

Morgan Stanley Institutional Fund Global Endurance Portfolio

1Q19
FACTSHEET

Investment Approach

We seek high-quality established and emerging companies primarily located throughout the world with durable competitive advantages, sustainable growth opportunities, valuable business models and strong management teams. We focus on long-term growth rather than short-term events, with our stock selection informed by rigorous fundamental analysis.

Objective

Seeks long-term capital appreciation.

Investment Team

Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. For the most recent month-end performance figures, please visit morganstanley.com/im or call 1-800-548-7786. Investment returns and principal value will fluctuate and fund shares, when redeemed, may be worth more or less than their original cost.

[†] Inception returns reflect the inception date of the fund.

Performance and fund information is as of March 31, 2019, unless otherwise noted. Returns are net of fees and assume the reinvestment of all dividends and income. Returns for less than one year are cumulative (not annualized). Performance of other share classes will vary.

Please keep in mind that double-digit returns are highly unusual and cannot be sustained. Investors should also be aware that these returns were primarily achieved during favorable market conditions.

Short-term returns may not be indicative of the fund's long-term performance potential. A fund's performance, especially for very short time periods, should not be the sole factor in making your investment decision.

| Expense Ratios | Symbol | Cusip | Gross (%) | Net (%) |
|----------------|--------|-----------|-----------|---------|
| Class A | MSJAX | 617661138 | 2.49 | 1.32 |
| Class C | MSJCX | 617661120 | 3.26 | 2.09 |
| Class I | MSJIX | 617661146 | 2.19 | 1.00 |
| Class IS | MSJSX | 617661112 | 2.14 | 0.95 |

Where the net expense ratio is lower than the gross expense ratio, certain fees have been waived and/or expenses reimbursed. These waivers and/or reimbursements will continue for at least one year from the date of the applicable fund's current prospectus (unless otherwise noted in the applicable prospectus) or until such time as the fund's Board of Directors acts to discontinue all or a portion of such waivers and/or reimbursements. Absent such waivers and/or reimbursements, returns would have been lower. Expenses are based on the fund's current prospectus. The minimum initial investment is \$5,000,000 for Class I shares.

This material is a general communication, which is not impartial and all information provided has been prepared solely for informational and educational purposes and does not constitute an offer or a recommendation to buy or sell any particular security or to adopt any specific investment strategy. The information herein has not been based on a consideration of any individual investor circumstances and is not investment advice, nor should it be construed in any way as tax, accounting, legal or regulatory advice. To that end, investors should seek independent legal and financial advice, including advice as to tax consequences, before making any investment decision.

Past performance is not indicative of future results. Subject to change daily. Fund information is provided for informational purposes only and should not be deemed as a recommendation to buy or sell any security or securities in the sectors and countries presented.

The index data displayed under characteristics and allocations are calculated using MSIM and other third-party methodologies and may differ from data published by the vendor.

PORTFOLIO CHARACTERISTICS DEFINITIONS

Active Share is the fraction of the portfolio or fund that is invested differently than its benchmark as of the last day of the reporting period. A portfolio with a high degree of Active Share does not assure a fund's relative outperformance. Active Share calculation may consolidate holdings with the same economic exposure. **Return on capital** is a measure of a company's efficiency at allocating the capital under its control to profitable investments, calculated by dividing net income minus dividends by total capital. **Earnings per share (EPS) growth** is the weighted average of earnings per share growth for all securities in the portfolio projected for the past five fiscal years. Earnings per share for a company is defined as total earnings divided by shares outstanding. **Weighted median market capitalization** is the point at which half of the market value of a portfolio or index is invested in stocks with a greater market cap, while the other half of the market value is invested in stocks with a lower market cap. **Debt/equity (D/E)** is a measure of a company's financial leverage calculated by dividing its total liabilities by stockholders' equity. **Sales growth** is the increase in sales over a specific period of time, often but not necessarily annually.

RISK CONSIDERATIONS

There is no assurance that a Portfolio will achieve its investment objective. Portfolios are subject to market risk, which is the possibility that the market values of securities owned by the Portfolio will decline and that the value of Portfolio shares may therefore be less than what you paid for them. Accordingly, you can lose money investing in this Portfolio. Please be aware that this Portfolio may be subject to certain additional risks. In general, **equities securities** values also fluctuate in response to activities specific to a company. Investments in **foreign markets** entail special risks such as currency, political, economic, market and liquidity risks. The risks of investing in **emerging market** countries are greater than risks associated with investments in foreign developed countries. **Illiquid securities** may be more difficult to sell and value than publicly traded securities (liquidity risk). Investments in **small- and medium- capitalization companies** tend to be more volatile and less liquid than those of larger, more established, companies.

OTHER CONSIDERATIONS

¹ The **MSCI All Country World Index (ACWI)** is a free float-adjusted market capitalization weighted index designed to measure the equity market performance of developed and emerging markets. The term "free float" represents the portion of shares outstanding that are deemed to be available for purchase in the public equity markets by investors. The performance of the Index is listed in U.S. dollars and assumes reinvestment of net dividends. The index is unmanaged and does not include any expenses, fees or sales charges. It is not possible to invest directly in an index.

* Turnover is sourced from the fund's current prospectus.

Please consider the investment objective, risks, charges and expenses of the fund carefully before investing. The prospectus contains this and other information about the fund. To obtain a prospectus, download one at morganstanley.com/im or call 1-800-548-7786. Please read the prospectus carefully before investing.

Morgan Stanley Investment Management (MSIM) is the asset management division of Morgan Stanley.
