## Share Class AH (EUR) Risk and Reward Profile

Lower Risk

Higher Risk

Potentially Lower Rewards

Potentially Higher Rewards

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in shares of companies from frontier and emerging markets and the fund's simulated and/or realised return has experienced high rises and falls historically.
- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The value of financial derivative instruments are highly sensitive and may result in losses in excess of the amount invested by the Sub-Fund.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- There may be an insufficient number of buyers or sellers which may affect the funds ability to buy or sell securities.
- Investment in China A-Shares via Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programs may also entail additional risks, such as risks linked to the ownership of shares.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.
- In order to achieve the currency hedging, this share class relies on other parties to fulfil certain contractual obligations, as these parties may fail to do so there is a higher risk to your investment.
- Past performance is not a reliable indicator of future results. Returns may increase or decrease as a result of currency fluctuations. The value of investments and the income from them can go down as well as up and investors may lose all or a substantial portion of his or her investment.
- The value of the investments and the income from them will vary and there can be no assurance that the Fund will achieve its investment objectives.
- Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase. Furthermore, the value of investments may be adversely affected by fluctuations in exchange rates between the investor's reference currency and the base currency of the investments.

## DEFINITIONS

**Active Share** is a measure of the percentage of stock holdings in a managers portfolio that differ from the benchmark index (based on holdings and weight of holdings). Active Share scores range from 0%-100%. A score of 100% means you are completely different from the benchmark. Active Share calculation may consolidate holdings with the same economic exposure. **Bloomberg** stands for 'Bloomberg Global Identifier (BBGID)'. This is a unique 12 digit alphanumeric code designed to enable the identification of securities, such as the Morgan Stanley Investment Funds sub-funds at share class level, on a Bloomberg Terminal. The Bloomberg Terminal, a system provided by Bloomberg L.P., enables analysts to access and analyse real-time financial market data. Each Bloomberg code starts with the same BBG prefix, followed by nine further characters that we list here in this guide for each share class of each fund. **Cash & Equivalents** are defined as the value of assets that can be converted into cash immediately. These include commercial paper, open FX transactions, Treasury bills and other short-term instruments. Such instruments are considered cash equivalents because they are deemed liquid and not subject to significant risk of changes in values. **Dividend yield** is the ratio between how much a company pays out in dividends each year relative to its share price. **ISIN** is the international securities identification number (ISIN), a 12 digit code consisting of numbers and letters that distinctly identifies securities. **NAV** is the Net Asset Value per share of the Fund (NAV), which represents the value of the assets of a fund less its liabilities. **Number of holdings** provided are a typical range, not a maximum number. The portfolio may exceed this from time to time due to market conditions and outstanding trades. **Price/book (P/BV)** compares a stock's market value to the book value per share of total assets less total liabilities. This number is used to judge whether a stock is undervalued or overvalued. **Price/earnings (P/E)** is the price of a stock divided by its earnings per share for the past 12 months. Sometimes called the multiple,

P/E gives investors an idea of how much they are paying for a company's earning power. The higher the P/E, the more investors are paying, and therefore the more earnings growth they are expecting.

## **Liquidity Risk**

The Company and the Management Company have established a liquidity risk process to assess and monitor the liquidity risk profile of the relevant Fund on an on-going basis. A summary of the liquidity management tools that may be implemented by the Management Company and/or the Company is set out below. Such liquidity management tools may be implemented in exceptional circumstances and in the best interest of the relevant Fund and its Shareholders and will have the corresponding effect on investors described below. Please refer to Sections 2.3 and 2.4 of the Prospectus for further information on these liquidity management tools.

### Redemption fee and conversion fee

A redemption fee or conversion fee of up to 2% of an individual redemption or conversion (as the case may be) may be applied where the Management Company, in its discretion, determines that the shareholder has engaged in trading practices which adversely affect the interests of the Company's shareholders or where it is otherwise appropriate to protect the interest of the Company. Such redemption fee and conversion fee will be retained for the benefit of continuing Shareholders of the relevant Fund.

### Suspension of redemption

The Company shall suspend the redemption of Shares of the Company during any period when the calculation of the Net Asset Value per share of the relevant Class is suspended under circumstances set out in section 2.7 of the Prospectus headed "Net Asset Value Determination". Shareholders will not be able to redeem Shares in the affected Fund(s) during the period when the calculation of the Net Asset Value is suspended.

### Gating

Shareholders may not be able to redeem or convert their Shares where application(s) for redemption or conversion in respect of any one Dealing Day is more than 10% of the Net Asset Value of any one Fund. In the event that such 10% threshold in respect of a Dealing Day is exceeded, the Company may scale down each application with respect to such Dealing Day pro rata so that not more than 10% of the Net Asset Value of the relevant Fund be redeemed or converted on such Dealing Day.

Alternatively, the Company may ask such Shareholder(s) affected by the abovementioned gating procedure to accept payment in whole or in part by an in-kind distribution of securities in lieu of cash. No Shareholder can be required to accept an in-kind distribution against their will, and where a Shareholder refuses such in-kind payment, the redemption proceeds will be

paid in the Reference Currency of the Fund or, if applicable, in the currency which the Currency Hedged Share Class is denominated from which the Shareholder is redeeming.

#### Anti-dilution pricing measure

The Management Company may adjust the Net Asset Value of a Fund (“**Swing Pricing**”) to reflect the estimated dealing spreads, costs and charges to be incurred by the Fund in liquidating or purchasing investments (“**Swing Factor**”) to satisfy the net transactions received in respect of a particular Dealing Day. Under normal market circumstances, the Swing Factor shall not exceed 2% of the Net Asset Value of the relevant Fund on the relevant Dealing Day. When net redemptions in a Fund exceed a threshold determined by the Management Company on a given Dealing Day, the Net Asset Value of the Fund may be adjusted downwards by the Swing Factor. If the Net Asset Value of the Fund is adjusted downwards, the redemption proceeds paid to affected Shareholders would likewise be adjusted in a manner proportionate to the then applicable Swing Factor.

#### Restrictions on conversion

The Company may refuse to accept a conversion application if it is detrimental to the interests of the Company or the Shareholders, taking into account the monetary amount or number of Shares to be converted, market conditions or any other circumstances (e.g., short-term trading).
