

Capex Captains

A UNIT INVESTMENT TRUST

The unit investment trust named above (the “Trust”) is included in Morgan Stanley Portfolios, Series 66. The Trust invests in common stocks of companies that the Morgan Stanley Wealth Management Global Investment Office (“MSWM GIO”) has identified as “Capex Captains,” which are companies MSWM GIO believes may benefit during an anticipated period of increased capital expenditure.

Please refer to the Investment Summary on the following page under Investment Concept and Selection Process for a description of the Trust’s strategy.

Capex Captains

INVESTMENT SUMMARY

Use this Investment Summary to help you decide whether the portfolio comprising Capex Captains (the “Trust”) is right for you. More detailed information can be found later in this Prospectus.

Investment Objective

The objective of the Trust is to provide long-term capital appreciation.

There is no guarantee that the Trust will achieve its investment objective.

Investment Strategy

The Trust uses a “buy and hold” strategy with a portfolio designed to remain fixed over its two-year life. Unlike a mutual fund, the Trust’s portfolio is not managed.

Investment Concept and Selection Process

The Trust will seek to meet its objective by investing in common stocks of companies that MSWM GIO believes may benefit during a period of increased capital expenditure. The Sponsor, Morgan Stanley Smith Barney LLC, developed the Trust’s portfolio based on a list of securities published by MSWM GIO in a March 28, 2023, report titled “AlphaCurrents: Capex Captains” (the “Report”). MSWM GIO uses the term “Capex Captains” to describe companies MSWM GIO believes are positioned to potentially benefit during the course of an anticipated period of increased capital expenditure (or “capex”), with capex describing businesses investing in infrastructure and technology to achieve long-term goals. MSWM GIO is a unit of Morgan Stanley Wealth Management that produces a range of investment strategy guidance and analysis to help financial advisors build their practices and manage their clients’ portfolios.

In crafting the Report, MSWM GIO began with the thesis set out in the January 2023 report titled “The Next American Productivity Renaissance.” This report, authored by Morgan Stanley Wealth Management Chief Investment Officer Lisa Shalett, contends that the next business cycle will look different from those occurring since the great financial crisis, as it may feature potentially transformative new economic drivers that, in turn, may support elevated levels of capex. Specifically, the prospects of digital disruption and reengineering of services businesses, a tight labor market and the prospect of increased

automation, advancing deglobalization, accelerating decarbonization, and geopolitical adjustments may lead to a capex boost.

With this backdrop in mind, MSWM GIO created the Report with the goal of identifying a list of companies that may benefit from, enable, or finance capex. MSWM GIO began with the companies within Morgan Stanley & Co. Research’s equity coverage universe (all of the companies covered by Morgan Stanley & Co. analysts globally) whose shares are rated as either “Overweight” or “Equal-weight.” From this initial list of approximately 200 companies, MSWM GIO narrowed the investable universe by applying a combination of qualitative and quantitative assessments.

First, MSWM GIO filtered the initial list by using the trends identified in The Next American Productivity Renaissance report to focus on five types of companies believed to have the potential to thrive in a period of increasing capex. Some companies can be members of multiple groups, but MSWM GIO eliminated companies that did not fit into at least one of the following groups:

- *Enablers of Human Capital Efficiency*—These companies help other companies get more out of labor or help upgrade an existing workforce. This includes businesses focused on automated surgeries, advanced medical testing, industrial automation, farming automation, automated dispatch, training, traffic ticketing and toll collections and cyber threat identification.
- *Enablers of Deglobalization*—These companies offer products and/or services that address the potential effects of deglobalization, which have been caused by factors including, but not limited to, tariffs, rising protectionism, Covid-related supply-chain disruptions, and increasing economic sanctions policy. Companies in this group include industrial automation manufacturers and providers of food supply-chain solutions.
- *Enablers of Energy Efficiency*—These companies provide either traditional carbon-based energy products and/or services or products and/or services that facilitate the transition away from carbon-based fuel sources. This group includes traditional energy service companies, as well as companies supporting electrification, energy efficiency improvement, and alternative energy solutions.

- *Enablers of the New World Order*—With The Next American Productivity Renaissance report asserting that the world order has shifted to a group of competing blocs, this group of companies helps nations compete with one another or defend against attacks, and also includes companies that help fund governments and governmental entities. Companies in this group include defense contractors, suppliers to defense companies, space companies, cybersecurity providers, and a business that helps governments generate revenue through ticketing and tolls.
- *Financing and Funding Facilitators*—These companies facilitate the financing of businesses that produce capex-increasing products and/or services. In particular, companies in this group include those focusing on financing various corporate investments or support the issuance of bonds and loans, as well as those companies that help governments generate more revenue.

To further narrow the list, MSWM GIO sought to emphasize large companies, with the potential for growth, that also have an attractive valuation given their perceived competitive advantage. Specifically, MSWM GIO emphasized, but did not require, for inclusion in the final list, companies that have (i) a market capitalization exceeding \$5 billion, (ii) estimated fiscal year 2024 sales growth exceeding 5%, and (iii) return on equity greater than the company's price/earnings ratio. Although MSWM GIO shared its final list of companies with the Sponsor, MSWM GIO does not supply services to the Trust.

In assembling the Trust's portfolio, the Sponsor sought to include each company highlighted in the Report that has issued common stock traded on a U.S. exchange. The Sponsor then excluded the common stocks of companies subject to any regulatory, tax, or trading-related restrictions of the Sponsor (see Description of the Trust—The Portfolio for a complete discussion). As such, as a result of this process, the Trust invests in all of the companies identified in the Report. As of the Initial Date of Deposit, 100% of the Trust's portfolio consists of common stocks of companies that MSWM GIO has identified as Capex Captains in the Report.

The resulting portfolio primarily consists of large capitalization (market capitalizations of \$10 billion or more) and mid capitalization (market capitalizations between \$2 billion and \$10 billion) common stocks of U.S. publicly traded domestic

companies, with concentrations in the industrials and information technology sectors, and significant investments in the energy, financial, and health care sectors (see Risk Factors). After the Initial Date of Deposit, the Trust will continue to purchase (subject to any restrictions described under Description of the Trust—Structure and Offering) or hold common stocks notwithstanding the fact that MSWM GIO, or any affiliate, may revise its opinion with respect to any individual company. In particular, any subsequent creation of a similar type of list of companies or an update by MSWM GIO regarding the companies held by the Trust will not affect the composition of the Trust. Furthermore, although MSWM GIO identified the companies based upon a multi-year outlook, the Trust has a maximum duration of 24 months and does not intend to change its composition prior to termination. Your financial professional will provide you with a copy of the Report, as well as a copy of The Next American Productivity Renaissance report, upon request.

Principal Risk Factors

Holders can lose money by investing in the Trust. The value of your units may increase or decrease depending on the value of the common stocks which make up the Trust. In addition, the amount of dividends you receive depends on each particular issuer's dividend policy, the financial condition of the securities and general economic conditions.

The Trust consists of common stocks. If you invest in the Trust, you should understand the potential risks generally associated with common stocks, which include, but are not limited to:

- The financial condition of the issuer may worsen.
- The rate of the dividends previously paid may be reduced or even eliminated.
- Geopolitical and other events, including but not limited to war, terrorism, economic uncertainty, trade disputes, extreme weather and climate-related events, instability in the global financial system, public health crises and spread of infectious illness have led, and in the future may lead, to increased market volatility, which may disrupt the U.S. and world economies, individual companies and markets, and may have significant adverse direct or indirect effects on the Trust and its investments. Such events include the ongoing global coronavirus pandemic, Russia's invasion of Ukraine, and the

recent developments in the banking sector, which have adversely impacted business activity and the economy on a global scale. It is possible and, indeed, likely that some or all of these global events will persist for the duration of the Trust.

- The stock market is also subject to volatile increases or decreases in value as market confidence in and perceptions of issuers change.

In addition, the Trust's portfolio holdings are concentrated in the common stocks of industrial companies and information technology companies. A trust is considered to be "concentrated" in a particular industry or sector when the securities in a particular industry or sector constitute 25% or more of the total asset value of the portfolio. The Trust's portfolio also invests significantly in the common stocks of energy companies, financial companies, and health care companies. Please also refer to the "Risk Factors" section for a complete discussion of the corresponding risks. Compared to the broad market, an individual industry or sector may be more strongly affected by:

- Highly competitive pressures on pricing.
- Changes in the interest rates and general economic conditions.
- Changes in the market prices of particular dominant stocks within the industry.
- Approval by government agencies and changes in government regulation.
- Changing domestic and international demand for a particular product.

The Trust's portfolio contains common stocks issued by 25 companies, which means that Holders should anticipate more price volatility than would occur in an investment in a portfolio which contains a greater number of issuers. A unit investment trust is not actively managed and the Trust will not sell securities in response to ordinary market fluctuations. Instead, securities will not usually be sold until the Trust terminates, which could mean that the sale price of the Trust's securities may not be the highest price at which these securities traded during the life of the Trust. Also, this means that securities may remain in the Trust even though they no longer meet the criteria of the Trust's investment strategy or are no longer

viewed favorably by MS&Co. Research. Further, there is no assurance that the overall thesis and underlying assumptions contained in the Report will be correct or that any individual company selected will benefit in the manner anticipated by MS&Co. Research.

Public Offering Price

On the first day units are made available to the public, the Public Offering Price will be approximately \$10.00 per unit, with a minimum purchase of \$1,000 (\$250 for retirement accounts). The Public Offering Price is based upon the net asset value of the Trust, the latter of which is calculated by:

- Adding the combined market value of the securities in the Trust to any other assets held, including but not limited to cash, dividends receivable on securities trading ex-dividend, and
- Subtracting therefrom all liabilities of the Trust, which include, among others, any accrued fees and expenses of the Trust, taxes and undistributed income or capital.

The Public Offering Price per unit is calculated by dividing the net asset value of the Trust by the number of units outstanding (net asset value per unit) and adding an applicable initial sales charge. The Public Offering Price will change daily because prices of the underlying securities will fluctuate. In addition, during the initial public offering period, a per unit amount sufficient to reimburse the Sponsor for organization costs is added to the Public Offering Price.

Market for Units

The Sponsor intends to repurchase units at a price based on their net asset value per unit. If the Sponsor decides to discontinue the policy of repurchasing units, you can redeem units through the Trustee, at a price determined by using the same formula.

Rollover Option

You may rollover all or a portion of your redemption or termination proceeds into any Sponsor-deposited trust in its initial offering period (a "Rollover Series"), including any future Trust series, if available. If you decide not to rollover your proceeds into a Rollover Series, you will receive a cash distribution after the Trust terminates. You will pay your share of expenses associated with a termination or rollover, including brokerage commissions on any sale of securities, as well as the sales charges and expenses of a Rollover Series. See "Rollover Option".

FEE TABLE

This Fee Table is intended to help you to understand the costs and expenses that you will bear directly or indirectly based on a \$10 Public Offering Price per Unit. Actual expenses will vary. See Public Sale of Units and Expenses and Charges. Although the Trust is a unit investment trust rather than a mutual fund, this information is presented to permit a comparison of fees.

Unitholder Transaction Expenses

	As a % of Public Offering Price	Amounts per 100 Units
Initial Sales Charge Imposed on Purchase (as a percentage of offering price)	0.00%*	\$ 0.00
Maximum Deferred Sales Charge	2.40%**	\$24.00
Maximum Sales Charge	2.40%	\$24.00
Reimbursement to Sponsor for Estimated Organization Costs	0.50%	\$ 5.00

Estimated Annual Trust Operating Expenses

	As a % of Net Assets	Amounts per 100 Units
Trustee's Fee	0.108%	\$1.05
Other Operating Expenses	0.043%***	\$0.42
Total	0.151%	\$1.47

Example

This example helps you compare the cost of the Trust with other unit trusts and mutual funds. In the example we assume that the expenses do not change and that the Trust's annual return is 5%. Your actual returns and expenses will vary. Based on these assumptions, you would pay the following expenses for every \$10,000 you invest in this Trust:

1 year	\$307
2 years (life of Trust)	322

- *

The initial sales charge is equal to the difference between the maximum sales charge of 2.40% and the sum of any remaining deferred sales charge. If the Unit price is less than \$10.00 per Unit, there is no initial sales charge, and a credit is applied to ensure the maximum sales charge does not exceed 2.40%. If the Unit price exceeds \$10.00 per Unit an initial sales charge is paid at the time of purchase. See Public Sale of Units—Public Offering Price for further detail on how the sales charges are calculated.
- **

The deferred sales charge is a fixed dollar amount equal to \$0.240 per Unit. The deferred sales charge will be paid from the Trust to the Sponsor in five monthly installments. If the Unit price exceeds \$10.00 per Unit, the deferred sales charge will be less than 2.40%; if the Unit price is less than \$10.00 per Unit, the deferred sales charge will exceed 2.40%, however, the maximum sales charge will not exceed 2.40% due to a credit applied at the time of purchase. If Units are redeemed at any time prior to the Trust's final deferred sales charge payment, any uncollected portion of the \$0.240 per Unit deferred sales charge amount will be deducted from the proceeds. See Public Sale of Units—Public Offering Price for further detail.
- ***

“Other Operating Expenses” is based upon the estimated size of the Trust determined as of the Initial Date of Deposit. Because certain of the operating expenses are fixed amounts, if the Trust does not reach its estimated size or falls below the estimated size over its life, the actual amount of these operating expenses will likely exceed the amounts reflected. In some cases, the actual amount of operating expenses may substantially differ from the amounts reflected above. The estimate for “Other Operating Expenses” does not include brokerage costs and other transactional fees.

