

A Sub-Fund of Morgan Stanley Investment Funds

QuantActive Global Property Fund

(Accumulating NAV Currency Hedged Share Class)

Investment Objective

Long term growth of your investment.

Investment Approach

We use fundamental analysis to identify companies whose securities may offer the best return potential based on a multi-layered filtering process (bottom-up approach). We apply a quantitative approach by considering a discretionary group of factors including, but not limited to trend, valuation, market capitalisation and further incorporates accounting and valuation assessments to identify equities for inclusion in the portfolio.

All performance data is calculated NAV to NAV, net of fees, and does not take account of commissions and costs incurred on the issue and redemption of shares. The sources for all performance and index data is Morgan Stanley Investment Management (MSIM Ltd).

The value of the investments and the income from them can go down as well as up and an investor may not get back the amount invested.

The Blended Index performance shown is calculated using the FTSE EPRA Nareit Equally Weighted Between North American, European and Asian Regions Index from inception through 30 November 2007, then the FTSE EPRA Nareit Developed Real Estate (Net) Equally Weighted Between North American, European and Asian Regions Index from 1 December 2007 through 31 March 2021 and the FTSE EPRA Nareit Developed Net Total Return Index thereafter.

Effective 22nd November 2024, Morgan Stanley merged the MS INVF European Property Fund into the MS INVF Global Property Fund. Effective 6 December 2024, the MS INVF Global Property Fund was renamed the MS INVF QuantActive Global Property Fund. Both an amendment to the investment strategy of the fund and a name change were implemented at this time, reflecting the new sub-investment manager, Parametric SAS's active quantitative approach. Therefore the Fund's performance, prior to 6 December 2024, was achieved under a different investment strategy and under circumstances that no longer apply.

IMPORTANT INFORMATION

This material has been prepared solely for informational purposes and does not constitute an offer or a recommendation to buy or sell any particular security or to adopt any specific investment strategy. Investors should be aware that a diversified strategy does not protect against a loss in a particular market.

All investments involve risks, including the possible loss of principal. The material contained herein has not been based on a consideration of any individual client circumstances and is not investment advice, nor should it be construed in any way as tax, accounting, legal or regulatory advice. To that end, investors should seek independent legal and financial advice, including advice as to tax consequences, before making any investment decision.

The use of leverage increases risks, such that a relatively small movement in the value of an investment may result in a disproportionately large movement, unfavourable as well as favourable, in the value of that investment and, in turn, the value of the Fund.

Share Class BH (EUR) Risk and Reward Profile

- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.
- There are additional risks associated with investing in real estate.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- Sustainability factors can pose risks to investments, for example: impact asset values, increased operational costs.
- There may be an insufficient number of buyers or sellers which may affect the fund's ability to buy or sell securities.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.
- In order to achieve the currency hedging, this share class relies on other parties to fulfil certain contractual obligations, as these parties may fail to do so there is a higher risk to your investment.
- Past performance is not a reliable indicator of future results. Returns may increase or decrease as a result of currency fluctuations. The value of investments and the income from them can go down as well as up and investors may lose all or a substantial portion of his or her investment.
- The value of the investments and the income from them will vary and there can be no assurance that the Fund will achieve its investment objectives.
- Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase. Furthermore, the value of investments may be adversely affected by fluctuations in exchange rates between the investor's reference currency and the base currency of the investments.

DEFINITIONS

Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index (based on holdings and weight of holdings). Active Share scores range from 0%-100%. A score of 100% means you are completely different from the benchmark. Active Share calculation may consolidate holdings with the same economic exposure. **Bloomberg** stands for Bloomberg Global Identifier (BBGID). This is a unique 12 digit alphanumeric code designed to enable the identification of securities, on a Bloomberg Terminal. The Bloomberg Terminal, a system provided by Bloomberg L.P., enables analysts to access and analyse real-time financial market data. Each Bloomberg code starts with the same BBG prefix, followed by nine further characters that are listed for each share class of the Sub-Fund. **Cash & Equivalents** are defined as the value of assets that can be converted into cash immediately. These include commercial paper, open FX transactions, Treasury bills and other short-term instruments. Such instruments are considered cash equivalents because they are deemed liquid and not subject to significant

risk of changes in values. **Dividend yield** is the ratio between how much a company pays out in dividends each year relative to its share price. **ISIN** is the international securities identification number (ISIN), a 12 digit code consisting of numbers and letters that distinctly identifies securities. **NAV** is the Net Asset Value per share of the Sub-Fund (NAV), which represents the value of the assets of a fund less its liabilities. **Number of holdings** provided are a typical range, not a maximum number. The portfolio may exceed this from time to time due to market conditions and outstanding trades. **Weighted average market capitalization** is an average of the market capitalization of stocks comprising a portfolio or index, adjusted by each stock's weight in the portfolio or index.

INDEX INFORMATION

The **Blended Index** performance shown is calculated using the **FTSE EPRA Nareit Equally Weighted Between North American, European and Asian Regions Index** from inception through 30 November 2007, then the **FTSE EPRA Nareit Developed Real Estate (Net) Equally Weighted Between North American, European and Asian Regions Index** from 1 December 2007 through 31 March 2021 and the **FTSE EPRA Nareit Developed Net Total Return Index** thereafter.

The **FTSE EPRA Nareit Developed Net Total Return Index** is a free float-adjusted market capitalization weighted index designed to reflect the stock performance of companies engaged in specific aspects of the major real estate markets/regions of the developed world. The indexes are unmanaged and do not include any expenses, fees, or sales charges. It is not possible to invest directly in an index.

Any index referred to herein is the intellectual property (including registered trademarks) of the applicable licensor. Any product based on an index is in no way sponsored, endorsed, sold or promoted by the applicable licensor and it shall not have any liability with respect thereto. The Sub-Fund is actively managed, and the management of the fund is not constrained by the composition of the Benchmark.

A blended benchmark has been used because there has been a change in benchmark during the reporting period shown.
