices or parameters for financial instruments owned and ask prices or parameters for financial instruments sold, not yet purchased. In the case of financial instruments transacted on recognized exchanges the observable prices represent quotations for completed transactions from the exchange on which the financial instrument is principally traded. Bid prices represent the price a buyer is willing to pay for a financial instrument at a particular time. Ask prices represent the lowest price a seller is willing to accept for a financial instrument at a particular time.

A substantial percentage of the fair value of the Company's financial instruments owned and financial instruments sold, not yet purchased, is based on observable market prices, observable market parameters, or is derived from such prices or parameters. The availability of observable market prices and pricing parameters can vary from product to product. Where available, observable market prices and pricing parameters in a product (or a related product) may be used to derive a price without requiring significant judgment. In certain markets, observable market prices or market parameters are not available for all products and fair value is determined using techniques appropriate for each particular product. These techniques may involve a degree of judgment.

The price transparency of the particular product will determine the degree of judgment involved in determining the fair value of the Company's financial instruments. Price transparency is affected by a wide variety of factors, including, for example, the type of product, whether it is a new product and not yet established in the marketplace, and the characteristics particular to the transaction. Products for which actively quoted prices or pricing parameters are available or for which fair value is

derived from actively quoted prices or pricing parameters will generally have a higher degree of price transparency. By contrast, products that are thinly or not quoted will generally have reduced to no price transparency.

The fair value of over-the-counter ("OTC") derivative contracts is derived primarily using pricing models, which may require multiple market input parameters. Where appropriate, valuation adjustments are made to account for credit quality and market liquidity. These adjustments are applied on a consistent basis and are based upon observable market data where available. In the absence of observable market prices or parameters in an active market, observable prices or parameters of other comparable current market transactions, or other observable data supporting a fair value based on a pricing model at the inception of a contract, fair value is based on the transaction price. The Company also uses pricing models to manage the risks introduced by OTC derivatives. Depending on the product and the terms of the transaction, the fair value of OTC derivative products can be modeled using a series of techniques, including closed form analytic formulae, such as the Black-Scholes option pricing model, simulation models or a combination thereof, applied consistently. In the case of more established derivative products, the pricing models used by the Company are widely accepted by the financial services industry. Pricing models take into account the contract terms, including the maturity, as well as market parameters such as interest rates, volatility and the creditworthiness of the counterparty.

### Receivables and Payables – Customers

Receivables from and payables to customers include amounts due on cash and margin transactions. Securities owned by customers, including those that collateralize margin or similar transactions, are not reflected on the consolidated statement of financial condition.

### Receivables and Payables – Brokers, Dealers and Clearing Organizations

Receivables from brokers, dealers and clearing organizations include amounts receivable for securities not delivered by the Company to a purchaser by the settlement date, margin deposits, commissions, and net receivables arising from unsettled trades. Payable to brokers, dealers and clearing organizations include amounts payables for securities not received by the Company from a seller by the settlement dates.

### Office Facilities

Office facilities are stated at cost less accumulated depreciation and amortization. Depreciation and amortization of office facilities are provided principally by the straight-line method

## Morgan Stanley & Co. Incorporated

over the estimated useful life of the asset. Estimates of useful lives are 7 years for furniture and fixtures and 3 to 5 years for computer and communication equipment. Leasehold improvements are amortized over the lesser of the estimated useful life of the asset or, where applicable, the remaining term of the lease, but generally not exceeding 15 years.

### **Customer Transactions**

Customers' securities transactions are recorded on a settlement date basis with related commission revenues and expenses recorded on trade date basis.

### **Investment Banking**

Underwriting revenues and fees for mergers, acquisitions and advisory assignments are recorded when services for the transactions are determined to be completed, generally as set forth under the terms of the engagement. Transaction-related expenses, primarily consisting of legal, travel and other costs directly associated with the transaction, are deferred to match revenue recognition.

### **Income Taxes**

Income tax expense is provided using the asset and liability method, under which deferred tax assets and liabilities are determined based upon the temporary differences between the financial statement and income tax bases of assets and liabilities, using currently enacted tax rates.

### **Foreign Currency Transactions**

Non-U.S. dollar denominated assets and liabilities are translated at fiscal year-end rates of exchange.

### **Securitization Activities**

The Company engages in securitization activities related to commercial and residential mortgage loans, U.S. agency collateralized mortgage obligations, corporate and municipal bonds and other types of financial assets. The Company may retain interests in the securitized financial assets as one or more tranches of the securitization, and rights to any excess cash flows remaining after payments to investors in the securitization trusts of their contractual rate of return and reimbursement of credit losses. The exposure to credit losses from securitized financial assets is limited to the Company's retained contingent risk, which represents the Company's retained interest in securitized financial assets. The gain or loss on the sale of financial assets depends in part on the previous carrying amount of the assets involved in the transfer and each subsequent transfer in revolving structures, allocated between the assets sold and the retained interests based upon their respective fair values at the date of sale. To obtain fair values,

observable market prices are used if available. However, observable market prices are generally not available for retained interests, so the Company estimates fair value based on the present value of expected future cash flows using its best estimates of the key assumptions, including forecasted credit losses, payment rates, forward yield curves and discount rates commensurate with the risks involved.

### **Note 3 -**

### **Securities Financing and Securitization Transactions**

Securities purchased under agreements to resell ("reverse repurchase agreements") and securities sold under agreements to repurchase ("repurchase agreements"), principally U.S. government and federal agency securities, are treated as financing transactions and are carried at the amounts at which the securities subsequently will be resold or reacquired as specified in the respective agreements; such amounts include accrued interest. Reverse repurchase agreements and repurchase agreements are presented on a net-by-counterparty basis, when appropriate. The Company's policy is to take possession of securities purchased under agreements to resell. Securities borrowed and securities loaned are also treated as financing transactions and are carried at the amounts of cash collateral advanced and received in connection with the transactions. Other secured borrowings include the liabilities related to transfers of financial assets that are accounted for as financings rather than sales and consolidated variable interest entities where the Company is the primary beneficiary where in all instances these liabilities are payable solely from the cash flows of the related assets accounted for as financial instruments owned.