SUMMARY OF ESSENTIAL INFORMATION AS OF May 23, 2023†

Sponsor, Supervisor and Evaluator

Morgan Stanley Smith Barney LLC

Trustee and Distribution Agent

The Bank of New York Mellon

Unit Price as of Initial Date of Deposit

\$10 per Unit

Sales Charge

The maximum aggregate sales charge is 2.40%. The initial sales charge is the difference between the maximum sales charge of 2.40% and the sum of the total deferred sales charge of \$0.240 per Unit. The initial sales charge, if any, is paid directly from the amount invested. The deferred sales charge is paid in five monthly installments on the Deferred Sales Charge Payment Dates. Upon a repurchase, redemption or exchange of Units before the final Deferred Sales Charge Payment Date, any remaining deferred sales charge payments will be deducted from the proceeds. The Trust's initial offering period is anticipated to last approximately six months from the Initial Date of Deposit.

Deferred Sales Charge Payment Dates

December 15, 2023, and the 15th day of each month thereafter, through April 15, 2024.

Termination Date

May 23, 2025, or at any earlier time by the Sponsor with the consent of Holders of two-thirds of the Units then outstanding or any earlier time as permitted or required by the Trust Indenture.

Distributions

Distributions of income, if any, will be made on the Distribution Day to Holders of record on the corresponding Record Day. Distributions will be paid in cash, unless a Holder elects to reinvest his or her distribution in additional Units of the Trust. A final distribution will be made upon termination of the Trust.

Record Day

The 10th day of December 2023, and semiannually thereafter.

Distribution Day

The 25th day of December 2023, and semiannually thereafter, and upon termination and liquidation of the Trust.

Evaluation Time

4:00 p.m. Eastern time (or earlier close of the New York Stock Exchange).

Minimum Value of the Trust

The Trust Indenture may be terminated early if the net asset value of the Trust is less than \$1,000,000 or less than 40% of the net asset value of the Trust at the completion of the initial public offering period.

Trustee's Annual Fee

\$0.0105 per Unit.

† The Initial Date of Deposit. The Initial Date of Deposit is the date on which the Trust Indenture between the Sponsor and the Trustee was signed and the deposit with the Trustee was made.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To Morgan Stanley Smith Barney LLC (the Sponsor), and Unit Holders of Morgan Stanley Portfolios, Series 66:

Opinion on the Statement of Financial Condition, Including the Portfolio of Investments

We have audited the accompanying statement of financial condition of Morgan Stanley Portfolios, Series 66, Capex Captains (the “Trust”), including the portfolio of investments, as of the opening of business on May 23, 2023 (Initial Date of Deposit), and the related notes (collectively, the “statement of financial condition”). In our opinion, the statement of financial condition presents fairly, in all material respects, the financial position of the Trust as of the opening of business on May 23, 2023 (Initial Date of Deposit), in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

This statement of financial condition is the responsibility of the Trust’s Sponsor. Our responsibility is to express an opinion on this statement of financial condition based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of financial condition is free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audit we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Trust’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the statement of financial condition, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the statement of financial condition. Our audit also included evaluating the accounting principles used and significant estimates made by the Trust’s Sponsor, as well as evaluating the overall presentation of the statement of financial condition. Our procedures included confirmation of contracts to purchase, by correspondence with the broker, as shown in the statement of financial condition as of the opening of business on May 23, 2023. We believe our audit provides a reasonable basis for our opinion.

Notes to Statement of Financial Condition

- (1) The Trustee has custody of and responsibility for all accounting and financial books and records. The Sponsor is responsible for preparation of the financial statements in accordance with U.S. generally accepted accounting principles based upon the books and records provided by the Trustee. The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect amounts reported therein. Actual results could differ from these estimates.
- (2) Aggregate cost to the Trust of the Securities listed under Portfolio of the Trust, on the Initial Date of Deposit, is determined by the Evaluator on the basis set forth in footnote 2 to the Portfolio. See also the column headed Market Value of Securities.
- (3) A portion of the Public Offering Price consists of an amount sufficient to reimburse the Sponsor for all or a portion of the costs of establishing the Trust. These organization costs have been estimated at \$0.05 per Unit for the Trust. A payment will be made as of the close of the initial public offering period to an account maintained by the Trustee from which the obligation of the investors to the Sponsor will be satisfied. To the extent that actual organization costs are greater than the estimated amount, only the estimated organization costs added to the Public Offering Price will be reimbursed to the Sponsor and deducted from the assets of the Trust.
- (4) A deferred sales charge of \$0.240 per Unit is payable in five installments on each of the Deferred Sales Charge Payment Dates. Distributions will be made to an account maintained by the Trustee from which the deferred sales charge obligation of the investors to the Sponsor will be satisfied. If Units are redeemed prior to the end of the initial offering period, the remaining portion of the deferred sales charge applicable to such Units will be transferred to such account on the redemption date.
- (5) The cost to investors represents the public offering price (computed on the basis set forth under Public Sale of Units—Public Offering Price) plus estimated organization costs.
- (6) Assumes a maximum aggregate sales charge of 2.40% of the Public Offering Price (2.459% of the net amount invested) computed on the basis set forth under Public Sale of Units—Public Offering Price.

Notes to Portfolio

- (1) All Securities are represented entirely by contracts to purchase Securities, which were entered into on May 22, 2023. All contracts to acquire Securities are expected to be settled by the initial settlement date for the purchase of Units.
- (2) Valuation of Securities by the Evaluator was made using the market value per share as of the Evaluation Time on May 22, 2023. In accordance with FASB Accounting Standards Codification ("ASC"), ASC 820, Fair Value Measurements and Disclosures all of the Trust portfolio's investments are classified as Level 1, which refers to security prices determined using quoted prices in active markets for identical securities. The cost of Securities to the Sponsor for the Trust's portfolio is \$233,279 and the Sponsor's profit or (loss) is \$0.
- (3) This company is a foreign issuer.

The following information is unaudited:

- (4) Morgan Stanley and its affiliates ("Morgan Stanley") do business that relates to companies in the Trust, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies in the Trust on a principal basis. Morgan Stanley may have a position in the debt of a company included in the Trust and may trade as principal in the debt securities (or in related derivatives) of such companies. The following information details certain of Morgan Stanley's investment banking relationships and other matters related to certain of the Trust's securities as of March 28, 2023, unless otherwise noted.

An employee, analyst or strategist (or a household member) of Morgan Stanley owns securities (or related derivatives) in one or more of the following companies that he or she has recommended in Morgan Stanley Research: Uber Technologies, Inc.

Morgan Stanley beneficially owned 1% or more of a class of common equity securities of: Applied Materials, Inc., Deere & Company, Eaton Corporation PLC, Halliburton Company, Honeywell International Inc., Illumina Inc., Intuitive Surgical Inc., Moody's Corporation, Northrop Grumman Corporation, Palo Alto Networks, Inc., Parker-Hannifin Corporation, Rockwell Automation, Inc., SolarEdge Technologies Inc., Thermo Fisher Scientific Inc., and Uber Technologies, Inc.

Within the last 12 months, Morgan Stanley received compensation for investment banking services from the following issuers: Eaton Corporation PLC, Halliburton Company, Honeywell International Inc., Northrop Grumman Corporation, Parker-Hannifin Corporation, Rockwell Automation, Inc., Shoals Technologies Group, Inc., SolarEdge Technologies Inc., Thermo Fisher Scientific Inc., and Uber Technologies, Inc.

In the next 3 months, Morgan Stanley will seek compensation for investment banking services from the following issuers: Applied Materials, Inc., CAE Inc, Deere & Company, Eaton Corporation PLC, GlobalFoundries Inc., Halliburton Company, Honeywell International Inc., Illumina Inc., Intuitive Surgical Inc., Jefferies Financial Group Inc., Lincoln Electric Holdings Inc., Moody's Corporation, Northrop Grumman Corporation, Nov Inc., Palo Alto Networks, Inc., Parker-Hannifin Corporation, Rockwell Automation, Inc., Shoals Technologies Group, Inc., SolarEdge Technologies Inc., Thermo Fisher Scientific Inc., Uber Technologies, Inc., and VM Consolidated, Inc.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144a offering) for: Eaton Corporation PLC, Honeywell International Inc., Northrop Grumman Corporation, Shoals Technologies Group, Inc., and Thermo Fisher Scientific Inc.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following issuers: Applied Materials, Inc., CAE Inc, Deere & Company, Eaton Corporation PLC, GlobalFoundries Inc., Halliburton Company, Honeywell International Inc., Illumina Inc., Intuitive Surgical Inc., Jefferies Financial Group Inc., Lincoln Electric Holdings Inc., Moody's Corporation, Northrop Grumman Corporation, Nov Inc., Palo Alto Networks, Inc., Parker-Hannifin Corporation, Rockwell Automation, Inc., Shoals Technologies Group, Inc., SolarEdge Technologies Inc., Thermo Fisher Scientific Inc., Uber Technologies, Inc., and VM Consolidated, Inc.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following issuers: CAE Inc, First Solar Inc., Halliburton Company, Honeywell International Inc., Illumina Inc., Intuitive Surgical Inc., Lincoln Electric Holdings Inc., Motorola Solutions Inc., Nov Inc., Palo Alto Networks, Inc., SolarEdge Technologies Inc., Uber Technologies, Inc., and VM Consolidated, Inc.

Morgan Stanley has a significant financial interest in relation to the following issuers: Deere & Company, GlobalFoundries Inc., Halliburton Company, and Honeywell International Inc.

DESCRIPTION OF THE TRUST

Objective of the Trust

The objective of Capex Captains (the “Trust”) is to provide long-term capital appreciation through a convenient investment in a fixed portfolio (the “Portfolio”) consisting of shares of common stocks (the “Securities”). The Trust’s portfolio will be comprised, initially, of Securities purchased, to the extent practicable, in approximately equal dollar amounts. The selection process is described in further detail under Investment Summary—Investment Concept and Selection Process.

Achievement of the Trust’s objective is dependent upon several factors including the financial condition of the issuers of the Securities and any appreciation of the Securities. Furthermore, because of various factors, including without limitation, Trust sales charges and expenses, unequal weightings of Securities, brokerage costs and any delays in purchasing securities with cash deposited, investors in the Trust may not realize as high a total return as the theoretical performance of the underlying Securities in the Portfolio.

You should note that the selection criteria were applied prior to the Initial Date of Deposit. After this time, the Securities included in your Trust may no longer meet the selection criteria. Should a Security no longer meet the selection criteria, the Sponsor will generally not remove the Security from the Trust nor refrain from purchasing the Security if additional Units are required. In offering the Units to the public, the Sponsor is not recommending any of the individual Securities but rather the entire pool of securities in your Trust, taken as a whole, which are represented by the Units.

Structure and Offering

This series of the Trust is considered a “unit investment trust.” The Trust was created under New York law by a Trust Indenture (the “Indenture”) between the Sponsor and the Trustee. To the extent references in this Prospectus are to articles and sections of the Indenture, which is incorporated by reference into this Prospectus, the statements made herein are qualified in their entirety by such reference. On the date of this Prospectus, each unit of the Trust (a “Unit”) represented a fractional undivided interest in the Securities listed in the Portfolio of the Trust. Additional Units of the Trust will be issued in the amount required to satisfy purchase orders by

depositing in the Trust cash (or a bank letter of credit in lieu of cash) with instructions to purchase Securities, contracts to purchase Securities together with irrevocable letters of credit, or additional Securities (“Additional Securities”). On each settlement date (generally two business days after the applicable date on which Securities were deposited in the Trust or any shorter period as may be required under the Securities Exchange Act of 1934 (“1934 Act”)), the Units will be released for delivery to investors and the deposited Securities will be delivered to the Trustee. As additional Units are issued by the Trust, the aggregate value of the Securities in the Trust will be increased, and the fractional undivided interest in the Trust represented by each Unit will be decreased. There is no limit on the time period during which the Sponsor may continue to make additional deposits of Securities into the Trust.

