(*): The ongoing charges figure is updated as of 1 March 2020 and provides an estimate of the total expenses of each class of the sub-fund. It is based on the fees described in the section on ongoing fees payable by the sub-fund within this KFS together with Specific Additional Costs including tax d'abonnement and hedging expenses, where applicable. These fees and the ongoing charges figure may vary from time to time. It excludes almost all costs of dealing in the sub-fund's underlying investments. For more information, please see the "Charges and Expenses" section of the Prospectus.

WHAT IS THIS PRODUCT ?

Morgan Stanley Investment Funds Global Opportunity Fund is a sub-fund of Morgan Stanley Investment Funds which is constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

OBJECTIVES AND INVESTMENT STRATEGY

Objective

Long term growth of your investment.

Strategy

At least 70% of the sub-fund's value will be invested in equity securities, including depositary receipts (including American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)), of issuers Located (as defined in the Prospectus) in any country.

The sub-fund may invest up to 30% of its value in other investments, such as debt securities convertible into common shares, preference shares, China A-Shares via Stock Connect, warrants on securities, cash and cash equivalents and other equity linked securities. The sub-fund may invest to a limited extent in units/shares of other collective investment schemes, including Morgan Stanley Investment Funds' Funds and open-ended ETFs. Investment in China A-Shares via Stock Connect may not exceed 20% of the sub-fund's value.

The sub-fund may use financial derivatives including exchange traded and over-the-counter options, futures and other derivatives, for investment purposes to capture market opportunities, or for efficient portfolio management, in order to gain exposure to certain markets at a lower cost or to reduce risk. The sub-fund does not invest extensively or primarily in financial derivatives instruments.

The Investment Adviser emphasises a bottom-up stock selection process, seeking attractive investments on an individual company basis. In selecting securities for investment, the Investment Adviser seeks high quality established and emerging companies that the Investment Adviser believes are undervalued at the time of purchase. The Investment Adviser typically favours companies it believes have sustainable competitive advantages that can be monetised through growth. The investment process integrates analysis of sustainability with respect to disruptive change, financial strength, environmental and social externalities and governance (also referred to as ESG). The Investment Adviser generally considers selling a portfolio holding when it determines that the holding no longer satisfies its investment criteria.

For the purpose of cash management, the sub-fund may hold cash and/or invest in cash equivalents such as money market instruments or money market funds, including those managed by the Investment Adviser, Sub Adviser or advisers affiliated either to the Investment Adviser or the Sub Adviser (please refer to the Prospectus for further details).

The sub-fund measures its performance against the MSCI All Country World Index USD (the "Benchmark"). The sub-fund is actively managed and is not designed to track the Benchmark. Therefore, the management of the sub-fund is not constrained by the composition of the Benchmark.

USE OF DERIVATIVES / INVESTMENT IN DERIVATIVES

The sub-fund's net derivative exposure may be up to 50% of the sub-fund's net asset value.

WHAT ARE THE KEY RISKS ?

Investment involves risks. Please refer to the offering document including the section headed "Risk Factors" for details including the risk factors.

1. Risk of Investment in Equity

Funds which invest in equity securities are subject to the volatility of the capital markets on which these securities are traded and may incur significant losses. The price of equities can be influenced by many factors at the individual company level, as well as by broader economic and political developments, including trends in economic growth, inflation and interest rates, corporate earnings reports, demographic trends and catastrophic events. The value of shares may fall in value and decrease the value of your investment as a whole.

2. Exchange Rate Risk

The value of your investment will be impacted by changes in the currency exchange rates between the sub-fund's base currency (US Dollars) and the currencies in which the underlying securities are denominated.

3. Emerging Market Risk

The sub-fund may invest in emerging market economies. Investing in companies operating in emerging market economies carries a higher level of risk as political, legal and operational systems may be less developed than developed markets.

4. Derivatives Risk

The use of derivatives involves different types of risk, and, in certain cases, this is greater than the risks presented by more traditional investment instruments. These risks include:

Market risk – the value of the derivative may go down as well as up in response to changes in market factors. If a short position is taken and the underlying investments increase in value, losses could, in theory, be unlimited in extreme market conditions.

Liquidity risk – it may be difficult to buy or sell a derivative, particularly if the derivative transaction is large or if the relevant market is illiquid. In such instances it may not be possible to undertake a transaction, or to undertake that transaction at a favourable price.

Counterparty risk – over-the-counter derivatives exposes a sub-fund to the credit of the counterparty and their ability to fulfil the terms of the derivative contract. If the counterparty is made bankrupt or becomes insolvent then the value of the derivative is likely to decline and the sub-fund may experience delays or the inability to realise its investment.