The Company pledges its financial instruments owned to collateralize repurchase agreements and other securities financing. Pledged securities that can be sold or repledged by the secured party are identified as financial instruments owned (pledged to various parties) on the consolidated statement of financial condition. The carrying value and classification of securities owned by the Company that have been loaned or pledged to counterparties where those parties do not have the right to sell or repledge the collateral were approximately:

	<b>May 31, 2005</b>
Financial instruments owned:	
U.S. government and federal agency	\$12,610,000
Corporate and other debt	3,395,000
Corporate equities	4,823,000
Total	<u><u>\$20,828,000</u></u>

## Morgan Stanley & Co. Incorporated

The Company enters into reverse repurchase agreements, repurchase agreements, securities borrowed and securities loaned transactions to, among other things, finance the Company's inventory positions, acquire securities to cover short positions and settle other securities obligations and to accommodate customers' needs. The Company also engages in securities financing transactions for customers through margin lending. Under these agreements and transactions, the Company either receives or provides collateral, including U.S. government and agency securities, other sovereign government obligations, corporate and other debt, and corporate equities. The Company receives collateral in the form of securities in connection with reverse repurchase agreements, securities borrowed transactions and customer margin loans. In many cases, the Company is permitted to sell or repledge these securities held as collateral and use the securities to secure repurchase agreements, to enter into securities lending transactions or for the delivery to counterparties to cover short positions. At May 31, 2005, the fair value of securities received as collateral where the Company is permitted to sell or repledge the securities was \$499,941,000, and the fair value of the portion that has been sold or repledged was \$482,689,000.

On the consolidated statement of financial condition, the Company recognized the fair value of an asset for securities received as collateral (as opposed to cash received as collateral) in certain securities lending transactions, and a corresponding liability, obligation to return securities received as collateral.

The Company manages credit exposure arising from reverse repurchase agreements, repurchase agreements, securities borrowed transactions and securities loaned transactions by, in appropriate circumstances, entering into master netting agreements and collateral arrangements with counterparties that provide the Company, in the event of a customer default, the right to liquidate collateral and the right to offset a counterparty's rights and obligations. The Company also monitors the fair value of the underlying securities as compared with the related receivable or payable, including accrued interest, and, as necessary, requests additional collateral to ensure such transactions are adequately collateralized. Where deemed appropriate, the Company's agreements with third parties specify its rights to request additional collateral. Customer receivables generated from margin lending activity are collateralized by customer-owned securities held by the Company. For these transactions, adherence to the Company's collateral policies significantly limits the Company's credit exposure in the event of customer default. The Company may request additional margin collateral from customers, if appropriate, and if necessary may sell securities that have not

been paid for or purchase securities sold but not delivered from customers.

The Company engages in securitization activities related to commercial and residential mortgage loans, U.S. agency collateralized mortgage obligations, corporate and municipal bonds and other types of financial assets. These assets are carried at fair value. The Company may act as underwriter of the beneficial interests issued by securitization vehicles. The Company may retain interests in the securitized financial assets as one or more tranches of the securitization. These retained interests are included in the consolidated statement of financial condition at fair value. Retained interests in securitized financial assets were approximately \$1,632,140 at May 31, 2005, the majority of which were related to U.S. agency collateralized mortgage obligation securitization transactions. The assumptions that the Company used to determine the fair value of its retained interests at the time of securitization related to those transactions that occurred during the period ended May 31, 2005 were not materially different from the assumptions included in the table below.

The following table presents information on the Company's U.S. agency collateralized mortgage obligation securitization transactions. Key economic assumptions and the sensitivity of the current fair value of the retained interests to immediate 10% and 20% adverse changes in those assumptions at May 31, 2005 were as follows:

U.S. agency collateralized mortgage obligations	
Retained interests (carrying amount/fair value)	\$1,386,676
Weighted average life (in months)	92
Credit losses (rate per annum)	-
Impact on fair value of 10% adverse change	-
Impact on fair value of 20% adverse change	-
Weighted average discount rate (rate per annum)	5.25%
Impact on fair value of 10% adverse change	\$(39,500)
Impact on fair value of 20% adverse change	\$(77,028)
Prepayment speed assumption	154-513 PSA
Impact on fair value of 10% adverse change	\$(3,329)
Impact on fair value of 20% adverse change	\$(6,816)

The table above does not include the offsetting benefit of any financial instruments that the Company may utilize to hedge risks inherent in its retained interests. In addition, the sensitivity analysis is hypothetical and should be used with caution. Changes in fair value based on a 10% or 20% variation in an assumption generally cannot be extrapolated because the relationship of the change in the assumption to the change in fair value may not be linear. Also, the effect of a

## Morgan Stanley & Co. Incorporated

variation in a particular assumption on the fair value of the retained interests is calculated independent of changes in any other assumption; in practice, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities. In addition, the sensitivity analysis does not consider any corrective action that the Company may take to mitigate the impact of any adverse changes in the key assumptions.

For the period ended May 31, 2005, the Company received \$14,031,231 of proceeds from new securitization transactions and \$2,952,344 of cash flows from retained interests in securitization transactions.

### **NOTE 4 - Short-Term Borrowings**

Borrowings from affiliates are unsecured, bear interest at prevailing market rates and are payable on demand. Other short-term borrowings consist of loans which are unsecured, generally bear interest at rates based upon the federal funds rate and are payable on demand.

The Company maintains a master collateral facility that enables it to pledge certain collateral to secure loan arrangements, letters of credit and other financial accommodations. As part of this facility, the Company also maintains a secured committed credit agreement with a group of banks that are parties to the master collateral facility under which such banks are committed to provide up to \$1,800,000 for up to 364 days. This facility was renewed on May 19, 2005. At May 31, 2005, no borrowings were outstanding under this agreement.

The Company entered into a Revolving Credit facility dated, September 28, 2001, in the amount of \$100,000 with a maturity date of September 22, 2006. At May 31, 2005, no borrowings were outstanding under this agreement.

These credit agreements contain restrictive covenants which require, among other things, that the Company maintain specified levels of consolidated stockholder's equity and Net Capital, as defined. As of May 31, 2005, the Company was in compliance with all restrictive covenants.

### **NOTE 5 - Subordinated Liabilities**

Subordinated liabilities consist of a Cash Subordination Agreement and a Subordinated Revolving Credit Agreement with the Parent and a Subordinated Indenture ("Indenture")

with J.P. Morgan Trust Company, N.A., as trustee, dated September 12, 1994, and modified as of November 28, 1995 and April 24, 1997.

