

Family Care Support for the California Wildfires

If your family care arrangements are being impacted by the wildfires in Southern California, **Bright Horizons®** is here to help. Once registered, we'll find care for you through the *Back-Up Care Advantage Program®*.

Or if we are unable to secure you care, you can receive a reimbursement stipend for care provided now through **December 17** to use towards the cost to hire a caregiver within your own personal network, such as a relative, babysitter, or friend.

IMPORTANT

To qualify for a reimbursement stipend for care found on your own, you need to contact the *Back-Up Care Advantage Program®* and receive pre-approval prior to securing care. Reimbursement forms will be provided to you at that time. The program is currently activated in Southern California. Any use of the program will count towards your standard number of back-up care visits.
