This brochure provides information about the qualifications and business practice of Calamos Advisors LLC. If you have any questions about the contents of this brochure, please contact us at 630.245.7200 or caminfo@calamos.com.

The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Calamos Advisors LLC is also available on the SEC’s website at www.adviserinfo.sec.gov. You can search this site by a unique identifying number, known as an SEC file number. Our firm’s SEC file number is 801-29688.
Item 2: Material Changes

Consistent with the SEC’s ADV rules, we must provide you with a summary of material changes made to this Brochure since its last publication on March 27, 2019.

Item 4: Advisory Business. Item 4 has been amended to note the dissolution of Timpani Capital Management LLC.

Item 5: Fees and Compensation. Item 5 has been amended to include the minimum account size for wrap-fee and UMA programs. It is noted that separate account fees are typically paid in advance, but may be payable in arrears. In addition, the standard fee schedule has been updated.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss. Item 8 was amended to include updates made to various risks, as well as the addition of inactivity risk and pandemic risk. The investment strategies section was amended to remove two equity strategies: All Cap Value and Emerging Market Equity.

Item 10: Other Financial Industry Activities and Affiliations. Item 10 has been amended to update the firm’s related parties, including the addition of Calamos Avenue Management, LLC and the removal of Timpani Capital Management LLC. Investment Companies section was amended to remove Emerging Market Equity and add the Timpani SMID Growth fund, as well as amend the names of various Calamos Mutual Funds and Closed-End Funds.

Item 12: Brokerage Practices. Item 12 has been amended to provide a more detailed description and further clarification around the trade order aggregation and allocation process.

ANY QUESTIONS: The Chief Compliance Officer (“CCO”) of Calamos Advisors LLC (“CAL”) remains available to address any questions that a client or prospective client may have regarding this Part 2A Brochure.

Item 4: Advisory Business

CORPORATE HISTORY

Calamos Advisors LLC is an investment adviser registered with the U.S. Securities and Exchange Commission (the "SEC") effective May 29, 1987 and a wholly owned subsidiary of Calamos Investments LLC ("CILLC"). Calamos Asset Management, Inc. ("CAM"), formerly a publicly traded company listed on Nasdaq and traded under the symbol CLMS, went private effective February 21, 2017. CAM is the sole manager of Calamos Investments LLC, which owns and manages our operating companies. Unless the context otherwise requires, references to "we," "us," "our," "the firm," "our company" and "Calamos" refer to Calamos Advisors LLC ("CAL"). Please note our use of the term "registered" throughout this brochure does not imply a certain level of skill or training.

The firm’s roots date back to 1977 when John P. Calamos, Sr. began serving clients with an emphasis on investment strategies that seek to maximize the potential of convertible securities to manage risk and build wealth. Our firm, headquartered in Naperville, Illinois, has grown throughout the decades and now includes offices based in New York, San Francisco, Milwaukee and London.

As of December 31, 2017, approximately 22% of the outstanding interests of CILLC was owned by CAM and the remaining 78% of CILLC was owned by Calamos Partners LLC ("CPL") and John P. Calamos, Sr. CAM was a wholly owned subsidiary of CPL, which was owned by Calamos Family Partners, Inc. ("CFP"), John P. Calamos, Sr. and John S. Koudounis. CFP was owned by members of the Calamos family, including John P. Calamos, Sr.

On May 31, 2019, Calamos closed on the acquisition of Timpani Capital Management LLC ("Timpani") a boutique small-and SMID-cap investment manager based in Milwaukee, Wisconsin. SEC Form ADV-W was filed for Timpani on June 10, 2019. The entity was dissolved on February 3, 2020.

INVESTMENT SERVICES

Since the introduction of the firm’s first convertible strategy in 1977, Calamos has continued to expand its product offerings. In 1989, the firm introduced an equity strategy that invests in equity and equity sensitive securities, and in 1990, the firm introduced its U.S. equity growth strategy. In subsequent years, investment offerings expanded to include high yield, value, alternative, total return, enhanced fixed income, international growth equity, and global long/short investment strategies.

The firm offers the following types of investment products: open-end mutual funds, closed-end funds, UCITS, institutional accounts, separately managed accounts, commingled privately placed funds and offshore funds. Products are distributed through Intermediaries, such as investment advisers and broker-dealers both in the U.S. and abroad; Institutional Platforms; and Wealth Management for high net worth individuals and private foundations. Calamos also provides discretionary investment management services directly to institutional investors. We also serve as a sub-investment adviser to investment companies registered under the Investment Company Act of 1940, as amended (the “1940 Act”).

We do not sponsor any “wrap-fee” programs, but Calamos participates in several “wrap-fee” and unified managed accounts ("UMA") programs (collectively, the “Wrap Programs”), which are sponsored by unaffiliated (third-party) investment advisory and/or brokerage firms (each a “Sponsor” and collectively, the “Sponsors”). We participate as a non-discretionary sub-adviser in Wrap Programs. In these Wrap Programs, a third-party Sponsor offers our firm’s strategies to its clients. We receive a fee from the third party as an investment adviser in these Wrap Programs.

Calamos provides, to third-party investment advisers, Model Portfolios/Portfolio Emulations Services (“Model Portfolio”) for a fee. Model Portfolios contain Calamos’ current investment recommendations based on one of its investment strategies and other investment parameters as agreed to between Calamos and a third-party client or program Sponsor for the client’s or Sponsor’s use in advising its clients. Although Calamos provides recommendations, it does not have the authority or responsibility to implement those recommendations for any particular account. Rather, the client or third-party program Sponsor receiving the model and any updates to the
model controls all investment decisions and executes the securities transactions on behalf of its own account or for the account of its clients.

There likely will be differences between these Model Portfolios and the discretionary portfolios managed by the firm for its other clients, including cash availability, investment restrictions, account size, holding limits, tax considerations, trade executions and other factors. As a result, the performance of our discretionary advisory clients and that of the Model Portfolios using the same investment strategies will differ.

TAILORED SERVICES

For most types of accounts for which Calamos has investment discretion, we allow clients to customize their investments, upon their request, by imposing reasonable investment restrictions on certain securities, industries or sectors. In these cases, the client will provide Calamos with written instructions. These requests are typically received at account inception but reasonable restrictions may be requested, in writing, at any time thereafter, and must be agreed to by Calamos.

OTHER

Given the multiple potential services that Calamos may provide to a client (and/or to a Fund in which clients may invest), conflicts of interest will arise. When using multiple Calamos (or affiliate) services and products (e.g., consulting and portfolio management), a client should be aware of the conflicts that may arise, consult its own adviser(s), and satisfy itself that the arrangement is appropriate and in its continuing best interests.

Calamos and its affiliates are not required to devote their full-time or attention to managing your assets. We conduct other business and also provide investment counseling services to other clients that can be competitive with the activities provided to you. In advising other accounts, we give advice and make recommendations to such accounts, which can be the same, similar to, or different from those rendered to you. Differing compensation arrangements with other clients create incentives for us to favor such other clients.

Calamos personnel may have more than one role at the company. Certain portfolio managers also serve as traders or research analysts. Further, certain research analysts offer investment ideas for team-managed products. Personnel with multiple roles may have an incentive to favor certain accounts or responsibilities over others.

John P. Calamos, Sr., Founder, Chairman and Global Chief Investment Officer, and his family have controlling interest in the firm. This affiliation creates a conflict of interest between our duty to act in your best interest while acting in the best interest of the firm.

The firm has in place policies and procedures to address conflicts of interest or potential conflicts of interest. These policies and procedures are described throughout this brochure and include requirements that Calamos employees act in the best interest of the client.

ASSETS UNDER MANAGEMENT

As of December 31, 2019 Calamos had approximately $25.2 billion total assets under management.

Item 5: Fees and Compensation

SEPARATE ACCOUNTS

Separate accounts are individual portfolios of securities managed to meet clients’ unique needs and include institutional accounts and managed accounts. Generally, the minimum account size for a separate account ranges from $1 million to $25 million depending on the strategy selected. The minimum account size for wrap-fee and UMA programs is typically $75,000 to $100,000, depending on the strategy and planSponsor minimums. Calamos reserves the right to waive or reduce the minimum account size at our discretion. Separate account fees are based upon a percentage of assets under management, typically calculated and invoiced at the end of each calendar
quarter, and are normally payable quarterly in advance. Fees may also be payable in arrears. Please see your Investment Management Agreement to determine your schedule.

Below is the standard fee schedule.

</table>

A description of the investment strategies available in separate accounts is provided in Item 8.
Please note that there are CAL strategies provided in Item 8 that are only offered to Calamos Wealth Management LLC (“CWM”) clients; see CWM Form ADV 2A for information on those fees schedules.

**Limited Negotiability of Advisory Fees:** Although Calamos has established the standard fee structure set forth above, we retain the discretion to negotiate or waive fees on a client-by-client basis. Also, pre-existing advisory clients are subject to our minimum account requirements and advisory fees in effect at the time the client entered into the advisory relationship with us. Therefore, the applicable minimum account requirements as well as advisory fees paid will differ among clients, and other clients may pay less than you or have lower minimums.

In determining the fee structure for your account, we consider the nature of our proposed advisory relationship with you. The nature of our proposed advisory relationship is determined by the assets to be placed under our management, anticipated future additional assets, services provided, other accounts you may have with us, account type, portfolio style, account composition, and reporting, among other factors. We may group certain of your accounts for the purposes of meeting the minimum account size requirements and determining the annualized fee. Your specific annual fee structure is described in your investment advisory agreement.

Discounts are offered to the firm’s employees, their family members and friends.

It should be noted that while we believe our fees are reasonable, similar advisory services may be available from other investment advisers for lower fees. Similarly, certain of the investment products that we recommend for your account will be available through other brokers or intermediaries that are not affiliated with Calamos.

The only compensation received by Calamos for effecting securities transactions for clients is its advisory fees. Calamos will also receive certain non-financial soft dollar benefits. See Item 12 Brokerage Practices for more details.

**Termination of the Advisory Relationship:** Under our current form of the advisory agreement, the agreement may be terminated at any time, by either party, for any reason upon receipt of 30 days written notice. Upon termination of your account, any prepaid, unearned fees will be refunded to you promptly. Calamos will issue you an invoice for any unpaid fees. In calculating your remaining fee or reimbursement, we will prorate the fee or reimbursement according to the number of days remaining in the billing period.

**“WRAP-FEE” AND SIMILAR ARRANGEMENTS**

Calamos participates in several Wrap Programs. As a client in a Wrap Program, you should carefully review the Sponsor’s Form ADV Part 2A for complete details regarding the Wrap Program. The typical minimum account size is $75,000 to $100,000 depending on the strategy and Sponsor minimums. Calamos reserves the right to waive or reduce the minimum account size at our discretion. A client participating in these Wrap Programs should be aware that the Sponsor will charge various program fees; e.g. trade away fees, in addition to the advisory fee charged by Calamos. All such fee disclosures are provided in the Sponsor’s Form ADV Part 2A.

**MUTUAL FUNDS**

We receive investment advisory, administration, and other fund expenses and distribution fees as a service provider to the Calamos Family of Funds (the “Mutual Funds”), which are registered under the 1940 Act. These fees are described in the Mutual Funds’ registration statements, shareholder reports, and the funds’ prospectuses,
which are available online at http://www.calamos.com/FundInvestor/LiteratureLibrary. We also act as sub-adviser to unaffiliated mutual funds and the fees associated with those funds are described in the registration statements and/or financial filings of those funds.

Certain Calamos supervised persons and related sales personnel are also associated with Calamos Financial Services LLC ("CFS"), an affiliated limited purpose broker-dealer, and in that capacity engage in marketing or selling activities with respect to shares in the Mutual Funds. Supervised persons and related sales personnel are compensated for successful marketing or selling activities with respect to shares in the Mutual Funds. These compensation arrangements create potential conflicts of interest that give Calamos and its supervised persons and related sales personnel an incentive to recommend particular Mutual Funds to potential investors based on the compensation received rather than on a mutual fund investor’s needs. The Calamos Mutual Funds website provides information describing Wholesaler compensation at:

Additionally, the Mutual Funds’ prospectuses provide additional details to help prospective investors understand potential conflicts of interest associated with the compensation of the intermediaries that sell fund shares.

We do not receive revenue sharing payments from funds or other advisers.

CLOSED-END FUNDS

The investment advisory fees that we receive as an investment adviser to the Calamos Closed-End Funds are described in the registration statements and financial filings of those funds. Registration Statements, financial filings and press releases are also available online at http://calamos.com/FundInvestor/LiteratureLibrary.

UNDERTAKING FOR COLLECTIVE INVESTMENTS

Calamos serves as investment manager to the Calamos Global Funds plc, an umbrella fund with variable capital formed as UCITS and authorized by the Irish Central Bank. The investment management fees that we receive are described in the prospectus of the Calamos Global Funds plc, which is available online at http://www.calamos.com/Global/LiteratureLibrary. The UCITS are available to non-U.S. clients only.

POOLED INVESTMENT VEHICLES

Calamos serves as the investment adviser to the Calamos Advisors LLC Master Group Trust Global Opportunities Trust ("Group Trust"). The fees relating to the Group Trust are described in the investment management and investment advisory agreements between Calamos and the Group Trust.

Our firm also serves as General Partner and investment adviser to the Calamos Global Opportunities Fund Limited Partnership. Fees relating to the Calamos Global Opportunities Fund Limited Partnership are further described in the Confidential Private Offering Memoranda. These products are available to accredited investors only.

Calamos serves as the Investment Manager and General Partner to the Calamos Ares Quant Fund I, LP. This fund is not currently offered to investors.

CUSTODY FEES

Calamos does not maintain custody of account assets. Rather, you must establish a custody account with an unaffiliated custodian. Your custodian will charge you fees for providing custody services for the assets held by them.

OTHER FEES OR EXPENSES

In addition to the fees and expenses described in the foregoing section, you will also pay costs such as brokerage commissions and equivalents, markups and markdowns, transaction fees, custodial fees, transfer taxes, wire
transfer fees, and other fees and taxes charged to brokerage accounts and securities transactions, which are in addition to the advisory fee collected by Calamos (See Item 12 for more details).

Open-end mutual funds, closed-end funds and UCITS are subject to various fees and expenses, including administrative, custody and other fees that are borne by investors. These fees are disclosed in the fund’s prospectus and financial filings.

As noted above, any taxes incurred are in addition to the advisory fee collected by Calamos, and you should understand that the purchases and sales of the securities, including those resulting from reallocation or rebalancing of your account, may be taxable events.

**COMPENSATION**

Compensation for investment professionals includes a base salary and an annual discretionary cash bonus (driven by investment, company and individual performance). Senior level investment professionals are also eligible for discretionary Long Term Incentive (“LTI”) awards based on individual and collective performance, however these awards are not guaranteed from year to year. The LTI program at Calamos for investment professionals is a Mutual Fund Incentive Award with amounts deemed to be invested in one or more funds. “Funds” mean mutual funds, ETFs or private funds managed by CAL or a subsidiary of CAL. Portfolio performance is utilized as one factor in determining the annual discretionary bonus; another factor is overall performance of CAL.

The compensation structure for portfolio managers generally does not differentiate between the funds or other accounts managed by the portfolio managers, and is determined as described above, with the exception of the compensation for the portfolio manager for Calamos Phineus Long/Short Fund and the portfolio manager to Calamos Timpani Small Cap Growth.

