**MORGAN STANLEY SMITH BARNEY LLC**  
**NOTES TO CONSOLIDATED STATEMENT OF FINANCIAL CONDITION**  
**As of June 30, 2021**  
**(In millions of dollars, except where noted)**  
**(Unaudited)**

## **1. Introduction and Basis of Presentation**

### **The Company**

MSSB, together with its wholly owned subsidiaries (the “Company”), provides a wide variety of financial products and services to a large and diversified group of clients and customers including financial institutions and individuals. The Company offers financial advisor-led brokerage and investment advisory services; securities-based lending; self-directed brokerage services covering various investment alternatives; financial and wealth planning services; workplace services including stock plan administration; annuity and insurance products; cash management; and retirement plan services through a network of approximately sixteen thousand financial advisors in the U.S. The Company also performs sales and trading activities, primarily on an agency basis, in the equity and fixed income businesses and new issue distribution of fixed income and equity products. See the “Glossary of Common Terms and Acronyms” for the definition of certain terms and acronyms used throughout the notes to the consolidated statement of financial condition.

MSSB is registered with the SEC as a wealth management broker-dealer and an investment adviser. The Company is also registered as an introducing broker with the CFTC and clears futures transactions through an affiliate, MS&Co. MSSB is also a member of FINRA, SIPC and various securities exchanges.

MSSB is a wholly owned subsidiary of MSDHI (the “Parent”), which is an indirect subsidiary of Morgan Stanley (the “Ultimate Parent”).

### **Basis of Financial Information**

The consolidated statement of financial condition is prepared in accordance with U.S. GAAP, which requires the Company to make estimates and assumptions regarding the valuations of certain financial instruments, the valuation of goodwill and intangible assets, the outcome of legal and tax matters, deferred tax assets, and other matters that affect its consolidated statement of financial condition and related disclosures. The Company believes that the estimates utilized in the preparation of its consolidated statement of financial condition are prudent and reasonable. Actual results could differ materially from these estimates.

On February 18, 2021, the Company transferred its Employee loans to an affiliated service entity, MSSBF. On the same day, as a result of the transfer, the Company repaid its \$1,400 Subordinated liabilities with the Parent and paid a \$1,600 dividend to the Parent.

The Company has evaluated subsequent events for adjustment to or disclosure in the consolidated statement of financial condition through the date of this report and the Company has not identified any recordable or disclosable events, not otherwise reported in the consolidated statement of financial condition or the notes thereto, except for the below.

On August 26, 2021, the Company paid a \$700 dividend payment to the Parent.

### **Consolidation**

The consolidated statement of financial condition includes the accounts of MSSB and its wholly owned licensed insurance subsidiaries in which MSSB has a controlling financial interest.

At June 30, 2021, the Company’s consolidated subsidiaries reported \$6 of assets, \$3 of liabilities and \$3 of equity on a stand-alone basis.

All material intercompany balances and transactions with its subsidiaries have been eliminated in consolidation.

## **2. Significant Accounting Policies**

### **Fair Value of Financial Instruments**

Instruments within Financial instruments owned and Financial instruments sold, not yet purchased, are measured at fair value, either as required or allowed by accounting guidance. These financial instruments represent the Company’s trading positions to facilitate customer transactions and include both cash and derivative products.

The fair value of OTC financial instruments, including derivative contracts related to financial instruments is presented in the accompanying consolidated statement of financial condition on a net-by-counterparty basis, when appropriate. Additionally, the Company nets the fair value of cash collateral paid or received against the fair value amounts recognized for net derivative positions executed with the same counterparty under the same master netting agreement.

### ***Fair Value Measurement – Definition and Hierarchy***

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the “exit price”) in an orderly transaction between market participants at the measurement date.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, assumptions are set to reflect those that the

Company believes market participants would use in pricing the asset or liability at the measurement date. Where the Company manages a group of financial assets, financial liabilities, and nonfinancial items accounted for as derivatives on the basis of its net exposure to either market risk or credit risk, the Company measures the fair value of that group of financial instruments consistently with how market participants would price the net risk exposure at the measurement date.

In determining fair value, the Company uses various valuation approaches and establishes a hierarchy for inputs used in measuring fair value that requires the most observable inputs be used when available.

Observable inputs are inputs that market participants would use in pricing the asset or liability that were developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect assumptions the Company believes other market participants would use in pricing the asset or liability that are developed based on the best information available in the circumstances. The fair value hierarchy is broken down into three levels based on the observability of inputs as follows, with Level 1 being the highest and Level 3 being the lowest.

*Level 1.* Valuations based on quoted prices in active markets that the Company has the ability to access for identical assets or liabilities. Valuation adjustments and block discounts are not applied to Level 1 instruments. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

*Level 2.* Valuations based on one or more quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

*Level 3.* Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The availability of observable inputs can vary from product to product and is affected by a wide variety of factors, including the type of product, whether the product is new and not yet established in the marketplace, the liquidity of markets and other characteristics particular to the product. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3 of the fair value hierarchy.

The Company considers prices and inputs that are current as of the measurement date, including during periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or from Level 2 to Level 3 of the fair value hierarchy. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the

total fair value amount is disclosed in the level appropriate for the lowest level input that is significant to the total fair value of the asset or liability.

### ***Valuation Techniques***

Many cash instruments and OTC derivative contracts have bid and ask prices that can be observed in the marketplace. Bid prices reflect the highest price that a party is willing to pay for an asset. Ask prices represent the lowest price that a party is willing to accept for an asset. The Company carries positions at the point within the bid-ask range that meets its best estimate of fair value. For offsetting positions in the same financial instrument, the same price within the bid-ask spread is used to measure both the long and short positions.

Fair value for many cash instruments and OTC derivative contracts is derived using pricing models. Pricing models take into account the contract terms as well as multiple inputs including, where applicable, commodity prices, equity prices, interest rate yield curves, credit curves, correlation, creditworthiness of the counterparty, creditworthiness of the Company, option volatility and currency rates.

