

# CGCM Ultra-Short Term Fixed Income Fund (TSDUX)

Objective: Total return, consistent with capital preservation

## OVERVIEW

PIMCO sub-advises the fund focusing on short duration, relatively high credit quality investments

## PROCESS & DIFFERENTIATORS

### PIMCO

- *Process:* Seeks to add excess return while meeting the primary objective of capital preservation. The strategy seeks highest liquidity to meet immediate day-to-day expenditures while limiting the cost of holding cash to increase return potential. This provides the ability to buy opportunistically when valuations are more attractive, leveraging diversification to manage portfolio quality and volatility.
- *Differentiator:* The team leverages PIMCO's vast resources and has historically added excess return through top-down curve calls and bottom-up credit selections from diversified return sources, including primarily MBS, structured credit, investment grade, and very limited foreign, high yield, and emerging markets investments.

### TARGET ALLOCATION <sup>1</sup>

100%

## KEY STATISTICS <sup>2</sup>

**Sponsor:** Morgan Stanley Smith Barney Holdings LLC

**Adviser:** Consulting Group Advisory Services LLC

**Sub-advisers:** PIMCO

**Asset Class:** Fixed Income

**Style:** Ultra-Short Duration

**Vehicle:** Mutual Fund

**Benchmarks:** Citigroup 3-Month US Treasury Bill Index, Lipper Ultra-Short Obligations Funds Average

**Assets:** \$159.3 million

**Ticker:** TSDUX

**Inception:** March 11, 2016

**Expense Ratio as of 1/1/16:**

- Gross: 0.60%
- Net: 0.60%

## PERFORMANCE (%) <sup>2, 3</sup>

	QTD	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
Return (gross)	0.42	--	--	--	--	--	3/11/2016
Return (net)	-0.21	--	--	--	--	--	3/11/2016
Citigroup 3-Month US Treasury Bill Index	0.06	0.12	0.14	0.07	0.06	0.96	
Lipper Ultra-Short Obligations Funds Average	0.47	0.61	0.45	0.53	0.65	1.64

# Definitions and Disclosures

*Investors should consider the fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus contains this and other information about the fund. To obtain a free prospectus, please call your Financial Advisor or Private Wealth Advisor, visit us online at [www.morganstanley.com/cgcm](http://www.morganstanley.com/cgcm) or call 1-888-454-3965. Please read the prospectus carefully before investing.*

## Consulting Group Advisory Services LLC

The fund's investment adviser is Consulting Group Advisory Services LLC, a business of Morgan Stanley Smith Barney Holdings LLC. Morgan Stanley Smith Barney Holdings LLC is an affiliate of Morgan Stanley Smith Barney LLC (hereafter collectively "Morgan Stanley"). Each CGCM fund may be sub-advised by multiple professional money managers chosen by Morgan Stanley Wealth Management's Manager Solutions team and reviewed and approved by the fund's Board of Trustees. The selection of sub-advisers is based on quantitative and qualitative evaluations of the sub-advisers' skills and investment results in specific asset classes, styles and strategies. Allocation of assets among the sub-advisers is determined by analyzing performance, organizational traits, personnel changes, compliance with the fund's policies and changes in market conditions. The sub-advisers are not affiliated with Morgan Stanley.

## Expense Ratios

Total returns may reflect waivers of certain expenses or, in some cases, waiver and reimbursement of all fund expenses. Such waivers and/or reimbursements of expenses would have the effect of increasing the respective fund's total return. Without the waivers and/or expense reimbursements, the returns would have been lower. Expense waivers may be terminated or revised at any time, at which time expenses will increase and returns may decrease.

## Performance and Other Portfolio Information

The performance shown in this document represents past performance. Past performance is no guarantee of future results, and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. To obtain performance current to the most recent month-end, please go to our website at [www.morganstanley.com/cgcm](http://www.morganstanley.com/cgcm). Year-to-Date (YTD) returns are calculated from January 1 of the reporting year. Average annual total returns assume the reinvestment of income dividends and capital gains distributions at net asset value. Performance results are annualized for periods greater than one year. Returns for periods of less than a calendar year show the total return for the period and are not annualized.