In addition to the compensation described above in the first paragraph of this section, the Phineus Long/Short Fund portfolio manager may earn bonus payments related to the asset levels within the Calamos Phineus Long/Short Fund. He does not receive additional bonus payments for the Calamos Growth Fund or other portfolios and strategies he manages, therefore the portfolio manager is incentivized to favor Calamos Phineus Long/Short Fund over Calamos Growth Fund and other portfolios and strategies.

In addition to the compensation described above, the portfolio manager of Calamos Timpani Small Cap Growth Fund is also eligible to receive certain “Timpani Team Revenue Share” payments, which are defined as a percentage of management fees over certain thresholds.

The portfolio managers for SMID Cap Growth Fund and Enhanced Alpha accounts also may earn “Timpani Team Revenue Share” payments, which are defined as a percentage of management fees over certain thresholds.

To mitigate the conflict of preferentially allocating investment opportunities, CAL has in place policies and procedures designed to allocate investment and trading opportunities among similarly situated clients on a fair and equitable basis over time.

**Item 6: Performance-Based Fees and Side-By-Side Management**

**PERFORMANCE-BASED FEES**

Calamos or an affiliate may receive performance-based or incentive fees from you or funds in which you invest.

A performance fee arrangement may create an incentive for the portfolio manager to make investments that are riskier or more speculative than would be the case in the absence of performance fees. A performance fee arrangement may result in increased compensation to the co-portfolio managers from such accounts due to unrealized appreciation as well as realized gains in the client’s account. A performance fee arrangement may result in increased compensation to the portfolio manager from such accounts due to unrealized appreciation as well as realized gains in the client’s account, therefore, Calamos has an incentive to favor such accounts.
Calamos is the adviser to two mutual funds that make fee adjustments based on fund performance. The Calamos International Growth Fund and the Calamos Global Equity Fund each pay a base fee, subject to possible adjustment based on the fund’s performance, as described in the fund’s prospectus. The payment and calculation of the performance adjustment is subject to the ultimate supervision of the board of trustees of the funds, Calamos will receive a positive performance adjustment even if the fund has a negative return over a performance measurement period if it otherwise outperforms its respective index during that period.

A portfolio manager will be faced with a conflict of interest when allocating investment opportunities, given the possibility of greater fees from accounts that pay performance-based fees as opposed to accounts that do not pay performance-based fees.

To the extent that Calamos receives performance fees, allocations or otherwise receives higher performance fees, allocations or investment management fees from a client than it does with respect to clients generally, Calamos will have an economic incentive to allocate additional resources or investment professionals to such client and, to the extent such resources are limited, away from other clients.

To address these types of conflicts, we have adopted policies and procedures that promote the allocation of investment opportunities in a manner consistent with our obligations as an investment adviser. See Item 12 for additional information on our trade allocation procedures. To further manage these types of conflicts, we have implemented policies and procedures, discussed in greater detail below, that are designed in part to manage and mitigate the potential conflicts arising from the management of traditional investment portfolios alongside alternative investment portfolios, including conflicts arising from differences in fee structures.

SIDE-BY-SIDE MANAGEMENT

Management of multiple portfolios gives rise to conflicts of interest. These include, for example, conflicts among investment strategies, conflicts in the allocation of investment opportunities, or conflicts due to different fees. Some accounts have higher fees than others. Fees charged to clients differ depending upon a number of factors including, but not limited to, the particular strategy, the size of the portfolio being managed, the relationship with the client, the service requirements, or the account type (e.g., separately managed accounts). Based on these factors, a client may pay higher fees than another client in the same strategy. Also, clients with larger assets under management generate more revenue for CAL than smaller accounts. These differences give rise to a conflict that a portfolio manager may favor the higher fee-paying account over the other or allocate more time to the management of one account over another.

Also, Calamos serves as an advisor to long-only accounts, accounts that execute short sales, and a long/short account. Calamos sells short securities in a long-short account while oftentimes holding long the same security in another account. In this case, we could harm the performance of the long-only accounts for the benefit of accounts that execute short sales, which may include performance-based fee accounts. For example, continually selling a position short may depress the stock price, which would harm a long-only account holding the same security.

As noted above (See Item 5) the portfolio manager for Calamos Phineus Long/Short Fund is incentivized to favor this fund over the other accounts he manages.

To manage these conflicts, we have implemented Side-by-Side Management policies and procedures designed to set out specific requirements regarding the side-by-side management of traditional investment portfolios (e.g., long-only portfolios) and alternative investment portfolios, including without limitation, those associated with any differences in fee structures, investments in the alternative investment portfolios by Calamos or its employees and trading-related conflicts including conflicts of interest that may also be raised when Calamos investment teams take conflicting (i.e., opposite direction) positions in the same or related securities for different accounts. In addition, we have established a Side-by-Side Management Committee that seeks to ensure that such conflicts are reviewed and managed appropriately.
Item 7: Types of Clients

Calamos provides investment management services to:

- institutional clients such as corporations and financial institutions;
- registered investment companies, open-end funds, or mutual funds;
- closed-end funds;
- charitable institutions, foundations and endowments;
- corporate pensions, profit sharing and other retirement plans;
- municipalities;
- individuals;
- Taft-Hartley plans; and
- pooled investment vehicles

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

**METHODS OF ANALYSIS**

We believe our edge or value as an investment manager is our ability to evaluate businesses strategically by marrying top-down insights with rigorous bottom-up fundamental research. We employ an active, high-conviction investment approach to building portfolios. A collaborative team-managed approach allows us to fully evaluate all elements of an investment idea. Top-down perspective, proprietary fundamental research and risk-management drive the portfolio construction process across all strategies.

Our investment organization is structured so that each portfolio management team maintains a dedicated focus on their area of expertise, while drawing on our shared perspectives. We believe this focus on specialization is essential because the diverse investment strategies that we offer require distinct skill sets to capitalize on investment opportunities.

Our investment analysis considers Environmental, Social and Governance (“ESG”) factors. Our commitment to investing revolves around our fiduciary responsibility to our investment advisory clients, and our dedication to generating the best risk-adjusted returns possible in line with our clients’ investment objectives. Acting in our advisory clients’ long-term best interest is paramount to everything we do. Our approach to sustainable investing, and in particular the impact of ESG factors is incorporated in our fundamental investment process. As with all other factors, the impact of ESG factors on our investment decision is at all times within the context of our commitment to our clients’ long-term best interests.

Chaired by John P. Calamos, Sr., the Calamos Investment Committee establishes our firm’s top-down views on the macro environment, market direction, country/sector positioning, asset allocation, and secular/cyclical themes. These views inform our economic outlook and broad thematic perspectives, providing direction for fundamental research and portfolio construction. The Investment Committee is also responsible for reviewing portfolio risk metrics, positioning, and investment performance across strategies, as well as recommending enhancements to the investment process.

The Calamos Investment Committee includes:

- John P. Calamos, Sr., Founder, Chairman, Global Chief Investment Officer (“CIO”)
- Matt Freund, CFA, Co-CIO, Head of Fixed Income Strategies, Senior Co-Portfolio Manager
- Michael Grant, Co-CIO, Head of Long/Short Strategies and Growth Strategies
- John Hillenbrand, CPA, Co-CIO, Head of Multi-Asset Strategies and Co-Head of Convertible Strategies, Senior Co-Portfolio Manager
- Nick Niziolek, CFA, Co-CIO, Head of Global Strategies and Senior Co-Portfolio Manager
• Eli Pars, CFA, Co-CIO, Head of Alternative Strategies and Co-Head of Convertible Strategies, Senior Co-Portfolio Manager
• Joe Mariano, CFA, SVP, Global Head of Trading and Co-Head of Risk
• Derek Olsen, CFA, SVP, Chief of Information Technology & Operations and Co-Head of Risk

Our bottom-up research utilizes both qualitative and quantitative criteria. Quantitative research provides a starting point that allows us to target investment candidates for deeper qualitative analysis.

Risk management is a shared function across the investment team undertaken by the co-portfolio managers and research analysts on a daily basis as we analyze risk at the issuing company, security and portfolio levels as well as across our investment firm. Our strategies also benefit from the contributions of a dedicated team focused on risk management. See also Risk Factors below.

**Investment Process: Equity and convertible strategies**

Our growth equity, value equity and convertible strategies pair bottom-up fundamental research with our top-down analysis of secular themes, macro trends and other factors. Our strategies benefit from a team-based approach and decades of experience. While we view ourselves as fundamental investors, our research blends both qualitative and quantitative analysis, with the latter helping to frame and focus our deeper fundamental research. Before investing, we carefully consider a security’s impact on a portfolio’s industry and sector allocations, referencing our macroeconomic outlook and thematic considerations. We also utilize quantitative analysis to help us more efficiently analyze fundamental and market dynamics.

Since our founding in the 1970s, our capabilities have included comprehensive capital research. We believe this experience is a key differentiator that can help us identify the most compelling opportunities from a risk/reward standpoint and the market dynamics affecting pricing and risk. Company analysis includes identifying opportunities from a bottom-up perspective. The end goal is to determine the economic value of a company. We evaluate the overall attractiveness of a business—how fast its market is growing, the company’s distinctive competitiveness and the ability to grow its market share and improve its profitability. We analyze a business as would a buyer of the entire company; this involves developing an investment thesis that incorporates growth drivers, potential risks and valuations. Once we understand the value of a business, we seek to determine the value of each security across the company’s capital structure and closely analyze each security’s upside and downside potential.

Our research process lends itself to identifying both growth and value opportunities. In our growth-oriented portfolios, we seek companies that offer above average and sustainable growth potential. In our value portfolios, we seek stable companies (e.g., those that are effective stewards of capital with quality management) that are undervalued by the market but have a near-term catalyst that we believe can move their security prices higher. Additionally, we incorporate our own credit analysis as part of our convertible research process as well as part of our capital structure research.

**Investment Process: Alternatives**

**Global Long/Short**

The long/short investment process is led by a fundamental bottom-up approach that seeks long and short opportunities in worldwide markets as well as in companies that exhibit enduring (on the long side) or eroding (on the short side) franchise value.

The investment process is global, fundamental and incorporates a blend a top-down and bottom-up considerations. The approach emphasizes: 1) a comprehensive assessment of what drives share prices; 2) how companies and industries are analyzed; and 3) the flexible management style, capitalization and country factors. While the approach is primarily derived from the team’s assessment of corporate and economic fundamentals, all investment styles are considered depending upon a company’s business model, prevailing market conditions and the economic cycle.
Central to the philosophy is a rigorous and collaborative process of fundamental research on companies and industries. This includes proprietary and independent research as well as analysis of publicly available information. The approach emphasizes: 1) a multi-year perspective of corporate prospects; 2) the ability to incorporate a global perspective when analyzing U.S. companies; and 3) analytical breadth and lateral thinking when judging technological shifts and their impact upon business models.

While investments are rarely sourced on the basis of a macro view, the process is alert to macro risks as well as rotational, liquidity, correlation and other risks. Quantitative tools are used to monitor the exposure to style and other common risk factors.

The portfolio aims to achieve its investment objective primarily by investing globally in publicly listed equity securities of issuers that operate in the knowledge-based sectors such as technology, communications and media, as well as financial services and healthcare, and other investment companies, including exchange-traded funds ("ETFs") that track or otherwise provide exposure to such sectors. We believe the heterogeneous, disruptive and volatile nature of many of these sectors are well suited for long/short equity investing. Other sectors are considered if, in our opinion, such long and short exposures have favorable potential for contributing value. The strategy may maintain long and short positions through the use of derivative instruments such as options, futures and forward contracts. The strategy may also invest in cash and equivalents.

**Market Neutral Income and Hedged Equity**

For our Market Neutral Income and Hedged Equity strategies, the team employs a combination of rigorous quantitative and fundamental research to evaluate securities that may offer compelling hedging opportunities. The team’s analysis of volatility, valuation research, and the identification of market mispricing or dislocations lead to investment ideas in the convertible arbitrage portion of alternative strategies. Analysis of valuation, correlation, tracking error and volatility pricing are utilized in the hedged equity portion.

**Investment Process: Fixed Income**

For our fixed income portfolios, rigorous proprietary analysis drives fundamental security selection. Co-portfolio managers, analysts, and traders work collaboratively to execute a fundamental, research based bottom-up investment process. Analysis encompasses a range of factors, including industry positioning, modeling of cash flow, balance sheet projections and full capital structure analysis. We also focus on the pricing of risk. In our portfolio construction process, we establish a risk framework and identify performance drivers, considering industry and company diversity and portfolio characteristics, among many factors. Portfolio construction also reflects our macro perspectives and liquidity analysis. We monitor strategies continually to ensure that returns are being generated from intended risks. Our monitoring includes daily attribution at credit quality, industry and security levels, as well as spread and interest rate risk and scenario analysis. In addition to qualitative analysis and proprietary tools, the team utilizes quantitative third-party tools and services in the selection and surveillance of securities.

**INVESTMENT STRATEGIES**

To meet the diverse investment requirements of clients, we offer a range of investment strategies, including growth equity, convertible, fixed income, alternative and value.

**ALTERNATIVE STRATEGIES**

Strategies that go beyond the traditional ways of investing. These strategies tend to behave differently than typical stock and bond investments and may provide broader diversification, reduce risk, and enhance returns.

*Convertible Arbitrage* - A strategy that seeks capital preservation by generating absolute returns to equity and fixed income markets.

*Hedged Equity* – A lower volatility, U.S. equity strategy that invests in a broadly diversified portfolio of U.S. common stock while also writing (selling) index call options and/or entering into other option strategies...
on equity securities and/or broad based indices.

**Market Neutral** – A lower volatility strategy that invests in convertible arbitrage and hedged equity strategies. Convertible arbitrage includes the purchase of convertible securities and the shorting of stock related to the underlying equity of the convertible holding. Hedged equity includes a broadly diversified portfolio of U.S. common stock as well as the writing (or sale) of index call options and/or entering into other option strategies on equity securities and/or broad based indices.

**Phineus Long/Short** – A fundamental, global process that incorporates a blend of top-down and bottom-up considerations as the advisor employs a flexible asset allocation across the global equity universe. The strategy allows for all investment styles (growth, value, etc.) to be considered.

**CONVERTIBLE STRATEGIES**

Strategies that seek to pursue equity market upside with potentially less downside than an all-equity portfolio, by investing primarily in convertible securities.

**Global Convertible** – A global convertible strategy that seeks to leverage our capital structure research by investing in convertible securities, in an effort to generate consistent alpha and manage downside volatility.

**U.S. Convertible** – A U.S. convertible strategy that seeks to leverage our capital structure research by investing in convertible securities, in an effort to generate consistent alpha and manage downside volatility.

**80/20 Convertible** – A U.S. convertible strategy that seeks to leverage our capital structure research by investing in convertible securities, in an effort to generate consistent alpha and manage downside volatility. The strategy invests primarily in U.S. convertible securities and may hold up to 20% in equities.

**80/20 Global Convertible** – A global convertible strategy that seeks to leverage our capital structure research by investing in convertible securities, in an effort to generate consistent alpha and manage downside volatility. The strategy invests primarily in U.S. and non-U.S. convertible securities and may hold up to 20% in equities.

**EQUITY STRATEGIES**

We offer strategies that seek capital appreciation by investing in a range of global companies of various market capitalizations.