Following the Initial Date of Deposit, additional deposits of cash or Securities in connection with the issuance and sale of additional Units will maintain, to the extent practicable, the same percentage relationship among the number of shares of each Security in the Portfolio of the Trust that existed immediately prior to the subsequent deposit (the “Proportionate Relationship”). The Proportionate Relationship will be adjusted to reflect the occurrence of a stock dividend, a stock split or a similar event which affects the capital structure of the issuer of a Security in the Trust but which does not affect the Trust’s percentage ownership of the common stock equity of such issuer at the time of such event. It may not be possible to maintain the Proportionate Relationship because of, among other reasons, purchase requirements, changes in prices, brokerage commissions or unavailability of Securities. During the life of the Trust it may not be possible to buy a particular Security due to regulatory, trading or internal Sponsor (or affiliate) related restrictions, or corporate actions. While such limitations are in effect, additional Units would be created by purchasing each of the Securities in your Trust that are not subject to those limitations. This would also result in the dilution (reduction in the proportional ownership) of the investment in any such Security not purchased and potential variances in anticipated income. Units may be continuously offered to the public by means of this Prospectus during the initial public offering period (see Public Sale of Units—Public Distribution) resulting in a potential increase in the number of Units outstanding.

The Public Offering Price of Units on any day will be based in part on the aggregate value of the Securities (including estimated brokerage commissions) in the Trust on that day at the Evaluation Time, plus an initial (if any) sales charge. The Public Offering Price for the Trust will thus vary in the future from the “Unit Price as of Initial Date of Deposit” set forth in the Summary of Essential Information. See Public Sale of Units—Public Offering Price for a complete description of the pricing of Units.

The Sponsor will execute orders to purchase Units in the order it determines, in good faith, that they are received. However, indications of interest received prior to the effectiveness of the registration of the Trust which become orders upon effectiveness will be accepted according to the order in which the indications of interest were received. Further, orders from such indications of interest that are made pursuant to the rollover option (see Rollover Option herein) will be accepted before any other orders for Units. Units will be sold to investors at the Public Offering Price next computed after receipt of the investor’s order to purchase Units. The Sponsor reserves the right to accept or reject any purchase order in whole or in part.

The holders of Units (“Holders”) of the Trust may redeem their Units in accordance with the provisions described under Redemption. If any Units are redeemed, the aggregate value of Securities in the Trust will be reduced and the fractional undivided interest in the Trust represented by each remaining Unit will be increased. Units of the Trust will remain outstanding until redeemed upon request to the Trustee by any Holder (which may include the Sponsor), or termination of the Indenture. See Administration of the Trust—Amendment and Termination.

The Portfolio

The Sponsor selected the Securities for the Trust through the process described in Investment Summary—Investment Concept and Selection Process. The Sponsor and its affiliates may use the list of Securities included in the Trust and distribute this information to various individuals and entities in other forms, including research reports. In doing so, the Sponsor and its affiliates may issue reports, make recommendations to other clients or otherwise effect transactions in the Securities held by the Trust, which includes selling such Securities when a sale by the Trust would be impermissible. This may have an adverse effect on the prices of

the Securities and, in turn, the value of the Units (see also Fixed Portfolio herein). This also may have an impact on the price the Trust pays for the Securities and the price received upon Unit redemptions or liquidation of the Securities. In addition, the Sponsor and its affiliates in their general securities businesses may act as agent or principal in connection with buying and selling securities, including the Securities held by the Trust, and may have bought the Securities held in the Trust, thereby benefiting. See under “Notes to Portfolio” and “Conflicts of Interest” in this Prospectus for information concerning the investment banking relationships, various other matters and roles as market-makers maintained by the Sponsor and its affiliates for certain of the Securities included in the Trust. In the future, the Sponsor and its affiliates may also provide or seek to provide investment banking or other services to any of the issuers of the Securities in the Trust. If these scenarios were to occur, the inclusion of such companies in the Trust would constitute a conflict of interest.

Prior to the initial deposit of the Trust, the Sponsor ensured that the securities identified for inclusion in the Trust did not violate any regulatory, tax, trading and internal Sponsor (or Sponsor-affiliate) related restrictions and further, ensured that the securities would be sufficiently liquid.

The performance of Units of the Trust will differ from the performance of the underlying portfolio Securities for various reasons, including:

- sales charges and expenses of the Trust,
- the Portfolio may not be fully invested at all times,
- the Securities may be purchased or sold at prices different from the closing price used to determine the Trust’s net asset value, and
- not all Securities may be weighted in the initial proportions at all times.

Additionally, the performance of Units for different Holders will vary depending on the net asset value per Unit on the days Holders bought and sold their Units. Purchasers of securities, including Units, will generally have to pay sales charges or commissions, which will reduce their total return.

All of the Securities are publicly traded on a stock exchange. Most of the contracts to purchase Securities deposited initially in the Trust are expected to settle in two business days (or any

shorter period as may be required by the 1934 Act), in the ordinary manner for such Securities.

The Trust consists of such Securities as may continue to be held from time to time in the Trust pursuant to the provisions of the Indenture (including the provisions with respect to the deposit into the Trust of Securities in connection with the sale of additional Units to the public) together with undistributed income therefrom and undistributed and uninvested cash realized from the disposition of Securities. See Administration of the Trust—Accounts and Distributions; Trust Supervision.

Neither the Sponsor nor the Trustee shall be liable in any way for any default, failure or defect in any of the Securities. However, in the event that any contract for the purchase of Securities fails, the Sponsor may seek to purchase replacement Securities in accordance with the Indenture. See Administration of the Trust—Trust Supervision.

Because certain of the Securities from time to time may be sold, or their percentage may be reduced under certain limited circumstances described below, or because Securities may be distributed in redemption of Units, no assurance can be given that the Trust will retain for any length of time its present size. See Redemption; Administration of the Trust—Amendment and Termination. For Holders who do not redeem their Units, investments in Units of the Trust will be liquidated on the fixed date specified under Termination Date in the Summary of Essential Information, and may be liquidated sooner if the net asset value of the Trust falls below that specified under Minimum Value of the Trust set forth in the Summary of Essential Information. See Risk Factors.

Income

There is no assurance that dividends on the Securities will be declared or paid in the future.

Record and Distribution Days for the Trust are set forth under the Summary of Essential Information. Income distributions, if any, will be paid in cash, unless a Holder elects to reinvest his or her distributions in additional Units of the Trust. See Reinvestment Plan. Because dividends on the Securities are not received by the Trust at a constant rate throughout the year and because the issuers of the Securities may change the schedules or amounts of dividend payments, any distributions, whether

reinvested or paid in cash, may be more or less than the amount of dividend income actually received by the Trust and credited to the income account established under the Indenture (the “Income Account”) as of the Record Day.

RISK FACTORS

Common Stock

An investment in Units entails certain risks associated with any investment in common stocks. For example, the financial condition of the issuers of the Securities or the general condition of the common stock market may worsen and the value of the Securities and therefore the value of the Units may decline. Common stocks are especially susceptible to general stock market movements and to volatile increases and decreases in value as market confidence in and perceptions of the issuers change. These perceptions are based on unpredictable factors including:

- expectations regarding government economic, monetary and fiscal policies,
- inflation and interest rates,
- economic expansion or contraction, and
- global or regional political, economic or banking crises.

The Sponsor’s, and/or its affiliates’, buying and selling of the Securities, especially during the initial offering of Units of the Trust or to satisfy redemptions of Units, may impact the value of the underlying Securities and the Units. The publication of the list of the Securities selected for the Trust may also cause increased buying activity in certain of the Securities comprising the Portfolio. After such announcement, investment advisory and brokerage clients of the Sponsor and its affiliates may purchase individual Securities appearing on the list during the course of the initial offering period. Such buying activity in the stock of these companies prior to the purchase of the Securities by the Trust may cause the Trust to purchase stocks at a higher price than those buyers who effect purchases prior to purchases by the Trust.

Shareholders of common stocks have rights to receive payments from the issuers of those common stocks that are generally inferior to those of creditors or holders of debt or other obligations of such issuers. Shareholders of common stocks of

the type held by the Trust have a right to receive dividends only when, if, and in the amounts, declared by the issuer's board of directors and have a right to participate in amounts available for distribution by the issuer only after all other claims on the issuer have been paid or provided for. The amount and/or frequency of dividends or other distributions paid to shareholders of common stock will under certain circumstances be adversely affected by the rights of an issuer's creditors and/or holders of debt obligations that are superior to such shareholders' rights.

Moreover, common stocks do not represent an obligation of the issuer and, therefore, do not offer any assurance of income or provide the same degree of protection of capital as do debt securities. The issuance of additional debt securities or other issuer obligations will create prior claims for payment of principal, interest and dividends which could adversely affect the ability and inclination of the issuer to declare or pay dividends on its common stock or the economic interest of holders of common stock with respect to assets of the issuer upon liquidation or bankruptcy. Further, unlike debt securities which typically have a stated principal amount payable at maturity, common stocks have neither a fixed principal amount nor a maturity, and have values which are subject to market fluctuations for as long as they remain outstanding.

Holders will be unable to dispose of any of the Securities in the Portfolio, and will not be able to vote the Securities. As the holder of the Securities, the Trustee will have the right to vote all of the voting stocks in the Trust and will vote in accordance with the instructions of the Sponsor. However, the Trustee may not be able to vote any Securities in the Trust that are traded on foreign exchanges.

Market Disruption Risk

Geopolitical and other events, including but not limited to war, terrorism, economic uncertainty, trade disputes, extreme weather and climate-related events, instability in the global financial system, public health crises, and spread of infectious illness have led, and in the future may lead, to increased market volatility, which may disrupt the U.S. and world economies, individual companies and markets, and may have significant adverse direct or indirect effects on the Trust's Securities.

In particular, the ongoing global coronavirus pandemic has led to increased levels of market distress and/or volatility, as well as

decreased economic activity, any of which may have adversely impacted the Securities, and may further adversely impact the Securities during the life of the Trust. This public health crisis has resulted in disruptions to supply chains, manufacturing and sales across a wide range of industries.

Further, Russia's invasion of Ukraine launched on February 24, 2022, has resulted in increased volatility in various financial markets and across various sectors. The U.S. and other countries, along with certain international organizations, have imposed economic sanctions on Russia and certain Russian individuals, banking entities and corporations as a response to the invasion. The extent and duration of the military action, resulting sanctions and future market disruptions in the region are impossible to predict. Moreover, the ongoing effects of the hostilities and sanctions may not be limited to Russia and Russian companies, and may spill over to and negatively impact other regional and global economic markets of the world, including Europe and the United States. The ongoing military action along with the potential for a wider conflict could further increase financial market volatility and cause negative effects on regional and global economic markets, industries, and companies.

In addition, in March 2023, a number of banks in the U.S. and abroad began to experience shortages in liquidity, in some cases resulting in intervention by government agencies in order to ensure the safety of customer deposits as well as the orderly takeover of operations in the event of a bank's failure. Ongoing concerns about the health of regional and national banks may lead to further adverse developments in the financial markets.

It is not currently possible to determine the severity of any potential adverse impact of the foregoing events on the financial condition of any of the Trust's Securities, or more broadly, upon the global economy. It is possible and, indeed, likely that some or all of these global events will persist for the duration of the Trust.

Dividends

The amount of dividends you receive depends on each particular issuer's dividend policy, the financial condition of the companies and general economic conditions. Since the Securities are all common stocks, and the income stream produced by dividend payments thereon is unpredictable, the Sponsor cannot provide any assurance that dividends will be

sufficient to meet any or all expenses of the Trust. If dividends are insufficient to cover expenses, it is possible Securities will have to be sold to meet Trust expenses. See Expenses and Charges—Payment of Expenses. Any such sales may result in capital gains or losses to Holders. See Taxes.

Large Capitalization Company Risk

The Trust invests primarily in the common stocks of large capitalization companies. Under certain market conditions, large capitalization companies may underperform small- and mid-capitalization companies, which may cause the Trust to underperform relative to the overall equity markets during the life of the Trust.

Mid Capitalization Company Risk

The Trust invests significantly in the common stocks of mid-cap issuers, which are generally considered to include those companies with a market capitalization of at least \$2 billion and less than \$10 billion. Securities of mid-cap issuers may also present greater risks than those associated with large-cap issuers. For example, mid-cap issuers may have limited operating histories, product lines, markets, or financial resources. They may be subject to high volatility in revenues, expenses and earnings. Their securities may be thinly traded, may be followed by fewer investment research analysts and may be subject to wider price swings and, thus, may create a greater chance of loss than investments in securities of large-cap issuers. The market prices of securities of mid-cap issuers generally are more sensitive to changes in earnings expectations, to corporate developments and to market rumors than are the market prices of large-cap issuers. Transaction costs in securities of mid-cap issuers may be higher than in those of large-cap issuers.

