INVESTMENT MANAGEMENT

APPROVED FOR USE IN FRANCE ONLY

Morgan Stanley Liquidity Funds

US Dollar Liquidity Fund (Qualified Accumulating Share Class)

Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this Fund presents disproportionate communication on the consideration of non-financial criteria in its investment policy.

Investment Objective

To provide liquidity and an attractive rate of income relative to short term interest rates, to the extent consistent with the preservation of capital.

Investment Horizon

Targeted for investors with surplus cash deposits who seek liquidity from their investments with same day accessibility.

Investment Process

The Fund will seek to achieve its investment objective by investing in high quality short-term money market instruments denominated in US dollars, including but not limited to: bank certificate of deposits, commercial paper, corporate and sovereign variable and fixed rate bonds, repurchase agreements and cash deposits.

Maximum maturity of individual security	397 days

Currency risk: The fund does not intend to use currency swaps to purchase securities that are denominated in a currency other than the base currency of the fund.

Share Class QN ACC Risk and Reward Profile

Lower Risk Higher Risk

Potentially Lower Rewards Potentially Higher Rewards

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in money market securities and the fund's simulated and/or realised return has experienced low rises and falls historically.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The value of bonds are likely to decrease if interest rates rise and vice versa.
- Issuers may not be able to repay their debts, if this happens the value of your investment will decrease. This risk is higher where the fund invests in a bond with a lower credit rating.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- Past performance is not a reliable indicator of future results. The value of investments and the income from them can go down as well as up and investors may lose all or a substantial portion of his or her investment.
- The value of the investments and the income from them will vary and there can be no assurance that the Fund will achieve its investment objectives.

¹May not sum to 100% due to rounding.

Please refer to the Prospectus for full risk disclosures. All data as of 31.08.2021 and subject to change daily.

270 days and is backed by some financial asset, such as trade receivables, consumer debt receivables, or auto and equipment loans or leases. **Average maturity** – weighted average of the maturities of the underlying securities in the portfolio. **Cash deposits** – cash held on balance sheet at a bank or financial institution. **Certificate of Deposit** - A document issued by a bank or other financial institution that is evidence of a deposit, with the issuer's promise to return the deposit plus earnings at a specified interest rate within a specified time period. **Commercial Paper** - Unsecured short-term corporate debt that is characterized by a single payment at maturity. **Commercial Paper - Interest Bearing** - Unsecured short-term corporate debt that is characterized by a single payment at maturity that earns interest. **Corporate and sovereign variable and fixed rate bonds** – Variable bonds are bonds with floating coupon payments that are adjusted at specific intervals. Fixed rate bonds are long term debt paper that carry a predetermined interest rate. **Corporate Bond** - A corporate bond is a debt security issued by a corporation backed by the payment ability of the company, which is typically money to be earned from future operations. In some cases, the company's physical assets may be used as collateral for

registered trademarks) of the applicable licensor. Any product based on an index is in no way sponsored, endorsed, sold or promoted by the applicable licensor and it shall not have any liability with respect thereto.

The Fund is not a guaranteed investment and is different from an investment in deposits. The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share. The value of investments and the income from them may go down as well as up and you may not get back the amount you originally invested.

Each Fund is authorised to invest up to 100% of its assets in Money Market Instruments issued or guaranteed separately or jointly by a Sovereign Entity and by any other member states of the OECD and their central authorities or central banks subject to certain conditions. Please see Prospectus for further details.