**Core Equity Income** – An equity strategy that seeks income and capital appreciation primarily through investments in common stocks of companies that focus on growing and paying dividends over time.

**Emerging Economies** – A risk-managed, emerging market strategy that seeks exposure to emerging economies by investing in securities of companies in those markets.

**Enhanced Alpha** – A primarily U.S. large-capitalization strategy that will tactically invest in a mix of defensive or growth oriented businesses based on the advisor’s probability weightings of which style will outperform over the near term.

**Global Growth** – A global all-cap growth equity strategy that invests in the common stocks of global growth companies.

**Global Opportunities** – An actively managed global strategy that seeks to leverage our capital structure research by investing in equities and equity-sensitive securities of global companies, in an effort to generate consistent alpha and manage downside volatility.

**International Growth** - A principally non-U.S. all-cap equity strategy that invests in the common stocks of
growth companies based outside of the United States.

**International Growth Concentrated** – Focuses on non-U.S. all-cap equity strategy that invests in a concentrated number, generally 35-45 holdings, of common stocks of growth companies based outside of the United States.

**Small Cap Growth** – An equity strategy that seeks investments in small-capitalization companies that have sound growth potential.

**SMID Growth** – An equity strategy that seeks investments in small- and mid-capitalization companies that have sound growth potential.

**Tactical Midcap Growth** – An equity strategy that invests primarily in mid-capitalization companies, but may invest in small- and large-capitalization companies. The strategy is based upon multi-factor analysis and macro-economic views in an effort to maximize expected return potential while managing exposure to risk.

**U.S. All Cap Growth** – A primarily U.S. all-cap growth equity strategy that invests in the common stock of growth companies.

**U.S. Large Growth** – A large-cap growth equity strategy that seeks capital appreciation by primarily investing in stocks of U.S. large cap companies.

**U.S. Mid Cap Growth** – A mid-cap growth equity strategy that invests primarily in the common stocks of U.S. mid-capitalization companies in high-growth industries.

**U.S. Opportunities** – An actively managed, primarily U.S. strategy that seeks to leverage our capital structure research by investing in equities and equity-sensitive securities, in an effort to generate consistent alpha and manage downside volatility.

**U.S. Select Equity** – A strategy that seeks total return through capital appreciation and income by primarily investing in U.S. large cap companies.

**FIXED INCOME STRATEGIES**

Strategies that provide a focus on income and capital preservation by investing in both taxable and non-taxable fixed income of various maturities and credit ratings.

**Dynamic Intermediate Tax-Efficient** – A fixed income strategy that invests in investment grade securities with maturities of 10 years or less.

**High Income Opportunities** – A total return high-income debt strategy that invests in a broad universe of high-yield corporate debt and higher-yielding convertible securities.

**High Quality U.S. Corporate** – A strategy that seeks to achieve total return, consistent with preservation of capital and prudent investment management, through income earned on investments, plus capital appreciation, by investing in diversified portfolios of fixed-income U.S. corporate debt instruments.

**Intermediate Insurance** – A fixed income strategy that invests in investment grade securities with maturities of 10 years or less.

**Intermediate Term Tax-Advantaged SMA Strategy** – A strategy that seeks tax-advantaged investment income, consistent with preservation of capital and prudent investment management by primarily investing in a broad range of U.S. dollar-denominated short and intermediate maturity, investment grade fixed income securities, including municipal bonds, corporate bonds, treasuries, agencies, mortgage-backed securities and asset-backed securities.

**Intermediate Term Taxable Bond SMA Strategy** – A strategy that seeks a high level of current income
without undue risk to principal by investing primarily in a broad range of investment-grade debt securities.

**Preferred Securities** – A strategy that seeks to deliver total return through high current income and capital appreciation by primarily investing in issues of preferred and debt securities issued by U.S. and non-U.S. companies.

**Short Term Taxable Bond SMA Strategy** – A strategy that seeks to provide a high level of current income consistent with preservation of capital by investing in a broad range of investment-grade debt securities.

**Short Term Tax-Advantaged SMA Strategy** – A strategy that seeks tax-advantaged investment income, consistent with preservation of capital and prudent investment management by primarily investing in a broad range of U.S. dollar-denominated short and intermediate maturity, investment grade fixed income securities, including municipal bonds, corporate bonds, treasuries, agencies, mortgage-backed securities and asset-backed securities.

**U.S. Core Plus Fixed Income** – A primarily investment grade total return strategy that seeks preservation of capital and prudent investment management, through income earned on a broad universe of debt instruments, plus capital appreciation.

**RISK FACTORS**

All investment programs carry the risk of loss and there is no guarantee that any investment strategy will meet its objective. Considering risk of loss is a key aspect of our investment approach. Depending on the types of strategies you invest in, you may face the following investment risks:

**Alternative Strategy Risk:** Alternative investment strategies are speculative and entail substantial risks. The investment practices of these strategies could result in substantial losses. There can be no assurance that the alternative strategies will be profitable or the investment objective will be achieved.

**American Depository Receipts (“ADRs”) Risk:** Positions in ADRs are not necessarily denominated in the same currency as the common stocks into which they may be converted. ADRs are receipts typically issued by an American bank or trust company evidencing ownership of the underlying securities. Generally, ADRs, in registered form, are designed for the U.S. securities markets. An account may invest in sponsored or unsponsored ADRs. In the case of an unsponsored ADR, a portfolio is likely to bear its proportionate share of the expenses of the depository and it may have greater difficulty in receiving shareholder communications than it would have with a sponsored ADR.

**Asset-Backed and Mortgage-Backed Securities Risk:** Asset-backed securities represent interests in pools of mortgages, loans, receivables, or other assets. Mortgage-backed securities are a type of asset-backed security that represent direct or indirect participations in, or are collateralized by and payable from, mortgage loans secured by real property. Payment of interest and repayment of principal may be largely dependent upon the cash flows generated by the assets backing the securities and, in certain cases, supported by letters of credit, surety bonds, or other credit enhancements.

Asset-backed securities differ from conventional debt securities because principal is paid back over the life of the security rather than at maturity. A strategy may receive unscheduled prepayments of principal before the security’s maturity date due to voluntary prepayments, refinancing, or foreclosures on the underlying mortgage loans, which would result in a loss of anticipated interest and a portion of its principal investment represented by any premium the strategy may have paid. Generally, rising interest rates tend to extend the duration of fixed rate mortgage-backed securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, if a strategy holds mortgage-backed securities, it may exhibit additional volatility. This is known as extension risk. In addition, adjustable and fixed rate mortgage-backed securities are subject to prepayment risk. When interest rates decline, borrowers may pay off their mortgages sooner than expected. This can reduce the returns of a strategy.
because the strategy may have to reinvest that money at the lower prevailing interest rates. A strategy’s investments in other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Asset-backed securities may not have the benefit of a security interest in collateral comparable to that of mortgage assets, resulting in additional credit risk. In the event of a default, a strategy may suffer a loss if it cannot sell collateral quickly and receive the amount it is owed. Asset-backed securities also may be subject to increased volatility and may become illiquid and more difficult to value even when there is no default or threat of default due to market conditions impacting asset-backed securities more generally.

Asset-backed security values also may be affected by other factors including changes in interest rates, the availability of information concerning the pool and its structure, the creditworthiness of the servicing agent for the pool, the originator of the loans or receivables, or the entities providing the credit enhancement.

If a strategy purchases asset-backed or mortgage-backed securities that are “subordinated” to other interests in the same pool of assets, the strategy as a holder of those securities may only receive payments after the pool’s obligations to other investors have been satisfied. For example, an unexpectedly high rate of defaults on the mortgages held by a mortgage pool may limit substantially the pool’s ability to make payments of principal or interest to the strategy as a holder of such subordinated securities, reducing the values of those securities or in some cases rendering them worthless. Certain mortgage-backed securities may include securities backed by pools of mortgage loans made to “subprime” borrowers or borrowers with blemished credit histories; the risk of defaults is generally higher for mortgage pools that include such subprime mortgages. Moreover, instability in the markets for mortgage-backed and asset-backed securities, as well as the perceived financial strength of the issuer and specific restrictions on resale of the securities, may affect the liquidity of such securities, which means that it may be difficult (or impossible) to sell such securities at an advantageous time and price. As a result, the value of such securities may decrease and the strategy may have to hold these securities longer than it would like, forgo other investment opportunities, or incur greater losses on the sale of such securities than under more stable market conditions. Furthermore, instability and illiquidity in the market for lower-rated mortgage-backed and asset-backed securities may affect the overall market for such securities, thereby impacting the liquidity and value of higher-rated securities. This lack of liquidity may affect a strategies’ NAV and total return adversely during the time the strategy holds these securities.

**BREXIT Risk:**

European financial markets are vulnerable to volatility and losses arising from concerns about the potential exit of member countries from the European Union and/or the Eurozone and, in the latter case, the reversion of those countries to their national currencies. Defaults by Economic Monetary Union member countries on sovereign debt, as well as any future discussions about exits from the Eurozone, may negatively affect a client’s investments in the defaulting or exiting country, in issuers, both private and governmental, with direct exposure to that country, and in European issuers generally. In addition, on June 23, 2016, voters in the United Kingdom decided in a referendum that the nation would leave the European Union (“Brexit”). The withdrawal agreement entered into between the United Kingdom and the EU entered into force on January 31, 2020, at which time the United Kingdom ceased to be a member of the EU. Following the withdrawal, there will be an eleven-month transition period, ending December 31, 2020, during which the United Kingdom will negotiate its future relationship with the EU. Brexit has resulted in volatility in European and global markets and could have negative long-term impacts on financial markets in the United Kingdom and throughout Europe. There is considerable uncertainty about the potential consequences for Brexit, how it will be conducted, how negotiations of trade agreements will proceed, and how the financial markets will react, and as this process unfolds markets may be further disrupted. The consequences of the United Kingdom’s or another country’s exit from the European Union and/or
Eurozone could also threaten the stability of the euro for remaining countries and could negatively affect the financial markets of other countries in the European region and beyond.

**Business Risk:** These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from a steady stream of customers who buy electricity no matter what the economic environment is like.

**Credit Risk:** Credit risk is the possibility that an issuer of a fixed-income security will fail to make timely interest and principal payments on its securities or that negative market perceptions of the issuer’s ability to make such payments will cause the price of that security to decline. All fixed-income securities from the highest quality to the very speculative, have some degree of credit risk. A strategy accepts some credit risk as a recognized means to enhance investors’ return. To the extent a strategy invests in government securities, credit risk will be limited.

When evaluating potential investments for a strategy, we independently assess credit risk and its potential impact on the strategies portfolio. In addition, the credit rating agencies may provide estimates of the credit quality of the securities. The ratings may not take into account every risk that interest or principal will be repaid on a timely basis. Lower credit ratings typically correspond to higher credit risk and higher credit ratings typically correspond to lower perceived risk. Credit ratings do not provide assurance against default or other loss of money. We may attempt to minimize a strategies’ overall credit risk by: (1) primarily investing in fixed-income securities considered at least investment grade at the time of purchase; and/or (2) diversifying the strategies’ investments across many securities with slightly different risk characteristics and across different economic sectors and geographic regions. If a random credit event should occur, such as a default, a strategy generally would suffer a smaller loss than if the strategy were concentrated in relatively large holdings with highly correlated risks.

**Currency Risk:** Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment’s originating country. This is also referred to as exchange rate risk.

Continuing uncertainty as to the status of the Euro and the European Monetary Union ("EMU") and the potential for certain countries to withdraw from the institution has created significant volatility in currency and financial markets generally. Any partial or complete dissolution of the EMU could have significant adverse effects on currency and financial markets, and on the values of the fund’s portfolio investments.

**Cybersecurity Risk:** With the increased use of technologies such as the Internet to conduct business, a portfolio is susceptible to operational, information security and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events and are not limited to, gaining unauthorized access to digital systems, and misappropriating assets or sensitive information, corrupting data, or causing operational disruption, including the denial-of-service attacks on websites. Cybersecurity failures or breaches by a third-party service provider and the issuers of securities in which the portfolio invests, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, the inability to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs, including the cost to prevent cyber incidents.

Calamos has established policies and procedures relative to cybersecurity, has worked closely with our third party providers including system’s vendors to seek to mitigate the risks of cybersecurity breaches, and has implemented controls to prevent breaches to our systems and infrastructure. While these controls are continually reviewed and enhanced based on our experience to date and technological advancements, the methods and techniques by which unauthorized access is gained is also continually becoming more
complex and sophisticated. Therefore, there can be no assurances that the controls Calamos has in place will be adequate in protecting client data from either deliberate or inadvertent cyber breaches. Also, there is a risk that Calamos would not detect a cybersecurity breach.

**Derivatives Risk:** Options, futures and other derivatives involve risks and are not suitable for everyone. Such trading can be speculative in nature and carry substantial risk of loss, including the loss of principal.

**Emerging Market Country Risk:** Some of the exchanges in which a strategy may invest may be less well-regulated than those in developed markets and may prove to be illiquid, insufficiently liquid or highly volatile from time to time. This may affect the price at which a strategy may liquidate positions to meet redemption requests or other funding requirements. Investment in emerging markets may also give rise to currency risks.

Emerging market countries involve risks such as immature economic structures, national policies restricting investments by foreigners, and different legal systems. The marketability of quoted shares in emerging market countries may be limited as a result of wide dealing spreads, the restricted opening of stock exchanges, a narrow range of investors and limited quotas for foreign investors. Therefore, a strategy may not be able to realize its investments at prices and times that it would wish to do so. Some emerging market countries may also have different clearance and settlement procedures, and in certain countries there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct transactions. Costs associated with transactions in developing country or emerging market country securities are generally higher than those associated with transactions in developed country securities.

**ESG Investing Risks:** As the investment process considers environmental, social and governance factors, the advisor may choose to avoid investments that might otherwise be considered, or sell investments due to changes in ESG risk factors as part of the overall investment decision process. The use of environmental, social and governance factors may impact investment exposure to issuers, industries, sectors, and countries, which may impact a portfolio’s relative performance.

**Eurozone Risk:** The Eurozone is currently undergoing a collective debt crisis. Greece, Ireland and Portugal have already received one or more “bailouts” from other members of the European Union, and it is unclear how much additional funding they will require. Investor confidence in other EU member states, as well as European banks exposed to risky sovereign debt, has been severely impacted, threatening capital markets throughout the Eurozone. Although the resources of various financial stability mechanisms in the Eurozone continue to be bolstered, many market participants have expressed doubt that the level of funds being committed to such facilities will be sufficient to resolve the crisis. There also appears to be a lack of political consensus in the Eurozone concerning whether and how to restructure sovereign debt, particularly Greek sovereign bonds. The consequences of any sovereign default would likely be severe and wide-reaching, and could include the removal of a member state from the Eurozone, or even the abolition of the Euro. Any such consequences could result in major losses to the funds.

**Financial Risk:** Excessive borrowing to finance a business’ operations increases the risk of profitability because the company must meet the terms of its obligations regardless of prevailing economic conditions. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.

**Fixed Income Risks:** Portfolios that invest in fixed income securities are subject to several general risks, including interest rate risk, credit risk, and market risk, which could reduce the yield that an investor receives from his or her portfolio. These risks may occur from fluctuations in interest rates, a change to an issuer’s individual situation or industry, or events in the financial markets.