**Gross and Net Performance.** Gross returns are calculated net of fund internal fees and expenses (such as management fees paid to the manager and 12b-1 fees) but are gross of an annual investment advisory fee ("Advisory Fee") charged by Morgan Stanley. Net returns are net of fund internal fees and expenses and a maximum Advisory Fee of 2.5%. Consulting Group Capital Markets Funds are only available within the following Morgan Stanley advisory programs: TRAK® CGCM, Select UMA, Consulting Group Advisor, and Portfolio Management. In addition to the Advisory Fee, Select UMA accounts are also subject to a 0.07% Overlay Manager Fee, but this fee is not reflected in the performance shown herein. For specific information about each of these programs, the applicable ADV brochure is available from your Morgan Stanley Financial Advisor or Private Wealth Advisor, or online at <http://www.morganstanley.com/adv>. The Advisory Fee is calculated by assessing the fee quarterly in the month after quarter end and then compounding those monthly net return rates for various time periods.

**Minimum Investment Amount.** The minimum initial investment in TRAK CGCM is \$5,000. The minimum initial aggregate investment in the Select UMA, CGA and PM programs is \$10,000.

## Definitions

**Citigroup 3-Month US Treasury Bill Index** – Equal dollar amounts of three-month Treasury bills are purchased at the beginning of each of three consecutive months. As each bill matures, all proceeds are rolled over or reinvested in a new three-month bill. The income used to calculate the monthly return is derived by subtracting the original amount invested from the maturity value. The yield curve average is the basis for calculating the return on the index. The index is rebalanced monthly by market capitalization.

**Lipper Ultra-Short Obligations Funds Average** – These are equally weighted total returns using all the active funds available within the category. Lipper analytical averages are an average of all funds in the specified investment objective's universe. Averages include all funds in the group in existence for the period. The number of component funds always changes. Ultra short obligations funds invest primarily in investment-grade debt issues or better and maintain a portfolio dollar-weighted average maturity between 91 days and 365 days.

**Average maturity** is a measure computed by weighting the maturity of each security in the portfolio by the market value of the security, then averaging these weighted figures.

**Duration** is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Rising interest rates mean falling bond prices, while declining interest rates mean rising bond prices.

## Credit Rating Definitions

An obligor rated 'AAA' has extremely strong capacity to meet its financial commitments. 'AAA' is the highest issuer credit rating assigned by Standard & Poor's.

An obligor rated 'AA' has very strong capacity to meet its financial commitments. It differs from the highest-rated obligors only to a small degree.

An obligor rated 'A' has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories.

An obligor rated 'BBB' has adequate capacity to meet its financial commitments. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments.

\*The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

## Consider Your Own Investment Needs

This profile is not intended to be a client-specific suitability analysis or recommendation, an offer to participate in any investment, or a recommendation to buy, hold or sell securities (includes securities of Morgan Stanley and/or its affiliates if shown in this profile).

Do not use this profile as the sole basis for investment decisions. Do not select an investment strategy based on performance alone. Consider all relevant information, including your existing portfolio, investment objectives, risk tolerance, liquidity needs and time horizon.

# Definitions and Disclosures

**Benchmark Index.** Depending on the composition of your account and your investment objectives, any indices shown in this profile may not be an appropriate measure for comparison purposes and are therefore presented for illustration only. Indices are unmanaged. They do not reflect any management, custody, transaction or other expenses, and generally assume reinvestment of dividends, accrued income and capital gains. Past performance of indices does not guarantee future results. You cannot invest directly in an index. Performance of indices may be more or less volatile than any investment strategy. The risk of loss in value of a specific investment strategy is not the same as the risk of loss in a broad market index. Therefore, the historical returns of an index will not be the same as the historical returns of a particular investment strategy.

**Fund Holdings.** Holdings are subject to change daily. Sector weightings are based on industry standard sector identification codes. Sector allocations and credit quality exposure are measured as a percentage of the total portfolio in terms of asset value. These holdings and allocations are subject to change at any time and may not reflect the Fund's current composition.

**Other Data.** Other data in this profile is accurate as of the date this profile was prepared unless stated otherwise. Data in this profile may be calculated by Morgan Stanley Smith Barney LLC or a third party service provider.