The Cash Subordination Agreement is for \$2,500,000, bears interest at 6.55% per annum and has a maturity date of April 30, 2007. Additionally, \$3,700,000 is payable under the Company's \$5,000,000 Subordinated Revolving Credit Agreement which has a commitment termination date and maturity date of April 30, 2006 and April 30, 2007, respectively. Interest on this borrowing is payable at rates based upon the federal funds rate or the London Interbank Offered Rate.

The Indenture is comprised of the following:

<u>Subordinated Notes</u>	<u>Maturity Date</u>	<u>Interest Rate</u>	<u>Amount</u>
Series E	June 1, 2006	7.28%	\$ 81,500
Series F	June 1, 2016	7.82%	25,000
Total			\$106,500

The Indenture contains restrictive covenants which require, among other things, that the Company maintain specified levels of Consolidated Tangible Net Worth and Net Capital, each as defined. As of May 31, 2005, the Company was in compliance with all restrictive covenants.

The estimated fair value of the Company's subordinated liabilities, based on rates available to the Company at May 31, 2005 for debt with similar terms and maturities, was approximately \$6,459,826.

### **NOTE 6 - Commitments and Contingencies**

The Company has non-cancelable operating leases covering office space and equipment. At May 31, 2005, future minimum rental commitments under such leases were as follows:

<u>Fiscal Year</u>	<u>Amount</u>
2005	\$ 52,269
2006	113,091
2007	109,567
2008	103,043
2009	89,057
Thereafter	<u>393,710</u>
Total	<u>\$860,737</u>

Occupancy lease agreements, in addition to base rentals, generally provide for rent and operating expense escalations resulting from increased assessments for real estate taxes and other charges.

## Morgan Stanley & Co. Incorporated

The Company had approximately \$675,182 of letters of credit outstanding at May 31, 2005 to satisfy various collateral requirements.

Financial instruments sold, not yet purchased represent obligations of the Company to deliver specified financial instruments at contracted prices, thereby creating commitments to purchase the financial instruments in the market at prevailing prices. Consequently, the Company's ultimate obligation to satisfy the sale of financial instruments sold, not yet purchased may exceed the amounts recognized in the consolidated statement of financial condition.

At May 31, 2005, the Company had commitments to enter into reverse repurchase and repurchase agreements of approximately \$45,221,153 and \$47,395,005, respectively.

In the normal course of business, the Company has been named, from time to time, as a defendant in various legal actions, including arbitrations, class actions and other litigation, arising in connection with its activities as a diversified financial services institution. Certain of the legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the issuers that would otherwise be the primary defendants in such cases are bankrupt or otherwise in financial distress. The Company also is involved, from time to time, in other reviews, investigations and proceedings by governmental and self-regulatory agencies (both formal and informal) regarding the Company's business, including, among other matters, accounting and operational matters, certain of which may result in adverse judgments, settlements, fines, penalties, injunctions or other relief. The number of these investigations and proceedings has increased in recent years with regard to many firms in the financial services industry, including the Company.

The Company contests liability and/or the amount of damages in each pending matter. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or indeterminate damages or where investigations and proceedings are in the early stages, the Company cannot predict with certainty the loss or range of loss related to such matters, how such matters will be resolved, when they will ultimately be resolved, or what the eventual settlement, fine, penalty or other relief might be. Subject to the foregoing, and except as described in the paragraph below, the Company believes, based on current knowledge and after consultation with counsel, that the outcome of each such pending matter will not have a material adverse effect on the consolidated financial condition of the Company, although the

outcome could be material to the Company's operating results for a particular future period, depending on, among other things, the level of the Company's income for such period. Legal reserves have been established in accordance with SFAS No. 5, "Accounting for Contingencies." Once established, reserves are adjusted when there is more information available or when an event occurs requiring a change.

### Coleman Litigation

On May 16, 2005, the jury in the litigation captioned Coleman (Parent) Holdings, Inc. v. Morgan Stanley & Co., Inc. ("Coleman litigation") returned a verdict in favor of Coleman (Parent) Holdings, Inc. ("CPH") with respect to its claims against the Company and awarded CPH \$604 million in compensatory damages. On May 18, 2005, the jury awarded CPH an additional \$850 million in punitive damages. On June 23, 2005, the state court of Palm Beach County, Florida entered its final judgment, awarding CPH \$208 million for prejudgment interest and deducting \$84 million from the award because of the settlements of related claims CPH entered into with others, resulting in a total judgment against the Company of \$1,578 million. On June 27, 2005, MS&Co. filed its notice of appeal and posted a bond which automatically stayed execution of the judgment pending appeal.

The Company believes, after consultation with outside counsel, that it is probable that the compensatory and punitive damages awards will be overturned on appeal and the case remanded for a new trial. Taking into account the advice of outside counsel, the Company is maintaining a reserve of \$360 million for the Coleman litigation, which it believes to be a reasonable estimate, under SFAS No. 5, "Accounting for Contingencies," of the low end of the range of its probable exposure in the event the judgment is overturned and the case remanded for a new trial. If the compensatory and/or punitive awards are ultimately upheld on appeal, in whole or in part, the Company may incur an additional expense equal to the difference between the amount affirmed on appeal (and post-judgment interest thereon) and the amount of the reserve. While the Company cannot predict with certainty the amount of such additional expense, such additional expense could have a material adverse effect on the consolidated financial condition of the Company, and the upper range could exceed \$1.2 billion.

## Morgan Stanley & Co. Incorporated

### Note 7 -

#### Trading Activities

##### Trading

The Company's trading activities are conducted through the integrated management of its client-driven and proprietary transactions, along with the hedging and financing of these positions. While trading activities are generated by client order flow, the Company also takes proprietary positions based on expectations of future market movements and conditions.

The Company manages its trading businesses by product groupings and therefore has established distinct trading divisions having responsibility for equity and fixed income (including foreign exchange) products. Because of the integrated nature of the markets for such products, each product area trades cash instruments as well as related derivative products (e.g., options, futures and forwards with respect to such underlying instruments).

The Company's trading portfolios are managed with a view toward the risk and profitability of the portfolios. The nature of the equities and fixed income activities conducted by the Company, including the use of derivative products in these businesses, and the market, credit and concentration risk management policies and procedures covering these activities are discussed below.