**Foreign, Emerging Markets Risk:** Investments in these types of securities have considerable risks. Risks
associated with investing in foreign securities include fluctuations in the exchange rates of foreign currencies that may affect the U.S. dollar value of a security, the possibility of substantial price volatility as a result of political and economic instability in the foreign country, less public information about the issuers of securities, different securities regulation, different accounting, auditing and financial reporting standards and less liquidity than in the U.S. markets.

**Foreign (Non-U.S.) Securities Risk:** Risks associated with investing in foreign (non-U.S.) securities include fluctuations in the exchange rates of foreign currencies that may affect the U.S. dollar value of a security, the possibility of substantial price volatility as a result of political and economic instability in the foreign country, less public information about issuers of securities, different securities regulation, different accounting, auditing and financial reporting standards and less liquidity than in U.S. markets.

**Frequent Trading and Portfolio Turnover Risk:** It is expected that certain strategies will make frequent trades in securities and other investments. Frequent trades typically result in higher transaction costs. In addition, these strategies may invest on the basis of short-term market considerations. The turnover rate within these strategies may be significant, potentially involving substantial brokerage commission and fees. As a result, it is anticipated that a significant portion of any income or gains in these strategies, if any, may be derived from ordinary income and short-term capital gains.

**Frontier Markets Risk:** Investments in frontier markets are subject to a greater risk of loss than investments in more developed and traditional emerging markets. Frontier markets are more likely to experience inflation, currency and liquidity risks, political turmoil and rapid changes in economic conditions than more developed and traditional emerging markets. Frontier markets often have less uniformity in accounting and reporting requirements, unreliable securities valuation and greater risk associated with custody of securities.

**Futures Risk:** Futures are standardized contracts between two parties to buy or sell a specified asset or index with a standardized quantity for a price agreed upon today with delivery and payment occurring at a delivery date.

They are negotiated on an exchange acting as an intermediary between parties. A strategy may enter into futures transactions as either the buyer or seller and may combine them to form a particular trading strategy. A strategy may use futures for reducing an existing risk.

Futures markets may be highly volatile. To the extent a strategy engages in transactions in futures contracts, the profitability of the strategy will depend to some degree on the ability of the portfolio manager or the firm to analyze correctly the futures markets, which are influenced by, among other things, changing supply and demand relationships, governmental policies, commercial and trade programs, world political and economic events and changes in interest rates. Moreover, options contracts on futures involve additional risks including, without limitation, leverage and credit risk vis-à-vis the contract counterparty.

Futures positions may be illiquid because certain commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations or exchanges; or the Commodities and Futures Trading Commission in the U.S. may suspend trading in a particular contract, order immediate liquidation and settlement of a particular contract, or order that trading in a particular contract be conducted for liquidation only.

**Growth Investing Risks:** Growth companies are generally more susceptible than established companies to market events and sharp declines in value. Additionally, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns.

**High-Yield Fixed-Income (“Junk Bond”) Securities Risk:** Investments in Junk Bonds entails a greater risk
than an investment in higher-rated securities. Although Junk Bonds typically pay higher interest rates than investment-grade bonds, there is a greater likelihood that the company issuing the Junk Bond will default on interest and principal payments. In the event of an issuer’s bankruptcy, claims of other creditors may have priority over the claims of Junk Bond holders, which may leave few or no assets to repay Junk Bond holders. Junk Bonds are also more sensitive to adverse economic changes or individual corporate developments than higher quality bonds. During a period of adverse economic changes or including a period of rising interest rates, companies issuing Junk Bonds may be unable to make principal and interest payments.

**Inactivity Risk:** CAL reviews client portfolios on a periodic basis, as described in greater detail in Item 13 below. Depending on the results of those reviews, CAL may determine that changes to a client’s portfolio are unnecessary. CAL will continue to charge its advisory fees described in Item 5 above regardless of the level of trading in the client’s account.

**Inflation Risk:** When any type of inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.

**Interest-Rate Risk:** The value of fixed-income securities generally decreases in periods when interest rates are rising. In addition, interest rate changes typically have a greater effect on prices of longer-term fixed-income securities rather than shorter-term fixed-income securities.

A strategy is subject to the risk that the market value of the bonds in its portfolio will fluctuate because of changes in interest rates, changes in supply and demand for investment securities, or other market factors. Bond prices generally are linked to the prevailing market interest rates. In general, when interest rates rise, bond prices fall; and conversely, when interest rates fall, bond prices rise. The price volatility of a bond also depends on its duration. Duration is a measure that relates the expected price volatility of a bond to changes in interest rates. The duration of a bond may be shorter than or equal to the full maturity of a bond. Generally, the longer the maturity of a bond, the greater is its sensitivity to interest rates. Bonds with longer durations have more risk and will decrease in price as interest rates rise. For example, a bond with a duration of three years will decrease in value by approximately 3% if interest rates increase by 1%. To compensate investors for this higher interest rate risk, bonds with longer maturities generally offer higher yields than bonds with shorter duration. If interest rates increase, the yield of a strategy may increase and the market value of the strategies’ securities may decline, adversely affecting the strategies’ net asset value (“NAV”) and total return. If interest rates decrease, the yield of a strategy may decrease and the market value of the strategies’ securities may increase, which may increase the strategies’ NAV and total return.

**Leverage Risk:** Certain strategies and/or funds/portfolios have the power to borrow funds and utilize leverage through various methods (including margin, futures and swaps), and may do so when deemed appropriate by the portfolio management team, including to finance its trading operations, to enhance a portfolio’s returns and to satisfy withdrawals that would otherwise result in the premature liquidation of investments. Such leverage, which may be substantial, may be achieved through, among other methods, purchases of securities on margin and the use of options, futures, forward contracts, repurchase and reverse repurchase agreements and swaps. The purchase of options, futures, forward contracts, repurchase agreements, reverse repurchase agreements and equity swaps generally involves little or no margin deposit, therefore, providing substantial leverage. Accordingly, relatively small price movements in these financial instruments may result in immediate and substantial losses to a client’s portfolio.

Portfolios may borrow funds from brokers, banks and other lenders. In some of our strategies and/or funds, there is no limit on the amount of leverage that may be utilized. The use of leverage can dramatically magnify both gains and losses, increasing the possibility of a total loss of investment. Trading securities on
margin results in interest charges and, depending on the amount of trading activity, such charges could be substantial. The level of interest rates generally, and the rates at which portfolios can borrow in particular, can affect the operating results of those portfolios. Any restriction on the availability of credit from lenders could adversely affect the portfolio’s performance.

Leverage achieved by a portfolio through margin borrowings requires a portfolio to post collateral with brokers and counterparties that provide financing to the portfolio. Brokers and counterparties have broad discretionary authority over valuation of a portfolio’s assets they hold, and the amount of collateral required. A broker or counterparty may have the right to: (i) reduce the valuation of a portfolio’s assets they hold, including collateral posted by the portfolio; (ii) require the portfolio to post additional collateral; and/or (iii) reduce unilaterally the credit extended to a portfolio for a number of reasons, including reasons that have no bearing on the creditworthiness of the portfolio. Any such action by a broker or counterparty could lead to a margin call on the portfolio or result in the portfolio having to sell assets at a time when the portfolio would not otherwise choose to do so. If the portfolio does not meet a margin call in accordance with the relevant financing agreement, the broker or counterparty may declare the portfolio in default and liquidate the portfolio’s assets held by the broker or counterparty.

Liquidity Risk: When consistent with a client’s investment objectives, guidelines, restrictions and risk tolerances, we may invest portions of client portfolios in illiquid securities, subject to applicable investment standards. Investing in an illiquid (difficult to trade) security may restrict its ability to dispose of investments in a timely fashion or at an advantageous price, which may limit the ability to take full advantage of market opportunities.

Management Risks: Calamos’ judgment about the attractiveness, value and potential appreciation of a particular asset class or individual security in which a strategy invests may prove to be incorrect and there is no guarantee that the firm’s judgment will produce the desired results.

Market Risk: The risk that securities will increase or decrease in value is considered market risk and applies to any security. The market value of your account is expected to fluctuate. If there is a general decline in the stock market, it is possible your investment may lose value regardless of the individual results of the companies in which a strategy or fund invests. Further, securities may decline in value or not increase in value when the market in general is rising.

Non-Diversification Risk: Investments that are concentrated in one or few industries or sectors, or in particular systemic risk styles such as growth, value, momentum, large/small cap, etc. may involve more risk than more diversified investments, including the potential for greater volatility.

Other Investment Companies (including ETFs) Risk: Investments in the securities of other investment companies, including ETFs, may involve duplication of advisory fees and certain other expenses. By investing in another investment company or ETF, the fund becomes a shareholder thereof. As a result, fund shareholders indirectly bear the fund’s proportionate share of the fees and expenses indirectly paid by shareholders of the other investment companies or ETFs, in addition to the fees and expenses fund shareholders bear in connection with the fund’s own operations. If the investment company or ETF fails to achieve its investment objective, the value of the fund’s investment will decline, adversely affecting the fund’s performance. In addition, closed end investment companies and ETF shares potentially may trade at a discount or a premium and are subject to brokerage and other trading costs, which could result in greater expenses to the fund. In addition, the fund may engage in short sales of the securities of other investment companies. When the fund shorts securities of another investment company, it borrows shares of that investment company which it then sells. The fund closes out a short sale by purchasing the security that it has sold short and returning that security to the entity that lent the security.
**Other Risks:** The alternative investment strategies are speculative and entails substantial risks in addition to those discussed above. The investment practices of these strategies could result in substantial losses. There can be no assurance that the alternative strategies will be profitable or the investment objective will be achieved.

**Pandemic Risk:** The impact of epidemics and pandemics could greatly affect the economies of many nations including the United States, individual companies and the market(s). Pandemics may cause extreme volatility and disruption in both the U.S. and global markets causing uncertainty and risks to economic growth, etc. Health crises caused by the recent coronavirus outbreak may exacerbate other pre-existing political, social and economic risks in certain countries. Also, pandemics may result, as this outbreak of coronavirus has resulted, in closing borders, enhanced health screenings, healthcare service preparation and delivery, quarantines, cancellations, disruptions to supply chains and customer activity, as well as general concern and uncertainty.

**Portfolio Turnover Risks:** Calamos may engage in frequent trading as part of our investment strategy and thus may experience a high portfolio turnover rate. When a portfolio experiences a high portfolio turnover rate you may realize significant taxable capital gains as a result, and the portfolio will incur transaction costs in connection with buying and selling securities, which may lower the portfolio’s return.

**Reinvestment Risk:** This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to fixed income securities.

**Securities Lending Risk:** A fund or strategy may lend its portfolio securities to broker-dealers and banks in order to generate additional income for the fund. Any such loan must be continuously secured by collateral in cash or cash equivalents maintained on a current basis in an amount at least equal to the market value of the securities loaned by the fund. In the event of bankruptcy or other default of a borrower of portfolio securities, a fund or strategy could experience both delays in liquidating the loan collateral or recovering the loaned securities and losses including: (a) possible decline in the value of the collateral or in the value of the securities loaned during the period which the fund seeks to enforce its rights thereto; (b) possible sub-normal levels of income and lack of access to income during this period; and (c) expenses of enforcing its rights. In an effort to reduce these risks, the investment manager will monitor the creditworthiness of the firms to which a fund lends securities. Although not a principal investment strategy, a fund may engage in securities lending to a significant extent.

**Short Positions Risk:** A short sale of an instrument entails the theoretical risk of an unlimited increase in the market price of that instrument, which can in turn result in significant losses to a client. Purchasing instruments to close out a short position in such instruments can itself cause the price of the instrument to rise further, increasing losses. Furthermore, a client may be forced to close out a short position in a security prematurely if a lender of such security demands the return of the security sold short.

**Small/Mid Cap Risk:** Stocks of small or mid cap companies may have less liquidity than those of larger, established companies and may be subject to greater price volatility and risk than the overall stock market.

**Structured Products Risk:** These products often involve a significant amount of risk, as they are often times based on derivatives. Structured products are not liquid instruments. They are "buy and hold" investments.

**Swaps Risk:** A strategy may enter into swap agreements with respect to currencies, interest rates and security indices. There can be no assurance that a liquid secondary market will exist at any specified time for any particular swap. A strategy may use these techniques for efficient portfolio management purposes to hedge against changes in currency rates, securities prices, market movements, or as part of such fund’s overall investment strategy. Whether a strategy’s use of swap agreements for efficient portfolio management purposes will be successful will depend on our ability to correctly predict whether certain types of investments are likely to produce greater returns than other investments.
The above list of risk factors does not purport to be a complete list or explanation of the risks involved in an investment strategy. You are encouraged to consult your financial advisor, legal counsel and tax professional on an initial and continual basis in connection with selecting and engaging in the services Calamos provides to you. In addition, due to the dynamic nature of investments and markets, strategies may be subject to additional and different risk factors not discussed above. Clients that invest in Calamos Funds, UCITS or private funds should carefully read the relevant prospectus or offering memorandum for specific information applicable to that particular vehicle.

**Item 9: Disciplinary Information**

We are required to disclose any legal or disciplinary events that are material to your evaluation of our advisory business or the integrity of our management. Our firm and our management personnel have no reportable disciplinary events to disclose.

**Item 10: Other Financial Industry Activities and Affiliations**

As noted in *Item 4*, our firm is an investment adviser registered with the SEC and a wholly owned subsidiary of CILLC. Calamos is a diverse financial services organization. In some cases, affiliates of Calamos have business arrangements with related persons/companies that are material to Calamos’ advisory business or to its clients. In some cases, these business arrangements create potential conflicts of interest, or the appearance of a conflict of interest between Calamos and a client. Calamos has policies and procedure in place to identify and mitigate such conflicts. In addition, Calamos has established a Conflict of Interest Committee, which has among its responsibilities the identification and amelioration of such conflicts of interest.

The following is a list of other related parties of the firm:

- **Calamos Advisors LLC Master Group Trust Global Opportunities Trust** operates for the collective investment of the assets of domestic pension or profit-sharing trusts.
- **Calamos Advisors Trust** is a Massachusetts business trust registered under the 1940 Act.
- **Calamos Ares Quant Fund I, LP** is a Delaware limited partnership whereby Calamos Advisors LLC serves as the Investment Manager and General Partner.
- **Calamos Asset Management, Inc.** is the sole manager of Calamos Investments LLC.
- **Calamos Avenue Management, LLC** is a Delaware limited liability company and joint venture entity establishing itself as an investment adviser.
- **Calamos Convertible and High Income Fund** is a closed-end company registered under the 1940 Act.
- **Calamos Convertible Opportunities and Income Fund** is a closed-end company registered under the 1940 Act.
- **Calamos Dynamic Convertible and Income Fund** is a closed-end investment company registered under the 1940 Act.
- **Calamos ETF Trust** is a Delaware statutory trust registered under the 1940 Act.
- **Calamos Family Partners, Inc.** is a private firm in which John P. Calamos, Sr. owns a controlling interest.
- **Calamos Financial Services LLC** is registered under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as a limited purpose broker-dealer. Its operations consist primarily of the distribution and sale of the Calamos Family of Mutual Funds.
- **Calamos Global Dynamic Income Fund** is a closed-end company registered under the 1940 Act.
- **Calamos Global Funds PLC** is an Ireland-domiciled open-end umbrella company organized as a UCITS consisting of sub-funds, which are registered with the Irish Central Bank.
• **Calamos Global Opportunities Fund LP** is a Delaware limited partnership whereby Calamos Advisors LLC serves as the Investment Manager and General Partner.

