Performance information and Fee and Expense information regarding the Morgan Stanley National Advisory 529 Plan may be found on Morgan Stanley's website and can be accessed at www.morganstanley.com/wealth-investmentsolutions/cgcm. References to Morgan Stanley's websites are intended to allow investors public access to information regarding the Morgan Stanley National Advisory 529 Plan and do not, and are not intended to, incorporate Morgan Stanley's website into this report.

To the North Carolina State Education Assistance Authority:

We have audited the accompanying Statement of Fiduciary Net Position of the Morgan Stanley National Advisory 529 Plan (the "Plan"), a Plan of the North Carolina State Education Assistance Authority, as of June 30, 2021 and for the period from July 20, 2020 (commencement of operations) to June 30, 2021, and the related Statement of Changes in Fiduciary Net Position for the period then ended, and the related notes, which collectively comprise the Plan's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the Statement of Fiduciary Net Position of the Plan as of June 30, 2021, and for the period July 20, 2020 (commencement of operations) to June 30, 2021 and the respective changes in fiduciary net position for the period then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

As discussed in Note 1 of the Notes to Financial Statements, the financial statements present only the Plan and do not purport to, and do not, present the fiduciary net position of the entire Parental Savings Trust Fund or the North Carolina State Education Assistance Authority as of June 30, 2021, or the changes in their fiduciary net position for the period then ended in conformity with accounting principles generally accepted in the United States of America.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that management's discussion and analysis on page 2 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Schedules

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Plan's basic financial statements. The Combining Statements of Fiduciary Net Position and the Combining Statements of Changes in Fiduciary Net Position, as listed in the table of contents on pages 9 through 15, are supplemental schedules presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Combining Statements of Fiduciary Net Position and the Combining Statements of Changes of Fiduciary Net Position are the responsibility of the Plan's management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such schedules have been subjected to the auditing procedures applied in our audit of the basic financial statements and certain additional procedures, including comparing and reconciling such schedules directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Combining Statements of Fiduciary Net Position and the Combining Statements of Changes in Fiduciary Net Position are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 18, 2021 on our consideration of the Plan's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and agreements and other matters. The purpose of that report is to solely describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Plan's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Plan's internal control over financial reporting and compliance.

Management's Discussion and Analysis

The North Carolina State Education Assistance Authority ("NCSEAA") offers and oversees the Morgan Stanley National Advisory 529 Plan (the "MS Advisory 529 Plan" or "Plan") for the State of North Carolina.

These financial statements pertain solely to the Plan's investment options that are each referred to individually as an "Investment Option" and collectively as the "Investment Options." As investment manager of the Plan, which is offered and overseen by NCSEAA for the State of North Carolina, Morgan Stanley Smith Barney LLC ("Morgan Stanley") offers readers of the financial statements of the Plan this discussion and analysis of the Plan's financial performance for the fiscal period ended June 30, 2021.

Overview of the Financial Statements

The Plan's financial statements are prepared in accordance with Governmental Accounting Standards Board ("GASB") Statement No. 34, Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments.

This report consists of two parts: management's discussion and analysis (this section) and the basic financial statements. The basic financial statements consist of a Statement of Fiduciary Net Position, a Statement of Changes in Fiduciary Net Position and Notes to Financial Statements that explain certain information in the financial statements and provide more detailed information.

The Statement of Fiduciary Net Position presents information on the Plan's assets and liabilities, with the difference between the two reported as fiduciary net position. This statement, along with the Statement of Changes in Fiduciary Net Position discussed below, is prepared using the accrual basis of accounting 1) whereby contributions are recognized when enrollment in the Plan has been successfully completed and all documentation is found to be in good order, 2) withdrawals are recognized when the withdrawal request has been received and all documentation is found to be in good order and 3) expenses and liabilities are recognized when services are provided, regardless of when cash is paid.