See Note 4 for a description of valuation techniques applied to the major categories of financial instruments measured at fair value.

### **Offsetting of Derivative Instruments**

In connection with its derivative activities, the Company generally enters into master netting agreements and collateral agreements with its counterparties. These agreements provide the Company with the right, in the event of a default by the counterparty, to net a counterparty's rights and obligations under the agreement and to liquidate and set off cash collateral against any net amount owed by the counterparty. Derivatives with enforceable master netting agreements are reported net of cash collateral received and posted.

For information related to offsetting of derivatives, see Note 5.

### **Income Taxes**

Deferred tax assets and liabilities are recorded based upon the temporary differences between the financial statement and income tax bases of assets and liabilities using currently enacted tax rates in effect for the year in which the differences are expected to reverse.

The Company recognizes net deferred tax assets to the extent that it believes these assets are more likely than not to be realized. In making such a determination, the Company considers all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax-planning strategies, and results of recent operations. When performing the assessment, the Company considers all types of deferred tax assets in combination with each other, regardless of the origin of the

underlying temporary difference. If a deferred tax asset is determined to be unrealizable, a valuation allowance is established. If the Company subsequently determines that it would be able to realize deferred tax assets in excess of their net recorded amount, it would make an adjustment to the deferred tax asset valuation allowance.

Uncertain tax positions are recorded on the basis of a two-step process whereby (i) the Company determines whether it is more likely than not that the tax positions will be sustained on the basis of the technical merits of the position and (ii) for those tax positions that meet this threshold, the Company recognizes the largest amount of tax benefit that is more likely than not to be realized upon ultimate settlement with the related tax authority.

## **Cash**

Cash represents funds deposited with financial institutions.

## **Cash Deposited with Clearing Organizations or Segregated Under Federal and Other Regulations or Requirements**

Cash deposited with clearing organizations or segregated under federal and other regulations or requirements (“restricted cash”) includes cash segregated in compliance with federal and other regulations and funds deposited by customers.

## **Contracts with Customers**

Receivables from contracts with customers are recognized across the various types of Receivables balances in the consolidated statement of financial condition when the underlying performance obligations have been satisfied and the Company has the right per the contract to bill the customer. Contract assets are recognized in Other assets when the Company has satisfied its performance obligations but payment is conditional and Other liabilities and accrued expenses when the Company has collected payment from a customer based on the terms of the contract but the underlying performance obligations are not yet satisfied.

## **Collateralized Financings**

Securities borrowed, Securities purchased under agreements to resell (“reverse repurchase agreements”), Securities loaned, and Securities sold under agreements to repurchase (“repurchase agreements”) are treated as collateralized financings. Reverse repurchase agreements and repurchase agreements are carried on the consolidated statement of financial condition at the amounts of cash paid or received, plus accrued interest. Where appropriate, repurchase agreements and reverse repurchase agreements with the same counterparty are reported on a net basis. Securities borrowed and Securities loaned are recorded at the amount of cash collateral advanced or received.

The Company manages credit exposure arising from such transactions by, in appropriate circumstances, entering into master netting agreements and collateral agreements with its counterparties. These agreements provide the Company, with the right to net a counterparty’s rights and obligations under the

agreement and to liquidate and set-off collateral held by the Company against the net amount owed by the counterparty.

The Company’s policy is generally to take possession of securities purchased or borrowed in connection with reverse repurchase agreements and securities borrowed transactions, respectively, and to receive cash and/or securities delivered under repurchase agreements or securities loaned transactions (with rights of rehypothecation).

For information related to offsetting of certain collateralized transactions, see Note 7.

## **Receivables and Payables – Customers**

Receivables from customers primarily include margin loans (net of related customer cash and short sale proceeds). Payables to customers primarily include cash and short sale activity (net of related customer margin loans), and margin requirements.

Customers’ securities transactions are recorded on a settlement date basis. Securities owned by customers, including those that collateralize margin loans, are not reflected on the consolidated statement of financial condition.

## **Receivables and Payables – Brokers, Dealers and Clearing Organizations**

Receivables from and payables to brokers, dealers and clearing organizations primarily include margin requirements, amounts on unsettled trades, and amounts for securities failed to deliver by the Company to the purchaser or failed to receive by the Company from the seller by the settlement date. Receivables and payables arising from unsettled trades are reported on a net basis.

## **Goodwill and Intangible Assets**

The Company tests goodwill for impairment on an annual basis and on an interim basis when certain events or circumstances exist. The Company tests goodwill for impairment at the reporting unit level, which is at the Company level. For both the annual and interim tests, the Company has the option to either (a) perform a *quantitative* impairment test or (b) first perform a *qualitative* assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, in which case the quantitative test would be performed.

When performing a *quantitative* impairment test, the Company compares the fair value of a reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit is less than its carrying amount, the goodwill impairment loss is equal to the excess of the carrying value over the fair value, limited by the carrying amount of goodwill allocated to that reporting unit.

The estimated fair value of the reporting unit is derived based on valuation techniques the Company believes market participants would use for the reporting unit. The estimated fair values are generally determined by utilizing a discounted cash flow methodology.

Goodwill is not amortized. Finite lived intangible assets are amortized over their estimated useful lives and reviewed for impairment on an interim basis when impairment indicators are present.

See Note 8 for further information on Goodwill and Intangible assets.

### **Deferred Compensation Plans**

Eligible current and former employees of the Company and affiliates participate in various deferred stock-based and cash-based compensation plans.

The deferred cash-based compensation plans provide a return to the plan participants based upon the performance of various referenced investments.

The Company enters into a variety of OTC derivative contracts with affiliates to economically hedge certain obligations under the deferred cash-based compensation plans.

