A Core Strategy Augmented by Opportunistic Growth

Change is constant in a global environment where central bank policy and regulation are playing an ever increasing role in asset pricing. The Morgan Stanley Institutional Fund Trust (MSIFT) Core Plus Fixed Income Portfolio can invest beyond traditional fixed income to actively seek opportunistic areas of growth. This approach has led the award winning fund to outperform its peers in both rising and falling markets for the five-year period.

2 There is no assurance that this target will be attained.

---

1 Active and Flexible

The fund actively invests in fixed income globally, with the flexibility to opportunistically invest beyond traditional asset classes to seek additional potential returns.

---

2 Award Winning Performance

In addition to winning the 2021 Lipper Fund Award for Best Core Plus Bond Fund in the ten-year category, the fund is in the top 1% of performance in its Morningstar category over the five-year time period. Rankings are based on total return.*

---

3 High Upside, Low Downside Capture Historically

The fund’s active positioning has historically resulted in significantly better upside and downside capture ratios relative to its peers.