The Statement of Changes in Fiduciary Net Position presents information showing how the Plan's assets changed during the fiscal year. All changes in net position are reported when the underlying event giving rise to the change occurs, regardless of the timing of related cash flows in future fiscal years.

Notes to Financial Statements provide additional information that is essential to a full understanding of the data provided in the basic financial statements.

This report presents the operating results and financial status of the Plan, which the North Carolina State Education Assistance Authority reports as a fiduciary fund (private purpose trust fund). Fiduciary fund reporting is used to account for resources held for the benefit of parties outside the government entity.

Financial Analysis

Fiduciary Net Positions: The following is a condensed Statement of Fiduciary Net Position for the Plan:

	June 30, 2021
Assets	
Investments	\$ 182,950,773
Receivables	1,490,669
Total assets	<u>184,441,442</u>
Liabilities	
Payable and other liabilities	1,526,975
Total liabilities	<u>1,526,975</u>
Fiduciary Net Position	<u>\$ 182,914,467</u>

Total Fiduciary net position represents total contributions from participants since the Plan's inception, plus net increases and decreases from investment operations, less withdrawals and expenses.

Investments make up 100.0% of total fiduciary net position, and consist of 13 Investment Options. Each investment option is made up of a combination of up to 9 Morgan Stanley ("MS") 529 Funds, and each MS 529 Fund in turn invests its assets in one of the nine Morgan Stanley Pathway Funds (the "Pathway Funds" or "underlying funds"). Receivables consist of receivables for underlying funds sold. Payables consist of payables for underlying funds purchased, accrued advisory fees payable, and the redemption of Plan units.

Changes in Net Position: The following is a condensed Statement of Changes in Fiduciary Net Position for the Plan:

	Period Ended June 30, 2021
Additions:	
Contributions and conversions of units	\$ 176,258,008
Net increase (decrease) from investment operations	9,401,028
Exchanges in	11,081,031
Total additions	<u>196,740,067</u>
Deductions:	
Withdrawals and conversion of units	2,688,336
Expenses	56,233
Exchanges out	11,081,031
Total deductions	<u>13,825,600</u>
Net increase in fiduciary net position	182,914,467

Beginning of period	-
End of period	\$ 182,914,467

⁽¹⁾ Morgan Stanley National Advisory 529 Plan commenced operations on July 20, 2020.

1. Organization

The Morgan Stanley National Advisory 529 Plan (the “MS Advisory 529 Plan” or “Plan”) is established and maintained pursuant to Section 529 of the Internal Revenue Code of 1986, as a “Qualified Tuition Plan” (“529 Plan”). 529 Plans are designed to encourage and facilitate saving and investing funds by offering numerous tax and other advantages to pay for certain future primary, secondary and higher education expenses of an individual anticipated to incur such expenses.

The North Carolina State Education Assistance Authority (“NCSEAA”) is the instrumentality of the State of North Carolina responsible for establishing and maintaining the MS Advisory 529 Plan. NCSEAA has contracted with Morgan Stanley Smith Barney LLC (“Morgan Stanley”) as the exclusive manager responsible for the administration, distribution, investment management and other services for the MS Advisory 529 Plan. The Plan is sponsored and overseen by the NCSEAA. The Plan, which is a part of the Parental Savings Trust Fund, is maintained by the NCSEAA and managed by Morgan Stanley.

The MS Advisory 529 Plan currently offers 13 Investment Options, consisting of up to 9 MS 529 Funds. The Investment Options represent different risk-level models, ranging from conservative allocations (Conservative Fixed Income) to aggressive allocations (Opportunistic Growth and Equity).