Energy Companies

The Trust invests significantly in securities issued by energy companies. Energy companies include those companies that explore for, produce, refine, distribute or sell petroleum or gas products, or provide parts or services to petroleum or gas companies. Issuers in energy-related industries can be significantly affected by fluctuations in energy prices and supply and demand of energy fuels caused by geopolitical events, energy conservation or use of alternative fuel sources, the success of exploration projects, weather or meteorological

events, taxes, increased governmental or environmental regulation, resource depletion, rising interest rates, declines in domestic or foreign production, accidents or catastrophic events, or terrorist threats or attacks, among others.

Energy companies are generally subject to risks that are inherent to the utility industry, such as difficulties in obtaining an adequate return on invested capital and in financing large construction programs during an inflationary period. Companies in this industry often face restrictions on operations and increased cost and delays attributable to environmental considerations and regulations. Challenges often occur in raising capital in adequate amounts on reasonable terms in periods of high inflation and unsettled capital markets. Energy companies may be hindered by increased costs and reduced availability of certain types of fuel and occasional reduced availability and high costs of natural gas for resales. Oil and gas exploration and production can be significantly affected by natural disasters as well as changes in exchange rates, interest rates, government regulation, world events and economic conditions. The effects of energy conservation may impact upon the financial condition of certain energy companies. Additionally, energy companies may be affected by national energy policy and lengthy delays and greatly increased costs and other problems associated with the design, construction, licensing, regulation and operation of nuclear facilities for electric generation, including, among other considerations, the problems associated with the use of radioactive materials and the disposal of radioactive wastes. These companies may be at risk for environmental damage claims.

There are substantial differences between the regulatory practices and policies of various jurisdictions, and any given regulatory agency may periodically make major shifts in policy. There is no assurance that regulatory authorities will grant rate increases in the future or that such increases will be adequate to permit the payment of dividends on common stocks. Additionally, existing and possible future regulatory legislation may make it even more difficult for these utilities to obtain adequate relief. Certain energy companies may own or operate nuclear generating facilities. Governmental authorities may from time-to-time review existing policies, and impose additional requirements governing the licensing, construction and operation of nuclear power plants.

Moreover, price disparities within selected utility groups and discrepancies in relation to averages and indices have occurred frequently for reasons not directly related to the general movements or price trends of utility common stocks. Causes of these discrepancies include changes in the overall demand for and supply of various securities (including the potentially depressing effect of new stock offerings), and changes in investment objectives, market expectations or cash requirements of other purchasers and sellers of securities.

Financial Companies

The Trust invests significantly in the common stocks of financial companies. Companies in the financial services industry include, but are not limited to, companies involved in activities such as banking, mortgage finance, consumer finance, specialized finance, industrial finance and leasing, investment banking and brokerage, asset management and custody, corporate lending, insurance, and financial investment. In general, financial services issuers are substantially affected by changes in economic and market conditions, including: the liquidity and volatility levels in global financial markets; interest rates, as well as currency and commodities prices; investor sentiment; the rate of corporate and consumer defaults; inflation and unemployment; the availability and cost of capital and credit; exposure to various geographic markets or to commercial and residential real estate; international sanctions; competition from new entrants in their fields of business; extensive government regulation; and the overall health of the U.S. and international economies. Due to the wide variety of companies in the financial services industry, they may behave and react in different ways in response to changes in economic and market conditions.

Companies in the financial services industry are subject to several distinct risks. Such companies may be subject to systematic risk, which may result due to factors outside the control of a particular financial institution—like the failure of another, significant financial institution or material disruptions to the credit markets—that could adversely affect the ability of the financial institution to operate normally or may impair its financial condition. Financial services companies are typically affected by changes in interest rates and may be disproportionately affected as a result of volatile and/or rising interest rates. Certain financial services companies may

themselves have concentrated investment portfolios, which makes them vulnerable to economic conditions that affect industries in which their investments may be concentrated. Companies in the financial industry are often subject to credit risk, meaning they may have exposure to investments or agreements which under certain circumstances may lead to losses. These companies may be adversely affected by global developments including recessionary conditions, deterioration in the credit markets and concerns over sovereign debt. This may increase the credit risk, and possibility of default, of bonds issued by such institutions faced with these problems. In addition, the liquidity of certain debt instruments may be reduced or eliminated due to the lack of available market makers. There can be no assurance that the risks associated with investment in financial services issuers will decrease even assuming that the U.S. and/or foreign governments and agencies take steps to address such problems as they arise.

Most financial services companies are subject to extensive governmental regulation, which limits their activities and may affect their ability to earn a profit from a given line of business. This also exposes financial services issuers to regulatory risk, where certain financial services companies may suffer setbacks if regulators change the rules under which they operate. Challenging economic and political conditions and increased public scrutiny have led to new legislation and increased regulation in the U.S. and abroad, creating additional challenges for financial institutions. Regulatory initiatives and requirements that are being proposed around the world may be inconsistent or may conflict with previous regulations to which financial services issuers were subject, thereby resulting in higher compliance and legal costs, as well as the potential for higher operational, capital and liquidity costs. Proposed or enacted regulations may further limit the amounts and types of loans and other financial commitments certain financial services issuers can make, and further, may limit the interest rates and fees they can charge, the prices they can charge and the amount of capital they must maintain. These laws and regulations may affect the manner in which a particular financial institution does business and the products and services it may provide. Increased regulation may restrict a company's ability to compete in its current businesses or to enter into or acquire new businesses. New regulations may reduce or limit a company's revenue or impose additional fees, limit the scope of

their activities, increase assessments or taxes on those companies and intensify regulatory supervision, adversely affecting business operations or leading to other negative consequences.

Financial services companies operating in foreign countries are also subject to regulatory and interest rate concerns. In particular, government regulation in certain foreign countries may include controls on interest rates, credit availability, prices and currency transfers. The departure of any EU member from use of the Euro could lead to serious disruptions to foreign exchanges, operations and settlements, which may have an adverse effect on financial services issuers. There is continued uncertainty regarding the state of the EU in connection with the United Kingdom's departure from the EU, commonly referred to as Brexit. In addition, the extent and duration of Russia's invasion of Ukraine, resulting sanctions and future market disruptions in Europe are impossible to predict, but could be significant and have an adverse effect on the region, including significant negative impacts on the economy. It is possible that these effects may spill over to and negatively impact other regional and global economic markets of the world, including the United States. The effect that any such developments may have on the global financial markets or on the financial services companies in your Trust is uncertain.

The financial condition of customers, clients and counterparties, including other financial institutions, could adversely affect financial services issuers. Financial services issuers are interrelated as a result of market making, trading, clearing or other counterparty relationships. Many of these transactions expose financial services issuers to credit risk as a result of the actions of, or deterioration in, the commercial soundness of other counterparty financial institutions. Economic and market conditions may increase credit exposures due to the increased risk of customer, client or counterparty default. Downgrades to the credit ratings of financial services issuers could have a negative effect on liquidity, cash flows, competitive position, financial condition and results of operations by significantly limiting access to funding or capital markets, increasing borrowing costs or triggering increased collateral requirements. Financial services issuers face significant legal risk, both from regulatory investigations and proceedings, as well as private actions. Profit margins of these companies continue to shrink due to the commoditization of traditional

businesses, new competitors, capital expenditures on new technology and the pressure to compete globally.

Commercial banks (including "money center" regional and community banks), savings and loan associations and holding companies of the foregoing are especially subject to adverse effects of volatile interest rates, concentrations of loans in particular industries or classifications (such as real estate, energy, or sub-prime mortgages), and significant competition from nontraditional lending sources as regulatory changes have permitted new entrants to offer various financial products. Bank profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. Commercial banks and savings associations are subject to extensive federal and, in many instances, state regulation. Neither such extensive regulation nor the federal insurance of deposits ensures the solvency or profitability of companies in this industry, and there is no assurance against losses in securities issued by such companies. The continued solvency and viability of a particular bank may be adversely affected by factors including, but not limited to, unrealized losses among its underlying assets, aggregate customer withdrawals amounts exceeding a bank's immediately available liquidity, shifts in policy among the Federal Reserve, FDIC and other regulatory bodies and agencies, decreased confidence among a bank's customers, and fears of contagion resulting from failures of other banks. Economic conditions in the real estate market may have a particularly strong effect on certain banks and savings associations.

Companies engaged in investment management and broker-dealer activities are subject to volatility in their earnings and share prices that often exceed the volatility of the equity market in general, as well as increasing levels of pressure on the fees they charge. Adverse changes in the direction of the stock market, increased regulation, investor confidence, equity transaction volume, the level and direction of interest rates and the outlook of emerging markets could adversely affect the financial stability, as well as the stock prices, of these companies.

Companies involved in the insurance, reinsurance and risk management industry underwrite, sell or distribute property, casualty and business insurance. Many factors affect insurance,

reinsurance and risk management company profits, including interest rate movements, the imposition of premium rate caps, a misapprehension of the risks involved in given underwritings, potential antitrust law changes, competition and pressure to compete globally, terrorism, weather catastrophes or other disasters and the effects of client mergers. Individual companies may be exposed to risks including reserve inadequacy and the inability to collect from reinsurance carriers. Life and health insurance companies may be affected by mortality and morbidity rates, including the effect of epidemics/pandemics. Insurance companies are subject to extensive governmental regulation, including the imposition of maximum rate levels, which may not be adequate for some lines of business. Proposed or potential tax law changes may also adversely affect insurance companies' policy sales, tax obligations and profitability.

Health Care Companies

The Trust invests significantly in the common stocks of health care companies. These issuers include companies involved in advanced medical devices and instruments, drugs and biotechnology, managed care, hospital management/health services and medical supplies. These companies face substantial government regulation and approval procedures. General risks of health care companies include extensive competition, product liability litigation and evolving government regulation.

Companies in the health care sector may be impacted by the adoption of new regulations, changes in current laws regarding access to health insurance, the overall risks and costs of compliance with new and existing regulations, and changes in government policy. Proposed regulations may span a wide range of topics, including cost and price controls (which may include a freeze on the prices of prescription drugs), incentives for competition in the provision of health care services, promotion of prepaid health care plans and additional tax incentives and penalties aimed at the health care sector. Changes in health care policy could also reduce government funding for health care related research. The potential long-term effects of new regulations and evolving government policy pertaining to the health care industry is uncertain and cannot be predicted.

Drug and medical products companies also face the risk of increasing competition from new products or services, generic drug sales, product obsolescence, increased government

regulation, termination of patent protection for drug or medical supply products and the risk that a product will never come to market. In particular, these companies are heavily dependent on obtaining and defending patents, which may be time consuming and costly, and the expiration of patents may also adversely affect the profitability of these companies. The research and development costs of bringing a new drug or medical product to market are substantial. This process involves lengthy government review with no guarantee of approval. These companies may have losses and may not offer proposed products for several years, if at all. The failure to gain approval for a new drug or product can have a substantial negative effect on a company and its stock. The goods and services of drug and medical products companies, as well as health care issuers generally, are also subject to risks of malpractice claims, product liability claims or other litigation.

Health crises, such as a pandemic outbreak, can severely impact the health care industry in particular. These crises can disrupt health care services and processes, strain resources and supplies, and are often increasingly difficult to assess and impossible to predict.

Health care facility operators face risks related to demand for services, the ability of the facility to provide required services, an increased emphasis on outpatient services, confidence in the facility, management capabilities, competitive forces that may result in price discounting, efforts by insurers and government agencies to limit rates, expenses, the cost and possible unavailability of malpractice insurance, and termination or restriction of government financial assistance (such as Medicare, Medicaid or similar programs).

Industrials Companies

The Trust is concentrated in the common stocks of industrials companies. General risks of industrials companies include the general state of the economy, intense competition, imposition of import controls, volatility in commodity prices, currency exchange rate fluctuation, consolidation, labor relations, government regulation, supply chain disruptions, domestic and international politics, excess capacity and consumer spending trends.

Companies in the industrials sector may be adversely affected by liability for environmental damage and product liability

claims. Capital goods companies may also be significantly affected by overall capital spending and leverage levels, economic cycles, technical obsolescence, delays in modernization, limitations on supply of key materials, depletion of resources, government regulations, government contracts and e-commerce initiatives.