##### Equities

The Company makes markets and trades in the global secondary markets for equities and convertible debt and is a dealer in exchange traded and OTC equity options, exchange traded funds and index futures. The Company's activities as a dealer primarily are client-driven, with the objective of meeting clients' needs while earning a spread between the premiums paid or received on its contracts with clients and the cost of hedging such transactions in the cash or forward market or with other derivative transactions. The Company limits its market risk related to these contracts, which stems primarily from underlying equity/index price and volatility movements, by employing a variety of hedging strategies. The Company also takes proprietary positions in the global equity markets by using derivatives, most commonly futures and options, in addition to cash positions, intending to profit from market price and volatility movements in the underlying equities or indices positioned.

The counterparties to the Company's equity transactions include commercial banks, investment banks, broker-dealers, investment funds and industrial companies.

##### Fixed Income

The Company makes markets and trades in fixed income securities and related products, including preferred stock, investment grade corporate debt, high-yield securities, U.S. government securities, municipal securities, and commercial paper, money market and other short-term securities. The Company also makes markets in, and acts as principal with respect to, mortgage-related and other asset-backed securities. In addition, the Company is a dealer in listed options on U.S. government bonds. The Company also takes positions in futures and options.

The Company also uses mortgage-backed forward agreements ("TBAs") in its role as a dealer in mortgage-backed securities and facilitates customer trades by taking positions in the TBA market. Typically, these positions are hedged by offsetting TBA contracts or underlying cash positions.

The Company is a market-maker in a number of foreign currencies. It actively trades currencies with its customers on a principal basis in the spot and forward markets earning a dealer spread. In connection with its market-making activities, the Company seeks to manage its market risk by entering into offsetting positions. The Company also takes proprietary positions in currencies to profit from market price and volatility movements in the currencies positioned.

The majority of the Company's foreign exchange business relates to major foreign currencies such as yen, euros, pound sterling, Swiss francs and Canadian dollars. The balance of the business covers a broad range of other currencies.

The counterparties to the Company's fixed income and foreign exchange transactions include investment advisors, commercial banks, insurance companies, investment banks, broker-dealers, investment funds and industrial companies.

##### Risk Management

The Company's risk management policies and related procedures are integrated with those of the Parent and its other consolidated subsidiaries. These policies and related procedures are administered on a coordinated global basis with consideration given to each subsidiary's, including the Company's, specific capital and regulatory requirements. For the discussion which follows, the term "Company" includes the Parent and its subsidiaries.

The cornerstone of the Company's risk management philosophy is protection of the Company's franchise and reputation. Guardianship is based on three key principles:

## Morgan Stanley & Co. Incorporated

accountability, transparency and independent oversight. Given the importance of effective risk management to the Company's reputation, senior management requires thorough and frequent communication and appropriate escalation of risk matters.

Risk management at the Company requires independent Company-level oversight, constant communication, judgment and knowledge of specialized products and markets. The Company's senior management takes an active role in the identification, assessment and management of various risks of the Company. In recognition of the increasingly varied and complex nature of the financial services business, the Company's risk management philosophy, with its attendant policies, procedures and methodologies, is evolutionary in nature and subject to ongoing review and modification.

The nature of the Company's risks, coupled with this risk management philosophy, informs the Company's risk governance structure. The Company's risk governance structure includes the Firm Risk Committee and the Capital Committee, the Chief Risk Officer, the Internal Audit Department, independent control groups and various risk control managers, committees and groups located within the business units.

The Firm Risk Committee, composed of the Company's most senior officers, oversees the Company's risk management structure. The Firm Risk Committee's responsibilities include comprehensive oversight of the Company's risk management principles, procedures and limits, and monitoring of material financial, operational and franchise risks. The Firm Risk Committee is overseen by the Audit Committee of the Board of Directors (the "Audit Committee"). The Capital Committee oversees alignment of the Company's resource allocation with strategic priorities.

The Chief Risk Officer, a member of the Firm Risk Committee, oversees compliance with Company risk limits, approves certain exceptions of Company risk limits, reviews material market, credit and liquidity and funding risks, and reviews results of risk management processes with the Audit Committee.

The Internal Audit Department provides independent risk and control assessment and reports to the Audit Committee and administratively to the Chief Legal Officer. The Internal Audit Department periodically examines the Company's operational and control environment and conducts audits designed to cover all major risk categories.

The Market Risk, Credit, Financial Control, Treasury and Law Departments (collectively, the "Company Control Groups"), which are all independent of the Company's business units, assist senior management and the Firm Risk Committee in monitoring and controlling the Company's risk through a number of control processes. The Company is committed to employing qualified personnel with appropriate expertise in each of its various administrative and business areas to implement effectively the Company's risk management and monitoring systems and processes.

Each business unit has a Risk Committee which is responsible for ensuring that the business unit, as applicable: adheres to established limits for market, credit and other risks; implements risk measurement, monitoring and management policies and procedures that are consistent with the risk framework established by the Firm Risk Committee; and reviews, on a periodic basis, its aggregate risk exposures, risk exception experience and the efficacy of its risk identification, measurement, monitoring and management policies and procedures, and related controls.

### *Market Risk*

Market risk refers to the risk that a change in the level of one or more market prices, rates, indices, implied volatilities (the price volatility of the underlying instrument imputed from option prices), correlations or other market factors, such as liquidity, will result in losses for a position or portfolio.

The Company manages the market risk associated with its trading activities on a Company-wide basis, on a trading division level and on an individual product basis. Aggregate market risk limits have been approved for the Company and for each major trading division. Additional market risk limits are assigned to trading desks and, as appropriate, products. Trading division risk managers, desk risk managers, traders and the Market Risk Department monitor market risk measures against limits in accordance with policies set by senior management.

The Market Risk Department independently reviews the Company's trading portfolios on a regular basis from a market risk perspective utilizing Value-at-Risk and other quantitative and qualitative risk measures and analyses. The Company's trading businesses and the Market Risk Department also use, as appropriate, measures such as sensitivity to changes in interest rates, prices, implied volatilities and time decay to monitor and report market risk exposures. Stress testing, which measures the impact on the value of existing portfolios of specified changes in market factors for certain products, is performed

## Morgan Stanley & Co. Incorporated

periodically and is reviewed by trading division risk managers, desk risk managers and the Market Risk Department. Reports summarizing material risk exposures are produced by the Market Risk Department and are disseminated to senior management, including members of the Firm Risk Committee.

