(*): The ongoing charges figure is updated as of 1 March 2020 and provides an estimate of the total expenses of each class of the sub-fund. It is based on the fees described in the section on ongoing fees payable by the sub-fund within this KFS together with Specific Additional Costs including tax d'abonnement and hedging expenses, where applicable. These fees and the ongoing charges figure may vary from time to time. It excludes almost all costs of dealing in the sub-fund's underlying investments. For more information, please see the "Charges and Expenses" section of the Prospectus.

WHAT IS THIS PRODUCT ?

Morgan Stanley Investment Funds Global Convertible Bond Fund is a sub-fund of Morgan Stanley Investment Funds which is constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

OBJECTIVES AND INVESTMENT STRATEGY**Objective**

Long term growth of your investment.

Strategy

At least 70% of the sub-fund's value will be invested in convertible bonds, denominated in global currencies, issued by companies in either developed or emerging countries.

The sub-fund may invest up to 30% of its value in other Fixed Income Securities that do not meet the above criteria, as well as a combination of equities and warrants, as an alternative to convertible bonds.

The sub-fund may use derivatives, including exchange traded and over-the-counter options, futures and other derivatives, for investment purposes. Derivatives may be used to manage interest rate, yield-curve and yield spread risk.

For the purpose of cash management, the sub-fund may hold cash and/or invest in cash equivalents such as money market instruments or money market funds, including those managed by the Investment Adviser or advisers affiliated to the Investment Adviser (please refer to the Prospectus for further details).

The sub-fund may invest in debt instruments with loss-absorption features, e.g. contingent convertible debt securities. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger events. The sub-fund's expected total maximum investments in such debt instruments will be no more than 20% of its net asset value.

The sub-fund may invest up to 10% of its assets in open-ended exchange traded funds provided that any exchange-traded funds are eligible investments for undertakings for collective investment in transferable securities.

The investment process takes into account information about environmental, social, and governance issues (also referred to as ESG) when making investment decisions. The Investment Adviser may engage company management around corporate governance practices as well as what it deems to be materially important environmental and/or social issues facing a company.

The sub-fund will measure its performance against the Refinitiv Convertible Global Focus (USD Hedged) Index (the "Benchmark"). The sub-fund is actively managed and is not designed to track the Benchmark. Therefore, the management of the sub-fund is not constrained by the composition of the Benchmark.

USE OF DERIVATIVES / INVESTMENT IN DERIVATIVES

The sub-fund's net derivative exposure may be up to 50% of the sub-fund's net asset value.

WHAT ARE THE KEY RISKS ?

Investment involves risks. Please refer to the offering document including the section headed "Risk Factors" for details including the risk factors.

1. Fixed Income Risk

Funds which invest in Fixed Income Securities will be subject to interest rate and credit risk, and the additional risks associated with securities such as high-yield debt securities or asset backed securities. These risks include:

Convertible Bonds Risk - Convertible bonds are subject to a number of risks including risk arising from both debt and equity securities, and to convertible securities specific risks. Convertible bond valuations are sensitive to macro-economic risk, interest rate risk, spread risk, default risk, and equity risk. In addition, convertible bonds issuers may be downgraded. In certain market conditions convertible bonds may be less liquid than other asset classes.

High Yield Securities Risk - Investing in higher yielding securities (typically those rated lower than BBB- by S&P or lower than Baa3 by Moody's) is speculative as it generally entails increased credit and market risk. Such securities are subject to the issuer's inability to meet principal and interest payments on its obligations and may also be subject to price volatility due to interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity.

Credit Risk - There is a risk of an issuer's inability to meet principal and interest payments on its obligations and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity, if this happens the value of your investment will decrease.

Interest Rate Risk - The values of bonds are usually impacted by the variation of interest rates. The value of a portfolio of bonds is likely to decrease if interest rates rise and vice versa.

Downgrading Risk - The ratings given to securities may be subject to change. The sub-fund may continue to invest in securities that are downgraded after purchase. If the sub-fund holds downgraded securities it may decrease in value due to price volatility on the perceived creditworthiness of the issuer. The sub-fund may not be able to dispose of securities which have been downgraded.

Unrated Securities Risk - Investing in unrated securities may carry increased risk. Such securities may be subject to price volatility and greater risks may be assumed due to interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity. There may also be a higher chance of default in unrated securities than highly rated securities.

2. Exchange Rate Risk

The value of your investment may be impacted by the currency exchange rates between the sub-fund's base currency (US Dollar) and the valuation currencies of the assets which the sub-fund has invested in. This sub-fund invests in a variety of currencies some of whose exchange rates to the US Dollar may be volatile.

3. Emerging Market Currency Risk

This sub-fund invests in assets denominated in emerging market currencies. Many emerging countries have experienced substantial devaluation relative to the currencies of more developed countries.

4. Derivatives Risk

The use of derivatives involves different types of risk, and, in certain cases, this is greater than the risks presented by more traditional investment instruments. These risks include:

Market risk – the value of the derivative may go down as well as up in response to changes in market factors. If a short position is taken and the underlying investments increase in value, losses could, in theory, be unlimited in extreme market conditions.

Liquidity risk – it may be difficult to buy or sell a derivative, particularly if the derivative transaction is large or if the relevant market is illiquid. In such instances it may not be possible to undertake a transaction, or to undertake that transaction at a favourable price.

Counterparty risk – over-the-counter derivatives exposes a sub-fund to the credit of the counterparty and their ability to fulfil the terms of the derivative contract. If the counterparty is made bankrupt or becomes insolvent then the value of the derivative is likely to decline and the sub-fund may experience delays or the inability to realise its investment.

Valuation risk – derivative instruments may not always track closely the value of the underlying assets and consequently they may not be an effective means of following a sub-fund's investment objective.

