

Trades Not Executed by Morgan Stanley and Potential Costs That May Be Incurred

Morgan Stanley Smith Barney LLC ("Morgan Stanley"), acting as overlay manager, and Executing Sub-Managers participating in some of Morgan Stanley's Separately Managed Account ("SMA") manager programs (together, the "Managers") have the authority to effect transactions through broker-dealers other than us or our affiliates when the Manager reasonably believes that such other broker-dealer may effect such transactions at a price, including any mark-ups or mark-downs and/or other fees and charges, that is more favorable to the account than would be the case if transacted through us or our affiliates. Such programs include Consulting and Evaluation Services, Select UMA, and institutional services programs. In addition, even if the price is not more favorable for such broker-dealer, the Manager may consider other factors, including execution capabilities, speed, efficiency, confidentiality, familiarity with potential purchasers or sellers, or any other relevant matters.

Managers may aggregate the securities to buy or sell for more than one client to obtain favorable execution to the extent permitted by law. The Manager is then responsible for allocating the trade in a manner that is equitable and consistent with its fiduciary duty to its clients (which could include, e.g., pro rata allocation, random allocation or rotation allocation). For block trade orders, the price to each client is the average price for the aggregate order.

We refer to trades on which we are not the executing broker as "step-out trades." If your Manager trades with another firm, you may be assessed other trading related costs (mark-ups, mark-downs and/or other fees and charges) by the other broker-dealer. Those costs are in addition to the program fees applicable to Morgan Stanley's SMA manager programs, will be included in the net price of the security, and will not be reflected as a separate charge on your trade confirmations or account statements. There are certain Managers (including, but not limited to, Managers offering municipal, corporate and convertible fixed income strategies) that have historically directed most, if not all, of their trades to outside broker-dealers. Any additional trading costs from step-out trades may increase your overall costs.

For the Consulting and Evaluation Services and Select UMA manager implemented strategies (generally, fixed income and balanced) and institutional services programs, the Managers (and not Morgan Stanley) have discretion over broker-dealer selection and execution, and are responsible for meeting best execution obligations to program participants. Before selecting a Manager for any of Morgan Stanley's SMA manager programs identified above where the Manager has the authority to trade away from Morgan Stanley, you should carefully review all material related to that Manager, including the step-out trade information from each such Manager. Individual client account percentages may vary from the Manager strategy percentage listed below. The information is for calendar year 2021 and has not been independently verified by Morgan Stanley. Neither the Managers nor Morgan Stanley can represent that past step-out trading practices are indicative of current or future practices.

For information about costs incurred, please contact your Financial Advisor/Private Wealth Advisor (FA/PWA). If the Manager you have selected or are considering is not listed below, or if that Manager has not provided Step-Out information, please contact your FA/PWA for more information. The information provided by the Managers is summarized below. For more detailed information on trading (including related costs), please refer to the ADV Brochure for the program(s) and/or Manager(s) you are utilizing, which is available at www.morganstanley.com/ADV and from your FA/PWA.

Responses received through May 31, 2022.