### **Accounting Updates Adopted in 2021**

#### **Simplifying the Accounting for Income Taxes**

In December 2019, the FASB amended the guidance to simplify the accounting for income taxes as part of its initiative to reduce complexity in accounting standards. The amendments remove certain exceptions to the general income tax accounting principles and provides for both consistency in application of and simplification for other areas within U.S. GAAP by clarifying and amending existing guidance. This update was adopted as of January 1, 2021 and did not have a material impact on the Company's consolidated statement of financial condition.

#### **Accounting Development Updates**

The FASB has issued certain accounting updates that apply to the Company. During the six months ended June 30, 2021, accounting updates were assessed and determined to be either not applicable or are not expected to have a significant impact on the Company's consolidated statement of financial condition.

### **3. Related Party Transactions**

The Company enters into transactions with the Ultimate Parent and its consolidated subsidiaries (the "Firm") in order to, among other things, manage risk, facilitate client demand, satisfy regulatory and liquidity requirements, and fund business activities. These transactions include OTC derivatives and collateralized financings, as described in Notes 5 and 7, respectively.

The Company also obtains funding from the Ultimate Parent as described in Note 9.

The Company is a party to deposit sweep agreements with MSBNA and MSPBNA, both bank affiliates. Under these sweep agreements, each bank sources certain deposits from the Company. These deposits are primarily garnered through the

Deposit Program whereby certain cash balances are primarily swept into separate money market deposit accounts and demand deposit accounts. The Company receives fees from each bank for the deposits obtained through the Deposit Program. In addition, MSBNA and MSPBNA issue certain types of loans and lending commitments to clients of the Company resulting in fees charged to the Company.

The Company participates in various deferred stock-based and cash-based compensation plans for the benefit of certain current and former employees, as described in Note 12, as well as employee benefit plans as described in Note 13. The Company enters into OTC derivative contracts with affiliates to economically hedge certain obligations under the deferred cash-based compensation plans. See Note 5 for additional disclosures on fair value and notional amounts related to the derivatives associated with these deferred compensation plans, included within equity contracts. Additionally, the Company has recognized liabilities to the Ultimate Parent for the deferred stock-based compensation plans which are recorded in Other liabilities and accrued expenses on the consolidated statement of financial condition.

The Company has agreements with affiliates for other activities, including a tax sharing agreement with the Ultimate Parent as described in Note 14, global transfer pricing policies, and other activities as described further below. Unsettled amounts for these activities are recorded within Receivables from or Payables to affiliates, are payable on demand, and bear interest at rates established by the treasury function of the Firm. These rates are periodically reassessed and are generally intended to approximate the rate of interest that the Firm incurs in funding its business.

The Company applies global transfer pricing policies among affiliates. These policies are consistent with 2017 OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations. The Firm has also engaged in negotiations of Advanced Pricing Agreements with selected tax authorities in respect of its key transfer pricing methodologies.

The Company has various agreements with an affiliated broker-dealer, MS&Co., in which MSSB provides certain sales and distribution services for MS&Co.'s equities and fixed income trading activities, and MS&Co. provides certain sales and trading services to the Company.

The Company has agreements with affiliated service entities, MSSG and MSSBF. MSSG provides the Company with certain services including infrastructure group support, healthcare and life insurance benefits for the employees of the Company, information processing, communications, and occupancy and equipment. MSSBF provides other services including information processing, communications, and occupancy and equipment. Certain employees of the Company provide services for business activities conducted on two affiliates, MSBNA and MSPBNA. The Company is reimbursed by these affiliates for expenses related to these services.

	At June 30, 2021
<b>Assets and receivables from affiliated companies:</b>

1. For positions with the same counterparty that cross over the levels of the fair value hierarchy, both counterparty netting and cash collateral netting are included in the column titled "Netting". Positions classified within the same level that are with the same counterparty are netted within that level. For further information on derivative instruments, see Note 5.

2. For trading purposes, the Company holds or sells short equity securities issued by entities in diverse industries and of varying sizes.

3. Represents fair value of derivative assets associated with deferred compensation plans as mentioned in Note 3.

#### Valuation Techniques for Assets and Liabilities Measured at Fair Value

##### Corporate and other debt

###### Corporate Bonds

###### Valuation Techniques:

- Fair value is determined using recently executed transactions, market price quotations, bond spreads, CDS spreads obtained from independent external parties, such as vendors and brokers, adjusted for any basis difference between cash and derivative instruments.
- The spread data used are for the same maturity as the bond. If the spread data do not reference the issuer, then data that reference a comparable issuer are used. When position-specific external price data are not observable, fair value is

determined based on either benchmarking to comparable instruments or cash flow models with yield curves, bond or single name CDS spreads and recovery rates as significant inputs.

###### Valuation Hierarchy Classification:

- Level 2 - if value based on observable market data for comparable instruments
- Level 3 - in instances where prices or significant spread inputs are unobservable

## Corporate Equities

### Valuation Techniques:

- Fair value is determined based on quoted prices from the exchange. To the extent these securities are actively traded, valuation adjustments are not applied.

### Valuation Hierarchy Classification:

- Level 1

contracts. In the case of more established derivative products, the pricing models used by the Company are widely accepted by the financial services industry.

### Valuation Hierarchy Classification:

- Level 2 - when valued using observable inputs or where the unobservable input is not deemed significant.

For further information on the valuation techniques for OTC derivative products, see Note 2

## Derivative Contracts

### OTC Derivative Contracts

#### Valuation Techniques:

- OTC derivative contracts include forward, swap and option contracts related to foreign currencies or equity prices.
- Depending on the product and the terms of the transaction, the fair value of OTC derivative products can be modeled using a series of techniques, including closed-form analytic formulas, such as the Black-Scholes option-pricing model, simulation models or a combination thereof. Many pricing models do not entail material subjectivity as the methodologies employed do not necessitate significant judgment since model inputs may be observed from actively quoted markets, as is the case for generic interest rate swaps, many equity, commodity and foreign currency option

## Borrowings

### Valuation Techniques:

- Borrowings include hybrid financial instruments with embedded derivatives which are contracts that are not classified as OTC derivatives because they fail net investment criteria. See the Derivative Contracts section above for a description of the valuation technique applied to the Company's Borrowings.