Leverage risk – derivative instruments allow the sub-fund to gain a larger exposure to asset values than the amount it invests. As a result losses on derivative instruments can exceed the amount invested in them and significantly reduce the value of the sub-fund as a whole, and increase volatility in the sub-fund.

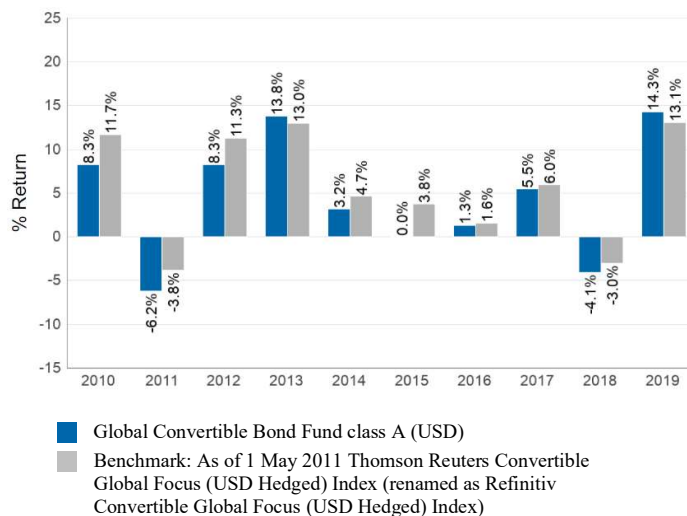

5. Exposure to the Euro and the Eurozone

The Eurozone is an economic and monetary union of 19 European member states that have adopted the Euro as their common currency and sole legal tender. The success of the Euro and the Eurozone is therefore dependent on the general economic and political condition of each member state, as well as each state's credit worthiness and the willingness of the members to remain committed to monetary union and support for the other members. Currently, there are widely held concerns in the market regarding the credit risk associated with certain sovereigns, including some member states of the Eurozone, and the continued viability of the Eurozone.

Default by any state on its Euro debts or a material decline in the credit rating of any Eurozone state could have a material negative impact on the Company and its investments. A number of the sub-funds of the Company may operate in Euro and/or may hold Euro denominated assets either directly or as collateral. In addition, the Company's counterparties, banks, custodians and service providers may have direct or indirect exposure to these countries or currency and a default or credit decline could impact their ability to meet their obligations to and/or perform services for the Company. In the event of one or more member states exiting the Eurozone, or the abandonment of the Euro entirely, there may be material negative impact on some or all sub-funds of the Company and the value of investments, including risk of redenomination from Euro into another currency, possible capital controls and legal uncertainty as to the ability to enforce obligations and debts.

Prospective shareholders should inform themselves as to the risks surrounding the Eurozone crisis and the associated risk of an investment in the Company, taking into account the uncertainty as to how the Eurozone crisis and more general global economic situation will continue to evolve.

HOW HAS THE FUND PERFORMED ?

Past performance information is not indicative of future performance. Investors may not get back the full amount invested.

The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.

These figures show by how much the sub-fund increased or decreased in value during the calendar year being shown.

The sub-fund was launched in 2002.

This share class was launched in 2002.

Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.

The sub-fund currently measures its performances against the Refinitiv Convertible Global Focus (USD Hedged) Index. However the performance shown was calculated using the ICE BofAML G300 Global Convertible Index USD Hedged from 1 January 2010 to 30 April 2011.

IS THERE ANY GUARANTEE ?

This sub-fund does not have any guarantees. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES ?**Charges which may be payable by you**

You may have to pay the following fees when dealing in the shares of the sub-fund.

Fee	What you pay
Subscription Fee (Sales Charge)	Up to 4% of the amount you buy for classes A, AH, AHX, AX. Up to 3% for classes C, CH, CHX, CX.
Switching Fee (Conversion Fee)	Usually nil, but up to 2% of the conversion value where the Management Company determine the trading activity of the investor has adversely affected other shareholders.
Redemption Fee	Usually nil, but up to 2% of the redemption value where the Management Company determine the trading activity of the investor has adversely affected other shareholders.
Contingent Deferred Sales Charges	Nil for classes A, AH, AHX, AX. Up to 1% of the amount redeemed, if the redemption is within 365 days of the date of subscription for classes C, CH, CHX, CX.

Ongoing fees payable by the Fund

The following expenses will be paid out of the sub-fund. They affect you because they reduce the return you get on your investments.

	Annual Rate
Management Fee	1.00% of the average daily net assets for classes A, AH, AHX, AX. 1.60% of the average daily net assets for classes C, CH, CHX, CX.
Depositary Fee	The Depositary Fee will be paid out of the Administration Charge.
Performance Fee	Not applicable
Administration Charge	Currently 0.19% of the average daily net assets, which is capped at the maximum annual rate of 0.25% as set out in the Prospectus.

All fees and charges will remain in force for an unlimited period, and may be changed by the Management Company as set out in the Prospectus subject to obtaining the prior approval of the Securities and Futures Commission and provision of one month's prior notice to investors where there is an increase in fees and charges.

Other fees

You may have to pay other fees when dealing in the shares of the sub-fund.

ADDITIONAL INFORMATION

- You generally buy and redeem shares of the sub-fund at the sub-fund's next-determined net asset value (NAV) after the transfer agent receives your request in good order on or before 1pm (Central European Time) on the relevant dealing day. The distributors may impose earlier cut-off deadlines.
- If the sub-fund or a class of shares of the sub-fund is being held by investors of Hong Kong, the net asset value per share of the sub-fund is calculated and published daily on www.morganstanleyinvestmentfunds.com in USD.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors from www.morganstanleyinvestmentfunds.com.