### *Credit Risk*

The Company's exposure to credit risk arises from the possibility that a customer or counterparty to a transaction might fail to perform under its contractual commitment, which could result in the Company incurring losses. The Company has credit guidelines that limit the Company's current and potential credit exposure to any one customer or counterparty and to aggregates of customers or counterparties by type of business activity. Specific credit risk limits based on these credit guidelines also are in place for each type of customer or counterparty (by rating category).

The Credit Department administers limits, monitors credit exposure, and periodically reviews the financial soundness of customers and counterparties. The Company manages the credit exposure relating to its trading activities in various ways, including entering into master netting agreements, collateral arrangements, and limiting the duration of exposure. Risk is mitigated in certain cases by closing out transactions, entering into risk reducing transactions, assigning transactions to other parties, or purchasing credit protection.

### **Concentration Risk**

The Company is subject to concentration risk by holding large positions in certain types of securities or commitments to purchase securities of a single issuer, including sovereign governments and other entities, issuers located in a particular country or geographic area, public and private issuers involving developing countries, or issuers engaged in a particular industry. Financial instruments owned by the Company include U.S. government and agency securities, which, in the aggregate, represented approximately 5% of the Company's total assets at May 31, 2005. In addition, substantially all of the collateral held by the Company for reverse repurchase agreements or bonds borrowed, which together represented approximately 29% of the Company's total assets at May 31, 2005, consist of securities issued by the U.S. government, federal agencies or other sovereign government obligations. Positions taken and commitments made by the Company, including underwritings, often involve substantial amounts and significant exposure to individual issuers and businesses, including non-investment grade issuers. The Company seeks to limit concentration risk through the use of the systems and procedures described in the

preceding discussions of risk management, market risk and credit risk.

### **Customer Activities**

The Company's customer activities involve the execution, settlement and financing of various securities and commodities transactions on behalf of customers. Customer securities activities are transacted on either a cash or margin basis. Customer commodities activities, which include the execution of customer transactions in commodity futures transactions (including options on futures), are transacted on a margin basis.

The Company's customer activities may expose it to off-balance sheet credit risk. The Company may have to purchase or sell financial instruments at prevailing market prices in the event of the failure of a customer to settle a trade on its original terms or in the event cash and securities in customer margin accounts are not sufficient to fully cover customer losses. The Company seeks to control the risks associated with customer activities by requiring customers to maintain margin collateral in compliance with various regulations and Company policies.

### **Fair Value of Derivatives**

In the normal course of business, the Company enters into a variety of derivative contracts related to financial instruments. The Company uses forward and option contracts and futures in its trading activities. In addition, financial futures and forward contracts are actively traded by the Company and are used to hedge proprietary inventory. The Company also enters into delayed delivery, when-issued, warrant and option contracts involving securities. These instruments generally represent future commitments to exchange currencies or purchase or sell other financial instruments on specific terms at specified future dates. Certain of these products have maturities that do not extend beyond one year, while options and warrants on equities may have longer maturities.

The fair value (carrying amount) of derivative instruments represents the amount at which the derivative could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale and is further described in Note 2. Future changes in interest rates, foreign currency exchange rates or the fair values of the financial instruments or indices underlying these contracts ultimately may result in cash settlements exceeding fair value amounts recognized in the consolidated statement of financial condition. The amounts in the following table represent unrealized gains on purchased exchange-traded and OTC options and other contracts (including foreign exchange and other forward contracts) for derivatives used by the Company for trading, net

## Morgan Stanley & Co. Incorporated

of any unrealized losses owed to the counterparties on offsetting positions in situations where netting is appropriate. These amounts are not reported net of collateral, which the Company obtains with respect to certain of these transactions to reduce its exposure to credit losses.

Credit risk with respect to derivative instruments arises from the failure of a counterparty to perform according to the terms of the contract. The Company's exposure to credit risk at any point in time is represented by the fair value of the contracts reported as assets. The Company monitors the creditworthiness of counterparties to these transactions on an ongoing basis and requests additional collateral when deemed necessary. The Company believes the ultimate settlement of the transactions outstanding at May 31, 2005 will not have a material effect on the Company's consolidated statement of financial condition.

The credit quality of the Company's trading-related derivatives (both listed and OTC) at May 31, 2005 is summarized in the table below, showing the fair value of the related assets by counterparty credit rating. The actual credit ratings are determined by external rating agencies or by equivalent ratings used by the Parent's Credit Risk Department:

<u>(In millions of dollars)</u>	<u>AAA</u>	<u>AA</u>	<u>A<sup>(1)</sup></u>	<u>BBB</u>	<u>B</u>	<u>Other Non Investment Grade</u>	<u>Totals</u>
Fixed income securities contracts (including forward contracts and options)	\$ 12	\$ -	\$ 2	\$ -	\$ -	\$ -	\$ 14
Foreign exchange forward contracts	69	1,293	1,225	248	-	351	3,186
Equity securities contracts (including warrants and options)	<u>1,102</u>	<u>-</u>	<u>5</u>	<u>-</u>	<u>40</u>	<u>49</u>	<u>1,196</u>
Total	<u><u>\$1,183</u></u>	<u><u>\$1,293</u></u>	<u><u>\$1,232</u></u>	<u><u>\$248</u></u>	<u><u>\$40</u></u>	<u><u>\$400</u></u>	<u><u>\$4,396</u></u>
Percent of total	<u>27%</u>	<u>29%</u>	<u>28%</u>	<u>6%</u>	<u>1%</u>	<u>9%</u>	<u>100%</u>

<sup>(1)</sup> Includes approximately \$1,010 of derivative transactions with affiliates.

### Note 8 - Variable Interest Entities

In January 2003, the FASB issued FIN 46, which clarified the application of Accounting Research Bulletin No. 51, "Consolidated Financial Statements," to certain entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties ("variable interest entities"). Variable interest entities ("VIEs") are required to be consolidated by their primary beneficiaries if

they do not effectively disperse risks among parties involved. Under FIN 46, the primary beneficiary of a VIE is the party that absorbs a majority of the entity's expected losses, receives a majority of its expected residual returns, or both, as a result of holding variable interests. FIN 46 also required disclosures about VIEs. In December 2003, the FASB issued a revision of FIN 46 to address certain technical corrections and implementation issues.