### Valuation Hierarchy Classification:

- Level 2 - when valued using observable inputs, or where the unobservable input is not deemed significant.

## Financial Instruments Not Measured at Fair Value

	At June 30, 2021				
	Carrying Value	Fair Value			Total
		Level 1	Level 2	Level 3	
<b>Financial Assets</b>					
Cash	\$ 621	\$ 621	\$ -	\$ -	\$ 621
Restricted cash	1,184	1,184	-	-	1,184
Reverse repurchase agreements	7,164	-	7,164	-	7,164
Securities borrowed	554	-	554	-	554
Receivables:					
Customers	10,812	-	10,812	-	10,812
Brokers, dealers and clearing organizations	55	-	55	-	55
Fees, interest and other	624	-	624	-	624
Affiliates	32	-	32	-	32
Other assets	46	-	46	-	46
<b>Financial Liabilities</b>					
Repurchase agreements	\$ 520	-	\$ 520	\$ -	\$ 520
Securities loaned	1,363	-	1,363	-	1,363
Payables:					
Customers	8,002	-	8,002	-	8,002
Brokers, dealers and clearing organizations	442	-	442	-	442
Interest and dividends	17	-	17	-	17
Affiliates	437	-	437	-	437
Other liabilities and accrued expenses	931	-	931	-	931
Borrowings	315	-	316	-	316

The previous table excludes all non-financial assets and liabilities, and certain financial instruments such as postretirement benefits.

## 5. Derivative Instruments

The Company may trade exchange-traded futures and options, as well as OTC swaps, forwards, options and other derivatives referencing, among other things, interest rates, equities, currencies, and bonds. The Company uses these instruments to economically hedge their client facilitation activity and obligations under certain deferred cash-based compensation plans. The Company does not apply hedge accounting.

The Company manages its trading positions by employing a variety of risk mitigation strategies. These strategies include diversification of risk exposures and hedging. Hedging activities consist of the purchase or sale of positions in related securities and financial instruments, including a variety of derivative products (e.g., futures, forwards, swaps and options).

	Derivative at June 30, 2021			
	Assets		Liabilities	
	Fair Value	Notional	Fair Value	Notional
	Bilateral	OTC	Bilateral	OTC
<b>Derivative contracts</b>				
Foreign exchange	\$ 12	\$ 710	\$ 13	\$ 710
Equity <sup>1</sup>	833	3,597	-	-
<b>Total gross derivative contracts</b>	<b>845</b>	<b>\$ 4,307</b>	<b>13</b>	<b>\$ 710</b>
Counterparty netting	(6)		(6)	
<b>Total derivative assets</b>	<b>\$ 839</b>		<b>\$ 7</b>	

1. Bilateral OTC Equity contracts represent derivative assets associated with deferred compensation plans, as mentioned in Note 3.

## 6. Receivables from Contracts with Customers

Receivables from contracts with customers, which are included across the various types of Receivables balances on the Company's consolidated statement of financial condition, arise when the Company has both recorded revenues and has the right per the contract to bill customers. At June 30, 2021, the balance related to Receivables from contracts with customers was \$1,225.

## 7. Collateralized Transactions

The Company enters into reverse repurchase agreements, repurchase agreements, securities borrowed and securities loaned transactions with affiliates to, among other things, acquire securities to cover short positions and settle other securities obligations, accommodate customers' needs, finance its inventory positions, and meet regulatory and liquidity requirements.

The Company monitors the fair value of the underlying securities as compared with the related receivable or payable, including accrued interest and requests or posts additional collateral, as provided under the applicable agreement to ensure such transactions are adequately collateralized, or that excess collateral is returned.

The risk related to a decline in the market value of collateral pledged or received is managed by setting appropriate market-based margin requirements. Increases in collateral margin calls on repurchase agreements and securities loaned transactions (collectively, "secured financing payables") due to market value declines may be mitigated by increases in collateral margin calls on reverse repurchase agreements and securities borrowed transactions with similar quality collateral. Additionally, the Company may request lower quality collateral pledged be replaced with higher quality collateral through collateral substitution rights in the underlying agreements.

The Company actively manages its secured financing payables in a manner that reduces the potential refinancing risk of secured financing payables of less liquid assets and also considers the quality of collateral when negotiating collateral eligibility with counterparties. The Company utilizes shorter-term secured financing payables for highly liquid assets and establishes longer tenor limits for less liquid assets, for which funding may be at risk in the event of a market disruption.

### Offsetting of Collateralized Transactions

	At June 30, 2021				
	Gross Amounts	Amounts Offset	Net Amounts Presented	Amounts Not Offset <sup>1</sup>	Net Amounts
<b>Assets</b>					
Reverse repurchase agreements	\$ 7,164	\$ -	\$ 7,164	\$ (7,164)	\$ -
Securities borrowed	554	-	554	(545)	9
<b>Liabilities</b>					
Repurchase agreements	\$ 520	\$ -	\$ 520	\$ (520)	\$ -
Securities loaned	1,363	-	1,363	(1,333)	30

1. Amounts relate to master netting agreements that have been determined by the Company to be legally enforceable in the event of default but where certain other criteria are not met in accordance with applicable offsetting accounting guidance.

For information related to offsetting of derivatives, see Note 5.