Industrials companies may also be affected by factors more specific to their individual industries. Industrial machinery manufacturers may be subject to declines in commercial and consumer demand and the need for modernization. Aerospace and defense companies may be influenced by decreased demand for new equipment, order cancellations, disputes over or ability to obtain or retain government contracts, changes in government budget priorities or defense spending policies, changes in aircraft-leasing contracts and cutbacks in profitable business travel. The number of housing starts, levels of public and nonresidential construction including weakening demand for new office and retail space, and overall construction spending may adversely affect construction materials and equipment manufacturers.

Stocks of transportation companies are cyclical and can be significantly affected by economic changes, fuel prices and insurance costs. Transportation companies in certain countries may also be subject to significant government regulation and oversight, which may negatively impact their businesses.

Information Technology Companies

The Trust is concentrated in the common stocks of information technology companies. These include companies that are involved in computer and business services, enterprise software/technical software, Internet and computer software, Internet-related services, networking and telecommunications equipment, telecommunications services, electronics products, server hardware, computer hardware and peripherals, semiconductor capital equipment and semiconductors. These companies face risks related to rapidly changing technology, rapid product obsolescence, government regulation, competition from foreign competitors with lower production costs, supply chain disruptions affecting the production of hardware and equipment, cyclical market patterns, the loss of patent, copyright and trademark protections, evolving industry standards and frequent new product introductions. An

unexpected change in technology can have a significant negative impact on a company. The failure of a company to introduce new products or technologies or keep pace with rapidly changing technology, can have a negative impact on the company's results. Information technology stocks tend to experience substantial price volatility and speculative trading. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability. Additionally, companies in the technology sector may face dramatic and often unpredictable changes in growth rates and competition for the services of qualified personnel. Announcements about new products, technologies, operating results or marketing alliances can cause stock prices to fluctuate dramatically. At times, however, extreme price and volume fluctuations are unrelated to the operating performance of a company. This can impact your ability to redeem your Units at a price equal to or greater than what you paid.

Fixed Portfolio

Investors should be aware that the Trust is not “managed” and as a result, the adverse financial condition of a company will not result in the elimination of its securities from the Portfolio of the Trust except under certain limited circumstances. Investors should note in particular that the Securities were selected on the basis of the criteria set forth under Investment Summary—Investment Concept and Selection Process and that the Trust will generally continue to purchase or hold Securities originally selected through these criteria even though a Security may no longer meet all of the selection criteria. A number of the Securities in the Trust may also be owned by other clients of the Sponsor. However, because these clients may have differing investment objectives, the Sponsor and/or its affiliates may sell or recommend selling certain Securities from those accounts in instances where a sale by the Trust would be impermissible, such as to maximize return by taking advantage of market fluctuations. See Administration of the Trust—Trust Supervision. This may have an adverse effect on the prices of the Securities. In the event a public tender offer is made for a Security or a merger or acquisition is announced affecting a Security, the Sponsor shall instruct the Trustee to accept or reject such offer or take any other action with respect thereto as the Sponsor deems proper.

The Portfolio is regularly reviewed and evaluated and although the Sponsor may instruct the Trustee to sell Securities under certain limited circumstances, Securities will not be sold by the Trust to take advantage of market fluctuations or changes in anticipated rates of appreciation. As a result, the amount realized upon the sale of the Securities may not be the highest price attained by an individual Security during the life of the Trust. The prices of single shares of each of the Securities in the Trust vary widely, and the effect of a dollar of fluctuation, either higher or lower, in stock prices will be much greater as a percentage of the lower-price stocks' purchase price than as a percentage of the higher-price stocks' purchase price.

Additional Securities

Investors should note that in connection with the issuance of additional Units during the Public Offering Period, the Sponsor may deposit cash (or a letter of credit in lieu of cash) with instructions to purchase Securities, additional Securities or contracts to purchase Securities, in each instance maintaining the Proportionate Relationship, subject to adjustment under certain circumstances (for instance, to avoid exceeding the limits on investment companies relating to the acquisition of stocks or securities of securities-related issuers). To the extent the price of a Security increases or decreases between the time cash is deposited with instructions to purchase the Security and the time the cash is used to purchase the Security, Units may represent less or more of that Security and more or less of the other Securities in the Trust. In addition, brokerage fees (if any) incurred in purchasing Securities with cash deposited with instructions to purchase the Securities will be an expense of the Trust. Price fluctuations between the time of deposit and the time the Securities are purchased, and payment of brokerage fees, will affect the value of every Holder's Units and the income per Unit received by the Trust.

Organization Costs

The Securities purchased with the portion of the Public Offering Price intended to be used to reimburse the Sponsor for the Trust's organization costs will be purchased in accordance with the Proportionate Relationship. Securities will be sold to reimburse the Sponsor for the Trust's organization costs after the completion of the initial public offering period, which is expected to be approximately six months, and in any event not later than six months, from the Initial Date of

Deposit (a significantly shorter time period than the life of the Trust). As a result, the net asset value of the Trust will decrease to the extent of such reimbursement. Since this reimbursement to the Sponsor occurs on a one time basis following the close of the initial public offering period, with respect to Units held after the reimbursement has been completed, you will pay the full per Unit amount of any such organization costs even if you redeem your Units prior to the Termination Date.

During the initial public offering period, there may be a decrease in the value of the Securities. To the extent the proceeds from the sale of these Securities are insufficient to repay the Sponsor for the Trust organization costs, the Trustee will sell additional Securities to allow the Trust to fully reimburse the Sponsor. In that event, the net asset value per Unit will be reduced by the amount of additional Securities sold. Although the dollar amount of the reimbursement due to the Sponsor will remain fixed and will never exceed the amount set forth under "Reimbursement to Sponsor for Organization Costs" in the Fee Table, this will result in a greater effective cost per Unit to Holders for the reimbursement to the Sponsor. When Securities are sold to reimburse the Sponsor for organization costs, the Trustee will sell such Securities to an extent which will maintain, to the extent practicable, the Proportionate Relationship.

Termination

The Trust may be terminated early and all outstanding Units liquidated if the net asset value of the Trust falls below \$1,000,000 or less than 40% of the net asset value of the Trust at the completion of the initial public offering period. As the size of the Trust decreases, the Trust's expenses may create an undue burden on your investment. Investors should note that if the net asset value of the Trust should fall below the applicable minimum value, the Sponsor may then in its sole discretion terminate the Trust before the Termination Date specified in the Summary of Essential Information. See Administration of Trust—Amendment and Termination for a more detailed discussion of situations which may lead to the termination of the Trust.

Conflicts of Interest

Certain of the Securities selected for the Trust are subject to conflicts of interest. The Sponsor selected the Securities for the Trust through the process described under "Investment

Summary and Selection Process”. The Sponsor and its affiliates have a range of relationships with certain of the companies contained in the Trust. The inclusion of these companies in the Trust constitutes a conflict of interest, as set forth in detail under “Notes to Portfolio”.

Legal Proceedings and Legislation

At any time after the Initial Date of Deposit, legal proceedings may be initiated on various grounds, or legislation may be enacted, with respect to any of the Securities in the Trust or to matters involving the business of the issuer of the Securities. There can be no assurance that future legal proceedings or legislation will not have a material adverse impact on the Trust or will not impair the ability of the issuers of the Securities to achieve their business and investment goals.

PUBLIC SALE OF UNITS

Public Offering Price

The Public Offering Price of the Units for the Trust is computed by adding any applicable initial sales charge to the net asset value per Unit of the Trust. The net asset value per Unit of the Trust is determined by the Trustee in accordance with the Indenture. The total sales charge is equal, in the aggregate, to a maximum charge of 2.40% of the Public Offering Price (2.459% of the net amount invested in Securities). In addition, during the initial offering period a per Unit amount sufficient to reimburse the Sponsor for organization costs is added to the Public Offering Price for all purchases, including those which are subject to any of the sales charge reductions described below. See Expenses and Charges—Initial Expenses.

The initial sales charge is equal to the difference between the total sales charge (maximum of 2.40% of the Public Offering Price) and the sum of the maximum fixed dollar amount of the remaining deferred sales charge (initially \$0.240 per Unit). As a result, on the Initial Date of Deposit and any other day the Public Offering Price equals \$10.00 per Unit, purchasers will pay no initial sales charge. If the Public Offering Price exceeds \$10.00 per Unit purchasers will pay an initial sales charge calculated as described above. If the Public Offering Price is less than \$10.00 per Unit, purchasers will receive a credit at the time of purchase equal to the difference between their applicable total sales charge (maximum of 2.40% of the Public

Offering Price) and the fixed dollar amount of the remaining deferred sales charge (a “Credit”). The initial sales charge, if any, is deducted from the purchase price of a Unit at the time of purchase and paid to the Sponsor.

The deferred sales charge of \$0.240 per Unit is accrued in five monthly installments and will be charged to the Trust’s capital account established under the Indenture (the “Capital Account”) on the dates specified in the Summary of Essential Information—Deferred Sales Charge Payment Dates. As a result of the deferred sales charge being a fixed dollar amount, if the Public Offering Price exceeds \$10.00 per Unit, the deferred sales charge will be less than 2.40%, and as noted above, an initial sales charge will apply. If the Public Offering Price is less than \$10.00 per Unit, the deferred sales charge will exceed 2.40%, in which case a Credit will be applied to ensure the purchaser is not charged more than the maximum of 2.40% of the Public Offering Price. If a Deferred Sales Charge Payment Date is not a business day, the payment will be charged to the Trust on the next business day. To the extent that the entire deferred sales charge of \$0.240 per Unit has not been deducted at the time of repurchase or redemption of Units prior to the final date specified in the Summary of Essential Information—Deferred Sales Charge Payment Dates, any unpaid amount will be deducted from the proceeds. Units purchased pursuant to the Reinvestment Plan are not subject to the remaining applicable deferred sales charge deduction. See Reinvestment Plan.

Purchasers on the Initial Date of Deposit (the first day Units will be available to the public), will be able to purchase Units at approximately \$10.00 each. To allow Units to be priced at approximately \$10.00, the Units outstanding as of the Evaluation Time on the Initial Date of Deposit (all of which are held by the Sponsor), will be split (or split in reverse). The Public Offering Price on any subsequent date will vary from the Public Offering Price on the Initial Date of Deposit (set forth under Investment Summary) in accordance with fluctuations in the aggregate value of the underlying Securities. Units will be sold to investors at the Public Offering Price next determined after receipt of the investor’s purchase order.

Valuation of Securities by the Evaluator is made as of the close of business on the New York Stock Exchange on each business day. For this purpose, the Trustee provides the Evaluator with closing prices from a reporting service approved by the Evaluator. Securities quoted on a national stock exchange or the

Nasdaq National Market System are valued at the closing sale price. When a market price is not readily available, including certain extraordinary corporate events, events in the securities market and/or world events as a result of which the Evaluator determines that a Security's market price is not accurate, a portfolio Security is valued at its fair value, as determined by the Evaluator or an independent pricing service used by the Evaluator. In these cases, the Trust's net asset value will reflect certain portfolio Securities' fair value rather than their market price. With respect to any Securities that are primarily listed on foreign exchanges, the value of the portfolio Securities may change on days when you will not be able to purchase or sell Units. The value of any foreign securities purchased on a foreign exchange is based on the applicable currency exchange rate as of the Evaluation Time.

Morgan Stanley employees, including those of affiliates, and employee-related accounts according to Morgan Stanley's account linking rules, may purchase Units at the Public Offering Price per Unit less a 2.00% discount applied at the time of purchase.

Since the deferred sales charges are fixed dollar amounts per Unit, the Trust must charge these amounts per Unit regardless of any discounts, including those provided with respect to Units purchased in Fee-Based Accounts. However, purchasers eligible to receive a discount such that their total sales charge is less than the aggregate fixed dollar amount of the deferred sales charges will receive a Credit equal to the difference between their applicable total sales charge and these fixed dollar charges at the time Units are purchased.

Fee-Based Accounts

The Sponsor may offer Units for purchase through a registered investment adviser, certified financial planner or registered broker dealer who either charges periodic fees for brokerage services, financial planning, investment advisory or asset management services, or provides such services in connection with the establishment of an investment account ("Fee-Based Account") for which a comprehensive "wrap fee" is charged on assets held in such an account, which generally would include the value of any Units held in the Fee-Based Account. If the Sponsor elects to offer Units for purchase by Fee-Based Accounts, then purchasers of such Units will not be subject to the sales charge due to the application of a Credit, or pay any other fees to the Sponsor.

You should consult your financial professional to determine whether you can benefit from purchasing Units through a Fee-Based Account. To purchase Units in these Fee-Based Accounts, your financial professional must purchase Units designated with the "Wrap Fee" CUSIP number set forth under "Summary of Essential Information".

Public Distribution

Units will be distributed to the public at the Public Offering Price through the Sponsor, as sole underwriter of the Trust. The Sponsor intends to qualify Units of the Trust for sale in all states of the United States where qualification is deemed necessary by the Sponsor.

