Activity (continued)

In **Activity**, the *Transactions in Excess of 5%* section identifies transactions that may exceed 5% of plan value. The 5% figure is determined by comparing the value of the transaction with the value of the plan assets at the beginning of the plan year. If this is the initial plan year, the value of plan assets at the end of the plan year is used to determine the 5% figure. The CYESS breaks down the 5% transactions by *Single Transactions* and *Series of Transactions*.

If the assets of two or more plans are maintained in one trust, the transactions in the 5% Transaction section will not be accurate as Morgan Stanley cannot determine each plan's allocatable portion of the transactions.

Appendix—Carrying Value

Carrying Value represents the market value of the security as of the first day of the plan year plus the cost basis of each purchase and/or minus the net proceeds of any sale, in sequential order.

For securities transferred in the middle of the year, Carrying Value is the market value on the day the asset is received.