### Gross Secured Financing Payables by Remaining Contractual Maturity

	At June 30, 2021				
	Overnight and Open	Less than 30 Days	30-90 Days	Over 90 Days	Total
Repurchase agreements	\$ 520	\$ -	\$ -	\$ -	\$ 520
Securities loaned	1,363	-	-	-	1,363
<b>Total</b>	<b>\$ 1,883</b>	<b>\$ -</b>	<b>\$ -</b>	<b>\$ -</b>	<b>\$ 1,883</b>

## Gross Secured Financing Payables by Class of Collateral Pledged

	At June 30, 2021	
<b>Repurchase agreements</b>		
Corporate equities	\$	95
Corporate and other debt		425
Total	\$	520
<b>Securities loaned</b>		
Corporate equities	\$	1,169
Corporate and other debt		191
Other sovereign government obligations		3
Total	\$	1,363
Total	\$	1,883

## Fair Value of Collateral Received with Right to Sell or Repledge

	At June 30, 2021	
Collateral received with right to sell or repledge	\$	20,787
Collateral that was sold or repledged <sup>1</sup>		4,417

1. Does not include securities segregated under federal and other regulations or requirements.

The Company receives collateral in the form of securities in connection with reverse repurchase agreements, securities borrowed, and customer margin loans. In many cases, the Company is permitted to sell or repledge these securities held as collateral and use the securities to collateralize repurchase agreements, securities loaned, and derivatives, as well as for delivery to counterparties to cover short positions held by customers.

## Customer Margin Lending

The Company provides margin lending arrangements which allow customers to borrow against the value of qualifying securities. Customer receivables representing margin loans are included within Receivables - Customers in the Company's consolidated statement of financial condition. Under these arrangements, the Company receives collateral, including U.S. Treasury and agency securities, other sovereign government obligations, corporate and other debt, and corporate equities. Margin loans are collateralized by customer-owned securities held by the Company. The Company monitors required margin levels and established credit terms daily and, pursuant to such guidelines, requires customers to deposit additional collateral, or reduce positions, when necessary.

Margin loans are extended on a demand basis and generally are not committed facilities. Factors considered in the review of margin loans are the amount of the loan, the intended purpose, the degree of leverage being employed in the account and the amount of collateral, as well as an overall evaluation of the portfolio to ensure proper diversification or, in the case of concentrated positions, appropriate liquidity of the underlying collateral or potential hedging strategies to reduce risk.

Underlying collateral for margin loans is reviewed with respect to the liquidity of the proposed collateral positions, valuation of securities, historic trading range, volatility analysis and an

evaluation of industry concentrations. For these transactions, adherence to the Company's collateral policies significantly limits its credit exposure in the event of a customer default. The Company may request additional margin collateral from customers if appropriate and, if necessary, may sell securities that have not been paid for or purchase securities sold but not delivered from customers. At June 30, 2021, the balance related to customer receivables representing margin loans (net of related customer cash and short sale proceeds) was \$10,125.

## 8. Goodwill and Intangibles

The Company's next annual goodwill impairment test is as of July 1, 2021 and is currently being performed. There have been no changes in the carrying amount of the Company's goodwill, which was \$4,609 at June 30, 2021. Adverse market or economic events could result in impairment charges in future periods.

## 9. Borrowings

Borrowings of \$329 at June 30, 2021 primarily consisted of unsecured borrowings from the Ultimate Parent, at variable rates, that mature in less than 12 months, and cash overdrafts.

The interest rates for the borrowings from Ultimate Parent are established by the treasury function of the Firm, are periodically reassessed, and are intended to approximate the rate of interest that the Firm incurs in funding its business.

## 10. Commitments, Guarantees and Contingencies

### Commitments

*Central Counterparty.* At June 30, 2021, the Company has outstanding commitments of \$20, with original maturities of five years or more. These commitments relate to the Company's membership in certain clearinghouses and are contingent upon the default of a clearinghouse member or other stress events.

### Guarantees

The Company has obligations under certain guarantee arrangements, including contracts and indemnity agreements that contingently require the Company to make payments to the guaranteed party based on changes in an underlying measure (such as an interest or foreign exchange rate, security or commodity price, an index or the occurrence or non-occurrence of a specified event) related to an asset, liability or equity security of a guaranteed party.

*Derivative Contracts.* Certain derivative contracts meet the accounting definition of a guarantee, including certain written options and contingent forward contracts. At June 30, 2021, the Company has no material derivatives meeting the definition of a guarantee. The Company evaluates collateral requirements for all derivatives, including derivatives that do not meet the accounting definition of a guarantee. For the effects of cash collateral and counterparty netting, see Note 5.

In certain situations, collateral may be held by the Company for those contracts that meet the definition of a guarantee. Generally, the Company sets collateral requirements by counterparty so that the collateral covers various transactions and products and is not allocated specifically to individual contracts. Also, the Company may recover amounts related to the underlying asset delivered to the Company under the derivative contract.

*Indemnities.* The Company provides indemnities to two affiliates, MSBNA and MSPBNA related to services that certain employees and vendors of the Company provide for business activities conducted by these affiliates. MSBNA and MSPBNA have the right to seek indemnification from the Company for losses arising out of the provision of such services by the Company, its employees or its vendors, including for any operational losses caused by human error, failed process management, information technology malfunctions/limitations, fraud, or violations of legal or regulatory requirements. The maximum potential amount of future payment that the Company could be required to make under these indemnities cannot be estimated. The Company has not recorded any contingent liability in its consolidated statement of financial condition for these indemnities.

## Contingencies

### Legal

In addition to the matters described below, in the normal course of business, the Company has been named, from time to time, as a defendant in various legal actions, including arbitrations, class actions and other litigation, arising in connection with its activities as a financial services institution. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the entities that would otherwise be the primary defendants in such cases are bankrupt or are in financial distress. While the Company has identified below any individual proceedings where the Company believes a material loss to be reasonably possible and reasonably estimable, individually or collectively, there can be no assurance that additional material losses will not be incurred from claims that have not yet been asserted or are not yet determined to be probable or possible and reasonably estimable losses.