• **Calamos Global Total Return Fund** is a closed-end company registered under the 1940 Act.

• **Calamos International Holdings LLC** is a Delaware limited liability company wholly owned by Calamos Investments LLC and is a sister company to Calamos Advisors LLC.

• **Calamos International Holdings II LLC** is a Delaware limited liability company wholly owned by Calamos Investments LLC and is a sister company to Calamos Advisors LLC.

• **Calamos Investment Trust** is a Massachusetts business trust registered under the 1940 Act.

• **Calamos Investments LLC** is a holding company. Through its subsidiaries, the firm provides investment management and distribution related services to its clients.

• **Calamos Investments LLP** is registered with the UK Financial Conduct Authority and maintains certain permissions including distribution, investment advisory and investment management. It is the global distributor of the Calamos Global Funds plc.

• **Calamos Long/Short Equity & Dynamic Income Trust** is a closed-end company registered under the 1940 Act.

• **Calamos OPIS LLC** is a Delaware limited liability company formed to manage proprietary investments.

• **Calamos Partners LLC** is a Delaware limited liability company owned by Calamos Family Partners, Inc., John P. Calamos, Sr. and John S. Koudounis.

• **Calamos Strategic Total Return Fund** is a closed-end company registered under the 1940 Act.

• **Calamos Wealth Management LLC** is a registered investment advisor that provides wealth management services, including asset allocation and investment advisory services, to high net worth individuals, family offices and private foundations.

• **Primacy Business Center LLC** is a Delaware limited liability company wholly-owned by Calamos Family Partners, Inc.

### INVESTMENT COMPANIES

Calamos serves as the investment adviser to mutual funds, closed-end funds and UCITS.

**Calamos Mutual Funds:**

- Convertible
- Dividend Growth
- Evolving World Growth
- Global Convertible
- Global Equity
- Global Growth and Income
- Growth
- Growth and Income
- Hedged Equity
- High Income Opportunities
- International Growth
- Market Neutral Income
- Select
• Phineus Long/Short
• Short Term Bond
• Timpani Small Cap Growth
• Timpani SMID Growth
• Total Return Bond

Calamos Closed-End Funds:
• Dynamic Convertible and Income (CCD)
• Convertible Opportunities and Income (CHI)
• Convertible and High Income (CHY)
• Global Dynamic Income (CHW)
• Strategic Total Return (CSQ)
• Global Total Return (CGO)
• Long/Short Equity & Dynamic Income Trust (CPZ)

UCITS:
• Emerging Markets
• Global Equity
• Global Convertible

UCITS are not U.S. registered investment companies nor regulated by U.S. law.

Calamos may also serve as a sub-advisor to other unaffiliated mutual funds. While we do not believe these services create a material conflict of interest between the firm and its other clients, Calamos has adopted policies and procedures to mitigate and manage any such conflicts as described throughout this brochure.

POOLED INVESTMENT VEHICLES

The firm serves as the investment adviser to the Calamos Advisors LLC Master Group Trust Global Opportunities Trust (“Group Trust”), which is available to eligible qualified retirement plans and government plans that meet certain requirements. The fees are described in the investment management agreement between Calamos and the Group Trust.

Calamos serves as Investment Manager and General Partner to the Calamos Global Opportunities Fund Limited Partnership (the “LP”). Fees relating to the LP are further described in the Confidential Private Offering Memoranda.

Our firm serves as the Investment Manager and General Partner to the Calamos Ares Quant Fund I, LP. This private fund is not currently being offered to investors.

Item 11: Code of Ethics and Insider Trading Policy, Participation or Interest in Client Transactions and Personal Trading

CODE OF ETHICS & PERSONAL TRADING

Calamos has adopted a Code of Ethics and Insider Trading Policy (“Code of Ethics”) which sets forth high ethical standards of business conduct required of our employees, including compliance with applicable federal securities laws. Our firm and our personnel owe a duty of loyalty, fairness and good faith toward you, our clients, and have an obligation to adhere not only to the specific provisions of the Code but to the general principles that guide the Code.
To mitigate the conflicts of interest caused by trading or other activities engaged in by our employees, our Code of Ethics requirements include the following controls:

- Employees and their household members must maintain their brokerage accounts at a limited number of brokerage firms approved by Compliance;
- Employees must receive written approval from Compliance prior to transacting in “reportable securities” (as defined under Investment Adviser Act Rule 204(A)-1 (pre-clearance required);
- Employees and their household members must provide to Compliance quarterly trade confirmations or statements and annual security holdings reports;
- Employee requests to trade a reportable security (excluding Broad-based Securities 3) will generally be denied if a client traded in the same reportable security within the previous six business days. Trades in an amount less than $10,000 in a 30 calendar day period in companies that have a market capitalization of at least $100 billion are exempt from the prohibitions with respect to whether Calamos is trading the same or equivalent security for the accounts of its clients of this Code. (An exception to selling transactions in covered securities is applicable for a limited time when an employee begins employment with the firm);
- Employee trade requests will be denied if a security is on the restricted list;
- Employees must hold securities for a minimum holding period of 60 calendar days to reduce excess and short-term or speculative trading. The holding period may be waived if the security is trading at a 20% or greater loss from where the employee purchased the security;
- Employees must obtain Management and Compliance approval prior to engaging in any outside business activity and their proposed activity will be vetted to ensure it does not create a conflict of interest with our clients, or that the firm is in a position to mitigate and manage any such conflict;
- Gifts given or accepted by employees must be reported to Compliance;
- Entertainment provided or received by employees must be reported to Compliance;
- Employees must receive prior Compliance approval to make any political contributions;
- Employees may not participate in Initial Public Offerings (“IPOs”); and
- Employees are prohibited from using Material Non-Public Information (“MNPI”) either professionally or personally.

The Code is designed to seek to ensure that the personal securities transactions, activities and interests of our employees will not interfere with making decisions that are in the best interest of advisory clients. The Code therefore restricts trading in close proximity to client trading and restricts personal trading of securities of which the firm is in possession of MNPI, as noted above.

Under unusual circumstances, such as a personal financial emergency, or when it is determined that no conflict of interest or other breach of duty is involved, application for an exemption from certain restrictions on trading (excluding pre-clearance and reporting requirements) under this Code may be made to the CCO, which application may be denied or granted in the CCO’s discretion.

From time to time, Calamos receives MNPI. This is information that is not available to other investors or other confidential information which, if disclosed, would likely affect an investor’s decision to buy, sell or hold a security. This information is received voluntarily and involuntarily and under varying circumstances including, but not

3 A Broad-based Security generally refers to any security index that would not be classified as a narrow-based security index under the definitions or exclusions set forth in the Commodity Exchange Act and the Exchange Act or that meets certain criteria specified jointly by the U.S. Commodities Futures Trading Commission (“CFTC”) and the U.S. Securities and Exchange Commission. An example of a Broad-based Security is the S&P 500.
limited to, upon execution of a non-disclosure agreement, as a result of serving on the board of directors of a company, serving on ad hoc or official creditor committees and participation in risk, advisory or other committees for various trading platforms and other market infrastructure related entities and organizations. Under applicable law, Calamos and its employees are generally prohibited from disclosing or using such information for their personal benefit or for the benefit of any other person, regardless of whether that person is a client.

Direct obligations of the U.S. Government (US Treasury bills, notes and bonds), money market instruments (including commercial paper and repurchase agreements) shares of open-end mutual funds not advised or sub-advised by Calamos or units in 529 College Savings Plans have been designated as exempt securities under the Code and therefore the transactions are exempt in conjunction with the associated rules of the Code. Access Persons’ trading is continually monitored under the Code to reasonably prevent conflicts of interest between Calamos employees and Calamos clients. All Access Persons must annually acknowledge their understanding of the terms of the Code.

Our Code of Ethics also includes provisions governing oversight, enforcement and recordkeeping.

A copy of the Calamos Code of Ethics is available to you by contacting us at caminfo@calamos.com, or by calling us at 800-582-6959.

**PARTICIPATING IN CLIENT TRANSACTIONS**

Calamos and its related parties may participate or have an interest in client transactions in one of several ways. For example, Calamos and its related parties may have positions or interests in equity or fixed-income securities, including shares of mutual Funds, closed-end funds, UCITS, pooled investment vehicles, and separately managed accounts in which its clients also are invested. Also, Calamos’ officers and employees are encouraged to invest in Calamos products. Calamos’ Mutual Funds are available to Calamos employees participating in the Calamos Investments 401k Profit Sharing Plan as an investment alternative and are available via a brokerage window. Calamos’ aggregate fee revenues increase with purchases, by clients or others, of shares of these funds (mutual funds, closed-end funds, UCITS, and pooled investment vehicles).

From time to time, Calamos and its related parties invest in products (e.g. Calamos Mutual Fund) managed by Calamos to support the continued growth of those investment products and strategies. For example, Calamos or a related party may invest the initial investment capital in or “seed” a product and, as a result, hold a substantial proprietary interest in the product for a period of time after the product’s inception. When consistent with the client’s investment objectives, Calamos recommends to clients the purchase of these same investments in which Calamos or its employees or affiliates have a financial interest.

The Mutual Funds are generally sold to the public on a “load” basis involving the payment of commission to an intermediary. However, there are certain share classes that have no load or where the sales load is, or may be, waived by the Calamos Fund’s Adviser. Calamos employees do not pay a sales load when purchasing Calamos open-end funds.

Calamos, its related parties and our employees have an incentive to favor the accounts in which we or they own a substantial interest. This conflict could result in our treating Calamos related accounts more favorably than other client accounts including in connection with the allocation of limited investment opportunities (such as IPOs) or the allocation of aggregated trade orders. In addition, Calamos’ or a related party’s disposition of such seed investment may adversely affect the price or liquidity of the product’s shares.

With regard to its Mutual Fund investments, from time to time, Calamos or a related party may, for tax purposes, redeem a portion of its Mutual Fund holdings, reinvesting in shares of the same Mutual Fund shortly thereafter. These transactions are subject to the Mutual Funds’ excessive trading policies and procedures and will only be consummated if they are determined not to be disruptive to the management of the Mutual Fund.
In determining whether trading is disruptive, consideration will be given to the purpose of the trades, the effects on the portfolio or shareholders, and whether the portfolio or shareholders will be made whole for any costs or administrative charges the Mutual Fund may incur as a result of the trade. In addition, these transactions will not be made if Calamos or its affiliate, as the case may be, is aware of any MNPI with respect to the Mutual Fund.

Where we have an interest in a client transaction, we endeavor to make all investment decisions in our clients’ best interests. In addition, pursuant to our policies and procedures, our transactions generally are aggregated with, or effected after, client orders and we are allocated investment opportunities on a pro rata basis with our clients. Further, we believe our, and our employees’, investments in Calamos products helps to ensure our interests are aligned with those of our clients.

Investments made by CAM, CILLC, CPL, CFP and the Calamos Family in products managed by CAL are not subject to restrictions of the Code of Ethics regarding short-term or speculative trading. As a result, such entities or individuals may hedge corporate or personal investments in such products. However, these hedging transactions are subject to oversight by the Compliance department. All other provisions of the Calamos Code of Ethics are otherwise applicable. See Item 10 for a list of related parties or affiliates.

Calamos adopted policies and procedures designed to mitigate and manage these conflicts, including the following:

- All Calamos employees have a fiduciary responsibility to act in the best interest of our clients and to put our clients’ interests in front of Calamos’ interests;
- Trade Order Aggregation and Allocation policies and procedures:
  - that seek to manage, monitor and, to the extent possible, minimize the effects of these conflicts
  - designed to ensure that all similarly situated clients are treated fairly and equitably over time and to prevent these conflicts from influencing the allocation of investment opportunities among clients;
- Dispersion testing, wherein we review the performance of accounts with similar investment strategies to identify performance outliers;
- Cross-Trade Policy (see below for information on our Cross-Trade Policy);
- Conflicts of Interest Committee that seeks to ensure all conflicts are identified and policies and procedures have been implemented to manage and mitigate them; and
- Compliance reviews trading after the fact to seek to ensure procedures and controls are effective.

Please also refer to Item 12 for additional information on trade order aggregation and allocation.

On occasion, Calamos may recommend to a client a security (other than mutual funds, closed-end funds, UCITS, and pooled investment vehicles) that we are either: (i) considering transacting in; or (ii) hold in a related account. In those instances, Calamos will neither add to nor liquidate its position in the related account until our client transactions in that security are completed, as determined by our Head Trader. In other words, the clients’ transactions will be completed prior to and take priority over Calamos’ transactions.

Calamos will not charge additional advisory fees on client advisory assets invested in Calamos Mutual Funds.

**CROSS-TRADES**

Calamos has adopted a Cross-Trade Policy to address potential conflicts that might arise from effecting trades between client accounts. This policy prohibits Calamos from purchasing or selling investments from or to clients for its own account, and prohibits Calamos from effecting a trade between clients if one of the clients is an Employee Retirement Income Security Act of 1974 (“ERISA”) client. The policy permits Calamos to effect cross trades between non-ERISA client accounts that are not mutual funds, subject to certain restrictions, including the requirements that:
• Each trade is effected at the independently determined current market price of the investment;
• Each trade effected is in the best interest of both clients;
• Calamos receives no compensation for effecting the trade.

The policy similarly permits Calamos to effect trades between its Mutual Funds, subject to restrictions, including the requirements that:

• The trade is effected in accordance with the mutual funds’ (1940 Act) Rule 17a-7 procedures and SEC guidance, including at the “current market price” determined in accordance with said procedures; and
• No brokerage commission is charged on the trade.

**Item 12: Brokerage Practices**

Calamos has established a Brokerage Practices Committee (the “Committee”), which has responsibility for:

• Approving broker-dealers through which trading for discretionary client accounts may be executed;
• Evaluating the performance of broker-dealers which shall include, among other things:
  o commission rates
  o execution services
  o reliability and coverage;
• Reviewing brokerage allocations;
• Reviewing and approving soft dollar arrangements; and
• Monitoring for best execution.

**BROKERAGE SELECTION & BEST EXECUTION**

In approving a broker-dealer, Calamos will review relevant information about the broker-dealer, which may include some or all of the following:

• Financial condition;
• Reputation and integrity;
• Commission rates;
• Trading expertise;
• Facilities;
• Willingness and ability to commit capital;
• Access to underwriter offering and secondary markets;
• Reliability in trade execution and record retention;
• Fairness in resolving disputes;
• Financial services offered; and
• Value of research or other services provided.

If, after reviewing the broker-dealer’s information, Calamos reasonably believes it will benefit our clients as an executing broker-dealer, the broker-dealer will be added to the Approved Broker-Dealer list that is maintained by the Head Trader.

Calamos has a duty to seek to obtain “best execution” of securities transactions for its clients. Calamos does not simply seek the lowest possible commission or cost but rather whether the transaction represents the best qualitative execution under all circumstances existing at the time of the trade. Calamos may select brokers and negotiate commissions based on research services as defined under Securities Exchange Act of 1934, as amended.
(the “Exchange Act”) Section 28(e) and, pay a broker a higher commission in a transaction where Calamos believes doing so is reasonable in relation to its responsibilities to all accounts for which Calamos has investment discretion. Calamos may be motivated to use client commissions rather than paying for services at its own expense or to select a broker based on the services they provide rather than the quality of their execution. This also will cause a client to pay commissions that are higher than commissions charged by brokers who do not provide the benefits listed above. However, Calamos believes that in return for paying fair and reasonable commissions, our clients will benefit. Some clients that did not directly pay for the benefits also will gain.