Valuation risk – derivative instruments may not always track closely the value of the underlying assets and consequently they may not be an effective means of following a sub-fund's investment objective.

Leverage risk – derivative instruments allow the sub-fund to gain a larger exposure to asset values than the amount it invests. As a result losses on derivative instruments can exceed the amount invested in them and significantly reduce the value of the sub-fund as a whole, and increase volatility in the sub-fund.

5. Exposure to the Euro and the Eurozone

The Eurozone is an economic and monetary union of 19 European member states that have adopted the Euro as their common currency and sole legal tender. The success of the Euro and the Eurozone is therefore dependent on the general economic and political condition of each member state, as well as each state's credit worthiness and the willingness of the members to remain committed to monetary union and support for the other members. Currently, there are widely held concerns in the market regarding the credit risk associated with certain sovereigns, including some member states of the Eurozone, and the continued viability of the Eurozone.

Default by any state on its Euro debts or a material decline in the credit rating of any Eurozone state could have a material negative impact on the Company and its investments. A number of the sub-funds of the Company may operate in Euro and/or may hold Euro denominated assets either directly or as collateral. In addition, the Company's counterparties, banks, custodians and service providers may have direct or indirect exposure to these countries or currency and a default or credit decline could impact their ability to meet their obligations to and/or perform services for the Company. In the event of one or more member states exiting the Eurozone, or the abandonment of the Euro entirely, there may be material negative impact on some or all sub-funds of the Company and the value of investments, including risk of redenomination from Euro into another currency, possible capital controls and legal uncertainty as to the ability to enforce obligations and debts.

Prospective shareholders should inform themselves as to the risks surrounding the Eurozone crisis and the associated risk of an investment in the Company, taking into account the uncertainty as to how the Eurozone crisis and more general global economic situation will continue to evolve.

HOW HAS THE FUND PERFORMED ?

Past performance information is not indicative of future performance. Investors may not get back the full amount invested.

The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.

These figures show by how much the sub-fund increased or decreased in value during the calendar year being shown. Where no past performance is shown there was insufficient data available in that year to provide performance.

The sub-fund was launched in 2010.

This share class was launched in 2010.

Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.

The sub-fund measures its performance against the MSCI All Country World Index USD.

IS THERE ANY GUARANTEE ?

This sub-fund does not have any guarantees. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES ?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the sub-fund.

Fee	What you pay
Subscription Fee (Sales Charge)	Up to 5.75% of the amount you buy for classes A, AH, AHX, AX. Up to 3% for classes C, CH, CHX, CX.
Switching Fee (Conversion Fee)	Usually nil, but up to 2% of the conversion value where the Management Company determine the trading activity of the investor has adversely affected other shareholders.
Redemption Fee	Usually nil, but up to 2% of the redemption value where the Management Company determine the trading activity of the investor has adversely affected other shareholders.
Contingent Deferred Sales Charges	Nil for classes A, AH, AHX, AX. Up to 1% of the amount redeemed, if the redemption is within 365 days of the date of subscription for classes C, CH, CHX, CX.

Ongoing fees payable by the Fund

The following expenses will be paid out of the sub-fund. They affect you because they reduce the return you get on your investments.

	Annual Rate
Management Fee	1.60% of the average daily net assets for classes A, AH, AHX, AX. 2.40% of the average daily net assets for classes C, CH, CHX, CX.
Depository Fee	The Depository Fee will be paid out of the Administration Charge.
Performance Fee	Not applicable
Administration Charge	Currently 0.19% of the average daily net assets, which is capped at the maximum annual rate of 0.25% as set out in the Prospectus.

All fees and charges will remain in force for an unlimited period, and may be changed by the Management Company as set out in the Prospectus subject to obtaining the prior approval of the Securities and Futures Commission and provision of one month's prior notice to investors where there is an increase in fees and charges.

Other fees

You may have to pay other fees when dealing in the shares of the sub-fund.

ADDITIONAL INFORMATION

- You generally buy and redeem shares of the sub-fund at the sub-fund's next-determined net asset value (NAV) after the transfer agent receives your request in good order on or before 1pm (Central European Time) on the relevant dealing day. The distributors may impose earlier cut-off deadlines.
- If the sub-fund or a class of shares of the sub-fund is being held by investors of Hong Kong, the net asset value per share of the sub-fund is calculated and published daily on www.morganstanleyinvestmentfunds.com in USD.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors from www.morganstanleyinvestmentfunds.com.