Underwriter's and Sponsor's Profits

The Sponsor, as sole underwriter, receives a gross underwriting commission equal to the maximum sales charge per Unit (subject to reduction for purchasers as described under Public Offering Price above). A portion of the sales charge is paid to the financial professional assisting with the sale of Units of the Trust.

In the event that subsequent deposits are effected by the Sponsor with the deposit of securities (as opposed to cash or a letter of credit) with respect to the sale of additional Units to the public, the Sponsor may realize a profit or loss, which equals the difference between the cost of the Securities to the Trust and the Sponsor's purchase price of such Securities. The Sponsor also may realize profits or sustain losses as a result of fluctuations in the Public Offering Price of any Units held by the Sponsor for sale to investors. Cash, if any, made available by buyers of Units to the Sponsor prior to the settlement dates for purchase of Units may be used in the Sponsor's business and may be of benefit to the Sponsor.

The Sponsor and/or its affiliates provide a vast array of financial services to a large number of companies globally and receive compensation for those services from such companies, some of which are issuers of the securities in the Trust's portfolio (see Notes to Portfolio). During the last twelve months, the Sponsor and/or its affiliates, have acted as underwriter, manager or co-manager of a public offering of the securities of, provided investment banking services to, or maintained a market in the securities of certain of the companies in the portfolio of the Trust and/or may seek to do so in the future. The Sponsor and/or its affiliates also provide additional services, including

but not limited to corporate banking, securities underwriting, brokerage, research, asset management and trading, to various companies. Holders should know that the Sponsor and/or its affiliates have received, receive or seek to receive compensation for those services from such companies, which include certain of the companies in the portfolio of the Trust (see Notes to Portfolio). As noted above, the inclusion of any such company in the Trust would constitute a conflict of interest. Please refer to the Conflicts of Interest section and the Notes to Portfolio for additional information.

In maintaining a market for the Units (see Market for Units), the Sponsor will also realize profits or sustain losses in the amount of any difference between the prices at which it buys Units and the prices at which it subsequently resells them or the prices at which the Securities are sold after it redeems such Units to the Trustee, as the case may be.

MARKET FOR UNITS

While the Sponsor is not obligated to do so, its intention is to maintain a market for Units and offer continuously to purchase Units from the Initial Date of Deposit at prices, subject to change at any time, based upon the net asset value per Unit.

The Sponsor may discontinue purchases of Units if the supply of Units exceeds demand or for any other business reason. The Sponsor does not in any way guarantee the enforceability, marketability or price of any Securities in the Portfolio or of the Units. On any given day, however, the price offered by the Sponsor for the purchase of Units shall be an amount not less than the net asset value per Unit on the date on which the Units of the Trust are tendered for redemption. Regardless of whether the Sponsor maintains a market for Units, a Holder will be able to dispose of Units by tendering them for redemption. See Redemption.

The Sponsor may redeem any Units it has purchased in the secondary market to the Trustee at any time. Among the factors which the Sponsor may consider in making such a determination include the number of units of all series of unit trusts which it has in its inventory, the saleability of such units and its estimate of the time required to sell such units and general market conditions. For a description of certain consequences of such redemption for the remaining Holders, see Redemption.

REDEMPTION

You may redeem all or a portion of your Units at any time by sending a request for redemption to your financial professional. Alternatively, you may tender your Units for redemption directly to the Trustee. Although no redemption fee will be charged, your redemption proceeds will be subject to any unpaid portion of the deferred sales charge, and you will be responsible for taxes (or other governmental charges) that may apply. The redemption proceeds you receive will be based on the net asset value per Unit as of the Evaluation Time next following the time you tender your Units for redemption. You will be entitled to receive your redemption proceeds two business days after the day you tender.

The Trustee is empowered to sell Securities in order to make funds available for redemption if funds are not otherwise available in the Capital and Income Accounts to meet redemptions. See Administration of the Trust—Accounts and Distributions. The Trustee will sell Securities from the Trust's portfolio on a pro rata basis unless the Sponsor has supplied a current list of designated Securities from which the Trustee may select the Securities to be sold. Provision is made in the Indenture under which the Sponsor may, but need not, specify minimum amounts in which blocks of Securities are to be sold in order to obtain the best price for the Trust. While these minimum amounts may vary from time to time in accordance with market conditions, the Sponsor believes that the minimum amounts which would be specified would be a sufficient number of shares to obtain institutional rates of brokerage commissions (generally between 1,000 and 5,000 shares).

Any amounts paid on redemption representing income received will be withdrawn from the Income Account to the extent funds are available (an explanation of such Account is set forth under Administration of the Trust—Accounts and Distributions).

A Holder may tender Units for redemption on any weekday (a "Tender Day") the New York Stock Exchange is open. The right of redemption may be suspended and payment postponed for any period, in accordance with applicable law, (1) during which the New York Stock Exchange, Inc. is closed other than for customary weekend and holiday closings, (2) during which the trading on that Exchange is restricted or an emergency exists as a result of which disposal or evaluation of the Securities is not

reasonably practicable or (3) for such periods as the SEC may by order permit.

The aggregate value of the Securities shall be determined by the Trustee in good faith in the following manner: if the Securities are listed on a national securities exchange or the Nasdaq National Market System, such evaluation shall generally be based on the closing sale price on such exchange. When a market price is not readily available, including certain extraordinary corporate events, events in the securities market and/or world events as a result of which the Evaluator determines that a Security's market price is not accurate, a portfolio Security is valued at its fair value, as determined under procedures established by the Evaluator or an independent pricing service used by the Evaluator. The value of any foreign securities purchased on a foreign exchange is based on the applicable currency exchange rate as of the Evaluation Time.

A redemption is a taxable event and may result in capital gain income or loss to the Holder. See Taxes.

EXPENSES AND CHARGES

Initial Expenses—Holders will reimburse the Sponsor on a per Unit basis, for all or a portion of the estimated costs incurred in organizing the Trust including the cost of the initial preparation, printing and execution of the registration statement and the Indenture, federal and state registration fees, the initial fees and expenses of the Trustee, legal expenses and any other out-of-pocket costs. Since the estimated organization costs will be paid from the assets of the Trust as of the close of the initial public offering period, Holders will have paid the full per Unit amount of any such organization costs even if Units are redeemed prior to the Termination Date. To the extent that actual organization costs are less than the estimated amount, only the actual organization costs will be deducted from the assets of the Trust. To the extent that actual organization costs are greater than the estimated amount, only the estimated organization costs added to the Public Offering Price will be reimbursed to the Sponsor. Any balance of the expenses incurred in establishing the Trust, as well as advertising and selling expenses, will be paid at no cost to the Trust. The payment of organization costs from the assets of the Trust to the Sponsor serves only to reimburse the Sponsor for the various payments made to unaffiliated entities on behalf of the

Trust, and does not in any way serve to compensate the Sponsor.

Trustee's Fees—The Trustee's fees are set forth under Summary of Essential Information. The Trustee receives for its services as Trustee and Distribution Agent, payable in monthly installments, the amount set forth under Summary of Essential Information. The Trustee's fee (in respect of services as Trustee), payable monthly, is based on the largest number of Units outstanding during the preceding month. Certain regular and recurring expenses of the Trust, including certain mailing and printing expenses, are borne by the Trust. The Trustee receives benefits to the extent that it holds funds on deposit in the various non-interest bearing accounts created under the Indenture.

The Trustee's fees may be increased without approval of Holders in proportion to increases under the classification "Services Less Rent of Shelter" in the Consumer Price Index for All Urban Consumers published by the United States Department of Labor.

The estimated expenses set forth in the Fee Table do not include the brokerage commissions payable by the Trust in purchasing or redeeming Securities.

Other Charges—These include: (1) fees of the Trustee for extraordinary services (for example, making distributions due to failure of contracts for Securities), (2) expenses of the Trustee incurred for the benefit of the Trust (including legal and auditing expenses) and expenses of counsel designated by the Sponsor, (3) various governmental charges and fees and expenses for maintaining the Trust's registration statement with federal and state authorities, (4) expenses and costs of action taken by the Sponsor, in its discretion, or the Trustee, in its discretion, to protect the Trust and the rights and interests of Holders (for example, expenses in exercising the Trust's rights under the underlying Securities), (5) any foreign custodial and transaction fees (which may include compensation paid to the Trustee or its subsidiaries or affiliates), (6) indemnification of the Trustee for any losses, liabilities and expenses incurred without negligence, bad faith or willful misconduct on its part, (7) indemnification of the Sponsor for any losses, liabilities and expenses incurred without gross negligence, bad faith, willful misconduct or reckless disregard of their duties and (8) expenditures incurred in contacting Holders upon

termination of the Trust. The amounts of these charges and fees are secured by a lien on the Trust.

Payment of Expenses—Funds necessary for the payment of the above fees will be obtained in the following manner: (1) first, by deductions from the Income Account (see below); (2) to the extent the Income Account funds are insufficient, by distribution from the Capital Account (see below) (which will reduce distributions from such accounts); and (3) to the extent the Income and Capital Accounts are insufficient, by selling Securities from the Portfolio and using the proceeds to pay the expenses. Each of these methods of payment will result in a reduction of the net asset value per Unit. Payment of the Deferred Sales Charge will be made in the manner described under Administration of the Trust—Accounts and Distributions below.

Since the Securities are all common stocks, and the income stream produced by dividend payments thereon is unpredictable (see Description of the Trust—Risk Factors), the Sponsor cannot provide any assurance that dividends will be sufficient to meet any or all expenses of the Trust. If dividends are insufficient to cover expenses, it is likely that Securities will have to be sold to meet Trust expenses. Any such sales may result in capital gains or losses to Holders. See Taxes.

ADMINISTRATION OF THE TRUST

Records

The Trustee keeps records of the transactions of the Trust, a current list of the Securities and a copy of the Indenture at its unit investment trust office. Such records are available to Holders for inspection at reasonable times during business hours. Morgan Stanley keeps records of the names, addresses and Units held by all Holders of record.

Accounts and Distributions

Dividends payable to the Trust are credited by the Trustee to the Income Account, as of the date on which the Trust is entitled to receive such dividends as a holder of record of the Securities. All other receipts (e.g., capital gains, proceeds from the sale of Securities, etc.) will be credited by the Trustee to the Capital Account. If a Holder receives his or her distribution in cash, any income distribution for the Holder as of each Record Day will be made on the following Distribution Day or shortly

thereafter and shall consist of an amount equal to the Holder's pro rata share of the distributable balance in the Income Account as of such Record Day, after deducting estimated expenses. The first distribution for persons who purchase Units between a Record Day and a Distribution Day will be made on the second Distribution Day following their purchase of Units. In addition, amounts from the Capital Account may be distributed from time to time to Holders of Record. No distribution need be made from the Capital Account if the balance therein is less than an amount sufficient to distribute \$0.05 per Unit. The Trustee may withdraw from the Income Account, from time to time, such amounts as it deems requisite to establish a reserve for any taxes or other governmental charges that may be payable out of the Trust. Funds held by the Trustee in the various accounts created under the Indenture do not bear interest. Distributions of amounts necessary to pay the Deferred Sales Charge will be made from the Capital Account to an account maintained by the Trustee for purposes of satisfying investors' sales charge obligations.

The Trustee will follow a policy that it will place securities transactions with a broker or dealer only if it expects to obtain the most favorable prices and executions of orders. Transactions in securities held in the Trust are generally made in brokerage transactions (as distinguished from principal transactions) and the Sponsor or any of its affiliates may act as brokers therein if the Trustee expects thereby to obtain the most favorable prices and execution.

The furnishing of statistical and research information to the Trustee by any of the securities dealers through which transactions are executed will not be considered in placing securities transactions.

Trust Supervision

The Trust is a unit investment trust which normally follows a buy and hold investment strategy and is not actively managed (i.e., engage in portfolio changes on the basis of economic, financial and/or market analyses as is typical in a mutual fund). Therefore, while the portfolio is regularly reviewed, the adverse financial condition of an issuer will not necessarily require the sale of its Securities from the Portfolio. However, while it is the intention of the Sponsor to continue the Trust's investment in the Securities and maintain the Proportionate Relationship, it has the power but not the obligation to direct the disposition of

the Securities upon certain limited circumstances described in the Indenture, including, but not limited to: institution of certain legal proceedings enjoining or impeding the declaration or payment of anticipated dividends; default under certain documents adversely affecting future declaration or payment of anticipated dividends or actual default on any outstanding security of the issuer; a substantial decline in price or the occurrence of materially adverse credit factors that, in the opinion of the Sponsor, would make retention of the Securities detrimental to the interest of the Holders; if a security deposited into the Portfolio was not among those identified for inclusion in accordance with the criteria specified under Investment Summary—Investment Concept and Selection Process; or a public tender offer, merger or acquisition affecting the Securities that, in the opinion of the Sponsor, would make the sale of the Securities in the best interests of the Holders. The Sponsor may also instruct the Trustee to take action necessary to ensure that the Trust continues to satisfy the qualifications of a regulated investment company and to avoid imposition of tax on undistributed income of the Trust.