MS 529 – Conservative Fixed Income
MS 529 – Tactical Wealth Conservation
MS 529 – Tactical Income
MS 529 – Tactical Balanced Growth
MS 529 – Tactical Market Growth
MS 529 – Tactical Opportunistic Growth
MS 529 – Tactical Equity
MS 529 – U.S. Focused Wealth Conservation
MS 529 – U.S. Focused Income
MS 529 – U.S. Focused Balanced Growth
MS 529 – U.S. Focused Market Growth
MS 529 – U.S. Focused Opportunistic Growth
MS 529 – U.S. Focused Equity

The 9 MS 529 Funds includes:

MS 529 Large Cap Equity Fund
MS 529 Small-Mid Cap Equity Fund
MS 529 International Equity Fund
MS 529 Emerging Markets Equity Fund
MS 529 Core Fixed Income Fund
MS 529 High-Yield Fund
MS 529 International Fixed Income Fund
MS 529 Inflation-Linked Fixed Income Fund
MS 529 Ultra-Short Term Fixed Income Fund

Each MS 529 Fund in turn invests its assets in one or more of nine Morgan Stanley Pathway Funds (the “Pathway Funds” or “underlying funds”) listed below:

Morgan Stanley Pathway Large Cap Equity Fund
Morgan Stanley Pathway Small-Mid Cap Equity Fund
Morgan Stanley Pathway International Equity Fund
Morgan Stanley Pathway Emerging Markets Equity Fund
Morgan Stanley Pathway Core Fixed Income Fund
Morgan Stanley Pathway High-Yield Fund
Morgan Stanley Pathway International Fixed Income Fund
Morgan Stanley Pathway Inflation-Linked Fixed Income Fund
Morgan Stanley Pathway Ultra-Short Term Fixed Income Fund

The Pathway Funds provide exposure to different asset classes utilizing various investment managers selected by an affiliate of Morgan Stanley to create a diversified portfolio. Financial statements of the underlying funds contain additional information about the expenses and investments of the underlying funds and are available from the EDGAR database on the Securities and Exchange Commission website at <http://www.sec.gov>.

Interests in the Plan (“Units”) have not been registered with the Securities and Exchange Commission (the “SEC”) or any other state or federal governmental agency. The Units in the Plan are exempt from the registration requirements of the federal securities laws and are instead regulated as “municipal fund securities” by the Municipal Securities Rulemaking Board. There are no front-end or deferred sales charges associated with the Investment Option or MS 529 Plan fund selections.

Qualified Withdrawals, used to pay Qualified Education Expenses, are free from federal income tax and the income tax of nearly every state. Non-Qualified Withdrawals, used for any other purpose, are subject to income taxes and a 10% federal tax penalty on the earnings component of such Withdrawal only, unless such penalty is eligible for a waiver.

2. Significant Accounting Policies

Use of Estimates: The Plan’s financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which may require management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

Investment Transactions and Investment Income: For financial reporting purposes, investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on investment transactions are determined on the identified cost basis. Dividend income and capital gain distributions from the underlying funds are recorded on the ex-dividend dates. Income, expenses and realized and unrealized gains and losses are allocated to each fund Unit based on its relative net assets.

Distributions to Unitholders: Distributions, if any, paid by the Investment Options are recorded on the ex-dividend dates.

Income Taxes: The Plan has been designed to comply with the requirements for treatment as a qualified state tuition plan under Section 529 of the Internal Revenue Code, which is exempt from federal and state income tax. Therefore, no provision for income tax is required.

3. Investment Valuation and Fair Value Measurements:

Investment Valuation Policies: The Plan’s policy is to fair value its investments in the underlying funds at fair value. Investments in the underlying funds are valued based on the published net asset value of each such underlying fund computed as of the close of regular trading on the New York Stock Exchange (“NYSE”) on days when the NYSE is open.

Fair Value Hierarchy: Various inputs are used in determining the fair value of investments. These inputs to valuation techniques are categorized into a fair value hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 — Unadjusted price quotations in active markets/exchanges for identical assets or liabilities that each Fund has the ability to access

Level 2 — Other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 — Unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including each Fund’s own assumptions used in determining the fair value of investments

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The significant unobservable inputs used by the Global Valuation Committee in determining the price for Fair Valued Investments are typically categorized as Level 3.

