Morgan Stanley Investment Funds

## Global Focus Property Fund - I Shares (Accumulation Share Class)

### Investment Objective

Long term growth of your investment.

### Investment Approach

The Fund invests in a high-conviction, focused portfolio of primarily equity securities of companies, including depositary receipts (including American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs) in the worldwide real estate industry that may offer the best expected total returns. The Fund implements a disciplined, bottom-up, fundamentally-driven investment methodology and invests in companies which the Team believes have the best forward total return potential based upon relative valuation. The Team assesses real estate specific factors, broader equity factors, and may consider Environmental, Social and Governance (ESG) factors in its fundamental analysis in order to calculate appropriate valuation metrics. Top-down considerations are incorporated into the portfolio construction process, and the Team seeks to achieve exposure across countries and sectors, and integrates forecasted fundamental inflections and macroeconomic considerations, among other factors. The Team actively selects positions in a limited number of equity securities

**Share Class I Risk and Reward Profile**

Potentially Lower Rewards

Potentially Higher Rewards

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in property company shares and the fund's simulated and/or realised return has experienced high rises and falls historically.
- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:

- There are additional risks associated with investing in real estate.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- Sustainability factors can pose risks to investments, for example: impact asset values, increased operational costs.
- There may be an insufficient number of buyers or sellers which may affect the funds ability to buy or sell securities.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.
- Investment in China A-Shares via Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programs may also entail additional risks, such as risks linked to the ownership of shares.
- Past performance is not a reliable indicator of future results. Returns may increase or decrease as a result of currency fluctuations. The value of investments and the income from them can go down as well as up and investors may lose all or a substantial portion of his or her investment.
- The value of the investments and the income from them will vary and there can be no assurance that the Fund will achieve its investment objectives.
- Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase. Furthermore, the value of investments may be adversely affected by fluctuations in exchange rates between the investor's reference currency and the base currency of the investments.