The Company is involved with various entities in the normal course of business that may be deemed to be VIEs and may hold interests therein that may be considered variable interests. Transactions associated with these entities include asset and mortgage-backed securitizations, credit-linked notes and other structured financings (including collateralized debt or bond obligations). The Company engages in these transactions principally to facilitate client needs and as a means of selling financial assets. The Company consolidates entities in which it has a controlling financial interest in accordance with accounting principles generally accepted in the U.S. For those entities deemed to be qualifying special purpose entities (as defined in SFAS No. 140), the Company does not consolidate the entity.

The Company purchases and sells interests in entities that may be deemed to be VIEs in the ordinary course of its business. As a result of these activities, it is possible that such entities may be consolidated and deconsolidated at various points in time. Therefore, the Company's variable interests included below may not be held by the Company at the end of future quarterly reporting periods.

At May 31, 2005, the aggregate size of VIEs, including structured note entities, financial asset-backed securitization, collateralized debt obligation and credit-linked note entities, for which the Company was the primary beneficiary of the entities was approximately \$578,080, which is the carrying amount of the consolidated assets recorded as financial instruments owned that are collateral for the entities' obligations. The nature and purpose of these entities that the Company consolidated were to issue a series of notes to investors that provide the investors a return based on the holdings of the entities. These transactions were executed to facilitate client investment objectives. Certain credit-linked note and certain financial asset-backed securitization transactions also were executed as a means of selling financial assets. The Company holds either the entire class or a majority of the class of subordinated notes or entered into a derivative instrument with the VIE and as a result bears the majority of the expected losses or receives a majority of the expected residual returns of the entities. The

## Morgan Stanley & Co. Incorporated

Company consolidates these entities, in accordance with its consolidation accounting policy, and as a result eliminates all intercompany transactions, including derivatives and other intercompany transactions such as fees received to underwrite the notes or to structure the transactions. The Company accounts for the assets held by the entities as financial instruments owned and the liabilities of the entities as other secured borrowings. For those liabilities that include an embedded derivative, the Company has bifurcated such derivative in accordance with SFAS No. 133, as amended by SFAS No. 149. The beneficial interests of these consolidated entities are payable solely from the cash flows of the assets held by the VIE.

At May 31, 2005, the aggregate size of the entities for which the Company holds significant variable interests, was approximately \$2,271,270. The Company's variable interests associated with these entities, primarily credit-linked notes and financial asset-backed entities, were approximately \$115,648 consisting primarily of senior beneficial interests, which represent the Company's maximum exposure to loss at May 31, 2005. The Company may hedge the risks inherent in its variable interest holdings, thereby reducing its exposure to loss. The Company's maximum exposure to loss does not include the offsetting benefit of any financial instruments that the Company utilizes to hedge these risks.

### Note 9 - Guarantees

FASB Interpretation No. 45 ("FIN 45"), "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others," requires the Company to disclose information about its obligations under certain guarantee arrangements. FIN 45 defines guarantees as contracts and indemnification agreements that contingently require a guarantor to make payments to the guaranteed party based on changes in an underlying (such as an interest or foreign exchange rate, security or commodity price, an index or the occurrence or nonoccurrence of a specified event) related to an asset, liability or equity security of a guaranteed party. FIN 45 also defines guarantees as contracts that contingently require the guarantor to make payments to the guaranteed party based on another entity's failure to perform under an agreement as well as indirect guarantees of the indebtedness of others.

### Derivative Contracts

Under FIN 45, certain derivative contracts meet the accounting definition of a guarantee, including certain written options and

contingent forward contracts. Although the Company's derivative arrangements do not specifically identify whether the derivative counterparty retains the underlying asset, liability or equity security, the Company has disclosed information regarding all derivative contracts that could meet the FIN 45 definition of a guarantee. In order to provide information regarding the maximum potential amount of future payments that the Company could be required to make under certain derivative contracts, the notional amount of the contracts has been disclosed.

The Company records all derivative contracts at fair value. For this reason, the Company does not monitor its risk exposure to such derivative contracts based on derivative notional amounts; rather the Company manages its risk exposure on a fair value basis. Aggregate market risk limits have been established and market risk measures are routinely monitored against these limits. The Company also manages its exposure to these derivative contracts through a variety of risk mitigation strategies including, but not limited to, entering into offsetting economic hedge positions. The Company records all derivative contracts on its consolidated statement of financial condition at fair value and believes that the notional amounts of the derivative contracts generally overstate its exposure. For further discussion of the Company's derivative risk management activities see Note 7 to the Company's consolidated statement of financial condition.

### Financial Guarantees to Third Parties

In connection with a funding transaction, the Company provides a financial guarantee to a third party of its affiliate's contractual obligation to repay. Such arrangement represents an obligation to make a payment to a third party if the counterparty fails to fulfill its obligation under a borrowing arrangement or other contractual obligation. The Company has the ability to offset any amount it is required to pay under the financial guarantee with an obligation owed to its affiliate's parent.

The table below summarizes certain information regarding these guarantees at May 31, 2005:

Types of Guarantee	Maximum Potential Payout/Notional					Carrying Amount	Collateral
	Less than 1	1-3	3-5	Over 5	Years to Maturity		
Derivative contracts	\$17,450,194	\$2,471,887	\$2,492	\$ -	Total	\$19,924,573	\$1,241,326
Financial guarantee	-	50	-	100	150	-	-

## Morgan Stanley & Co. Incorporated

### **Exchange/Clearinghouse Member Guarantees**

The Company is a member of various U.S. exchanges and clearinghouses that trade and clear securities and/or futures contracts. Associated with its membership, the Company may be required to pay a proportionate share of the financial obligations of another member who may default on its obligations to the exchange or the clearinghouse. While the rules governing different exchange or clearinghouse memberships vary, in general the Company's guarantee obligations would arise only if the exchange or clearinghouse had previously exhausted its resources. In addition, any such guarantee obligation would be apportioned among the other non-defaulting members of the exchange or clearinghouse. Any potential contingent liability under these membership agreements cannot be estimated. The Company has not recorded any contingent liability in the consolidated statement of financial condition for these agreements and believes that any potential requirement to make payments under these agreements is remote.

### **Note 10 - Employee Compensation Plans**

Employees of the Company participate in compensation plans sponsored by the Parent. The following summarizes these plans:

#### *Equity-Based Compensation Plans*

Certain employees of the Company participate in several of the Parent's equity-based stock compensation plans. Effective December 1, 2002, the Parent adopted SFAS No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148, "Accounting for Stock-Based Compensation – Transition and Disclosure, an amendment of FASB Statement No. 123," using the prospective adoption method.