As of period end, the Plan’s investments in its underlying funds were classified as Level 1.

4. Plan and Other Fees

To maintain an account in the MS Advisory 529 Plan, a shareholder must at all times be a Morgan Stanley Wealth Management client. Each plan account is subject to a consulting and advisor fee. This fee may range up to a maximum of 2.00% of the Plan’s total aggregate assets on an annual basis. Prior to December 7, 2020, there was also

an Advisory Overlay Fee of 0.07%. There are no front-end or deferred sales charges associated with an investment in the MS Advisory 529 Plan. The Investment Options have certain expenses associated with their investment strategies. Each Account Owner bears these direct ongoing expenses, which will vary with the chosen Investment Option. The expenses of each Investment Option represents a blended weighted average of the underlying investments in the MS 529 Funds. The NCSEAA will receive an oversight and marketing fee at an annual rate of up to 0.10% of the average daily nets assets in each MS Advisory 529 Plan.

5. Plan Units

All beneficial interests in the Investment Options are expressed as a number of Plan units. Plan unit values under each Investment Option are based on the net position value per share of each of the underlying funds in which the Investment Option is invested. Unit values of the underlying funds are determined as described in Note 3 above.

Contributions by a participant are evidenced through the issuance of units in the particular Investment Option according to the investment elections made by the participant. Contributions and withdrawals are subject to terms and limitations defined in the participation agreement between the participant and the Savings Plan. Contributions are invested in units of the assigned Investment Option on the same day as the credit of the contribution to the participant’s account. Withdrawals are based on the unit value calculated for such Investment Option on the day that the withdrawal request is accepted. The earnings portion of non-qualified withdrawals, in addition to applicable federal and state income taxes, may be subject to a 10% non-qualified withdrawal penalty to be withheld from the amount withdrawn.

Transfers of participant assets between Investment Options are referred to as exchanges on the Statement of Changes in Fiduciary Net Position. Subject to certain limitations and restrictions, participants may generally direct their assets to be reinvested in one or more Investment Options twice each calendar year.

6. Change in Investments

The following table represents a calculation of the net change in appreciation (depreciation) on investments during the period ended June 30, 2021:

Value of investments at end of period	\$ 182,950,773
Less cost of investments purchased during the period	(181,970,625)
Plus cost of investments sold during the period	7,620,753
Less value of investments at the beginning of period	—
Net change in unrealized appreciation (depreciation) on investments during the period	<u>\$ 8,600,901</u>

7. Investments Risks

The Plan's investments consist of shares of the underlying funds, rather than individual securities and therefore are not subject to classification by custodial credit risk or disclosure of concentration of credit risk under GASB Statement No. 40, Deposits and Investment Risk Disclosures. The underlying funds are not rated by any nationally recognized statistical rating organization. An Investment Option is exposed to the risks of the underlying funds in direct proportion to the amounts of assets the Investment Option allocates to each underlying fund.

Interests in the Investment Options, and in the underlying funds in which they invest, are subject to a number of Investment Risks. Please refer to the Plan Description for a complete list of such Investment Risks, which include the following:

Interest Rate Risk: Certain underlying funds invest in debt securities, including bonds, and are subject to interest rate risk. Declining interest rates generally increase the value of the debt instruments, and rising interest rates generally decrease the value of existing debt instruments. The exposure to interest rate risk is greater with underlying funds with longer average effective maturity and average effective duration.

Foreign Securities Market Risk: Securities of many non-U.S. companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. Securities of companies traded in many countries outside the U.S., particularly emerging markets countries, may be subject to further risks due to the inexperience of local investment professionals and financial institutions, the possibility of permanent or temporary termination of trading and greater spreads between bid and asked prices of securities. In addition, non-U.S. stock exchanges and investment professionals are subject to less governmental regulation, and commissions may be higher than in the United States. Also, there may be delays in the settlement of non-U.S. stock exchange transactions.