Further, the Trust will likely continue to hold a Security and purchase additional shares even though such Security no longer meets the selection criteria listed under Investment Concept and Selection Process.

In the event a public tender offer is made for a Security or a merger or acquisition is announced affecting a Security, the Sponsor shall instruct the Trustee to accept or reject such offer or take any other action with respect thereto as the Sponsor deems proper. Upon receipt of securities through stock dividends, stock splits, dividend reinvestment plans or other distributions on Securities, the Sponsor shall determine whether to instruct the Trustee to hold or sell such securities, based on considerations such as diversification requirements, income distribution requirements and fees and expenses of the Trust.

The Sponsor is authorized to direct the Trustee to acquire replacement Securities (“Replacement Securities”) to replace any Securities for which purchase contracts have failed (“Failed Securities”), or, in connection with the deposit of Additional Securities, when Securities of an issue originally deposited are unavailable at the time of subsequent deposit. In the event of a Failed Security, the Sponsor will (unless substantially all of the

moneys held in the Trust to cover the purchase are reinvested in Replacement Securities in accordance with the Indenture) refund the cash and sales charge attributable to the failed contract to all Holders on or before the next Distribution Day. The Replacement Securities must be identical issuers of the Failed Securities and are limited to Securities previously included in the portfolio of the Trust.

Any property received by the Trustee after the Initial Date of Deposit as a distribution on any of the Securities in a form other than cash or additional shares of the Securities received in a non-taxable stock dividend or stock split, shall be retained or disposed of by the Trustee as provided in the Indenture. The proceeds of any disposition shall be credited to the Income or Capital Account of the Trust.

In connection with creating additional Units of the Trust following the Initial Date of Deposit, the Sponsor may specify minimum amounts of Additional Securities to be deposited or purchased. If a deposit is not sufficient to acquire minimum amounts of each Security, Additional Securities may be acquired in the order of the Security most under-represented immediately before the deposit when compared to the Proportionate Relationship. If Securities of an issue originally deposited are unavailable at the time of subsequent deposit or cannot be purchased due to regulatory, trading or internal Sponsor (or affiliate) related restrictions, or corporate actions, in accordance with the relevant terms of the Indenture the Sponsor may (1) deposit cash or a letter of credit with instructions to purchase the Security when practicable, (2) deposit (or instruct the Trustee to purchase) Securities of one or more other issuers originally deposited or (3) deposit (or instruct the Trustee to purchase) a Replacement Security that will meet the conditions described above.

Reports to Holders

Holders will receive a statement of dividends and other amounts received by the Trust for each distribution. Within a reasonable time after the end of each year, the Sponsor will provide on its website (www.morganstanley.com/what-we-do/wealth-management/unit-investment-trusts) a statement describing dividends and capital received, actual Trust distributions, Trust expenses, a list of the Securities and other Trust information. Holders may obtain a paper copy of this statement free of charge by requesting one from their financial

advisor. Further, Holders may also obtain evaluations of the Securities upon request to the Trustee. If you have any other questions regarding your account or your Trust, please contact your financial advisor or the Trustee.

Book-Entry Units

Ownership of Units of the Trust will not be evidenced by certificates. All evidence of ownership of the Units will be recorded in book-entry form either at Depository Trust Company (“DTC”) through an investor’s broker’s account or through registration of the Units on the books of the Trustee. Units held through DTC will be deposited by the Sponsor with DTC in the Sponsor’s DTC account and registered in the nominee name CEDE & CO. Individual purchases of beneficial ownership interest in the Trust will be made in book-entry form through DTC or the Trustee. Ownership and transfer of Units will be evidenced and accomplished by book-entries made by DTC and its participants if the Units are evidenced at DTC, or otherwise will be evidenced and accomplished by book-entries made by the Trustee. DTC will record ownership and transfer of the Units among DTC participants and forward all notices and credit all payments received in respect of the Units held by the DTC participants. Beneficial owners of Units will receive written confirmation of their purchases and sale from the broker-dealer or bank from whom their purchase was made. Units are transferable by making a written request properly accompanied by a written instrument or instruments of transfer which should be sent registered or certified mail for the protection of the Holder. Holders must sign such written request exactly as their names appear on the records of the Trust. Such signatures must be guaranteed by a commercial bank or trust company, savings and loan association or by a member firm of a national securities exchange.

Amendment and Termination

The Sponsor may amend the Indenture, with the consent of the Trustee but without the consent of any of the Holders, (1) to cure any ambiguity or to correct or supplement any provision thereof which may be defective or inconsistent, (2) to change any provision thereof as may be required by the SEC or any successor governmental agency, (3) to make such other provisions as shall not materially adversely affect the interest of the Holders (as determined in good faith by the Sponsor) and (4) for the Trust to continue to qualify as a “regulated investment company” for

federal income tax purposes. The Indenture may also be amended in any respect by the Sponsor and the Trustee, or any of the provisions thereof may be waived, with the consent of the Holders of two-thirds of the Units outstanding, provided that no such amendment or waiver will reduce the interest in the Trust of any Holder without the consent of such Holder or reduce the percentage of Units required to consent to any such amendment or waiver without the consent of all Holders.

The Indenture will terminate upon the earlier of the disposition of the last Security held thereunder or the Termination Date specified under the Summary of Essential Information. The Indenture may also be terminated by the Sponsor if the value of the Trust is less than the minimum value set forth under the Summary of Essential Information (as described under Description of the Trust—Risk Factors) and may be terminated early by written instrument executed by the Sponsor and consented to by Holders of two-thirds of the Units. The Sponsor shall deliver written notice of any early termination to each Holder of record within a reasonable period of time prior to such termination. Within a reasonable period of time after such termination, the Trustee must sell all of the Securities then held and distribute to each remaining Holder, after deductions of accrued and unpaid fees, taxes and governmental and other charges, such Holder’s interest in the Income and Capital Accounts.

ROLLOVER OPTION

Holders may elect to rollover all or a portion of their redemption or termination proceeds into units of any Rollover Series, subject to any applicable sales charge (as disclosed in the prospectus for the Rollover Series). A rollover is treated as a redemption of Trust Units (see “Redemption” above) and as a separate purchase of units of the Rollover Series. Rollovers will be effected only in whole units. Holders will pay their share of any brokerage commissions on the sale of underlying Securities when their Units are liquidated. Holders who decide not to rollover their expected termination proceeds will receive a cash distribution after the Trust terminates.

The availability of the rollover option does not constitute a solicitation of an offer to purchase units of a Rollover Series or any other security. A Holder’s election to participate in the rollover option will be treated as an indication of interest only. Holders should contact their financial professionals to find out

what appropriate Rollover Series may be available and to obtain any corresponding prospectus. At any time prior to the liquidation of a Holder's Units in connection with a request to rollover such proceeds into a Rollover Series, such Holder may instead elect to receive their terminating distribution in cash. Exercise of the rollover option will not prevent a Holder from recognizing taxable gain or loss (except in the case of loss, if and to the extent the Rollover Series, as the case may be, is treated as substantially identical to the Trust) as a result of the liquidation, even though no cash will be distributed to pay any taxes. See "Taxes." Holders should consult their own tax advisers in this regard. The Sponsor reserves the right to modify, suspend or terminate the rollover option at any time.

REINVESTMENT PLAN

Distributions of income and/or principal, if any, on Units will be paid in cash. Pursuant to the Trust's "Reinvestment Plan," Holders may elect to automatically reinvest their distributions into additional Units of the Trust at no extra charge. However, the reinvestment of distributions does not avoid a taxable event that otherwise would occur. See "Taxes". If the Holder wishes to participate in the Reinvestment Plan, the Holder must notify his or her financial professional prior to the Record Day to which that election is to apply. The election may be modified or terminated by similar notice. Investors that rollover into the Trust from any prior unit investment trust deposited by the Sponsor (a "Prior Series"), if any, and who participated in the Reinvestment Plan of such Prior Series when it terminated, will continue to have their distributions reinvested into additional Units of the Trust until they elect otherwise.

Distributions being reinvested will be paid in cash to the Sponsor, who will use them to purchase whole Units of the Trust at the net asset value per Unit as of the Evaluation Time on the Distribution Day. Any distributions, or portions thereof, not applied towards the purchase of Units shall be credited towards the Holder's account. These may be either previously issued Units repurchased by the Sponsor or newly issued Units created upon the deposit of additional Securities in the Trust. See Description of the Trust—Structure and Offering. Each participant will receive an account statement reflecting any purchase or sale of Units under the Reinvestment Plan.

The costs of the Reinvestment Plan will be borne by the Sponsor, at no cost to the Trust. The Sponsor reserves the right

to amend, modify or terminate the Reinvestment Plan at any time without prior notice.

RESIGNATION, REMOVAL AND LIMITATIONS ON LIABILITY

Trustee

The Trustee or any successor may resign upon notice to the Sponsor. The Trustee may be removed by the Sponsor without the consent of any of the Holders if the Trustee becomes incapable of acting or becomes bankrupt or its affairs are taken over by public authorities. Such resignation or removal shall become effective upon the acceptance of appointment by the successor. In case of such resignation or removal the Sponsor is to use its best efforts to appoint a successor promptly and if upon resignation of the Trustee no successor has accepted appointment within thirty days after notification, the Trustee may apply to a court of competent jurisdiction for the appointment of a successor. The Trustee shall be under no liability for any action taken in good faith in reliance on prima facie properly executed documents or for the disposition of monies or Securities, nor shall it be liable or responsible in any way for depreciation or loss incurred by reason of the sale of any Security. This provision, however, shall not protect the Trustee in cases of wilful misfeasance, bad faith, negligence or reckless disregard of its obligations and duties. In the event of the failure of the Sponsor to act, the Trustee may act under the Indenture and shall not be liable for any of these actions taken in good faith. The Trustee shall not be personally liable for any taxes or other governmental charges imposed upon or in respect of the Securities or upon the interest thereon. In addition, the Indenture contains other customary provisions limiting the liability of the Trustee.

Sponsor

The Sponsor may resign at any time if a successor Sponsor is appointed by the Trustee in accordance with the Indenture. Any new Sponsor must have a minimum net worth of \$2,000,000 and must serve at rates of compensation deemed by the Trustee to be reasonable and may not exceed amounts prescribed by the SEC. If the Sponsor fails to perform its duties or becomes incapable of acting or becomes bankrupt or its affairs are taken over by public authorities, then the Trustee may (1) appoint a successor Sponsor at rates of compensation

deemed by the Trustee to be reasonable and not exceeding amounts prescribed by the SEC, (2) terminate the Indenture and liquidate the Trust or (3) continue to act as Trustee without terminating the Indenture.

The Sponsor shall be under no liability to the Trust or to the Holders for taking any action or for refraining from taking any action in good faith or for errors in judgment and shall not be liable or responsible in any way for depreciation of any Security or Units or loss incurred in the sale of any Security or Units. This provision, however, shall not protect the Sponsor in cases of wilful misfeasance, bad faith, gross negligence or reckless disregard of its obligations and duties. The Sponsor may transfer all or substantially all of its assets to a corporation or partnership which carries on its business and duly assumes all of its obligations under the Indenture and in such event it shall be relieved of all further liability under the Indenture.

TAXES

The following is a general discussion of certain federal income tax consequences of the purchase, ownership and disposition of the Units by U.S. citizens and residents and corporations organized in the United States as of the date of this Prospectus. Tax laws and their interpretation are subject to change, possibly with retroactive effect. This summary is based on the advice of counsel. The Internal Revenue Service ("IRS") could take a contrary position. Our counsel has not been asked to review the assets of the Trust or to provide an opinion on any tax issues. The Trust does not expect to seek any rulings from the IRS. The summary is limited to investors who hold the Units as "capital assets" (generally, property held for investment) within the meaning of the Code, and does not address the tax consequences of Units held by brokers, dealers, financial institutions, insurance companies, tax-exempt entities, or anyone who holds Units as part of a hedge or straddle or marks to market its holdings.