In December 2004, the FASB issued SFAS No. 123 (revised 2004), "Share-Based Payment" ("SFAS No. 123R"). SFAS No. 123R eliminates the intrinsic value method under APB 25 as an alternative method of accounting for stock-based awards. SFAS No. 123R also revises the fair-value-based method of accounting for share-based payment liabilities, forfeitures, and modifications of stock-based awards and clarifies SFAS No. 123's guidance in several areas, including measuring fair value, classifying an award as equity or as a liability, and attributing compensation cost to reporting periods.

The Company is required to adopt SFAS No. 123R for the interim period beginning September 1, 2005 using a modified version of prospective application or may elect to apply a

modified version of retrospective application. The Company's past practice for recognizing compensation expense for equity-based awards included the recognition of a portion of the award in the year of grant. Based upon the terms of the Company's equity-based compensation program, the Company will no longer be permitted to recognize a portion of the award in the grant year under SFAS 123R.

#### *Profit Sharing Plan*

The Parent sponsors a qualified profit sharing plan covering substantially all U.S. employees. Contributions are made to eligible employees at the discretion of the parent's Board of Directors based upon the financial performance of the Parent.

#### *Employee Stock Ownership Plan*

The Company participates in the Parent and Subsidiaries Employee Stock Ownership Plan ("ESOP") covering substantially all employees. Contributions to the ESOP and allocation of ESOP shares to employees are made annually at the discretion of the Parent's Board of Directors.

### **Note 11 - Employee Benefit Plans**

The Company sponsors various pension plans for the majority of its employees and employees of certain U.S. affiliates. The Company provides certain other postretirement benefits, primarily health care and life insurance, to eligible employees. The Company also provides certain benefits to former or inactive employees prior to retirement. The following summarizes these plans:

#### **Pension and Postretirement Benefit Plans**

Substantially all of the employees of the Company and its U.S. affiliates are covered by a non-contributory pension plan that is qualified under Section 401(a) of the Internal Revenue Code (the "Qualified Plan"). Unfunded supplemental plans (the "Supplemental Plans") cover certain executives. These pension plans generally provide pension benefits that are based on each employee's years of credited service and on compensation levels specified in the plans. For the Qualified Plan, the Company's policy is to fund at least the amounts sufficient to meet minimum funding requirements under applicable employee benefit and tax regulations. Liabilities for benefits payable under the Supplementary Plans are accrued by the Company and are funded when paid to the beneficiaries.

The Company uses a measurement date of September 30 for its pension and postretirement plans.

## Morgan Stanley & Co. Incorporated

In July 2003, the Company's qualified plan was amended, effective January 1, 2004, to change the benefit accrual formula from final average pay to career average pay as well as to change the definition of pay from base to total pay with new limits for pensionable earnings. The following table provides a reconciliation of the changes in the benefit obligation and fair value of plan assets for fiscal 2004 as well as a summary of the funded status of the plans as of November 30, 2004:

	<u>Qualified Plan</u>	<u>Supplemental Plans</u>
<b>Reconciliation of benefit obligation:</b>		
Benefit obligation at beginning of year	\$ 436,318	\$ 168,493
Service cost	29,223	4,591
Interest cost	26,801	10,283
Actuarial loss	30,591	7,972
Benefits paid	(7,793)	(4,680)
Benefit obligation at end of year	<u>515,140</u>	<u>186,659</u>
<b>Reconciliation of fair value of plan assets:</b>		
Fair value of plan assets at beginning of year	433,819	-
Actual return on plan assets	47,947	-
Employer contributions	29,000	4,680
Benefits paid	(7,793)	(4,680)
Fair value of plan assets at end of year	<u>502,973</u>	<u>0</u>
<b>Funded status:</b>		
Funded status	(12,167)	(186,659)
Unrecognized prior-service cost	(65,781)	(963)
Unrecognized loss	174,820	32,007
Amount contributed to plan after measurement date	-	837
Net amount recognized	<u>\$ 96,872</u>	<u>\$ (154,778)</u>

The Company has unfunded postretirement benefit plans that provide medical and life insurance for eligible retirees and dependents. At November 30, 2004, the Company's accrued postretirement benefit cost was \$78,948.

### *Assumptions*

The following table presents the weighted average assumptions used to determine benefit obligations at fiscal year-end:

	<u>Pension Fiscal 2004</u>	<u>Postretirement Fiscal 2004</u>
Discount rate	6.05%	6.05%
Rate of future compensation increases	4.80%	n/a

The Company uses the expected long-term rate of return on plan assets to compute the expected return on assets. The Company estimates the expected long-term return by utilizing a portfolio return calculator model (the "Portfolio Model") that produces the expected return for a portfolio. Return assumptions are forward-looking gross returns that are not developed solely by an examination of historical returns. The

Portfolio Model begins with the current U.S. Treasury yield curve, recognizing that expected returns on bonds are heavily influenced by the current level of yields. Corporate bond spreads and equity risk premiums, based on current market conditions, are then added to develop the return expectations for each asset class. Expenses that are expected to be paid from the investment return are reflected in the Portfolio Model as a percentage of plan assets. This includes investment and transaction fees that typically are paid from plan assets, added to the cost basis or subtracted from sale proceeds, as well as administrative expenses paid from the pension plan.

### *Plan Assets*

The weighted average asset allocations for the Company's pension plans at November 30, 2004 and the targeted asset allocation for fiscal 2005 by asset class were as follows:

	<u>November 30, 2004</u>	<u>Fiscal 2005 Targeted</u>
Equity securities	50%	50%
Fixed income securities	44%	50%
Other—primarily cash	6%	—
Total	<u>100%</u>	<u>100%</u>

### *Pension Plan Asset Allocation*

The Company's asset allocation targets for its pension plan assets are based on its assessment of business and financial conditions, demographic and actuarial data, funding characteristics and related risk factors. Other relevant factors as well as equity and fixed income market sensitivity analysis also were considered in determining this asset mix. The overall allocation is expected to help protect each plan's funded status while generating sufficiently stable real returns (i.e., net of inflation) to help cover current and future pension obligations.