The Company is also involved, from time to time, in other reviews, investigations and proceedings (both formal and informal) by governmental and self-regulatory agencies regarding the Company's business, and involving, among other matters, sales and trading activities, financial products or offerings sold by the Company, and accounting and operational matters, certain of which may result in adverse judgments, settlements, fines, penalties, injunctions or other relief.

The Company contests liability and/or the amount of damages as appropriate in each pending matter. Where available information indicates that it is probable a liability had been incurred at the date of the consolidated statement of financial condition and the Company can reasonably estimate the amount of that loss, the Company accrues the estimated loss by a charge to income.

In many proceedings and investigations, however, it is inherently difficult to determine whether any loss is probable or even possible, or to estimate the amount of any loss. In addition, even where loss is possible or an exposure to loss exists in excess of the liability already accrued with respect to a previously recognized loss contingency, it is not always possible to reasonably estimate the size of the possible range of loss.

For certain legal proceedings and investigations, the Company cannot reasonably estimate such losses, particularly for proceedings and investigations where the factual record is being developed or contested or where plaintiffs or government entities seek substantial or indeterminate damages, restitution, disgorgement or penalties. Numerous issues may need to be resolved, including through potentially lengthy discovery and determination of important factual matters, determination of issues related to class certification and the calculation of damages or other relief, and by addressing novel or unsettled legal questions relevant to the proceedings or investigations in question, before a loss or additional loss or range of loss or additional range of loss can be reasonably estimated for a proceeding or investigation.

For certain other legal proceedings and investigations, the Company can estimate reasonably possible losses, additional losses, ranges of loss or ranges of additional loss in excess of amounts accrued, but does not believe, based on current knowledge and after consultation with counsel, that such losses will have a material adverse effect on the Company's consolidated statement of financial condition as a whole, other than the matter referred to in the following paragraphs.

On May 27, 2014, the Company was named as a defendant in a civil case styled *Tracy Chen, as an aggrieved employee, v. Morgan Stanley Smith Barney LLC, et al.*, which is pending in Orange County Superior Court in California. Plaintiff seeks civil penalties on behalf of the State of California and all current and former California employees allegedly aggrieved by certain of the Company's policies, pursuant to the California Private Attorney General Act, Cal. Labor Code section 2699 et seq. Plaintiff asserts that the Company's expense reimbursement and final pay policies, and specifically, the Firm's Alternative Flexible Grid program, violate the California Labor Code under various factual and legal theories, including by passing the Company's costs of doing business onto Financial Advisors, and by paying some terminated Financial Advisors outside the statutorily prescribed time period for final wages. On August 31, 2017, the court denied both Plaintiff and the Company's motions for summary judgment regarding the legality of the Alternative Flexible Grid program. Plaintiff seeks per pay period remedies based on the number of impacted employees, attorneys' fees, and enhanced penalties for a "willful" violation, which can potentially include 25% of the amount found to have been unlawfully withheld. The total penalties sought are currently unspecified. On November 21, 2018, the parties in a related federal litigation against the Company styled *Brandon Harvey, individually and on behalf of others similarly situated, v. Morgan Stanley Smith Barney LLC*, pending in the United States District Court for the Northern District of California, reached a settlement in principle.

The federal court settlement, if approved, would resolve the representative claims in Plaintiff's action, which has been stayed. On January 23, 2019, Plaintiff filed a motion opposing the settlement and seeking to intervene in the federal action. On March 3, 2020, the federal court entered final approval of the class and settlement and entered judgment dismissing all claims with prejudice. The federal court granted Plaintiff's motion to intervene for the limited purpose of receiving fees and awarded fees to both counsel for *Harvey* and counsel for Plaintiff. On March 23, 2020, Plaintiff filed a notice of appeal of the final approval and judgment to the Ninth Circuit. The appeal is currently pending. Plaintiff also filed a motion to lift the stay in state court, which was denied on August 6, 2020. On June 25, 2021, Plaintiff filed a motion to certify certain questions relating to their objection to the settlement to the California Supreme Court, to which the Company filed its opposition on August 5, 2021.

Beginning on July 29, 2020, various plaintiffs filed complaints against the Company in the United States District Court for the Southern District of New York, asserting claims arising out of two data breach incidents in 2016 and 2019. On September 17, 2020, the Court consolidated the cases under the caption *In re Morgan Stanley Data Security Litigation*. On November 2, 2020, class plaintiffs filed a consolidated amended class action complaint asserting claims of negligence, invasion of privacy, unjust enrichment, breach of confidence, and various claims under state unfair and deceptive practices laws and data breach protection and notification statutes. On July 5, 2021, Plaintiffs filed a further amended complaint, which the Company moved to dismiss on August 9, 2021. The Company has also received related regulatory inquiries.

## 11. Risk Management

Risk is an inherent part of the Company's business activities. Management believes effective risk management is vital to the success of the Company's business activities. Accordingly, the Company has policies and procedures in place to identify, measure, monitor, advise, challenge and control the principal risks involved in the activities of its business and support functions. The principal risks involved in the Company's business activities include credit, operational, model, compliance, cybersecurity, liquidity, strategic and reputational risk.

The Company's risk management policies and related procedures are aligned with those of the Firm. These policies and related procedures are administered on a coordinated global and legal entity basis with consideration given to each subsidiary's, including the Company's, specific capital and regulatory requirements. For the Risk Management discussion which follows, the term "Company" includes the Ultimate Parent and its subsidiaries.

The cornerstone of the Company's risk management philosophy is the pursuit of risk-adjusted returns through prudent risk-taking that protects the Company's capital base and franchise. This is

implemented utilizing five key principles: integrity, comprehensiveness, independence, accountability, and transparency. To help ensure the efficacy of risk management, which is an essential component of the Company's reputation, senior management requires thorough and frequent communication and the appropriate escalation of risk matters. The fast-paced, complex, and constantly evolving nature of global financial markets requires the Company to maintain a risk management culture that is incisive, knowledgeable about specialized products and markets, and subject to ongoing review and enhancement.