Emerging Market Risk: Certain underlying funds invests in emerging market instruments which are subject to certain credit and market risks. The securities and currency markets of emerging market countries are generally smaller, less developed, less liquid and more volatile than the securities and currency markets of the United States and other developed markets. Disclosure and regulatory standards in many respects are less stringent than in other developed markets. There also may be a lower level of monitoring and regulation of securities markets in emerging market countries and the activities of investors in such markets and enforcement of existing regulations may be extremely limited. Political and economic structures in many of these countries may be in their infancy and developing rapidly, and such countries may lack the social, political and economic stability characteristics of more developed countries.

LIBOR Transition Risk: Certain investments in which an underlying funds invests rely in some manner on the London Interbank Offered Rate ("LIBOR"). LIBOR is intended to represent the rate at which contributing banks may obtain

short-term borrowings from each other in the London interbank market as determined by the ICE Benchmark Administration ("IBA"). Previously, the Financial Conduct Authority, which regulates financial markets and financial services firms in the United Kingdom, announced that it will no longer compel the banks to continue to submit the daily rates for the calculation of LIBOR after 2021 and warned that LIBOR may cease to be available or appropriate for use beyond 2021. More recently, the IBA announced it will cease publication of USD LIBOR for the most common tenors (overnight and one, three, six and twelve months) as of June 30, 2023, and it will cease publication of USD LIBOR for the less commonly used tenors of one week and two months as well as all tenors of non-USD LIBOR as of December 31, 2021.

Currency Risk: Certain underlying funds invest in securities of foreign issuers, including American Depositary Receipts. These markets are subject to special risks associated with foreign investments not typically associated with investing in U.S. markets. Because the foreign securities in which the underlying funds may invest generally trade in currencies other than the U.S. dollar, changes in currency exchange rates will affect the underlying fund's net position value, the value of dividends and interest earned and gains and losses realized on the sale of securities. Because the net position value of each underlying fund is determined on the basis of U.S. dollars, the underlying funds may lose money by investing in a foreign security if the local currency of a foreign market depreciates against the U.S. dollar, even if the local currency value of the underlying funds' holdings goes up. Generally, a strong U.S. dollar relative to these other currencies will adversely affect the value of the underlying fund' holdings in foreign securities.

Market and Credit Risk: In the normal course of business, the underlying funds invest in securities and enter into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations (issuer credit risk). The value of securities held by the underlying funds may decline in response to certain events, including those directly involving the issuers whose securities are owned by the underlying funds; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to issuer credit risk, the underlying funds may be exposed to counterparty credit risk, or the risk that an entity with which the underlying funds have unsettled or open transactions fails to be able to perform on its commitments. Financial assets, which potentially expose the underlying funds to market, issuer and counterparty credit risks, consist principally of financial instruments and receivables due from counterparties. The extent of the underlying funds' exposure to market, issuer and counterparty credit risks with respect to these financial assets is generally approximated by their value recorded in the underlying funds' Statements of Assets and Liabilities, less any collateral held by the underlying funds. Certain underlying funds invest in various derivative instruments. Refer to the prospectuses and financial statements of the underlying funds for information on the respective underlying fund's investment strategy.

Other: Market disruptions associated with the COVID-19 pandemic have had a global impact, and uncertainty exists as to its long-term implications. The COVID-19 pandemic could adversely affect the value and liquidity of the Plan's investments, impair the Plan's ability to satisfy redemption requests, and negatively impact the Plan's performance. In addition, the outbreak of COVID-19, and measures taken to mitigate its effects, could result in disruptions to the services provided to the Plan by its service providers. Morgan Stanley is continuing to monitor this development and evaluate its impact on the Plan.

8. Subsequent Events

Management has evaluated the impact of all subsequent events on the Plan through October 18, 2021, the date the financial statements were available to be issued, and has determined that there are no subsequent events requiring recognition or disclosure in the financial statements.