## Key Risk Considerations

**Asset allocation and diversification do not assure a profit or protect against loss.**

Bonds are subject to interest rate risk. When interest rates rise, bond prices fall; generally the longer a bond's maturity, the more sensitive it is to this risk. Bonds may also be subject to call risk, which is the risk that the issuer will redeem the debt at its option, fully or partially, before the scheduled maturity date. The market value of debt instruments may fluctuate, and proceeds from sales prior to maturity may be more or less than the amount originally invested or the maturity value due to changes in market conditions or changes in the credit quality of the issuer. Bonds are subject to the credit risk of the issuer. This is the risk that the issuer might be unable to make interest and/or principal payments on a timely basis. Bonds are also subject to reinvestment risk, which is the risk that principal and/or interest payments from a given investment may be reinvested at a lower interest rate.

Bonds rated below investment grade may have speculative characteristics and present significant risks beyond those of other securities, including greater credit risk and price volatility in the secondary market. Investors should be careful to consider these risks alongside their individual circumstances, objectives and risk tolerance before investing in high-yield bonds. High yield bonds should comprise only a limited portion of a balanced portfolio.

**Loss of money is a risk of investing in the Fund. The Fund's principal risks include:**

**Market risk,** which is the risk that stock prices decline overall. Markets are volatile and can decline significantly in response to real or perceived adverse issuer, political, regulatory, market or economic developments in the U.S. and in other countries. Market risk may affect a single company, sector of the economy or the market as a whole.

**Interest rate risk,** which is the risk that interest rates rise and fall over time. When interest rates are low, the Fund's yield and total return also may be low. When interest rates rise, bond prices generally fall, which might cause the Fund's share price to fall. When the Fund holds variable or floating rate securities, a decrease (or, in the case of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the net asset value of the Fund's shares.

**Mortgage-backed securities risk,** exists when the Fund invests in mortgage-backed securities, which represent an interest in a pool of mortgages. Mortgage backed securities are subject to prepayment and extension risk as well as the risk that underlying borrowers will be unable to meet their obligations.

**Asset-backed securities risk,** exists when the Fund invests in asset-backed securities which are structured like mortgage-backed securities, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include such items as motor vehicle installment sales or installment loan contracts, leases of various types of real and personal property, and receivables from credit card agreements. Asset-backed securities are subject to many of the same risks as mortgage-backed securities including prepayment and extension risk. The ability of an issuer of asset-backed securities to enforce its security interest in the underlying assets may be limited.

**Liquidity risk,** exists when securities are difficult or impossible for the Fund to sell at the time and the price that the Fund would like due to a limited market or to legal restrictions. These securities may also need to be fair valued.

**Foreign investment risk,** which means risks unique to foreign securities, including less information about foreign issuers, less liquid securities markets, political instability and unfavorable changes in currency exchange rates.

**Currency risk,** which refers to the risk that as a result of the Fund's investments in securities denominated in, and/or receiving revenues in, foreign currencies, those currencies will decline in value relative to the U.S. dollar or, in the case of hedged positions, the U.S. dollar will decline in value relative to the currency hedged.

**Prepayment and extension risks,** which means a debt obligation may be paid off earlier or later than expected. Either situation could cause the Fund to hold securities paying lower-than-market rates of interest, which could hurt the Fund's yield or share price.

**Securities lending risk,** which includes the potential insolvency of a borrower and losses due to the reinvestment of collateral received on loaned securities in investments that default or do not perform well.

**Manager risk,** which is the risk that poor security selection by a Sub-adviser will cause the Fund to underperform. This risk is common for all actively managed funds.

**The Fund may experience a higher portfolio turnover rate,** which can increase the Fund's transaction costs and more taxable short-term gains for shareholders.

**Multi-manager risk,** which is the risk that the investment styles of the Sub-advisers may not complement each other as expected by the Manager. The Fund may experience a higher portfolio turnover rate, which can increase the Fund's transaction costs and more taxable short-term gains for shareholders.

**Issuer risk,** which is the risk that the value of a security may decline for reasons directly related to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services.

For more information on the risks of investing in the Fund please see the "Fund Details" section in the Prospectus.