### **Risk Management Process**

The following is a discussion of the Company's risk management policies and procedures for the Company's primary risks.

#### ***Risk Limits Framework***

Risk limits and quantitative metrics provide the basis for monitoring risk taking activity and avoiding outsized risk-taking. Risk limits and associated limit frameworks are reviewed on at least an annual basis, with more frequent updates as necessary. Board-level risk limits and approved frameworks address the most important Company-wide aggregations of risk, including, but not limited to credit and liquidity risks. Additional risk limits approved by risk management may address more specific types of risk and are bound by the higher-level Board risk limits.

#### ***Credit Risk***

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to the Company. Credit Risk includes Country Risk, which is the risk that events in, or affect a foreign country (any country other than the U.S.) might adversely affect the Company. The Company primarily incurs credit risk exposure to institutions and individuals. This risk may arise from a variety of business activities, including, but not limited to, entering into swap or derivative contracts under which counterparties may have obligations to make payments to the Company; extending credit to clients through lending commitments; providing short- or long-term funding that is secured by physical or financial collateral whose value may at times be insufficient to fully cover the loan repayment amount; posting margin and/or collateral to clearinghouses, clearing agencies, exchanges, banks, securities firms and other financial counterparties; placing funds on deposit at other financial institutions to support its clearing and settlement obligations; and investing or trading in securities and loan pools, whereby the value of these assets may fluctuate based on realized or expected defaults on the underlying obligations or loans. This type of risk requires credit analysis of specific counterparties, both initially and on an ongoing basis. The Company also incurs credit risk through margin and other customer securities-based lending transactions, which are collateralized by securities.

The Company establishes practices to evaluate, monitor and control credit risk exposure both within and across business activities. The Company's credit risk exposure is actively

managed by credit professionals (and the Business Unit's Risk Management, as appropriate) who monitors risk exposures, including margin loans and credit-sensitive, higher risk transactions.

The Company is responsible for ensuring timely and transparent communication of material credit risks, ensuring compliance with established limits, approving extensions of credit and escalating of risk concentrations to appropriate senior management.

### ***Operational Risk***

Operational risk refers to the risk of loss, or of damage to the Company's reputation, resulting from inadequate or failed processes or systems, from human factors or from external events (e.g., fraud, theft, legal and compliance risks, cyber- attacks or damage to physical assets). The Company may incur operational risk across the full scope of its business activities, including revenue-generating activities (e.g., providing financial advice) and support and control groups (e.g., information technology and trade processing).

The Company's operational risk framework is established to identify, measure, monitor and control risk. Effective operational risk management is essential to reducing the impact of operational risk incidents and mitigating legal, regulatory and reputational risks. The framework is continually evolving to account for changes in the Company and to respond to the changing regulatory and business environment.

### ***Cybersecurity***

The Firm's cybersecurity and information security policies, procedures, and technologies are designed to protect the Company's own, client and employee data against unauthorized disclosure, modification or misuse and are also designed to address regulatory requirements. These policies and procedures cover a broad range of areas, including: identification of internal and external threats, access control, data security, protective controls, detection of malicious or unauthorized activity, incident response and recovery planning.

### ***Model Risk***

Model risk refers to the potential for adverse consequences from decisions based on incorrect or misused model outputs. Model risk can lead to financial loss, poor business and strategic decision making or damage to the Company's reputation. The risk inherent in a model is a function of the materiality, complexity and uncertainty around inputs and assumptions. Model risk is generated from the use of models impacting financial statements, regulatory filings capital adequacy assessments and the formulation of strategy.

Sound model risk management is an integral part of the Company's Risk Management Framework. MRM is a distinct department in Firm Risk Management responsible for the oversight of model risk. MRM establishes a model risk tolerance in line with the Ultimate Parent's risk appetite. The tolerance is

based on an assessment of the materiality of the risk of financial loss or reputational damage due to errors in design, implementation and/or inappropriate use of models. The tolerance is monitored through model-specific and aggregate business-level assessments, which are based upon qualitative and quantitative factors.

A guiding principle for managing model risk is the "effective challenge" of models. The effective challenge of models is defined as critical analysis by objective, informed parties who can identify model limitations and assumptions and drive appropriate changes. MRM provides effective challenge of models, independently validates and approves models for use, annually recertifies models, identifies and tracks remediation plans for model limitations and reports on model risk metrics. The department also oversees the development of controls to support a complete and accurate Firm-wide model inventory.

### ***Liquidity Risk***

Liquidity risk refers to the risk that the Company will be unable to finance its operations due to a loss of access to the capital markets or difficulty in liquidating its assets. Liquidity risk also encompasses the Company's ability (or perceived ability) to meet its financial obligations without experiencing significant business disruption or reputational damage that may threaten its viability as a going concern. Generally, the Company incurs liquidity and funding risk as a result of its trading, lending, investing and client facilitation activities.

The Company's Liquidity Risk Management Framework is critical to help ensure that the Company maintains sufficient liquidity reserves and durable funding sources to meet the Company's daily obligations and to withstand unanticipated stress events. The Liquidity Risk Department ensures transparency of material liquidity and funding risks, compliance with established risk limits and escalation of risk concentrations to appropriate senior management. To execute these responsibilities, the Liquidity Risk Department establishes limits in line with its risk appetite, identifies and analyzes emerging liquidity and funding risks to ensure such risks are appropriately mitigated, monitors and reports risk exposures against metrics and limits, and reviews the methodologies and assumptions underpinning its Liquidity Stress Tests to ensure sufficient liquidity and funding under a range of adverse scenarios.

### ***Concentration Risk***

Substantially all of the collateral held by the Company for reverse repurchase agreements or bonds borrowed, which together represented approximately 25% of the Company's total assets at June 30, 2021, consist of securities issued by the U.S. government, federal agencies or other sovereign governments.

