

## A Sub-Fund of Morgan Stanley Funds (UK) Sterling Corporate Bond Fund

### Investment Objective

The Fund aims to provide income while also growing your investment by outperforming, net of fees, the ICE BofA Sterling Non-Gilt Index over 3 years or more.

### Investment Approach

The objective of the Fund is to provide an attractive rate of return through investment primarily in sterling corporate and other sterling non-gilt fixed interest securities. A proportion of the Fund may also invest in non-sterling fixed interest securities as well as UK gilts.

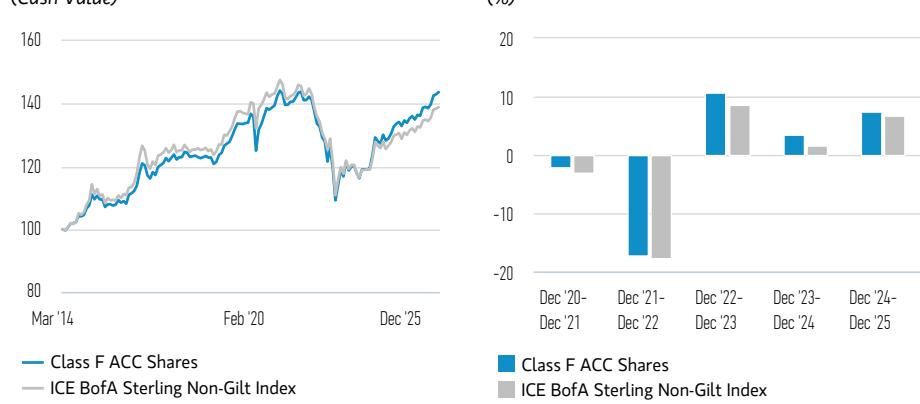

Investment Team	JOINED FIRM	YEARS OF INDUSTRY EXPERIENCE

<sup>1</sup>May not sum to 100% due to the exclusion of other assets and liabilities.

<sup>2</sup> Quality distribution data for securities is sourced from Fitch, Moody's and S&P. Where the credit ratings for individual securities differ between the three ratings agencies, the 'highest' rating is applied. The rating of credit default swaps is based on the 'highest' rating of the underlying reference bond. 'Cash' includes investments in short term instruments, including investments in Morgan Stanley liquidity funds.

Please refer to the Prospectus for full risk disclosures. All data as of 31.12.2025 and subject to change daily.

**Share Class F ACC Risk and Reward Profile****Lower Risk****Higher Risk****Potentially Lower Rewards****Potentially Higher Rewards**

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk-free investment.
- The Fund is in this category because it invests in fixed interest securities and the Fund's simulated and/or realised return has experienced medium rises and falls historically.
- The Fund may be impacted by movements in the exchange rates between the Fund's currency and the currencies of the Fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The value of bonds are likely to decrease if interest rates rise and vice versa.
- The value of financial derivative instruments can be complex and volatile, and may result in losses in excess of the amount invested by the Fund.
- Issuers may not be able to repay their debts, if this happens the value of your investment will decrease. This risk is higher where the Fund invests in a bond with a lower credit rating.
- The Fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the Fund to financial loss.
- Sustainability factors can pose risks to investments, for example: impact asset values and increased operational costs.
- There may be an insufficient number of buyers or sellers which may affect the Fund's ability to buy or sell securities.
- Past performance is not a reliable indicator of future results. Returns may increase or decrease as a result of currency fluctuations. The value of investments and the income from them can go down as well as up and investors may lose all or a substantial portion of his or her investment.
- The value of the investments and the income from them will vary and there can be no assurance that the Fund will achieve its investment objectives.
- Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase. Furthermore, the value of investments may be adversely affected by fluctuations in exchange rates between the investor's reference currency and the base currency of the investments.

**IMPORTANT INFORMATION**

This material has been prepared solely for informational purposes and does not constitute an offer or a recommendation to buy or sell any particular security or to adopt any specific investment strategy. Investors should be aware that a diversified strategy does not protect against a loss in a particular market.

All investments involve risks, including the possible loss of principal. The material contained herein has not been based on a consideration of any individual client circumstances and is not investment advice, nor should it be construed in any way as tax, accounting, legal or regulatory advice. To that end, investors should seek independent legal and financial advice, including advice as to tax consequences, before making any investment decision.

The use of leverage increases risks, such that a relatively small movement in the value of an investment may result in a disproportionately large movement, unfavourable as well as favourable, in the value of that investment and, in turn, the value of the Fund.

Investment in the Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as building or shares of a company, as these are only the underlying assets owned.

Morgan Stanley Investment Management 'MSIM', the asset management division of Morgan Stanley (NYSE: MS), has not authorised financial intermediaries to use and to distribute this material, unless such use and distribution is made in accordance with applicable law and regulation. MSIM shall not be liable for, and accepts no liability for, the use or misuse of this material by any such financial intermediary.

The whole or any part of this material may not be directly or indirectly reproduced, copied, modified, used to create a derivative work, performed, displayed, published, posted, licensed, framed, distributed or transmitted or any of its contents disclosed to third parties without the Firm's express written consent. This material may not be linked to unless such hyperlink is for personal and non-commercial use. All information contained herein is proprietary and is protected under copyright and other applicable law.

This material may be translated into other languages. Where such a translation is made, this English version remains definitive; any discrepancies with another language, the English version prevails.

This material has been prepared on the basis of publicly available information, internally developed data and other third-party sources believed to be reliable. However, no assurances are provided regarding the reliability of such information and MSIM, the Firm has not sought to independently verify information taken from public and third-party sources.