When selecting a broker-dealer to execute a particular transaction, traders generally consider the full range of brokerage services including, but not limited to:

- Execution capabilities;
- Commission rate/all-in transaction cost;
- Financial responsibility;
- Responsiveness; and
- The value of any research provided.

The traders will also consider:

- The character of the market for the security;
- Size and type of transaction; and
- Number of primary markets.

Certain approved broker-dealers are also clients of Calamos or companies with which Calamos has other commercial dealings, which creates a conflict of interest. Calamos may be incented to favor these broker-dealers by directing trades to them. To mitigate or manage this risk, we have the following controls in place:

- Head Trader oversees trading and spot checks trades;
- Monitoring execution in our clients’ portfolio transactions, including reviewing trades for best execution;
- If the commission rate exceeds a certain set amount, trades must be pre-approved by the Head Trader and then reported to Compliance along with the rationale for paying a higher rate;
- Head Trader uses third-party execution services to compare Calamos’ execution rate to those achieved by peer firms; and
- The Brokerage Practices Committee reviews best execution.

**RESEARCH AND OTHER SOFT DOLLAR BENEFITS**

As stated above, Calamos has an obligation to seek best execution for clients’ transactions, and therefore to carefully utilize such commission dollars. Calamos believes using commission dollars for research and brokerage services is generally beneficial to clients; therefore, we will pay higher commissions to receive such research and brokerage services.

Calamos recognizes that while the acquisition of research and other services with client commission dollars can be valuable to any individual client, it also benefits Calamos and other Calamos clients, which creates a conflict of interest between Calamos and its clients. Section 28(e) under the Exchange Act provides a safe harbor permitting the use of client commissions to pay for certain “research” and “brokerage” products and services (these benefits received are referred to as soft dollars).

Soft dollar arrangements are permitted under Section 28(e) when certain conditions are met:

- Commission dollars are only used to obtain allowable brokerage or research services (as defined by Section 28(e) of the Exchange Act);
• Such brokerage or research must actually provide lawful and appropriate assistance in the performance of Calamos’ investment decision-making responsibilities;
• Calamos must in good faith determine that the amount of commission paid is reasonable in relation to the value of the brokerage and research services provided;
• Only commissions in agency transactions may be used to obtain such services and riskless principal transactions in equity securities; and
• Calamos must have investment discretion over the account.

In fulfilling our investment advisory responsibilities, when Calamos believes more than one broker can offer the brokerage services needed to obtain the best available price and most favorable execution, we will consider selecting those brokers that also supply research and brokerage services to us. We believe such services provide a net benefit to our clients as a whole.

These research and brokerage products and services may include:

- Information on the economy, industries, groups of securities, or individual companies;
- Statistical information;
- Analysis of Company financials;
- Information on political developments;
- Macro market commentary;
- Pricing and appraisal services;
- Proxy and corporate action analysis;
- Credit analysis;
- Risk measurement analysis;
- Trade order management systems;
- Trade execution systems; and
- Analysis of corporate responsibility issues.

Research and brokerage products and services are provided to Calamos primarily in the form of:

- Written reports;
- Telephone contact;
- Personal meetings with security analysts;
- Access to various computer-generated data and computer software; and
- Meetings arranged with corporate and industry spokespersons, economists, academicians, and government representatives.

Certain research and brokerage products and services might also be used for functions that are not research or brokerage related. In such cases, the research or brokerage service or product has a mixed use. Where a product or service has a mixed use, Calamos will make a reasonable allocation of the cost of the product or service according to its use, and will pay for the non-research and brokerage function at its own expense (not using client commissions).

We will use various methodologies to determine this allocation including but not limited to the percentage of time the product or service is used for investment decision-making or the percentage of the function that is investment decision-making or research-oriented, as the case may be, but under all circumstances, the mixed use allocation will be made in good faith and documented consistent with our Brokerage Practices Policy and Section 28(e) of the Exchange Act.
Calamos participates in client commission arrangements ("CCAs") under which we effect transactions through a broker-dealer and request that the broker-dealer allocate a portion of the commissions or commission credits to another firm that aggregates these client monies and, with our oversight and approval, pays service providers of qualified research and brokerage. Calamos believes the CCAs, as well as the research provided in connection with such arrangements, comply with Section 28(e) of the Exchange Act, as interpreted by the SEC.

Further, Calamos believes participating in a CCA enables us to efficiently consolidate payments for qualified research and brokerage services through one or more channels. Using the accumulated client commissions (credits from transactions executed through multiple broker-dealers and electronic communication networks ("ECN")), Calamos can then obtain qualified research and brokerage services provided by firms and vendors of its choice. Such arrangements also help to provide us with the continued receipt of research services while facilitating best execution in the trading process. In all cases, we believe such research and brokerage services are important to our investment decision-making.

When Calamos uses client brokerage commissions to obtain research and brokerage services, we receive benefits because we do not have to produce such products internally and we do not have to compensate third-party providers of the research using Calamos money. Therefore, such use of client brokerage commissions results in a conflict of interest because we have an incentive to direct client brokerage to those brokers who provide research and services we utilize, even if these brokers do not offer the best price or commission rates for our clients.

Calamos has in place controls designed to mitigate or manage the conflicts described above, including:

- Brokerage Practices Committee review and approval of soft dollar arrangements;
- Periodic review of commission rates;
- Periodic review of our soft dollar process to determine in good faith that commissions used to acquire research products and services were reasonable relative to the value of the research and services received;
- Monitoring execution of transactions in our client’s portfolios, including reviewing trades for best execution; and
- Periodic review of mixed price allocations.

**CLIENT DIRECTED BROKERAGE**

Clients may request “directed brokerage” by instructing Calamos to send their trades to a specific broker. For example, certain institutional clients may direct Calamos to place all or a portion of their brokerage with brokers who provide the client with certain services, such as performance monitoring and commission recapture. Where the client directs Calamos to use a specific broker, the client should understand that: (i) Calamos will not negotiate commissions on the client’s behalf and that, as a result, the client may pay materially different commissions than paid by other clients depending on the client’s commission arrangement with such broker; (ii) these accounts may not have their trades included in Calamos aggregated orders intended to reduce transactions costs or to otherwise negotiate commissions and, therefore, the client may pay a different brokerage commission than other clients of Calamos participating in such aggregated orders and may receive less favorable prices and execution; (iii) the client’s transactions may not be executed until after Calamos executes transactions for accounts that do not direct brokerage; (iv) if Calamos was not directed to use such broker, the client may pay less in commissions; and (v) for the foregoing reasons, Calamos will not provide best execution assurances in accounts with directed brokerage.

Calamos must accept a request for directed brokerage before it will be effective. We have the right to deny your request to direct brokerage.

**AGGREGATED TRADES**

Calamos, where permitted by its clients, seeks, but is not required, to aggregate ("bunch") client orders for all accounts under management – including Calamos’ proprietary accounts or accounts in which Calamos, its affiliates,
or their employees are beneficiaries. Aggregating or bunching orders for the same securities may be advantageous to clients because larger orders can have lower execution costs and reduce market impact.

All accounts participating in a bunched equity trade will typically receive the average price for all transactions executed for that order. For equity trades, all accounts share in the commission and other transactional costs on a pro rata basis. Fixed income and convertible trades are typically executed on a net basis – the dealers through whom Calamos executes client trades do not charge explicit commissions, or separately identifiable mark-ups and mark-downs, or spreads.

Portfolio management is primarily responsible for determining which accounts are eligible to be included in an aggregated order based upon whether the opportunity is consistent with the client’s guidelines and restrictions, the client has available securities or assets to participate and portfolio management otherwise believes the trade is appropriate for the client. Additionally, a client or account cannot participate in an aggregated order unless the client or account permits its orders to be bunched with those of other Calamos clients. Any portfolio management decision to exclude an account from an aggregated transaction must be consistent with Calamos’ fiduciary duty to the client.

To the extent trades in a security have not yet been completed, and subsequent orders are received, the trading desk will close out the trade that was in progress (and allocate pro-rata to the accounts on the ticket). The new, subsequent orders4 will be added to the unfilled orders remaining from the prior trade and a new trade will be sent to the market for execution.

A. Pre-execution Allocation Statement and Duty to Seek Best Execution

In general, the intended allocations to client accounts for each aggregated order must be documented prior to placement of such order. Portfolio management shall identify all Calamos clients intended to participate in a bunched order before the trade is sent to the trading desk for placement. Client identification is typically done on an individual basis, but for ease in administration, accounts may be identified by type or on a general basis when there are numerous accounts included in a bunched order (e.g., growth accounts).

B. Directed, Preferred and Restricted Accounts

A client’s brokerage arrangements can impact Calamos’ determinations as to whether it is appropriate to include the client’s account(s) in an aggregated order. Clients requesting or requiring Calamos to use a specified broker-dealer whose brokerage arrangements are such that clients are benefitted by trading with a specified broker (e.g., wrap and UMA clients), as well as those prohibiting trading with particular broker-dealers, may not be able to participate in an aggregated trade. These accounts will be included if the bunched trade is executed through such “directed” or “preferred” broker-dealer, or the trading desk is permitted by the directed or preferred broker-dealer to execute the transactions with other brokerage firms which then book the transaction directly with the directed broker (i.e., “trading away” or “step-out”). For [client] preferred brokers, where Calamos has discretion to trade away, Calamos will do so when an aggregated order is placed with a brokerage firm other than the “directed” or “preferred” broker-dealer, only if Calamos determines that, based on the overall circumstances, it is in the client’s interest and consistent with the client’s request to include the account in such aggregated order. Orders not bunched will be placed in the market after the aggregated trades are filled.

To avoid disadvantaging fully discretionary clients, restricted5 account transactions required to be executed separately are typically placed in the market after the aggregated transaction for other Calamos

---

4 Subsequent orders eligible for aggregation and for which such orders in the security would be appropriate in accordance with these policies and procedures.

5 A restricted account may also include an account that is liquidating or has investment prohibitions on certain individual securities.
clients is placed in the market and filled. As a result, a trade for a restricted account will be executed at a different point in time and price than the aggregated transaction.

C. **Account (or Portfolio) Trading for Cash Flows or Other Special Circumstances**

To accommodate a client’s cash contribution or redemption request, or request to manage the flow of cash in the client’s account (or portfolio), a trade or series of trades will generally be placed separately from aggregated trades for other Calamos clients involving the same security. Therefore, there will be time and price variances in comparison to the aggregated trade. The basis for excluding an account from an aggregated trade will be recorded on the trade ticket.

**ALLOCATION OF INVESTMENT OPPORTUNITIES**

When allocating investment opportunities among client accounts, Calamos seeks to treat clients fairly and equitably over time. Calamos has sought to design its policies and procedures to reasonably assure that no account for which Calamos has investment and brokerage discretion will systematically receive preferential treatment over any other discretionary account. Allocations of aggregated trades, particularly where trade orders were only partially completed due to limited availability (for example, initial public offerings), could raise a potential conflict of interest. To mitigate the potential conflicts between or among accounts in a strategy, portfolio management generally seeks to keep all client portfolios in the same strategy invested in the same securities with approximately the same weightings (subject to client-imposed restrictions and limitations). Nevertheless, investment opportunities may be allocated differently among accounts in a strategy due to the particular characteristics of an account, such as size of the account, cash position, tax status, risk tolerance, investment guidelines, objectives and restrictions, brokerage arrangements or for other reasons.

In addition, there are instances where a particular security is held by, or appropriate for, more than one investment strategy due to the overlap of their investment universes; however, investment decisions for each strategy are made by the relevant investment team independently of investment decisions for another strategy in light of differing considerations.

Aggregated trades are allocated to the participating accounts at average cost.

**Order Rotation**

Orders generally will be executed in the following order:

a. Discretionary orders, including Calamos Funds and accounts with:

   • a preferred broker where Calamos determines it to be in the best interest of the client to trade away from the preferred broker
   • a directed broker where trading away is permissible
   • directed brokerage if Calamos determines to trade its discretionary accounts through the directed broker; then

b. Directed or preferred brokerage to the extent not able to be executed with discretionary brokerage; then

c. Instructions are communicated to Model Portfolio [and other non-discretionary] clients.

Regarding Model Portfolios, Calamos will first implement investment recommendations for its discretionary accounts prior to communicating or delivering the Model Portfolio to the third-party program Sponsor. However, where a position has been partially implemented by Calamos in its discretionary accounts at the time of delivery of the Model Portfolio, such Model Portfolio will include that position(s) at the intended final weighting. As a result, any trades placed by the third-party Sponsor for its clients based on the Model Portfolio may receive prices that

---

6 However, if the directed broker allows Calamos to execute with other brokerage firms, which then book the transaction directly with the directed broker, the order may be placed as if the account had given Calamos full brokerage discretion. Similarly, preferred brokerage accounts will be aggregated with discretionary accounts where Calamos determines it to be in the client’s best interest to do so.
are different than the prices obtained by Calamos for its discretionary accounts (including directed or preferred accounts). Model Portfolio information is delivered based on an agreed upon schedule between Calamos and the third-party program Sponsor; provided that Calamos shall not be obligated to deliver a Model Portfolio at a specified date and/or time that would disadvantage or unfairly treat Calamos discretionary accounts.

**METHOD OF ALLOCATION**

**Equity Securities (other than IPOs)**

Generally, equity orders will first be placed for discretionary clients and all partial fills will be allocated on a pro-rata basis based upon the original trade order for each account at the end of each trading day unless deemed inappropriate by Calamos. Directed accounts and preferred brokerage accounts, except as otherwise set forth herein, will trade after all discretionary account orders are filled.

On a daily basis, a rotation schedule is set by the trading desk to establish the order in which directed and preferred accounts (including relevant separately managed wrap accounts) will be executed for that day. New orders will be filled based on the rotation set on the day the trade is received by the trading desk even if the execution takes several days to complete. Each day the rotation starts for that day’s trades with the next account on the list.7

**Equity Initial Public Offerings**

Calamos seeks to allocate IPOs among eligible accounts in a manner that is fair and equitable over time. Calamos seeks to allocate the purchase of the IPO on a pro-rata basis among accounts8 for which the IPO is appropriate and for which the client is permitted, under FINRA Rule 5130, to participate. Participation in IPOs shall take into account the following:

a. Portfolio management must indicate interest in an IPO prior to the pricing of the offering and identify those client accounts for which an allocation would be permissible and appropriate in light of the accounts’ investment policy statement or investment guidelines and restrictions, as applicable;

b. The ability to participate in the IPO shall be made to all portfolio management teams with sufficient time to determine client eligibility and suitability;

c. An account may not be included in the indication of interest for the IPO unless it has enough cash in the account to settle the transaction;

d. Allocations will generally be made on a pro-rata basis in proportion to assets under management among those accounts indicating an interest in the security; and

e. Calamos will oftentimes purchase an IPO within a strategy or account with the intent of selling the security the same day in order to realize a short-term profit (a “flip”). Accounts that are purchasing an IPO with the intention of investing will be fully allocated before any accounts in which Portfolio Management intends to flip the security.

**Convertible Securities**

Generally, all convertible security orders are aggregated, including directed and preferred (e.g., wrap) client account orders. If an order is partially filled, the securities will be allocated pro-rata across all accounts included on the order.