## 12. Employee Stock-Based Compensation Plans

Eligible current and former employees of the Company and affiliates participate in several of the Ultimate Parent's stock-based compensation plans. The Ultimate Parent determines the fair value of stock-based awards based on the grant-date fair value of its common stock.

### *Restricted Stock Units*

RSUs are generally subject to vesting over time, generally four years from the date of award, contingent upon continued employment and subject to restrictions on sale, transfer or assignment until conversion to common stock. All or a portion of an award may be forfeited if employment is terminated before the end of the relevant vesting period or canceled after the relevant vesting period in certain situations. Recipients of RSUs may have voting rights, at the Ultimate Parent's discretion, and generally receive dividend equivalents if the awards vest. The Ultimate Parent determines the fair value of RSUs based on the grant-date fair value of its common stock, measured as the volume-weighted average price on the date of grant. Certain awards provide the Ultimate Parent discretion to claw back or cancel all or a portion of the award under specified circumstances.

### *Performance-based Stock Units*

PSUs will vest and convert to shares of common stock only if the Ultimate Parent satisfies predetermined performance and market-based conditions over a three-year performance period. The number of PSUs that will vest ranges from 0% to 150% of the target award based on the extent to which the Ultimate Parent achieves the specified performance goals. PSUs have vesting, restriction, forfeiture, and cancellation provisions that are generally similar to those of RSUs. The Ultimate Parent determines the fair value of PSUs with non-market performance conditions based on the grant-date fair value of its common stock, measured as the volume-weighted average price on the date of grant. PSUs that contain market-based conditions are valued using a Monte Carlo valuation model.

## 13. Employee Benefit Plans

Eligible current and former employees of the Company and affiliates participate in various pension and postretirement employee benefit plans sponsored by the Parent.

### *Pension and Other Post Retirement Plans*

The pension and postretirement plans, which are recorded on MS&Co. with associated employee costs charged to MSSB, have generally ceased future benefit accruals.

The pension plans generally provide pension benefits that are based on each employee's years of credited service and on compensation levels specified in the plans.

### *Morgan Stanley 401(k) Plan*

The Company's employees meeting certain eligibility requirements may participate in the Morgan Stanley 401(k) Plan sponsored by the Parent. Eligible employees receive discretionary 401(k) matching cash contributions as determined annually by the Firm. In 2021, the Company matched employee contributions up to 4% of eligible pay, up to the IRS limit.

Matching contributions were invested among available funds according to each participant's investment direction on file.

## 14. Income Taxes

The Company is a single-member limited liability company that is treated as a disregarded entity for federal income tax purposes. As such, the Company has a Tax Sharing Agreement with the Ultimate Parent in order to record its related current and deferred federal, state and local taxes. The Company is included in the consolidated federal income tax return filed by the Ultimate Parent. Federal income taxes have generally been provided on a modified separate entity basis. The Company is included in the combined state and local income tax returns with the Ultimate Parent and certain other subsidiaries of the Ultimate Parent. State and local income taxes have been provided on separate entity income at the effective tax rate of the Company's combined filing group.

In accordance with the terms of the Tax Sharing Agreement, current taxes (federal, combined and unitary states) are settled periodically with the Ultimate Parent, who pays these taxes on behalf of the Company.

The Company is subject to the income and indirect tax laws of the U.S., its states and municipalities in which the Company has significant business operations. These tax laws are complex and subject to different interpretations by the taxpayer and the relevant governmental taxing authorities. The Company must make judgments and interpretations about the application of these inherently complex tax laws when determining the provision for income taxes and the expense for indirect taxes and must also make estimates about when certain items affect taxable income in the various tax jurisdictions. Disputes over interpretations of the tax laws may be settled with the taxing authority upon examination or audit. The Company periodically evaluates the likelihood of assessments in each taxing jurisdiction resulting from current and subsequent years' examinations, and unrecognized tax benefits related to potential losses that may arise from tax audits are established in accordance with the relevant accounting guidance. Once established, unrecognized tax benefits are adjusted when there is more information available or when an event occurs requiring a change.

It is reasonably possible that significant changes in the balance of unrecognized tax benefits may occur within the next 12 months. At this time, however, it is not possible to reasonably estimate the expected change to the total amount of unrecognized tax benefits and the impact on the Company's effective tax rate over the next 12 months.

The Company, through its inclusion in the return of the Ultimate Parent, is under continuous examination by the IRS and other tax authorities in certain states in which the Company has significant business operations, such as New York.

The Company believes that the resolution of these tax examinations will not have a material effect on the consolidated statement of financial condition.

## **15. Regulatory Requirements**

### **MSSB Regulatory Capital**

MSSB is a registered U.S. broker-dealer and, accordingly, is subject to the minimum net capital requirements of the SEC. Under SEA Rule 15c3-1, MSSB is required to maintain minimum Net Capital, as defined, of the greater of 2% of aggregate debit items arising from customer transactions, plus excess margin collateral on reverse repurchase agreements, or \$1. At June 30, 2021, MSSB's Net Capital was \$3,080, which exceeded the minimum requirement by \$2,879.

### **MSSB Customer Protection**

As a registered U.S. broker dealer, MSSB is subject to the customer protection provisions under SEA Rule 15c3-3, which requires MSSB to compute a reserve requirement for customers and deposit cash or securities into a special reserve bank account for the exclusive benefit of customers. As of June 30, 2021, MSSB had \$4,192 in the special reserve bank account for the exclusive benefit of customers consisting of \$440 in cash and \$3,752 in qualified U.S. Government securities. These qualified securities are sourced from reverse repurchase agreements in the Company's consolidated statement of financial condition.

As a clearing and carrying broker dealer, MSSB is also required to compute a reserve requirement for PAB under SEA Rule 15c3-3. As of June 30, 2021, MSSB deposited \$6 in cash in a special bank account for PABs.