Charts and graphs provided herein are for illustrative purposes only and subject to change.

**DEFINITIONS**

**Alpha** (Jensen's) is a risk-adjusted performance measure that represents the average return on a portfolio or investment above or below that predicted by the capital asset pricing model (CAPM) given the portfolio's or investment's beta and the average market return. Prior to 6/30/2018 Alpha was calculated as the excess return of the fund versus benchmark.

**Average maturity** – weighted average of the maturities of the underlying securities in the portfolio. **Average quality** – average credit quality gives a snapshot of the portfolio's overall credit quality. It is an average of each security's credit rating, adjusted for its relative weighting in the portfolio. **Average yield to maturity** measures the annual return on interest-bearing securities. In this it is assumed that they will be held to maturity. This metric includes both the coupon payments received during the term of the security and the repayment of the capital on maturity. **Beta** is a measure of the relative volatility of a fund to the market's upward or downward movements. A beta greater than 1.0 identifies an issue or fund that will move more than the market, while a beta less than 1.0 identifies an issue or fund that will move less than the market. The Beta of the Market is always equal to 1. **Bloomberg** stands for Bloomberg Global Identifier (BBGID). This is a unique 12 digit alphanumerical code designed to enable the identification of securities, on a Bloomberg Terminal. The Bloomberg Terminal, a system provided by Bloomberg L.P., enables analysts to access and analyse real-time financial market data. Each Bloomberg code starts with the same BBG prefix, followed by nine further characters that are listed for each share class of the Sub-Fund. **Cash & Equivalents** are defined as the value of assets that can be converted into cash immediately. These include commercial paper, open FX transactions, Treasury bills and other short-term instruments. Such instruments are considered cash equivalents because they are deemed liquid and not subject to significant risk of changes in values.

**Duration** is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. Rising interest rates mean falling bond prices, while declining interest rates mean rising bond prices. **Excess Return** or value added (positive or negative) is the portfolio's return relative to the return of the benchmark. **Information ratio** is the portfolio's alpha or excess return per unit of risk, as measured by tracking error, versus the portfolio's benchmark. **ISIN** is the international securities identification number (ISIN), a 12 digit code consisting of numbers and letters that distinctly identifies securities. **NAV** is the Net Asset Value per share of the Sub-Fund (NAV), which represents the value of the assets of a fund less its liabilities. **Number of holdings** provided are a typical range, not a maximum number. The portfolio may exceed this from time to time due to market conditions and outstanding trades. **R squared** measures how well an investment's returns correlate to an index. An R squared of 1.00 means the portfolio performance is 100% correlated to the index's, whereas a low r-squared means that the portfolio performance is less correlated to the

index's. **Sharpe ratio** is a risk-adjusted measure calculated as the ratio of excess return to standard deviation. The Sharpe ratio determines reward per unit of risk. The higher the Sharpe ratio, the better the historical risk-adjusted performance. **Tracking error** is the standard deviation of the difference between the returns of an investment and its benchmark. **Volatility (Standard deviation)** measures how widely individual performance returns, within a performance series, are dispersed from the average or mean value.

#### INDEX INFORMATION

The **ICE BofA Sterling Non-Gilt Index**: tracks the performance of GBP denominated investment grade non-sovereign debt publicly issued in the eurobond or UK domestic market, including quasi-government, corporate, securitized and collateralized securities. Defaulted securities are excluded from the Index.

The Index has been selected as a target benchmark because it is representative of the type of bonds in which the Fund is likely to invest, and it is therefore an appropriate target for the Fund's performance.

The index is unmanaged and does not include any expenses, fees or sales charges. It is not possible to invest directly in an index.

Any index referred to herein is the intellectual property (including registered trademarks) of the applicable licensor. Any product based on an index is in no way sponsored, endorsed, sold or promoted by the applicable licensor and it shall not have any liability with respect thereto. The Sub-Fund is actively managed, and the management of the fund is not constrained by the composition of the Benchmark.

#### DISTRIBUTION

In the UK this material is issued by MSIM Ltd is authorized and regulated by the Financial Conduct Authority. Registered in England. Registered No. 1981121. Registered office: 25 Cabot Square, Canary Wharf, London E14 4QA.

This material is only intended for and will be only distributed to persons resident in jurisdictions where such distribution or availability would not be contrary to local laws or regulations. It is the responsibility of any person in possession of this material and any persons wishing to make an application for shares in pursuant to the Prospectus to inform themselves and observe all applicable laws and regulations of any relevant jurisdictions. MSIM and its affiliates have arrangements in place to market each other's products and services. Each MSIM affiliate is regulated as appropriate in the jurisdiction it operates.

MSIM's affiliates are: Eaton Vance Advisers International Ltd, Calvert Research and Management, Eaton Vance Management, Parametric Portfolio Associates LLC, Atlanta Capital Management LLC and Parametric SAS.

The Fund(s) mentioned herein are not authorized for distribution in the United States 'U.S.' and may not be purchased by U.S. persons and entities other than in accordance with the laws of the U.S.

#### \*MORNINGSTAR

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account sales loads.

The **Europe/Asia and South Africa category (EAA)** includes funds domiciled in European markets, major cross-border Asian markets where material numbers of European UCITS funds are available (principally Hong Kong, Singapore and Taiwan), South Africa, and selected other Asian and African markets where Morningstar believes it is of benefit to investors for the funds to be included in the EAA classification system.