**Fixed Income Securities**

For fixed income securities, any bunched order that is not completely filled at the end of a trading day is allocated pro-rata and incorporates the de minimis and rounding requirements described below. In determining whether to

---

7 For equity securities traded for directed or preferred brokerage accounts, Calamos will use a rotation schedule allocating securities on a pre-determined order of priority until the entire order has been allocated. For the next partial fill order, the Firm will begin with the next account where it left off.

8 Wrap accounts do not participate in IPOs.
make a pro-rata allocation, Calamos considers account specific factors; e.g. account minimums. This determination is made prior to adding the account to the trade ticket. The allocation is made pro-rata by account, based upon the original trade order for each account.

For new issues (like IPOs), accounts that seek bonds for investment purposes will be allocated bonds before accounts that seek bonds to “flip” or sell the security the same day in order to realize a short-term profit as identified by the portfolio manager on the trade request ticket.

- De minimis - as noted above, when Calamos receives bond allocations smaller than the allocations needed to fill client orders, the allocation will generally be made pro-rata based upon the original trade order for each account. An effort will be made to keep the blocks of bonds in marketable sizes while also considering client specific minimums.
- Rounding - is generally carried out in increments of five bonds.

Exceptions to Allocations

The allocation methodology may be modified when strict adherence to the methodology is impractical or would result in an inefficient or undesirable outcome in the view of portfolio management or the Head Trader. Circumstances where this may be the case, include:

- Where allocations to Calamos are small, Calamos may determine to allocate such securities to one or more accounts for which the allocations would be meaningful. Calamos will monitor such variations of or exceptions to the allocation methodology to ensure all clients are treated fairly and equitably over time;
- Pro-rate amount does not meet the account minimum;
- The client would receive an unmarketable amount of securities based on account size;
- Error (e.g. portfolio manager erroneously included an account to the allocation9); or
- Instrument typically trades in standard round lot size;
- Counterparty specifies a minimum lot size.

The fact that an allocation has been modified and the basis for modifying an allocation will be disclosed within Chares River Development (“CRD”) on the trade ticket. The Head Trader must approve each instance that the allocation methodology is not followed and report these monthly to the Chief Compliance Officer.

With respect to allocations to accounts within a wrap or directed brokerage arrangement, not otherwise aggregated with discretionary accounts, the wrap program Sponsor or directed broker may implement its own allocation methodology.

Item 13: Review of Accounts

Our investment team regularly monitors client accounts for consistency with client objectives and restrictions. Our Portfolio Administrators perform a periodic review of each client account. In these reviews, positions in client accounts are compared to the weights in the appropriate investment strategy model.

Calamos issues periodic written reports to its investment advisory clients. These written reports generally contain a list of assets, investment results, and statistical data related to the client’s account. We urge clients to carefully review these reports on a timely basis and compare the statements that they receive from their independent qualified custodian to the reports that we provide. The information in our reports may vary from custodial

---

9 On trade date, to the extent there was an error in allocation resulting in a client not participating in an allocation, the excess shares or bonds will be allocated among the remaining clients on the trade, unless doing so would be inconsistent with a client’s investment objectives or restrictions [or is deemed by the portfolio manager to be inadvisable]. If the error is discovered after trade date, it is treated as a trade error and handled in accordance with the Trade Error Policy.
statements based on accounting procedures, reporting dates or valuation methodologies of certain securities. We encourage you to follow up with us, as well as the custodian, for your account to understand any differences.

Because Calamos, not the custodian, calculates the amount of the advisory fees for your assets under management with us, it is important you carefully review your custodial statements to verify the accuracy of the calculation, among other things. Clients should contact Calamos directly if they believe that there may be an error in the calculation of their fees.

**Item 14: Client Referrals and Other Compensation**

Calamos does not receive an economic benefit from anyone other than its clients.

Calamos and its affiliates may enter into Referral Agreements with a solicitor such as a broker-dealer or an investment adviser. Calamos or its affiliates generally pay the solicitor a percentage of the management fee and/or performance based fee collected from the client. Regardless of how it is calculated, any such referral fee will be paid solely from Calamos’ investment management fee, and will not result in any additional charge to the client. See Item 5 for additional information on advisory fees.

Calamos has entered into arrangements with unaffiliated third parties for their assistance in referring business to Calamos or advising Calamos with respect to the expansion of the firm’s distribution of products or services in various U.S. and non-U.S. markets and distribution channels. Calamos may pay cash compensation under these arrangements based on a monthly flat fee as well as, in the sole discretion of the firm, a bonus at the conclusion of the arrangements. The fees paid to the unaffiliated third party are not passed on to any introduced clients, but the presence of these arrangements may affect Calamos’ willingness to negotiate below its standard investment advisory fees and, therefore, may affect the overall fees paid by referred clients.

The firm has in place a solicitor agreement with its affiliated limited purpose broker-dealer, CFS. The referral fees paid are equal to an estimate of the expenses incurred by the solicitor to obtain such business. Any such arrangements will comply with Rule 206(4)-3 under the Investment Advisers Act of 1940, as amended.

**Item 15: Custody**

Calamos serves as General Partner and investment adviser to Calamos Global Opportunities Fund Limited Partnership as well as Ares Quant Fund I, LP. As such, we are deemed to have custody of the assets invested in these funds. The funds’ financials are audited by an independent public accounting firm and are issued to investors within 120 days of the fiscal year end. (As noted above, the Ares Quant Fund I, LP is not currently offered to investors.)

Calamos does not maintain physical custody of its clients’ assets. Rather, as discussed previously, you must establish a custody account with an unaffiliated custodian. You should receive quarterly or monthly account statements from the broker-dealer, bank or financial services firm that serves as qualified custodian to your account. Clients should carefully review these statements. Clients who do not receive such account statements are encouraged to follow-up directly with their custodian and request such statements.

To the extent a client receives additional reports from Calamos, they are urged to compare these reports to the account statements they receive from the qualified custodian. Calamos’ reports may vary from custodial statements based on accounting procedures, reporting dates, valuation methodologies and other factors. Calamos’ reports are not intended to be a substitute for account statements provided by a qualified custodian, and should not be used for official purposes.

**Item 16: Investment Discretion**

As noted in Item 4, Calamos accepts discretionary authority, via the Investment Management Agreement or other Power of Attorney, to manage the assets in the client’s account. Calamos endeavors to follow reasonable directions, investment guidelines and limitations. This discretionary authority will remain in full force and effect...
until we receive written notice from you of its termination or until we receive actual notice of your death or adjudged incompetency.

**Item 17: Voting Client Securities**

**Proxy Voting**

Calamos votes proxies on behalf of its clients’ accounts in accordance with its procedures and solely in the best interest of our clients.

As an investment adviser that exercises proxy-voting authority over client securities, Calamos has a fiduciary duty to vote proxies in a timely manner and make voting decisions that are in our clients’ best interests. We recognize that there will be potential conflicts of interest when we vote a proxy on behalf of clients. We have adopted a detailed policy statement that addresses and describes the steps we take to mitigate conflicts when voting proxies.

Calamos subscribes to an unaffiliated third-party corporate proxy research service that provides:

- in-depth analyses of shareholder meeting agendas;
- vote recommendations;
- record keeping;
- voting;
- administration;
- reporting; and
- vote disclosure services.

In addition, this service facilitates the voting of each proxy in accordance with our proxy voting policy. The proxy group is responsible for maintaining oversight of all facets of the processes described above.

Material conflicts of interest are identified based upon analyses of client, broker and vendor lists, information periodically gathered from directors and officers and information derived from other sources, including public filings. All conflicts of interest will be resolved in the interests of Calamos’ advisory clients.

In situations where a material conflict of interest is identified, the proxy group will refer the matter, along with the recommended course of action by Calamos, if any, to a Proxy Review Committee comprised of representatives from Portfolio Management (which may include portfolio managers and/or research analysts employed by Calamos) and Operations, and, in an advisory capacity, representatives of the Legal and Compliance departments within Calamos for evaluation and voting instructions. The Proxy Review Committee may defer to the voting recommendation of its proxy voting service, or those of another independent third party provider of proxy services, or send the proxy directly to the relevant advisory clients with a recommendation regarding the vote for approval.

The Proxy Review Committee will independently review proxies that are identified as presenting material conflicts of interest; determine the appropriate action to be taken in such situations; report the results of such votes to Calamos’ clients as may be requested; and recommend changes to the Proxy Voting Policies and Procedures, as appropriate.

The Proxy Review Committee will also decide whether to vote proxies for securities deemed to present conflicts of interest that are sold following a record date, but before a shareholder meeting date. The Proxy Review Committee may consider various factors in deciding whether to vote such proxies, including Calamos' long-term view of the issuer’s securities for investment, or it may defer the decision to vote to the applicable advisory client.

There may be some instances when Calamos believes its client’s best interest is served by abstaining or not voting certain proxies. Additional information is provided in the procedures. Clients may obtain a copy of our procedures by contacting us at caminfo@calamos.com, or by calling us at 800-582-6959.
You, the client, reserve the right to vote the proxies on your account(s) and you may do so by sending your custodian and Calamos a written request to update the proxy instructions on your account.

Calamos will not advise and will not act on a client’s behalf in legal proceedings involving companies whose securities you hold in your account(s). This includes the filing of "Proofs of Claim" in class action settlements. Clients may direct us to transmit copies of class action notices to them or to a third party. We will make commercially reasonable efforts to forward such notices in a timely manner.

Calamos is not responsible for voting proxies we do not receive. However, we will make reasonable efforts to obtain missing proxies. Clients may request information on how proxies for his/her shares were voted by writing us at caminfo@calamos.com.

Item 18: Financial Information

Calamos has no known financial commitment that impairs our ability to meet contractual and fiduciary commitments to our clients. In addition, we have never been the subject of a bankruptcy proceeding.
This brochure supplement provides information about supervised persons of Calamos Advisors LLC listed above that supplements the Calamos Advisors LLC brochure. You should have received a copy of that brochure. Please contact a customer service representative at 1.800.582.6959 if you did not receive a copy of Calamos Advisors’ brochure or if you have questions about the contents of this supplement. Additional information about certain of these supervised persons is available on the SEC’s website at www.adviserinfo.sec.gov. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.
JOHN P. CALAMOS, SR.

Item 2 – Educational Background and Business Experience

Year of birth: 1940

Formal education after high school: Mr. Calamos received his B.S. in Economics (1963) and a M.B.A. in Finance (1970) from the Illinois Institute of Technology.

Business background: John P. Calamos, Sr. founded Calamos Investments in 1977 and is its Chairman and Global Chief Investment Officer.

Professional designations: Mr. Calamos holds the following FINRA registrations: Series 4, 7, 24, 27, 52, 53, 63, and 65.

Item 3 – Disciplinary Information

Calamos is required to disclose all material facts regarding certain legal or disciplinary events that would materially impact a client’s evaluation of Mr. Calamos. No events have occurred that are applicable to this item.

Item 4 – Other Business Activities

Mr. Calamos is the Chairman and Global Chief Investment Officer for Calamos Investments LLC (“CILLC”) and its subsidiaries. In addition, Mr. Calamos is (i) a shareholder, director and officer of Calamos Family Partners, Inc., which is a holding company owned by members of the Calamos family; (ii) a member of Calamos Partners LLC, a holding company owning CILLC and Calamos Asset Management, Inc.; (iii) a member and officer of Calamos Property Holdings LLC, and its subsidiaries, which manage real estate and hospitality businesses.

Item 5 – Additional Compensation

Mr. Calamos does not receive economic benefits for providing advisory services, other than the regular salary paid by Calamos Advisors LLC, a bonus paid in cash and LTI awards which are discretionary and not guaranteed from year to year. Mr. Calamos is subject to policies that prohibit the acceptance of gifts and entertainment that may influence the nature of the investment advice provided to clients. Consistent with these policies, he is permitted to receive gifts of up to $100, per giver, per year.

Item 6 – Supervision

Calamos uses a team approach in managing client accounts. As Global Chief Investment Officer and a senior member of the investment management team, Mr. Calamos indirectly gives financial advice to clients by participating in the security selection process for all of our accounts. Mr. Calamos is supervised by John Koudounis, Chief Executive Officer, who can be reached at 630.245.1055.
JOHN CALAMOS, JR.

Item 2 – Educational Background and Business Experience

Year of birth: 1963

Formal education after high school: Mr. Calamos received his B.A. from Drake University (1986) and an M.B.A. from Benedictine University (2001).

Business background:

2013 to Present: Senior Vice President, Co-Portfolio Manager - Calamos
2010 to 2013: Executive Vice President, Senior Strategy/Sector Analyst – Calamos
2010 to 2010: Executive Vice President, Senior Strategy Analyst – Calamos
2002 to 2010: Executive Vice President – Calamos
1985 to 2002: Vice President, Senior Strategy Analyst - Calamos

Professional designations: Mr. Calamos holds the following FINRA registrations: Series 7 and 63.

Item 3 – Disciplinary Information

Calamos is required to disclose all material facts regarding certain legal or disciplinary events that would materially impact a client’s evaluation of Mr. Calamos. No events have occurred that are applicable to this item.

Item 4 – Other Business Activities

Calamos is required to disclose any investment-related business or occupation or outside business activity or occupation for compensation that could potentially create a conflict of interest with clients. Mr. Calamos is a partner with Calamos Family Partners, Inc. (“CFP”), which is a private holding company owned by members of the Calamos family. CFP is the majority owner of Calamos Advisors LLC, Calamos Wealth Management LLC and Calamos Property Management LLC.

Item 5 – Additional Compensation

Mr. Calamos does not receive economic benefits for providing advisory services, other than the regular salary paid by Calamos Advisors LLC, a discretionary bonus paid in cash and LTI awards which are discretionary and not guaranteed from year to year. Mr. Calamos is subject to policies that prohibit the acceptance of gifts and entertainment that may influence the nature of the investment advice provided to clients. Consistent with these policies, he is permitted to receive gifts of up to $100, per giver, per year.

Item 6 – Supervision

Calamos uses a team approach in managing client accounts. As a senior member of the investment management team, Mr. Calamos indirectly gives financial advice to clients by participating in the security selection process for all of our accounts. Mr. Calamos is supervised by John P. Calamos, Sr., Chairman and Global Chief Investment Officer, who can be reached at 1.800.582.6959.
DENNIS COGAN, CFA®

Item 2 – Educational Background and Business Experience

Year of birth: 1978

Formal education after high school: Dennis Cogan received his B.S. in Finance from Northern Illinois University (2000).

Business background:

2014 to Present: Senior Vice President, Co-Portfolio Manager – Calamos
2013 to 2014: Vice President, Co-Portfolio Manager – Calamos
2011 to 2013: Vice President, Senior Sector Analyst/Strategy Analyst – Calamos
2007 to 2011: Research Analyst/Strategy Analyst – Calamos
2005 to 2007: Research Associate/Strategy Associate – Calamos

Professional designations: Mr. Cogan is a CFA® charterholder.

Item 3 – Disciplinary Information

Calamos is required to disclose all material facts regarding certain legal or disciplinary events that would materially impact a client’s evaluation of Mr. Cogan. No events have occurred that are applicable to this item.

Item 4 – Other Business Activities

Calamos is required to disclose any investment-related business or occupation or outside business activity or occupation for compensation that could potentially create a conflict of interest with clients. Mr. Cogan is not actively engaged in any such activities.

