

## INVESTMENT MANAGEMENT

Morgan Stanley Investment Funds

# Sustainable Emerging Markets Equity Fund - A Shares

(Accumulation Share Class)

### Important information

- The Fund invests primarily in emerging country equity securities.
- Investment involves risks. Key risks for this fund include Risk of Investment in Equity, Emerging Market Risk, ESG Investing Risk, Exchange Rate Risk and Risk of Exposure to the Euro and Eurozone.
- There is a risk that you may potentially lose your entire investment in this Fund.
- The investment decision is yours but you should not invest unless the intermediary who sells it to you has advised you that it is suitable for you and has explained why, including how buying it would be consistent with your investment objectives. You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

### Investment Approach

The Sustainable Emerging Markets Equity fund is a diversified, core portfolio seeking to identify growing countries and the quality companies that could potentially benefit. In our integrated process, we translate macro and thematic research and fundamental bottom-up analysis into a growth-oriented portfolio. We take a thematic approach to help identify longer term trends not fully appreciated by the market and construct a diversified portfolio of 70 - 90 stocks we believe are positioned to benefit. The fund engages with management on ESG and sustainability during both the investment process to limit exposure to ESG risks when seeking out sustainable investment opportunities. The Fund strives to align with the objectives of the Paris Agreement on climate change and seeks a lower carbon footprint than the MSCI EM Net Index.

Investment Team	JOINED FIRM	YEARS OF INVESTMENT EXPERIENCE
Paul Psaila, Managing Director	1994	28
Amay Hattangadi, Managing Director	1997	25
Eric Carlson, Head of Sustainability, Emerging Markets Equity Team	1997	26

Effective December 31, 2021, Ruchir Sharma is no longer serving as a portfolio manager on the Fund. The Fund will continue to be co-managed by Paul Psaila, Amay Hattangadi and Eric Carlson.

Team members may be subject to change at any time without notice.

### Class A Shares (% net of fees) vs. Index in USD

**DEFINITIONS**

**Active Share** is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index (based on holdings and weight of holdings). Active Share scores range from 0%-100%. A score of 100% means you are completely different from the benchmark. Active Share calculation may consolidate holdings with the same economic exposure. **Beta** is a measure of the relative volatility of a fund to the market's upward or downward movements. A beta greater than 1.0 identifies an issue or fund that will move more than the market, while a beta less than 1.0 identifies an issue or fund that will move less than the market. The Beta of the Market is always equal to 1. **Bloomberg** stands for

† This Fund is classified as an Article 8 product under the Sustainable Finance Disclosure Regulation. Article 8 products are those which promote environmental or social characteristics and which integrate sustainability into the investment process in a binding manner. Before making any decision to invest in the fund mentioned herein, please refer to all the characteristics and objectives of the Fund noted in the current Prospectus and KIID at [morganstanleyinvestmentfunds.com](http://morganstanleyinvestmentfunds.com).

<sup>1</sup> May not sum to 100% due to the exclusion of other assets and liabilities.

<sup>2</sup> For additional information regarding sector classification/definitions please visit [www.msci.com/gics](http://www.msci.com/gics) and the glossary at [www.morganstanley.com/im](http://www.morganstanley.com/im).

<sup>3</sup> These securities and percentage allocations are only for illustrative purposes and do not constitute, and should not be construed as, investment advice or recommendations with respect to the securities or investments mentioned.

Please refer to the Prospectus for full risk disclosures, available at [www.morganstanleyinvestmentfunds.com](http://www.morganstanleyinvestmentfunds.com). All data as of 31.05.2022 and subject to change daily.

'Bloomberg Global Identifier (BBGID)': This is a unique 12 digit alphanumeric code designed to enable the identification of securities, such as the Morgan Stanley Investment Funds sub-funds at share class level, on a Bloomberg Terminal. The Bloomberg Terminal, a system provided by Bloomberg L.P., enables analysts to access and analyse real-time financial market data. Each Bloomberg code starts with the same BBG prefix, followed by nine further characters that we list here in this guide for each share class of each fund. **Cash & Equivalents** are defined as the value of assets that can be converted into cash immediately. These include commercial paper, open FX transactions, Treasury bills and other short-term instruments. Such instruments are considered cash equivalents because they are deemed liquid and not subject to significant risk of

changes in values. **Dividend yield** is the ratio between how much a company pays out in dividends each year relative to its share price.

**Information ratio** is the portfolio's alpha or excess return per unit of risk, as measured by tracking error, versus the portfolio's benchmark. **ISIN** is the international securities identification number (ISIN), a 12 digit code consisting of numbers and letters that distinctly identifies securities. **NAV** is the Net Asset Value per share of the Fund (NAV), which represents the value of the assets of a fund less its liabilities. **Number of holdings** provided are a typical range, not a maximum number. The portfolio may exceed this from time to time due to market conditions and outstanding trades. **Price/book (P/BV)** compares a stock's market value to the book value per share of total assets less total liabilities. This number is used to judge whether a stock is undervalued or overvalued. **Price/cash flow (P/CF)** is a ratio used to compare a company's market value to its cash flow. It is calculated by dividing the company's per-share stock price by the per-share operating cash flow. **Price/earnings (P/E)** is the price of a stock divided by its earnings per share for the past 12 months. Sometimes called the multiple, P/E gives investors an idea of how much they are paying for a company's earning power. The higher the P/E, the more investors are paying, and therefore the more earnings growth they are expecting. **R squared** measures how well an investment's returns correlate to an index. An R squared of 1.00 means the portfolio performance is 100% correlated to the index's, whereas a low R squared means that the portfolio performance is less correlated to the index's. **Return on equity (ROE)** is the amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested. **Sharpe ratio** is a risk-adjusted measure calculated as the ratio of excess return to standard deviation. The Sharpe ratio determines reward per unit of risk. The higher the Sharpe ratio, the better the historical risk-adjusted performance. **Tracking error** is the standard deviation of the difference between the returns of an investment and its benchmark. **Upside/downside market capture** measures annualized performance in up/down markets relative to the market benchmark. **Volatility (Standard deviation)** measures how widely individual performance returns, within a performance series, are dispersed from the average or mean value. **Weighted average market capitalization** is an average of the market capitalization of stocks comprising a portfolio or index, adjusted by each stock's weight in the portfolio or index. **Weighted median market capitalization** is the point at which half of the market value of a portfolio or index is invested in stocks with a greater market cap, while the other half of the market value is invested in stocks with a lower market cap.

#### INDEX INFORMATION

The **MSCI Emerging Markets Net Index** is a free float-adjusted market capitalization weighted index that is designed to measure equity market performance of emerging markets. The term "free float" represents the portion of shares outstanding that are deemed to be available for purchase in the public equity markets by investors. The MSCI Emerging Markets

Index currently consists of 23 emerging-market country indices. The performance of the index is listed in U.S. dollars and assumes reinvestment of net dividends.

#### DISTRIBUTION

This communication is only intended for and will only be distributed to persons resident in jurisdictions where such distribution or availability would not be contrary to local laws or regulations. In particular, the Shares are not for distribution to US persons.