The Trust intends to qualify annually as a regulated investment company under the Code. To qualify as a regulated investment company, the Trust must generally distribute to its Holders at least 90% of its investment company taxable income (which includes, among other items, dividends, taxable interest and the excess of net short-term capital gains over net long-term capital losses), and meet certain diversification of assets, source of income, and other requirements. By meeting these

requirements, the Trust generally will not be subject to federal income tax on investment company taxable income, and on net capital gains (the excess of net long-term capital gains over net short-term capital losses) designated by the Trust as capital gain dividends, timely distributed to Holders. The Trust intends to distribute enough of its income to avoid the non-deductible 4% federal excise tax imposed on regulated investment companies that do not distribute at least 98% of their ordinary income and 98.2% of their capital gain net income. There is no assurance that the distributions of the Trust will be sufficient to eliminate all taxes at the Trust level in all periods. A Trust may make taxable distributions even during periods in which the unit value has declined.

If for any taxable year the Trust did not qualify as a regulated investment company, all of its taxable income would be subject to tax at the regular corporate rate without any deduction for distributions to Holders, and any distributions would be taxable to the Holders as ordinary dividends to the extent of the Trust's current or accumulated earnings and profits. Such distributions generally would be eligible for the dividends received deduction in the case of corporate Holders and the preferential federal tax rate of 20% applicable to certain qualified dividends from domestic corporations.

The Trust's policy is to distribute as dividends each year 100% (and in no event less than 90%) of its investment company taxable income. Distributions of net ordinary income and net short-term capital gains are taxable to Holders as ordinary income. Certain dividends of the Trust, to the extent attributable to income earned by the Trust from taxable domestic and certain foreign corporations may be eligible for the maximum 20% federal tax rate applicable to qualified dividends if certain holding period and other requirements are met. If the Trust receives at least 95% of its gross income (exclusive of net capital gain) in any taxable year from qualified dividends, all of the ordinary income dividends paid by the Trust will be qualified dividend income. Corporate Holders are generally entitled to the dividends-received deduction to the extent that the Trust's income is derived from qualifying dividends from domestic corporations. Holders should consult their tax adviser regarding specific questions about the dividends received deduction.

Net capital gains of the Trust (net long-term capital gain over net short-term capital loss) realized and distributed by the Trust

and designated as capital gains dividends are taxable to Holders as long-term capital gains, without regard to the length of time the Holder may have held his or her Units in the Trust.

Long-term capital gains distributions are not eligible for the dividends-received deduction. In determining the amount of capital gains to be distributed, available capital loss carry overs from a prior year will be taken into account in determining the amount of net long-term capital gain. Short-term capital gains of the Trust will be taxable to Holders as ordinary income.

Dividends and capital gains income derived from the Trust generally will be included in the net investment income of a Holder, which is subject to a 3.8% federal tax applicable to U.S. taxpayers in the higher income brackets.

Distributions are taxable to investors whether received in cash or reinvested in additional Units of the Trust. Holders receiving a distribution in the form of additional Units will be treated as receiving a distribution in an amount equal to the amount of the cash dividend that otherwise would have been distributable (where the additional Units are purchased in the open market), or the net asset value of the Units received, determined as of the reinvestment date. Holders electing to receive distributions in the form of additional Units will have a cost basis for federal income tax purposes in each Unit so received equal to the value of a Unit on the reinvestment date. The tax laws provide that certain distributions of the Trust declared in October, November and December and paid to Holders in the following January are taxed as if received in December.

Upon the taxable disposition (including a sale or redemption and certain rollovers and exchanges) of Units of the Trust, a Holder may realize a gain or loss depending upon its basis in the Units. Such gain or loss will be treated as capital gain or loss if the Units are capital assets in the Holder's hands, and will be long-term or short-term, generally depending upon the Holder's holding period for the Units. To determine the amount of this gain or loss, you must subtract your adjusted tax basis in your Units from the amount you receive for the sale of the Units. Your initial tax basis in your Units is generally equal to the cost of your Units, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Units. Non-corporate Holders are subject to tax at a maximum federal rate of 20% on capital gains resulting from the disposition of Units held for more than 12 months. However, a loss realized by a

Holder on the disposition of Units with respect to which capital gains dividends have been paid will, to the extent of such capital gain dividends, also be treated as long-term capital loss if such shares have been held by the Holder for six months or less. Further, a loss realized on a disposition will be disallowed to the extent the Units disposed of are replaced (whether by reinvestment of distributions or otherwise) within a period of 61 days beginning 30 days before and ending 30 days after the Units are disposed of. In such a case, the basis of the Units acquired will be adjusted to reflect the disallowed loss. Capital losses in any year are deductible only to the extent of capital gains plus, in the case of a noncorporate taxpayer, \$3,000 of ordinary income (\$1,500 for married individuals filing separately).

Expenses incurred and deducted by the Trust will generally not be treated as taxable income to you. In certain cases, if the Trust is not considered "publicly offered" under the Code, each U.S. Holder that is either an individual, trust or estate will be treated as having received a taxable distribution from the Trust in the amount that Holder's allocable share of certain of the Trust's expenses for the year, and these expenses will be treated as miscellaneous itemized deductions of those U.S. Holders. The deductibility of expenses that are characterized as miscellaneous itemized deductions, which includes investment expenses, is suspended for tax years beginning prior to January 1, 2026.

The Trust is generally required, subject to certain exemptions, to withhold, as backup withholding, at a current federal rate of 24% from dividends paid or credited to Holders and from the proceeds from the redemption of Trust Units if a correct taxpayer identification number, certified when required, is not on file with the Trust, or if the Trust or the Holder have been notified by the IRS that the shareholder is subject to backup withholding. Corporate Holders are not subject to this requirement.

If the Trust invests in securities of foreign issuers, it may be subject to withholding and other similar income taxes imposed by a foreign country.

Under the Foreign Account Tax Compliance Act ("FATCA"), a 30% withholding tax on your Trust's distributions generally applies if paid to a foreign entity unless: (i) if the foreign entity is a "foreign financial institution" as defined under FATCA, the

foreign entity undertakes certain due diligence, reporting, withholding, and certification obligations, (ii) if the foreign entity is not a “foreign financial institution,” it identifies certain of its U.S. investors or (iii) the foreign entity is otherwise excepted under FATCA. If required under the rules above and subject to the applicability of any intergovernmental agreements between the United States and the relevant foreign country, withholding under FATCA may apply to distributions with respect to your Units, but under proposed regulations, upon which taxpayers are entitled to rely until such regulations are finalized, FATCA withholding on gross proceeds from the sale of Units and capital gain distributions from the Trust that were scheduled to take effect on January 1, 2019 is no longer applicable to such types of payments. If withholding is required under FATCA on a payment related to your Units, investors that otherwise would not be subject to withholding (or that otherwise would be entitled to a reduced rate of withholding) on such payment generally will be required to seek a refund or credit from the IRS to obtain the benefit of such exemption or reduction. The Trust will not pay any additional amounts in respect of amounts withheld under FATCA. You should consult your tax advisor regarding the effect of FATCA based on your individual circumstances.

Dividends and distributions may also be subject to state and local taxes and, potentially, foreign taxes applicable to certain Holders.

Investors should carefully consider the tax implications of buying Units prior to a distribution by the Trust. The price of Units purchased at that time includes the amount of the forthcoming distributions. Distributions by the Trust reduce the net asset value per Unit, and if a distribution reduces the net asset value per Unit below a Holder’s cost basis, such distribution, nevertheless, would be taxable to the Holder as ordinary income or capital gain as described above, even though, from an investment standpoint, it may constitute a partial return of capital.

Each Holder who is not a U.S. person should consult their tax advisor regarding the U.S. and foreign tax consequences of ownership of Trust Units, including the possibility that such a non-U.S. Holder may be subject to a U.S. withholding tax at a rate of 30% (or at a lower rate under an applicable income tax treaty) or backup withholding tax at a current rate of 24%, as discussed above, on amounts received by such person.

Distributions received by a non-U.S. Holder from the Trust that are properly reported by the Trust as capital gain dividends, interest-related dividends and as short-term capital gain dividends, may not be subject to U.S. federal income taxes, including withholding taxes, provided that the Trust makes certain elections and certain other conditions are met.

The Trust may be subject to state or local tax in jurisdictions in which the Trust is organized or may be deemed to be doing business.

* * *

After the end of each fiscal year for the Trust, the Trustee will furnish to each Holder a statement containing information relating to the dividends received by the Trust, including qualified dividends, the gross proceeds received by the Trust from the disposition of any Security (resulting from redemption or the sale by the Trust of any Security), and the fees and expenses paid by the Trust. The Trustee will also furnish an information return to each Holder and to the IRS.

Retirement Plans

Because each Holder’s circumstances are different and special tax rules may apply, you should consult your tax adviser about federal, state, local and/or foreign tax considerations that may be relevant to your particular situation. The summary is based on current tax law, which may be changed by legislative, judicial or administrative action. Units of the Trust may be appropriate for purchase by Individual Retirement Accounts (“IRAs”), Keogh plans, pension funds and other qualified retirement plans. Generally, capital gains and income received in each of the foregoing plans are exempt from federal taxation. All distributions from such plans (other than from certain IRAs known as “Roth IRAs”) are generally treated as ordinary income but may be eligible for tax-deferred rollover treatment and, in very limited cases, special 10 year averaging. Holders of Units in IRAs, Keogh plans and other tax-deferred retirement plans should consult their plan custodian as to the appropriate disposition of distributions. Investors considering investment in the Trust through any such plan should review specific tax laws related thereto and should consult their attorneys or tax advisers with respect to the establishment and maintenance of any such plan.

Before investing in the Trust, the trustee or investment manager of an employee benefit plan (e.g., a pension or profit sharing retirement plan) should consider among other things (a) whether the investment is prudent under the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), taking into account the needs of the plan and all of the facts and circumstances of the investment in the Trust; (b) whether the investment satisfies the diversification requirement of Section 404(a)(1)(C) of ERISA; and (c) whether the assets of the Trust are deemed “plan assets” under ERISA and the Department of Labor regulations regarding the definition of “plan assets.”

New York Tax Status

Under the existing income tax laws of the State and City of New York, the Trust will not be taxed as a corporation subject to the New York State franchise tax and the New York City business corporation tax. You should consult your tax advisor regarding potential federal, foreign, state or local taxation with respect to your Units based on your individual circumstances.

MISCELLANEOUS

Trustee

The Bank of New York Mellon is the trustee of the Trust. It is a trust company organized under New York law. The Trustee is subject to supervision and examination by the Superintendent of Banks of the State of New York, the Federal Deposit Insurance Corporation and the Board of Governors of the Federal Reserve System. In connection with the storage and handling of certain Securities deposited in the Trust, the Trustee may use the services of Depository Trust Company. These services may include safekeeping of the Securities, computer book-entry transfer and institutional delivery services. The Depository Trust Company is a limited purpose trust company organized under the Banking Law of the State of New York, a member of the Federal Reserve System and a clearing agency registered under the 1934 Act.

Legal Opinion

The legality of the Units has been passed upon by Morgan, Lewis & Bockius LLP, as special counsel for the Sponsor.

Experts

The statement of financial condition, including the portfolio of investments, of Morgan Stanley Portfolios, Series 66, comprising Capex Captains, as of May 23, 2023 (Initial Date of Deposit) included in this Prospectus, has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report. Such statement of financial condition, including the portfolio of investments, is included in reliance upon the report of such firm given their authority as experts in accounting and auditing.

Sponsor

The Sponsor is, among other things, a registered investment adviser, a registered broker-dealer, a registered futures commission merchant, and a member of the New York Stock Exchange. The Sponsor is also a member of the Financial Industry Regulatory Authority. The Sponsor is one of the largest financial services firms in the United States with branch offices in all 50 states and the District of Columbia.

Morgan Stanley is a global firm engaging, through its various subsidiaries, in a wide range of financial services including:

- securities underwriting, distribution, trading, merger, acquisition, restructuring, real estate, project finance and other corporate finance advisory activities
- merchant banking and other principal investment activities
- brokerage and research services
- asset management
- trading of foreign exchange, commodities and structured financial products and
- global custody, securities clearance services, and securities lending.

The Sponsor and the Trust have adopted a code of ethics requiring employees who have access to information on trust transactions to report personal securities transactions. The purpose of the code is to avoid conflicts of interest and to prevent fraud, deception or misconduct with respect to the Trust.

When units of the Trust are no longer available, this Prospectus may be used as a preliminary prospectus for a future trust. In this case an investor should note that:

The information in this Prospectus is not complete with respect to future trusts and may be changed. No one may sell units of a future trust until a registration statement is filed with the SEC and is effective. This Prospectus is not an offer to sell units and is not soliciting an offer to buy units in any state where the offer or sale is not permitted.

No person is authorized to give any information or to make any representations with respect to this Trust not contained in this Prospectus and you should not rely on any other information. The Trust is registered as a unit investment trust under the Investment Company Act of 1940. Such registration does not imply that the Trust or any of its Units have been guaranteed, sponsored, recommended or approved by the United States or any other state or any agency or office thereof.