Item 5 – Additional Compensation

Mr. Cogan does not receive economic benefits for providing advisory services, other than the regular salary paid by Calamos Advisors LLC, a discretionary bonus paid in cash and LTI awards which are discretionary and not guaranteed from year to year. Mr. Cogan is subject to policies that prohibit the acceptance of gifts and entertainment that may influence the nature of the investment advice provided to clients. Consistent with these policies, he is permitted to receive gifts of up to $100, per giver, per year.

Item 6 – Supervision

Calamos uses a team approach in managing client accounts. As a senior member of the investment management team, Mr. Cogan indirectly gives financial advice to clients by participating in the security selection process for all of our accounts. Mr. Cogan is supervised by Nick Niziolek, Co-CIO, Head of Global Strategies and Senior Co-Portfolio Manager, who can be reached at 1.800.582.6959.
R. MATTHEW FREUND, CFA®

Item 2 – Educational Background and Business Experience

Year of birth: 1963

Business background:

2019 to Present: Co-CIO, Head of Fixed Income Strategies, and Senior Co-Portfolio Manager - Calamos

2016 to 2019: Co-CIO, Senior Co-Portfolio Manager, Head of Fixed Income Strategies - Calamos

2010 to 2016: Chief Investment Officer, USAA Investments – USAA

1999 to 2016: Portfolio Manager USAA High Income Fund – USAA

1994 to 1999: Director of Fixed Income Research – USAA

1985 to 1987: Audit Senior – Arthur Young

Professional designations: Mr. Freund is a CFA® charterholder.

Item 3 – Disciplinary Information

Calamos is required to disclose all material facts regarding certain legal or disciplinary events that would materially impact a client’s evaluation of Mr. Freund. No events have occurred that are applicable to this item.

Item 4 – Other Business Activities

Calamos is required to disclose any investment-related business or occupation or outside business activity or occupation for compensation that could potentially create a conflict of interest with clients. Mr. Freund is not actively engaged in any such activities.

Item 5 – Additional Compensation

Mr. Freund does not receive economic benefits for providing advisory services, other than the regular salary paid by Calamos Advisors LLC, a discretionary bonus paid in cash and LTI awards which are discretionary and not guaranteed from year to year. Mr. Freund is subject to policies that prohibit the acceptance of gifts and entertainment that may influence the nature of the investment advice provided to clients. Consistent with these policies, he is permitted to receive gifts of up to $100, per giver, per year.

Item 6 – Supervision

Calamos uses a team approach in managing client accounts. As Co-Chief Investment Officer and senior member of the investment management team, Mr. Freund indirectly gives financial advice to clients by participating in the security selection process for all of our accounts. Mr. Freund is supervised by John Calamos, Sr., Chairman and Global Chief Investment Officer and John Koudounis, Chief Executive Officer, who can be reached at 1.800.582.6959
Item 2 – Educational Background and Business Experience

Year of birth: 1964

Formal education after high school: Mr. Grant received his Bachelor of Commerce in Finance and Economics from the University of Alberta, Canada (1986) and a Master of Science in International History from the London School of Economics and Political Science (1995).

Business background:

2017 to Present: Co-CIO, Head of Long/Short and Growth Strategies - Calamos
2015 to 2017: Senior Vice President, Global Economist and Senior Co-Portfolio Manager – Calamos
2002 to 2015: Chief Investment Officer – Phineus Partners, L.P.
1990 to 2002: Managing Director – Schroder Investment Management (London, Hong Kong, San Francisco)
1987 to 1989: Portfolio Manager – National Investment Trust Co. (Taiwan)
1985 to 1987: U.S. Equity Analyst – Principal Group (Canada)

Professional designations: Mr. Grant holds the following FINRA registrations: Series 65.

Item 3 – Disciplinary Information

Calamos is required to disclose all material facts regarding certain legal or disciplinary events that would materially impact a client’s evaluation of Mr. Grant. No events have occurred that are applicable to this item.

Item 4 – Other Business Activities

Calamos is required to disclose any investment-related business or occupation or outside business activity or occupation for compensation that could potentially create a conflict of interest with clients. Mr. Grant is not actively engaged in any such activities.

Item 5 – Additional Compensation

Mr. Grant does derive some economic benefit by providing advisory services to affiliates. Mr. Grant receives a regular salary paid by Calamos Advisors LLC, a discretionary bonus paid in cash and LTI awards which are discretionary and not guaranteed from year to year. Additionally, Mr. Grant may earn bonus payments related to the asset levels within the Calamos Phineus Long/Short Fund. The existence of these payments could create a conflict of interest with regard to Mr. Grant’s allocation of investment opportunities among the accounts for which he acts as portfolio manager. Calamos Advisors has in place policies and procedures reasonably designed to mitigate such conflicts of interest. Mr. Grant is subject to policies that prohibit the acceptance of gifts and entertainment that may influence the nature of the investment advice provided to clients. Consistent with these policies, he is permitted to receive gifts of up to $100, per giver, per year.

Item 6 – Supervision

Calamos uses a team approach in managing client accounts. As a senior member of the investment management team, Mr. Grant indirectly gives financial advice to clients by participating in the security selection process for all of our accounts. Mr. Grant is supervised by John P. Calamos, Sr., Chairman and Global Chief Investment Officer, who can be reached at 1.800.582.6959.
JASON HILL

Item 2 – Educational Background and Business Experience

Year of birth: 1979

Formal education after high school: Mr. Hill received his B.A. in Finance from North Central College (2001) and a M.S. in Finance from DePaul University (2011).

Business background:

2015 to Present: Senior Vice President, Co-Portfolio Manager - Calamos
2014 to 2015: Vice President, Co-Portfolio Manager - Calamos
2013 to 2014: Associate Vice President, Senior Research Analyst - Calamos
2013 to 2007: Research Analyst - Calamos
2007 to 2004: Portfolio Administrator - Calamos

Item 3 – Disciplinary Information

Calamos is required to disclose all material facts regarding certain legal or disciplinary events that would materially impact a client’s evaluation of Mr. Hill. No events have occurred that are applicable to this item.

Item 4 – Other Business Activities

Calamos is required to disclose any investment-related business or occupation or outside business activity or occupation for compensation that could potentially create a conflict of interest with clients. Mr. Hill is not actively engaged in any such activities.

Item 5 – Additional Compensation

Mr. Hill does not receive economic benefits for providing advisory services, other than the regular salary paid by Calamos Advisors LLC, a discretionary bonus paid in cash and LTI awards which are discretionary and not guaranteed from year to year. Mr. Hill is subject to policies that prohibit the acceptance of gifts and entertainment that may influence the nature of the investment advice provided to clients. Consistent with these policies, he is permitted to receive gifts of up to $100, per giver, per year.

Item 6 – Supervision

Calamos uses a team approach in managing client accounts. As a senior member of the investment management team, Mr. Hill indirectly gives financial advice to clients by participating in the security selection process for all of our accounts. Mr. Hill is supervised by Eli Pars, Co-CIO, Head of Alternative Strategies and Co-Head of Convertible Strategies, who can be reached at 1.800.582.6959.
JOHN HILLENBRAND, CPA

2015 to 2020: Senior Sector Analyst - Calamos
2005 to 2015: Research Analyst – Phineus Partners’ Voyager Funds
2001 to 2003: Principal – Soundview Technology Group
2000 to 2001: Vice President – Soundview Technology Group
1999 to 2000: Associate Analyst – Soundview Technology Group

Item 3 – Disciplinary Information

Calamos is required to disclose all material facts regarding certain legal or disciplinary events that would materially impact a client’s evaluation of Mr. Ingalls. No events have occurred that are applicable to this item.

Item 4 – Other Business Activities

Calamos is required to disclose any investment-related business or occupation or outside business activity or occupation for compensation that could potentially create a conflict of interest with clients. Mr. Ingalls is not actively engaged in any such activities.

Item 5 – Additional Compensation

Mr. Ingalls does not receive economic benefits for providing advisory services, other than the regular salary paid by Calamos Advisors LLC, a discretionary bonus paid in cash and LTI awards which are discretionary and not guaranteed from year to year. Mr. Ingalls is subject to policies that prohibit the acceptance of gifts and entertainment that may influence the nature of the investment advice provided to clients. Consistent with these policies, he is permitted to receive gifts of up to $100, per giver, per year.

Item 6 – Supervision

Calamos uses a team approach in managing client accounts. As a senior member of the investment management team, Mr. Ingalls indirectly gives financial advice to clients by participating in the security selection process for all of our accounts. Mr. Ingalls is supervised by Michael Grant, Co-CIO, Head of Long/Short Strategies and Growth Strategies, who can be reached at 1.630.245.1613.
BRANDON NELSON, CFA®

Item 2 – Educational Background and Business Experience

Year of birth: 1971

Formal education after high school: Graduated from the University of Wisconsin-Madison with his B.B.A. and master’s degree in Finance.

Business background:
- 2019 to Present: SVP, Senior Portfolio Manager – Calamos
- 2008 to 2019: Chief Investment Officer and Portfolio Manager – Timpani Capital Management
- 2005 to 2008: Managing Director and Senior Portfolio Manager – Wells Capital Management

Professional designations: Mr. Nelson is a Certified Financial Analyst (CFA®).

Item 3 – Disciplinary Information

Calamos is required to disclose all material facts regarding certain legal or disciplinary events that would materially impact a client’s evaluation of Mr. Nelson. No events have occurred that are applicable to this item.

Item 4 – Other Business Activities

Calamos is required to disclose any investment-related business or occupation or outside business activity or occupation for compensation that could potentially create a conflict of interest with clients. Mr. Nelson is not actively engaged in any such activities.

Item 5 – Additional Compensation

Mr. Nelson does derive some economic benefit by providing advisory services to affiliates. Mr. Nelson receives a regular salary paid by Calamos Advisors LLC, a discretionary bonus paid in cash and LTI awards which are discretionary and not guaranteed from year to year. Additionally, Mr. Nelson is eligible to receive certain “Timpani Team Revenue” Share payments, which are defined as a percentage of management fees over certain thresholds. Mr. Nelson is subject to policies that prohibit the acceptance of gifts and entertainment that may influence the nature of the investment advice provided to clients. Consistent with these policies, he is permitted to receive gifts of up to $100, per giver, per year.

PROFESSIONAL DESIGNATION QUALIFICATIONS

This summary of Professional Designation Qualifications is provided to assist you in evaluating the professional designations and minimum requirements of our investment professionals to hold these designations. “Understanding Professional Designations” may also be helpful and found on the FINRA website at: http://apps.finra.org/DataDirectory/1/prodesignations.aspx

Chartered Financial Analyst (CFA®)

The Chartered Financial Analyst (CFA®) charter is a professional designation established in 1962 and awarded by CFA® Institute. To earn the CFA® charter, candidates must pass three sequential, six-hour examinations over two to four years. The three levels of the CFA Program test a wide range of investment topics, including ethical and professional standards, fixed-income analysis, alternative and derivative investments, and portfolio management and wealth planning. In addition, candidates must have at least four years of acceptable professional experience in the investment decision-making process and must commit to abide by, and annually reaffirm, their adherence to the CFA® Institute Code of Ethics and Standards of Professional Conduct.

Chartered Alternative Investment Analyst (CAIA®)

The CAIA® curriculum places an emphasis on foundations and addresses issues such as due diligence, portfolio management, risk management, and portfolio monitoring. Ethics and professional codes of conduct are the cornerstones of the program. The right to use the CAIA® designation is earned by successfully completing the CAIA® program (passing both the Level I and Level II exams) and becoming a member of the CAIA® Association. To qualify for membership in the Association, a candidate must pass both the CAIA® Level I and Level II exams, hold a U.S. bachelor’s degree or the equivalent, and have more than one year of professional experience or alternatively have at least four years of professional experience (professional experience is defined as full-time employment in a professional capacity within the regulatory, banking, financial, or related fields), submit payment for the annual CAIA® Association membership fee and agree on an annual basis to abide by the Member Agreement.

Certified Public Accountant (CPA)

CPAs are licensed and regulated by their state boards of accountancy. While state laws and regulations vary, the education, experience and testing requirements for licensure as a CPA generally include minimum college education (typically 150 credit hours with at least a baccalaureate degree and a concentration in accounting), minimum experience levels (most states require at least one year of experience providing services that involve the use of accounting, attest, compilation, management advisory, financial advisory, tax or consulting skills, all of which must be achieved under the supervision of or verification by a CPA), and successful passage of the Uniform CPA Examination.
At Calamos Investments, we are committed to conducting ourselves with total integrity and to the highest standards of prudent business practice. Your financial privacy is an important part of these activities. Our Privacy Policy outlines the steps we take to protect your personal information. Preserving your trust and confidence reflects our dedication to maintaining long-term client relationships.

Why It Is Important We Share Our Privacy Policy
We believe that maintaining the privacy of your personal financial information is an essential piece of the service that we provide. This Privacy Policy explains how Calamos Investments handles your personal financial information, and the procedures that we follow to ensure your privacy.

What Types of Personal Information Does Calamos Investments Collect?
We collect information about you to help serve your financial needs, provide customer service, and fulfill various legal and regulatory requirements. The type of information that we collect from you will vary based upon the product or service that we provide, and may include:

> Information included on applications, questionnaires, new account forms and other related forms such as your name, address, Social Security number, assets and income;
> Information about your transactions with us such as purchases, sales, account balances, and bank account information;
> Information provided or captured on our website; including any information captured on our website through the use of “cookies”.

How Does Calamos Investments Share Your Information?
First and foremost, Calamos Investments does not sell lists of client information, nor do we disclose client information to marketing companies, with the exception of companies we may hire to provide specific services for us, as described below. We do not disclose any of the information described above to anyone, except as provided by law. Specifically, Calamos Investments may share non-public personal information with our affiliates in the course of processing transactions, managing accounts on your behalf, or to inform you of products or services that we believe may be of interest to you. Additionally, we may share non-public personal information with the following types of third parties:

> Our financial service providers such as custodians and transfer agents; and
> Non-financial companies under servicing or joint marketing agreements, such as printing firms and mailing firms that may assist us in the distribution of investor materials.

In all cases, your information is strictly protected. These third parties are bound by law or by contract to use your information only for the services for which we hired them, and are not permitted to use or share this information for any other purpose. This policy applies to current and former clients. If you access our services or products through another financial intermediary, such as a wrap fee sponsor, your intermediary’s policy will govern how it uses your personal information.
Your Right to Opt Out

Calamos Investments does not sell or distribute non-public information to third parties, except as provided above. If, in the future, our policies were to change, you would be notified and provided an opportunity to opt out of our disclosing that information. That is, you could tell us not to disclose the information to any other person or entity.

Calamos Investments does not discriminate against clients who exercise any privacy rights, nor do we discriminate in responding to client requests for access to or deletion of their personal information.

How We Keep Your Information Secure and Confidential

In order to further protect you, Calamos Investments maintains strict internal security measures. We restrict access to your personal and account information to those employees who need to know that information to service your account. We also maintain physical, electronic and procedural safeguards that comply with industry standards to guard our non-public personal information.

To protect your accounts online, encryption technology (Secure Sockets Layer) is used to prevent unauthorized access. Before accessing your accounts online, you are required to provide verification of who you are and a password/PIN number. We request your help in this process by keeping your identification information and password/PIN number private and restricting access to your personal computer.

As a client of Calamos Investments, you can rely on our commitment to protect your personal information and privacy.