The equity portion of the asset allocation utilizes a combination of active and passive investment strategies as well as different investment styles, while a portion of the fixed income asset allocation utilizes longer duration fixed income securities to help reduce plan exposure to interest rate variation and to correlate assets with obligations. The longer duration fixed income allocation also is expected to further stabilize plan contributions over the long run. Additionally, potential allocations to other asset classes are intended to provide attractive diversification benefits, absolute return enhancement and/or other potential benefits to the pension plans.

The asset mix of the Company's pension plans is reviewed quarterly by the Morgan Stanley Retirement Plan Investment Committee. When asset class exposure reaches a minimum or

## Morgan Stanley & Co. Incorporated

maximum level, the plan asset allocation mix is rebalanced back to target allocation levels.

The pension plans' real and actuarial return objectives provide long-term measures for monitoring the investment performance against growth in the pension liabilities. Total pension plan portfolio performance is assessed by comparing actual returns with relevant benchmarks, such as the S&P 500 Index, the Russell 1000 Index and the Lehman Brothers Aggregate Index.

The Company's U.S. pension plans may invest in derivative instruments only to the extent that they comply with all of the pension plans' policy guidelines and are consistent with the pension plans' risk and return objectives. In addition, any investment in derivatives must meet the following conditions:

- Derivatives may be used only to manage risk of the portfolio or if they are deemed to be more attractive than a similar direct investment in the underlying cash market.
- Derivatives may not be used in a speculative manner or to leverage the portfolio or for short-term trading.
- Derivatives may be used only in the management of the pension plans' portfolio when their possible effects can be: quantified; shown to enhance the risk-return profile of the portfolio; and reported in a meaningful and understandable manner.

### *Cash Flows*

The Company expects to contribute approximately \$37,171 to its pension and other benefit plans in fiscal 2005 based upon their current funded status and expected asset return assumptions.

Expected benefit payments associated with the Company's pension and other benefit plans for the next five fiscal years and in aggregate for the five fiscal years thereafter are as follows:

	<u>Pension</u>	<u>Postretirement</u>
Fiscal 2005	\$15,391	\$3,163
Fiscal 2006	17,125	3,528
Fiscal 2007	18,885	3,846
Fiscal 2008	20,998	4,140
Fiscal 2009	23,506	4,494
Fiscal 2010-2014	163,132	28,516

## **Note 12 - Income Taxes**

The Company is included in the consolidated federal income tax return filed by the Parent. Federal income taxes have been provided on a separate entity basis. The Company is included in the combined state and local income tax returns with the Parent and certain other subsidiaries of the Parent. State and local income taxes have been provided on separate entity income at the effective tax rate of the Company's combined filing group.

In accordance with the terms of the Tax Allocation Agreement with the Parent, all current and deferred taxes are offset with all other intercompany balances with the Parent.

Deferred income taxes reflect the net tax effects of temporary differences between the financial reporting and tax bases of assets and liabilities and are primarily attributable to employee benefit plan payables.

## **Note 13 - Regulatory Requirements**

MS&Co. is a registered broker-dealer and futures commission merchant and, accordingly, is subject to the Net Capital rules of the SEC, the CFTC and the New York Stock Exchange ("NYSE"). Under these rules, MS&Co. is required to maintain minimum Net Capital of not less than the greater of 2% of aggregate debit items arising from customer transactions, as defined, plus excess margin collateral on reverse repurchase agreements or the risk based requirement representing the sum of 8% of customer risk maintenance margin requirement and 4% of non customer risk maintenance margin requirement, as defined. The NYSE may require a member firm to reduce its business if net capital is less than 4% of such aggregate debit items and may prohibit a firm from expanding its business if net capital is less than 5% of such aggregate debit items. At May 31, 2005, MS&Co.'s Net Capital was \$3,688,797, which exceeded the minimum requirement by \$2,973,023 and included excess Net Capital of \$749,755 of MS Securities Services Inc., a broker-dealer and a guaranteed subsidiary of MS&Co.

Advances to the Parent and its affiliates, repayment of subordinated liabilities, dividend payments and other equity withdrawals are subject to certain notification and other provisions of the Net Capital rules of the SEC.

During the six month period ended May 31, 2005, MS&Co. performed the computations for the assets in the proprietary

## Morgan Stanley & Co. Incorporated

---

accounts of its introducing brokers (commonly referred to as “PAIB”) in accordance with the customer reserve computation set forth under SEC Rule 15c3-3 (the Customer Reserve Formula).

### **Regulatory Developments**

The SEC approved a rule on April 28, 2004 in response to industry requests to establish a voluntary framework for comprehensive, group-wide risk management procedures and consolidated supervision of certain financial services holding companies by the SEC. The framework is designed to minimize the duplicative regulatory burdens on U.S. securities firms resulting from the European Union (“EU”) Directive (2002/87/EC) concerning the supplementary supervision of financial conglomerates active in the EU. The rule also would allow the Company to use an alternative method, based on mathematical models, to calculate net capital charges for market and derivatives-related credit risk. Under this rule, the SEC has the authority to regulate the holding company and any unregulated affiliate of a registered broker-dealer, including subjecting the holding company to capital requirements generally consistent with the standards of the Basel Committee on Banking Supervision (“Basel II”). On July 28, 2005, the SEC determined that the Company met the requirements of Consolidated Supervised Entity, and will begin reporting effective December 1, 2005.

The Company continues to work with its regulators to understand and assess the impact of the rule and Basel II capital standards. The Company cannot fully predict the impact that these changes will have on its businesses; however, compliance with consolidated supervision and the imposition of revised capital standards are likely to impose additional costs and affect decisions with respect to capital raising and allocation.

Securities and cash held in Morgan Stanley & Co. Incorporated accounts are protected up to their full net equity value by a combination of coverage provided by the Securities Investor Protection Corporation (“SIPC”) a non-profit organization created by an Act of Congress and additional protection purchased from a private insurer by Morgan Stanley & Co. Incorporated (the “Excess Coverage”). SIPC protects up to \$500,000 of each customer’s securities of which up to \$100,000 may be uninvested cash. Excess Coverage provides additional protection up to the full net equity value of each account including unlimited coverage for uninvested cash. SIPC and Excess Coverage apply only to securities and cash in the exclusive possession and control of Morgan Stanley Co. Incorporated and do not protect against losses due to market fluctuations. If you would like more information, ask your Financial Advisor for a detailed brochure.
